2022 SRF Lightning Complex Fire Weather Forecast

FORECAST NO: 32
PREDICTION FOR: 0700 Fri - 0700 Sat
SHIFT DATE: Sept 9th – Sept 10th, 2022

NAME OF FIRE: 2022 SRF Lightning Complex
SHIFT UNIT: CA-SRF
SIGNED: Tom Lonka - IMET (910) 920-7865

FORECAST ISSUED: 1800 Thursday, September 8th, 2022

...EXCESSIVE HEAT WARNING...

WEATHER DISCUSSION: The intense and dangerous heat will peak today, with slightly improved conditions Saturday, then much cooler and higher humidities next week as a Pacific air mass replaces the record hot high pressure area. Very hot temperatures into the 100's are expected in the lower and middle elevations, with only slightly cooler in the 90s above 4,000 ft. Very low RH values in the 10-20% range this afternoon. Light easterly to southeasterly flow in the morning will become northwesterly after 1400, though light in the 4-7 mph range, with gusts 10-14 mph on the higher ridges and slopes. Poor RH recoveries expected once again with readings only 20-30% in the higher terrain, and 30-70% in the lower slopes below 3,500 ft.

WEATHER FORECAST FOR TODAY (FRIDAY):

WEATHER: Sunny, but areas of smoke early, partially mixing out after 1400.

MAX TEMPERATURES: 91 - 97 degrees upper slopes and ridges. **24 HR Trend:** Up 3-5 degrees.
101 - 106 degrees lower slopes and drainages. **24 HR Trend:** Up 3-5 degrees.

MINIMUM HUMIDITY: 12 - 18% upper slopes and ridges. **24 HR Trend** Down 3-5%.
10 - 17% lower slopes and drainages. **24 HR Trend** Down 4-6%.

20-FOOT WIND:

SLOPE/VALLEY - Light east/downslope breeze, becoming NW or upslope 3-5 mph, gusts to 9 mph after 1500 PDT.

RIDGETOP - Light southeast breeze, becoming NW 4-6 mph with gusts 8 to 13 mph after 1500 PDT.

INVERSIONS/STABILITY: Moderate inversion around 1500 feet partially mixing out around 1400 hours.

SMOKE TRANSPORT WIND: South around 5 mph.

WEATHER FORECAST FOR TONIGHT (FRIDAY NIGHT):

WEATHER: Haze through sunset then smoke settling across the fire overnight and ICP toward morning.

MINIMUM TEMPERATURES: 70-75 thermal belts above 3500 ft. 63-68 lower slopes. **24 HR Trend:** No significant change.

MAXIMUM HUMIDITY: 20-40% mid and upper slopes. 30-70% lower slopes. **24 HR Trend:** No significant change.

20-FOOT WIND:

SLOPE/VALLEY – NW to N or upslope winds 3-5 mph, diminishing to E or downslope 2-4 mph after 2200.

RIDGETOP – NW 4-6 mph with gusts up to 10 mph through 2100, becoming southeast 4-6 mph late.

INVERSIONS/STABILITY: Smoke settling over the fire and ICP with a moderate nighttime inversion around 2000 ft.

EXTENDED FORECAST SATURDAY - MONDAY: One last day of hot and dry weather Saturday, though somewhat cooler than Friday as increasing clouds are expected by afternoon. Southeast to south winds may gust up to 15 to 20 mph on ridgetops on Saturday, before diminishing later in the afternoon. Cooler conditions expected on Sunday, and then cooler still Monday through much of next week as a Pacific air mass moves in with much higher humidities.

