Incident Management Team

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: SRF LIGHTNING COMPLEX	2. Operational Period:	Date From: 9/11/2022	Date To: 9/12/2022
		Time From: 0700	Time To: 0700

Strategic Direction
 The SRF Lightning Complex is managed with a full suppression strategy. Firefighting resources will follow risk-based decision making and implement tactics that offer the highest probability of success to achieve the strategy of suppressing the fire and restoring suppression related damages while protecting local values.

Values at risk include the safety of the public and firefighters; privately and tribally held timberlands; the communities and outlying areas near Willow Creek, Hawkins Bar, Burnt Ranch, and Salyer; water, transportation, electrical infrastructure as well as natural and cultural resources.

Leaders' Intent
 Everyone will work as a team to provide the highest level of service and safety while assigned to the incident. All assigned resources will ensure transparent, timely, and accurate communication at all levels of the incident while working to strengthen relationships with each other and with cooperators. All incident personnel should be prepared to take appropriate actions regarding:

- Safety - including the identification and mitigation of hazards to yourself and others.
- Timely and thoughtful risk-based decision making.
- Manage fatigue by taking breaks and maintaining work/rest cycles.
- Professional behavior, conduct, and timely/effective communication.
- Manage health and wellbeing and environmental impacts by following common sense, practicing good hygiene, communicable disease mitigations, and recycling.

Management Objectives

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Coordinate public information to provide timely and continuous situation updates to affected agency partners, cooperators, and public.
- Coordinate suppression and repair activities with READs to minimize impacts on natural and cultural resources.
- Effectively manage and track costs for all incidents identified within the SRF Lightning Complex.
- Reduce incident generated waste by encouraging recycling throughout the incident.

Control Objectives
 Mop-up and strengthen firelines to prevent the fire from spreading to private property, surrounding communities and values at risk, keep the SRF Lightning Complex fires:

Campbell Fire
 - Keep the fire within the current perimeter.

Ammon Fire
 - Keep the fire within the current perimeter.

2022 SRF Lightning Complex Fire Weather Forecast

FORECAST NO: 34
PREDICTION FOR: 0700 Sun - 0700 Mon
SHIFT DATE: Sept 11th – Sept 12th, 2022

NAME OF FIRE: 2022 SRF Lightning Complex
SHIFT UNIT: CA-SRF
SIGNED: Tom Lonka - IMET (910) 920-7865

FORECAST ISSUED: 1800 Saturday, September 10th, 2022

WEATHER DISCUSSION: The weather pattern will continue to transition to a cooler and more seasonable scenario today into next week. Mostly cloudy skies are expected today, keeping temperatures down mostly in the mid 70s to mid 80s, coolest above 3,500 ft. RH values will also increase from where they were, and bottom out in the mid 20s to mid 30s. A few showers or sprinkles will dot the region through this afternoon into tonight, though little if any measurable rain is expected at this time. Even cooler yet Monday as temperatures dip below normal and excellent RH recoveries are expected every night.

WEATHER FORECAST FOR TODAY (SUNDAY):

WEATHER: Mostly cloudy, with isolated showers or sprinkles this afternoon.

MAX TEMPERATURES: 79 - 85 degrees upper slopes and ridges. **24 HR Trend:** Down 5-8 degrees.
86 - 92 degrees lower slopes and drainages. **24 HR Trend:** Down 6-10 degrees.

MINIMUM HUMIDITY: 26 - 36% upper slopes and ridges. **24 HR Trend** Up 10-15%.
22 - 32% lower slopes and drainages. **24 HR Trend** Up 10-15%.

20-FOOT WIND:

SLOPE/VALLEY – SE or downslope 2-4 mph in the morning, becoming NW or upslope 4-6 mph after 1500 PDT.

RIDGETOP – SE 2-4 mph in the morning, becoming NW 5-7 mph with gusts to 12 mph after 1500 PDT.

INVERSIONS/STABILITY: Moderate inversion around 2000 feet partially mixing out around 1500 hours.

SMOKE TRANSPORT WIND: West around 10 mph.

WEATHER FORECAST FOR TONIGHT (SUNDAY NIGHT):

WEATHER: Mostly Cloudy with a few showers or sprinkles. Little if any measurable accumulation expected at this time.

MINIMUM TEMPERATURES: 57-65 thermal belts above 3500 ft. 51-59 lower slopes. **24 HR Trend:** Down 5-8 degrees.

MAXIMUM HUMIDITY: 55-70% mid and upper slopes. 80-95% lower slopes. **24 HR Trend:** Up 10-20%.

20-FOOT WIND:

SLOPE/VALLEY – W to NW or upslope winds 3-5 mph, diminishing to calm after 2000.

RIDGETOP – NW 4-6 mph through 2000, becoming N 2-4 mph.

INVERSIONS/STABILITY: Moderate nighttime inversion around 2000 ft.

EXTENDED FORECAST MONDAY - WEDNESDAY: Cooler temperatures and higher humidities are expected this coming week as a Pacific trough of low pressure brings cooler temperatures along with higher humidities. Lows will be mainly in the 50s, with highs in the upper 60s to mid 70s. Morning clouds from the Pacific will be replaced by sunshine in the afternoon, though overnight relative humidities will be excellent throughout the fire area.

PORTABLE WEATHER STATIONS:

Division J/N/R off Denny Road: Frequency 163.350 DTMF Tone 0059
Division W near Friday Ridge: Frequency 163.350 DTMF Tone 0060
Division A/D/G east of Elbow Dip: Frequency 163.350 DTMF Tone 0002
Tish Tang RAWs on Tish Tang Ridge: Frequency 163.350 DTMF Tone 0003

Current Obs

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 36	TYPE OF FIRE: Wildfire
FIRE NAME: SRF Lightning CA-SRF-00620	OPERATIONAL PERIOD: 09/11/2022 (0700-0700)
DATE ISSUED: 09/10/2022	TIME ISSUED: 1800
UNIT: Six Rivers National Forest	SIGNED:  Typed/printed: Nic Elmquist (FBAN)

INPUTS

WEATHER SUMMARY: ** See Fire Weather Forecast**

Weather: The weather pattern will continue to transition to cooler and more seasonable into next week
Max Temp: 79^o-85^o (upper elevations), 86^o-92^o (lower slopes) **Min Temp:** 51^o-65^o
Min RH: 26%-36% (upper elevations), 22%-32% (lower slopes)
20 foot winds: SE 2-4 mph in the morning, becoming NW 5-7 mph with gusts to 12 mph after 1500

FUELS SUMMARY:

Fuels and Fire Behavior Advisory Issued for Geographic Area

The Campbell and Ammon fires resulted from a lightning event that occurred in the early morning hours of August 5th. The area has seen 50-75% of normal precipitation in the current rain year and the relatively mild spring and early summer conditions had the fuel and fire danger indices near historical averages during the initial stages of the fire. Current conditions are reflective of an additional 30+ days of drying with fuels and fire danger indices at the 90th percentile. The primary carrier of fire at lower elevations is timber litter with a substantial hardwood dead and down component resulting from an ice/snow event this past winter.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The improved overnight humidity combined with today's cooler temperatures and cloud cover, will cause fire danger to drop from the extreme levels we have seen the past several operational periods. This trend will continue through the week with overnight recovery expected between 75-100%. These improved conditions, along with your hard work, will provide increased confidence that the SRF Lightning Complex will remain within its current footprint.

Fire Danger Indices – 2022 IRPG Page 39

Energy Release Component (Brush Mtn): 90th

September Average ERC Percentile: 50th

Peak Burn Period (1600-2000) - Probability of Ignition (PIG): 40% (shaded), 50% (unshaded), 30% (overnight)

SPECIFIC:

Campbell: Great job getting through the recent hot and dry conditions without issue. Although there will continue to be smokes that occur across a fire of this size and fuel type, the chance of them compromising control lines has greatly decreased. While rehabbing the lines, pay attention to hot material within the machine piles that can often get buried.