PORTABLE WEATHER STATIONS:

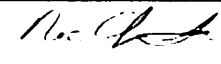

Division N/R near Denny Road: Frequency 163.350 DTMF Tone 0059

Division W near Friday Ridge: Frequency 163.350 DTMF Tone 0060

Division N/R/U east of Elbow Dip: Frequency 163.350 DTMF Tone 0002

Division G near Branch I Contingency Line: Frequency 163.350 DTMF Tone 0003

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 34	TYPE OF FIRE: Wildfire
FIRE NAME: SRF Lightning CA-SRF-00620	OPERATIONAL PERIOD: 09/09/2022 (0700-0700)
DATE ISSUED: 09/08/2022	TIME ISSUED: 1800
UNIT: Six Rivers National Forest	SIGNED:  Typed/printed: Nic Elmquist (FBAN)

INPUTS

WEATHER SUMMARY: ** See Fire Weather Forecast**

Weather: The intense and dangerous heat will peak today, with slightly improved conditions expected Saturday

Max Temp: 90^o-96^o (upper elevations), 99^o-104^o (lower slopes) **Min Temp:** 63^o-75^o

Min RH: 12%-18% (upper elevations), 10%-17% (lower slopes)

20 foot winds: Light southeast breeze, becoming NW 4-6 mph with gusts to 13 mph after 1500

FUELS SUMMARY:

Fuels and Fire Behavior Advisory Issued for Geographic Area

The Campbell and Ammon fires resulted from a lightning event that occurred in the early morning hours of August 5th. The area has seen 50-75% of normal precipitation in the current rain year and the relatively mild spring and early summer conditions had the fuel and fire danger indices near historical averages during the initial stages of the fire. Current conditions are reflective of an additional month of drying with fuels and fire danger indices at or above the 97th percentile. The primary carrier of fire at lower elevations is timber litter with a substantial hardwood dead and down component resulting from an ice/snow event this past winter.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The peak of the heat wave should be over the fire area today, with temperatures reaching similar conditions as experienced on Tuesday. Most of the Ammon and Campbell fire burned at a low to moderate intensity. This means there will continue to be potential for a timber stringer to catch fire inside the control lines. Continue to patrol the lines and post lookouts who can assess the threat of the smokes that are sure to pop-up this afternoon during the hot and dry conditions.

Fire Danger Indices – 2022 IRPG Page 39

Energy Release Component (Brush Mtn): 97th

September Average ERC Percentile: 50th

Peak Burn Period (1600-2000) - Probability of Ignition (PIG): 80% (shaded), 100% (unshaded), 30% (overnight)

Spotting Distance of Torching Tree with 10 mph ridgetop winds: 0.20 miles

SPECIFIC:

Branch I: The main threat to the control lines will be from roll-out on the mid-slope control lines. The forecast calls for a breezy southeasterly wind to be over the fire on Saturday. This is a wind direction not yet experienced on the fire. Continue the seek and destroy missions as every piece of heat extinguished now, is one less that can cause a problem down the line.

Branch X: Keep posting lookouts who can assess smokes. When working with heavy equipment, spin weather and evaluate the probability of ignition. You may need to shut down operations during the hottest and driest parts of the day.

Initial Attack: The fire weather conditions will cause any new fires to burn actively. If you are requested to support a new fire, the PDF maps for the SHF and SRF can be accessed with the QR code and opened in Avenza.

AIR OPERATIONS:

Sunrise 0651, Sunset 1935 (Daylength: losing 2 min, 36 sec)

The air will continue to improve through the week with conditions favorable for air support each afternoon.

SAFETY:

Push hydration with your crews each day as dehydration is cumulative. Take breaks in strategic locations during the heat of the day.

Fuels and Fire Behavior Advisory

Northern California

September 2nd, 2022

Subject: Potential for extreme fire behavior due to critically elevated fire danger indices, low live and dead fuel moistures, and very hot and dry conditions across much of northern California.

Discussion: An extended period of hot, dry weather with embedded periods of enhanced winds will impact Northern California. The elevated fire weather concerns with fuels reaching their yearly minimum moisture values will create conditions conducive to long range spotting, rapid fire growth, and high resistance to control.

Difference from normal conditions: The current values for Energy Release Component (ERC) are at or above the 90th percentile for the majority of Northern California, with live fuel moistures dropping to critical levels as herbaceous and woody fuels cure. These conditions will be exacerbated by a predicted heat wave, resulting in anomalous daytime highs with little relief in temperature or humidity recovery overnight. Some PSA's, may reach daily record ERC values, with all covered PSA's predicted to reach or exceed the 97th percentile for an extended period. The combination of extreme ERC's with high temperatures and poor overnight humidity recovery is highly correlated with extreme fire behavior in Northern California.