Ammon: The fire perimeter looks great and most of the hose has been pulled. There is less concern of the heavy equipment starting a fire but keep lookouts in place and know the location/call sign of the engine nearest to the operation.

Initial Attack: If you are requested to support a new fire, the PDF maps for the SHF and SRF can be accessed with the QR code and opened in Avenza.

AIR OPERATIONS:

Sunrise 0653, Sunset 1932 (Daylength: losing 2 min, 39 sec)

Air quality will keep improving with conditions favorable for air support most of the day.

SAFETY:

Many resources are working around heavy equipment. Review IRPG page 85 with your crews.

Fuels and Fire Behavior Advisory

Northern California

September 2nd, 2022

Subject: Potential for extreme fire behavior due to critically elevated fire danger indices, low live and dead fuel moistures, and very hot and dry conditions across much of northern California.

Discussion: An extended period of hot, dry weather with embedded periods of enhanced winds will impact Northern California. The elevated fire weather concerns with fuels reaching their yearly minimum moisture values will create conditions conducive to long range spotting, rapid fire growth, and high resistance to control.

Difference from normal conditions: The current values for Energy Release Component (ERC) are at or above the 90th percentile for the majority of Northern California, with live fuel moistures dropping to critical levels as herbaceous and woody fuels cure. These conditions will be exacerbated by a predicted heat wave, resulting in anomalous daytime highs with little relief in temperature or humidity recovery overnight. Some PSA's, may reach daily record ERC values, with all covered PSA's predicted to reach or exceed the 97th percentile for an extended period. The combination of extreme ERC's with high temperatures and poor overnight humidity recovery is highly correlated with extreme fire behavior in Northern California.

Concerns to Firefighters and the Public:

- The advisory coincides with the Labor Day holiday weekend that is likely to result in increased outdoor recreation and visitor use to public lands across Northern California. The increase in public use carries an increased risk of fire starts as well as potential for evacuations of visitors/ recreational users in the event of a fire starting.
- Energy Release Component (ERC) in areas covered by this advisory are at or above the 90th percentile and are expected to approach or exceed the 97th percentile. **Anticipate increased spread rates, long range spotting, and active nighttime burning.**
- The combination of persistent drought, a building heat wave, and a very dry atmosphere will continue to decrease already low fuel moisture values:
 - 1000-hour fuel moistures are below average and approaching the 90th percentile,
 - Live woody fuel moisture in brush is near or slightly below average, making them readily available and will likely reach critical levels because of the forecasted hot, dry weather.
 - The above average herbaceous fuel load at low and mid elevations (below 5,000 ft.) is fully cured, with high elevation herbaceous fuels rapidly curing during the hot, dry forecast.
 - Higher than average surface fuel loading is present in areas that experienced winter snow and ice storms in the Coast Range and northern Sierra Nevada.

Expect fires to ignite easier and spread faster. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.

- Periods of enhanced winds are expected during the hot and dry period. Given the current and anticipated fuels conditions, increases in winds will make direct attack of any new starts difficult and may hamper use of aerial resources.
- Review the current [North Ops Outlooks](#) and [national fuels and fire behavior advisories](#).

Mitigation Measures:

- Suppression actions need to be based on good anchor points, escape routes, and safety zones. **Remember LCES. Experienced lookouts are essential under these conditions.**
- Base all actions on current and expected behavior of the fire. **Augment initial attack resources as incident activity dictates**
- Fire managers should be aware of high use recreation and visitor sites in their area. **The holiday weekend will bring increased visitor use, increasing risk of starts during critical fire weather.**

Area of Concern: Northern California except for the following Predictive Service Areas: North Coast, Bay Marine, and west of Highway 101 in Mid-Coast to Mendocino.

SRF LIGHTNING COMPLEX - SAFETY MESSAGE

Honor the fallen today by staying as safe as you possibly can...

INCIDENT: SRF Lightning Complex	DATE: September 11, 2022 TIME: 0700-1900
--	---

- Major Hazards and Risks:**
- **DRIVING** - Keep your speeds down. Be alert for increased public in fire area.
 - **EXTENDED EXTRACTION TIMES** - Be familiar with the medical plan. Develop a plan on how you would get an injured firefighter out. Train on the Medical Incident Report form(8-line).
 - **STEEP TERRAIN AND ROLLING MATERIALS** - Watch for rocks/trees that can roll out.
 - **DEHYDRATION** - Ensure you and your personnel are staying hydrated.
 - **FATIGUE** – Watch your people today, look for signs of fatigue and mitigate.
 - **HEAVY EQUIPMENT** – Be extremely careful around and below heavy equipment.
 - **WORKING AROUND AIRCRAFT** - Stay alert to air resources working in your area.
 - **SNAGS AND FIRE WEAKENED TREES** – Survey your work area, look up and live.
 - **COVID** – Use COVID precautions and mitigations (masks/distancing/handwashing).

Narrative: Fatigue is cumulative. Get some good rest between shifts if possible. Make sure all your drivers are rested prior to demob. All phases of this incident carry great risk. Even demob. Don't rush home or to a new incident. Pace yourself. Please stay focused on your safety and those you are responsible for.

- Demob---before you hit the road**
- Walk around the vehicle.
 - Check the windshield, wipers and wiper fluid level.
 - Keep windows, mirrors and lights clean to better see and be seen.
 - Clean and adjust mirrors.
 - Check front and back tires (including wheels and lug nuts).
 - Under the hood check all fluid levels and especially the air filter.
 - Drivers to be rested up prior to driving.
 - If tired and by yourself, take a safety nap.
 - Single drivers will not drive over 10 hours.
 - Don't drive past 2200 hrs.

Remembering today those who died on 9.11.2001

Safety Officers: Rick Bertram, Tom Zeulner, Brent Kaiser

Incident Risk Analysis (ICS 215a)

CA-SRF-000620

BR/DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
All	Hazard Trees	<ul style="list-style-type: none"> Follow "Hazard Tree Safety" guidelines, reference IRPG Post lookouts or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights.
All	Extended Medical Extraction Times	<ul style="list-style-type: none"> Identify helispots and communicate Lat/Longs to DIVS. Be familiar with the medical plan and communicate 8 line promptly. Evaluate the necessity to send personnel into areas with limited access. Be aware of weather conditions (i.e., smoke inversions, rain, and high winds etc.) that could affect the ability of helicopters to reach you. Don't rely on helicopters exclusively.
All	Steep Terrain & Rolling Debris	<ul style="list-style-type: none"> Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Be on the lookout for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access.
All	Driving & Traffic	<ul style="list-style-type: none"> SCHOOL is back in session, watch for children there are lots of bus stops Practice "Defensive Driving" techniques traveling on all roads Use spotters and honk horn when backing. Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seatbelts). Always use headlights and obey posted speed limits. Use chock blocks, turn wheels into hill. Avoid distractions (eating, cell phones, etc.) and use the 3 second rule.
All	Air Operations	<ul style="list-style-type: none"> Establish and ensure communications are adequate with helibase aircraft. Ensure work/rest policies are being met for the flight crews. Involve aviation leadership with operational planning to avoid risk/exposure Establish trigger points to disengage aviation resources. Utilize the appropriate aircraft for the mission. Always consider pilot exposure: RISK VS GAIN
All	Heavy Equipment Operations	<ul style="list-style-type: none"> Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment and increase it to 2 1/2 times tree height when in timber. Use a spotter when backing. Avoid working below heavy equipment.
All	Fatigue \ Overexertion	<ul style="list-style-type: none"> Drink water and sports drinks throughout the day, before and after shift also Drink at a ratio of 2 waters to 1 sports drink Eat well and get plenty of sleep Stand down if needed during the heat of the day Come off the line and get into vehicle with A/C on Take more breaks during the hottest part of the day
All	Illness	<ul style="list-style-type: none"> Wear masks when entering any building at ICP Isolate yourself if you have any cold symptoms and take COVID test Wash hands often Don't share radios/tools and equipment
All	Chipper \ Chainsaw Operations	<ul style="list-style-type: none"> Follow "Hazard Tree Safety" guidelines, reference IRPG Follow "Procedural Felling Operations", reference IRPG Only Chipper contractor can Feed the Chipper Ensure all personal safety gear is worn to address mechanical hazards Ensure personnel are spaced to ensure no one is accidentally pushed towards the chipper