Concerns to Firefighters and the Public:

- The advisory coincides with the Labor Day holiday weekend that is likely to result in increased outdoor recreation and visitor use to public lands across Northern California. The increase in public use carries an increased risk of fire starts as well as potential for evacuations of visitors/ recreational users in the event of a fire starting.
- Energy Release Component (ERC) in areas covered by this advisory are at or above the 90th percentile and are expected to approach or exceed the 97th percentile. **Anticipate increased spread rates, long range spotting, and active nighttime burning.**
- The combination of persistent drought, a building heat wave, and a very dry atmosphere will continue to decrease already low fuel moisture values:
 - 1000-hour fuel moistures are below average and approaching the 90th percentile,
 - Live woody fuel moisture in brush is near or slightly below average, making them readily available and will likely reach critical levels because of the forecasted hot, dry weather.
 - The above average herbaceous fuel load at low and mid elevations (below 5,000 ft.) is fully cured, with high elevation herbaceous fuels rapidly curing during the hot, dry forecast.
 - Higher than average surface fuel loading is present in areas that experienced winter snow and ice storms in the Coast Range and northern Sierra Nevada.

Expect fires to ignite easier and spread faster. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.

- Periods of enhanced winds are expected during the hot and dry period. Given the current and anticipated fuels conditions, increases in winds will make direct attack of any new starts difficult and may hamper use of aerial resources.
- Review the current [North Ops Outlooks](#) and [national fuels and fire behavior advisories](#).

Mitigation Measures:

- Suppression actions need to be based on good anchor points, escape routes, and safety zones. **Remember LCES. Experienced lookouts are essential under these conditions.**
- Base all actions on current and expected behavior of the fire. **Augment initial attack resources as incident activity dictates**
- Fire managers should be aware of high use recreation and visitor sites in their area. **The holiday weekend will bring increased visitor use, increasing risk of starts during critical fire weather.**

Area of Concern: Northern California except for the following Predictive Service Areas: North Coast, Bay Marine, and west of Highway 101 in Mid-Coast to Mendocino.

6. Work Assignments:

- Proactively patrol for potential issues; mitigate any threats to keep the fire within the current perimeter.
- Identify and locate remaining equipment; backhaul as appropriate.
- Work with Resource Advisors to repair hand and mechanical control lines to the identified standard.

7. Special Instructions:

- Only use designated fire hydrants at Enchanted Springs Rd, cross of Hwy. 299 and the Country Club Rd. Post Office.
- ***Mtn. Medic M5 - DP113, Wildemess M1 - DP240, Rough Country AMB2 - DP168, Rough Country AMB3 and REMS 1 - DP184, REMS 4 - DP155***

SAFETY MESSAGE

INCIDENT NAME: LIGHTNING COMPLEX	Date: September 9, 2022 Time: 0700-1900
---	---

MAJOR HAZARDS:

- DRIVING
- MEDICAL EXTRACTION TIMES
- HEAVY EQUIPMENT OPERATIONS
- SNAGS AND FIRE WEAKENED TREES
- COVID-19 AVOIDANCE

Fire Order of the Day:

*Be Alert. Keep Calm.
Think Clearly. Act Decisively.*

Safety Considerations

- Are we monitoring current and predicted fire weather conditions? Are we prepared for the predicted fire behavior possibilities?
- Are we prepared to deal with a medical emergency?
- Do you have communications with your forces, your supervisor and adjoining forces?
- Are we willing to adjust tactics and operations to SAFELY accommodate changing or changed conditions?

Situational Awareness

Don't let the holes line up.

Do what you have to do to break the error chain!

NARRATIVE:

ADAPTABILITY AND FLEXIBILITY:

As the 2022 fire season continues to ramp up, and conditions continue to worsen, it is important to spend some time to recognize that fire behavior conditions are changing. Annual trainings and readiness reviews can only do so much to bring us into a safety-oriented mindset. Often, our awareness of safety increases over the course of the season, but it is important to spend some time, as we move from the SRF Lightning Complex into our critical fire season, to facilitate the mental shift on how we are going to respond to fires safely now that conditions have worsened.

REMEMBER: Increasing personal adaptability and flexibility increases our margin of error and can lead to a safer environment.

COMPLACENCY:

It's up to each of us to control and eliminate complacency. Challenge yourself to focus on the task at hand, maintain a positive attitude, continue to work as a productive member of the "SRF Lightning Complex" toward the objectives, and encourage fellow workers to adhere to all the safety fundamentals.

SAFETY OFFICERS	Rick Bertram, Tom Zeulner, Brent Kaiser
------------------------	--

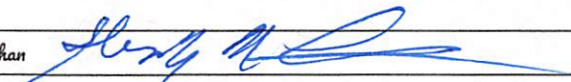

BK

Incident Risk Analysis (ICS 215a)

CA-SRF-000620

BR/DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
All	Hazard Trees	<ul style="list-style-type: none"> Follow "Hazard Tree Safety" guidelines, reference IRPG Post lookouts or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights.
All	Extended Medical Extraction Times	<ul style="list-style-type: none"> Identify helispots and communicate Lat/Longs to DIVS. Be familiar with the medical plan and communicate 8 line promptly. Evaluate the necessity to send personnel into areas with limited access. Be aware of weather conditions (i.e., smoke inversions, rain, and high winds etc.) that could affect the ability of helicopters to reach you. Don't rely on helicopters exclusively.
All	Steep Terrain & Rolling Debris	<ul style="list-style-type: none"> Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Be on the lookout for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access.
All	Driving & Traffic	<ul style="list-style-type: none"> SCHOOL is back in session, watch for children there are lots of bus stops Practice "Defensive Driving" techniques traveling on all roads Use spotters and honk horn when backing. Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seatbelts). Always use headlights and obey posted speed limits. Use chock blocks, turn wheels into hill. Avoid distractions (eating, cell phones, etc.) and use the 3 second rule.
All	Air Operations	<ul style="list-style-type: none"> Establish and ensure communications are adequate with helibase aircraft. Ensure work/rest policies are being met for the flight crews. Involve aviation leadership with operational planning to avoid risk/exposure Establish trigger points to disengage aviation resources. Utilize the appropriate aircraft for the mission. Always consider pilot exposure: RISK VS GAIN
Branch 1 Branch 10	Heavy Equipment Operations	<ul style="list-style-type: none"> Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment and increase it to 2 1/2 times tree height when in timber. Use a spotter when backing. Avoid working below heavy equipment.

TRAINING SPECIALIST MESSAGE

- A Training Specialist is assigned to the incident.
 - It is to your advantage to complete the quick registration process sooner than later.
 - The TNSP Desk located at ICP. You can also contact the TNSP, Jesse Roach, at 530-966-3459 for training related questions.
-

FINANCE MESSAGE

Email address: 2022.lightningcomplex.finance@firenet.gov

INTERIM PAYMENTS

Any contract equipment that has been here at least 14 days and is not on the demob list must receive an interim payment. Please see the Equipment folks in the Finance yurt or send an email to the address above to begin that process.

TIME

Electronic CTRs, Shift Tickets and agreement information can be emailed to the address above. Hard copy documents can also be dropped off in the Finance yurt. Please be sure to write legibly and print your name under your signature.

For demobing resources: Finance does not sign CTRs or shift tickets, please make sure your supervisor signs them prior to submitting to Finance.

COSTS

Send any costs for aircraft or national contracts (caterers, showers) to the email address above.

FIRE ITEMS REPLACEMENT

Cache Items – Complete a 213 signed by DIVS verifying lost or damaged items and explanation of circumstances and take to Ordering. Any items that cannot be filled by Supply will need FSC, INBA or IC signature to approve replacement for cache equivalent of lost/damaged items.

-Non-cache items/Claims - For replacement of non-cache items or claims please submit a completed OF-213 and OF-289. A determination for replacement based on the documentation provided will be made by the FSC, IC, or INBA.

-Damaged items will be surrendered to the Supply Unit. Replacement for normal wear and tear is through home unit project funds.

Online Information For The Public

STAGE 1 Fire Suppression Repair Cheat Sheet

Remember, if you have any doubts or questions about the ideal end state of these repairs, get in touch with a READ!