FINANCE MESSAGE

****NOTE REGARDING MEAL BREAKS, SHIFTS AND DEMOB****

The incident is now in its final stages, and moving to Type 3, at **89%** containment. We trust that times submitted are accurate and integrous, for example breaks are reflected on finance documentation. For those Contract resources with a crew, briefing begins at **0700**. CRWB's can start time then, but crew must be ½ hr later per agreement/contract.

If you are held at the line and unable to make it back to camp, please provide a 213 written justification for the late return.

Also, please be sure to submit all final shift tickets/CTRs **prior** to demob to ensure a quick and easy departure.

Email address: **2022.lightningcomplex.finance@firenet.gov**

TIME

Electronic CTR's Shift Tickets and agreement information can be emailed to the address above. Hard copy documents can also be dropped off at the Finance Yurt, however electronic is preferred. Please reach out to a Finance team member if you would like assistance.

COSTS

Send any costs for aircraft or national contracts (caterers, showers) to the email address above.

FIRE ITEMS REPLACEMENT

Cache Items: Complete a 213 signed by DIVS verifying lost or damaged items and explanation of circumstances. Take the 213 to Ordering. Any items that can't be filled by supply will need FSC, INBA, or IC signature to approve replacement for cache equivalent of lost/damaged items. Be sure to bring the lost/damaged item with you.

Non-Cache Items: For replacement of Non-Cache items, please submit a completed OF213 explaining in detail the circumstances of how the item(s) were lost/damaged. Additionally, please complete an OF-289 form and include pictures, police report (if any) for property loss/damage or vehicle damage. Forms available at Finance.

-Damaged items will be surrendered to the Supply Unit. Replacement for normal wear and tear is completed through home unit project funds.

TRAINING SPECIALIST MESSAGE

-A Training Specialist is assigned to the incident.
-It is to your advantage to complete the quick registration process sooner than later.
-The TNSP Desk located at ICP. You can also contact the TNSP, Jesse Roach, at 530-966-3459 for training related questions.

Online Information For The Public

STAGE 1 Fire Suppression Repair Cheat Sheet

Remember, if you have any doubts or questions about the ideal end state of these repairs, get in touch with a READ!

Overall Objective: Repair damage caused by suppression activities, and thus minimize short and long-term environmental impacts. Impacts caused by the direct effects of fire will be mitigated or corrected during this repair phase, only those impacts caused by the suppression of the fire.

General Guidelines for Stage 1 Repair (consult signed Suppression Repair Plan (SR Plan))

Dozer and Hand Lines:

- Construct water bars and/or rolling dips where access is no longer needed and erosion is a concern. Knock down berms into the fire line. (see SR Plan page 13)
- Firelines that cross draws/channels will be cleaned of debris and re-contoured (see SR Plan page 15)
- Remove suppression created fuels and logs from firelines via chipping, piling, lop & scatter, and decking, advised.
- Trench handlines should be pulled back and contoured.
- Obliterate hand lines where they intersect FS trails.
- Strategic firelines intended for future use should have suppression general debris chipped and little to no debris or brush scattered over them. Only pile after all other repair activities are complete.

Safety Zones, Drop Points, Helispots, Sling Sites, Staging Areas, etc:

- Restore to pre-existing condition.
- Knock down berms, de-compact soil, and restore natural drainage flows.
- Only pull enough slash across the area to reduce erosion and prevent further impacts.
- Chip and pile debris, as advised.