Overall Objective: Repair damage caused by suppression activities, and thus minimize short and long-term environmental impacts. Impacts caused by the direct effects of fire will be mitigated or corrected during this repair phase, only those impacts caused by the suppression of the fire.

General Guidelines for Stage 1 Repair (consult signed Suppression Repair Plan (SR Plan))

Dozer and Hand Lines:

- Construct water bars and/or rolling dips where access is no longer needed and erosion is a concern. Knock down berms into the fire line. (see SR Plan page 13)
- Firelines that cross draws/channels will be cleaned of debris and re-contoured (see SR Plan page 15)
- Remove suppression created fuels and logs from firelines via chipping, piling, lop & scatter, and decking, advised.
- Trench handlines should be pulled back and contoured.
- Obliterate hand lines where they intersect FS trails.
- Strategic firelines intended for future use should have suppression general debris chipped and little to no debris or brush scattered over them. Only pile after all other repair activities are complete.

Safety Zones, Drop Points, Helispots, Sling Sites, Staging Areas, etc:

- Restore to pre-existing condition.
- Knock down berms, de-compact soil, and restore natural drainage flows.
- Only pull enough slash across the area to reduce erosion and prevent further impacts.
- Chip and pile debris, as advised.

Roads and Trails:

- Clean ditches, side drains, rolling dips, and other drainage features along roads damaged by suppression activities (see SR Plan page 14).
- Where needed, water and grade surfaces and remove berms along roads impacted by suppression activities.
- Chip side-cast slash on roads, construct slash piles, lop and scatter, or deck logs, as advised.
- Repair damaged earthen barriers for Maintenance Level 1, decommissioned, and non-system roads (see SR Plan page 16).

Miscellaneous Resources:

- Maintain the integrity of Wilderness, Inventoried Roadless Areas and Wild and Scenic River Corridor characteristics
- **SITES WITH YELLOW/BLACK FLAGGING:** *Sites: No repair work may commence without consultation with an assigned Archaeologist and the Hoopa Tribal Representative, and/or and the lead Resource Advisor to the fire.*
- Remove all equipment, gear, hose, flagging, and trash from firelines and dispersal sites following repair actions.

Fences and Gates:

- Repair any fences and gates damaged by suppression activities.

Water Sources:

- Remove dams, dikes, and other impoundments.
- Restore damaged stream banks to natural contours.
- Report fuel and oil spills.

Fireline slope %	Maximum Distance Apart (feet)
1 – 5	200
6 – 20	125
21 – 40	60
41 – 60	40
>60	25

For repairs along 06N06 & 06N08 – See READ for specific vehicle washing procedures!

Fire and COVID-19 Briefing Checklist

SRF LIGHTNING COMPLEX

Self-Awareness / Screening

- Notify supervisor if you or others experience:
 - Cough, more than expected
 - Difficulty breathing
 - Loss of taste or smell
 - Fever
 - Chills
 - Sore throat
 - Muscle pain
- Immediately separate yourself from others.
- Follow crew and division plans to isolate, triage, and transport symptomatic personnel.

Hygiene on the Fireline

- Properly wash or sanitize your hands often
- Avoid handshakes and communal use items
- Inform supervisor of needed resupply.
- Disinfect high touch surfaces often

Social distancing and protective equipment

- Practice social distancing
- Conduct briefings in conversations outdoors and at least SIX feet apart
- Utilize face coverings
- Clean or replace dirty face coverings, equipment, and PPE

Communications

- Ensure effective sender/receiver messaging.
- **Protect yourself, your crew, and your camp!**

Any questions contact:

MEDL Jim Emerson 805-570-9061

HUMAN RESOURCES MESSAGE

What Does HR Do?

Generally, HRSPs assist the ICs and Team staff in preventing, identifying, and resolving problems and concerns here on the incident. We're also available to assist all assigned personnel with a wide range of issues that may be impacting the work environment, including helping with conflict resolution and addressing allegations of misconduct.

If you have any questions, comments, or concerns that you'd like to discuss with us, please don't hesitate to stop by or contact us at the number below.

HRSP: Sterling Flores, (707) 980-2043

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha, Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2nd - 3rd burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2nd - 3rd burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