Roads and Trails:

- Clean ditches, side drains, rolling dips, and other drainage features along roads damaged by suppression activities (see SR Plan page 14).
- Where needed, water and grade surfaces and remove berms along roads impacted by suppression activities.
- Chip side-cast slash on roads, construct slash piles, lop and scatter, or deck logs, as advised.
- Repair damaged earthen barriers for Maintenance Level 1, decommissioned, and non-system roads (see SR Plan page 16).

Miscellaneous Resources:

- Maintain the integrity of Wilderness, Inventoried Roadless Areas and Wild and Scenic River Corridor characteristics
- **SITES WITH YELLOW/BLACK FLAGGING:** *Sites: No repair work may commence without consultation with an assigned Archaeologist and the Hoopa Tribal Representative, and/or and the lead Resource Advisor to the fire.*
- Remove all equipment, gear, hose, flagging, and trash from firelines and dispersal sites following repair actions.

Fences and Gates:

- Repair any fences and gates damaged by suppression activities.

Water Sources:

- Remove dams, dikes, and other impoundments.
- Restore damaged stream banks to natural contours.
- Report fuel and oil spills.

Fireline slope %	Maximum Distance Apart (feet)
1 – 5	200
6 – 20	125
21 – 40	60
41 – 60	40
>60	25

For repairs along 06N06 & 06N08 – See READ for specific vehicle washing procedures!

COVID-19 PREVENTION INFORMATION

MAINTAINING A HEALTHY WORKFORCE

From FF Health /Advocate

All fire personnel are susceptible to contracting COVID-19. The health and wellbeing of all personnel must be a priority throughout the fire season. **Mask use, social distancing and good hygiene** will support the health of fire personnel and are important ways to **prevent the spread of COVID-19 and maintain the health of all fire personnel.**

Self-Awareness/ Daily Health Screening

Separate yourself from others and notify your supervisor if you experience COVID-19 related symptoms (fever or chills, cough-more than expected, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea), Supervisors will use COVID-19 precautions and facilitate COVID-19 testing at the identified COVID-19 testing locations.

COVID-19 Testing Availability

COVID-19 Testing is available within the Camp from **Frontline Medical, hours 06:00-22:00.** Priorities for testing will be for those with COVID-19 related symptoms and potential exposures to those with COVID-19 positive individuals.

Sanitary and Personal Hygiene Practices

Rigorous sanitary practices are important for reducing the transmission of infectious diseases. All personnel should cover their coughs and sneezes. Perform proper hand hygiene including handwashing or hand sanitizer use after touching potentially contaminated surfaces, removing face coverings, after use of the restroom and before eating or putting anything in their mouth.

Social Distancing and Mask Wearing

Individuals should practice and remind others of social distancing of at least six feet apart. When social distancing is not possible, mask use is recommended. **Modules should limit close contact with other resources to insulate their module from potential exposures.**

Current Community Level for Trinity County is LOW so mask wearing is optional unless social distancing cannot be maintained. Community Levels are updated weekly

Contact Firefighter Health Advocate @ 805-570-9061, if needed

HUMAN RESOURCES MESSAGE

Appreciation

There's a Vietnamese proverb that says:

"When eating fruit, remember who planted the tree."

Especially on fires, there are a multitude of concerns that require our immediate focus. Tactical strategy planning, safety hazards, and interpersonal problems are often firmly in the foreground. In the midst of everything going on, both on duty and in our own personal lives, sometimes it helps to pause, to take a step back and remember the efforts of the ones who came before us. Reminding ourselves that we're following in the footsteps of others, and walking on the paths they've helped to pave, provides us with a little perspective, and hopefully, allows us to understand and be thankful for the foundations they've left behind, to appreciate the fruit-planters when eating the fruit.

HRSP: Sterling Flores, (707) 980-2043

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
