2022 SRF Lightning Complex Fire Weather Forecast

FORECAST NO: 36

PREDICTION FOR: 0700 Tue - 0700 Wed

SHIFT DATE: Sept 13th - Sept 14th, 2022

NAME OF FIRE: 2022 SRF Lightning Complex

SHIFT UNIT: CA-SRF

SIGNED: Tom Lonka - IMET (910) 920-7865

FORECAST ISSUED: 1800 Monday, September 12th, 2022

<u>WEATHER DISCUSSION:</u> A cooling trend continues as Pacific trough of low pressure influences the weather. Low clouds over the area in the morning will give way to mostly sunny skies by late morning, with temperatures seasonably cool, in the 60s for the highest elevations, and 70s for the mid and lower slopes. Minimum RH values should be in the 40s today. For tonight, excellent RH recoveries are expected again as a marine intrusion occurs with low clouds, especially in the Trinity River Valley and lower surrounding elevations. The cool Pacific weather pattern will continue for this coming week.

WEATHER FORECAST FOR TODAY (TUESDAY):

WEATHER: Mostly cloudy in the morning, becoming mostly sunny.

MAX TEMPERATURES: 68 - 74 degrees upper slopes and ridges.

75 - 81 degrees lower slopes and drainages.

24 HR Trend: Down 2-4 degrees. 24 HR Trend: Down 2-4 degrees.

MINIMUM HUMIDITY: 44 - 54% upper slopes and ridges.

35 - 45% lower slopes and drainages. **24**

24 HR Trend Up 2-4%. 24 HR Trend Up 2-4%.

20-FOOT WIND:

SLOPE/VALLEY – Downslope 2-4 mph in the morning, becoming N or upslope 4-7 mph with gusts to 11 mph after 1400

PDT.

RIDGETOP - N 2-4 mph in the morning, becoming NW 6-9 mph with gusts to 14 mph after 1400 PDT.

INVERSIONS/STABILITY: Moderate inversion around 1500 feet partially mixing out around 1400 hours.

SMOKE TRANSPORT WIND: West around 11 mph.

WEATHER FORECAST FOR TONIGHT (TUESDAY NIGHT):

WEATHER: Mostly clear early, becoming mostly cloudy late.

MINIMUM TEMPERATURES: 50-57 thermal belts above 3500 ft. 47-54 lower slopes. 24 HR Trend: Down 2-3 degrees.

MAXIMUM HUMIDITY: 65-85% mid and upper slopes. 85-100% lower slopes. 24 HR Trend: No significant change.

20-FOOT WIND:

SLOPE/VALLEY - N or upslope winds 3-5 mph, diminishing to calm after 2100.

RIDGETOP - N 4-7 mph, diminishing to 2-4 mph after 2100.

INVERSIONS/STABILITY: Moderate nighttime inversion around 1500 ft.

EXTENDED FORECAST WEDNESDAY - FRIDAY: Cooler temperatures and higher humidities are expected to continue through this week as a Pacific trough of low pressure influences the region. Lows will be mainly in the 50s, with upper 40s in the lower valleys, with highs in the mid 60s to mid 70s. Morning clouds from the Pacific, especially in the Trinity River Valley and surrounding lower mountain slopes, will be replaced by sunshine in the afternoon. Overnight relative humidities will be excellent throughout the fire area.

PORTABLE WEATHER STATIONS:

Division J/N/R off Denny Road: Frequency 163.350 DTMF Tone 0059 Division W near Friday Ridge: Frequency 163.350 DTMF Tone 0060 Division A/D/G east of Elbow Dip: Frequency 163.350 DTMF Tone 0002 Tish Tang RAWS on Tish Tang Ridge: Frequency 163.350 DTMF Tone 0003

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 38	TYPE OF FIRE: Wildfire
FIRE NAME: SRF Lightning CA-SRF-00620	OPERATIONAL PERIOD: 09/13/2022 (0700-0700)
DATE ISSUED: 09/12/2022	TIME ISSUED: 1800
UNIT: Six Rivers National Forest	SIGNED: 16- Ch
	Typed/printed: Nic Elmquist (FBAN)

INPUTS

WEATHER SUMMARY:

** See Fire Weather Forecast**

Weather: A cooling trend continues as Pacific trough of low pressure influences the overall weather pattern. This cool pattern is expected to persist through the week.

Max Temp: 680-740 (upper elevations), 750-810 (lower slopes) Min Temp: 470-570

Min RH: 44%-54% (upper elevations), 35%-45% (lower slopes)

20 foot winds: North 2-4 mph in the morning, becoming NW 6-9 mph with gusts to 14 after 1400

FUELS SUMMARY:

Fuels and Fire Behavior Advisory Issued for Geographic Area

The Campbell and Ammon fires resulted from a lightning event that occurred in the early morning hours of August 5th. The area has seen 50-75% of normal precipitation in the current rain year and the relatively mild spring and early summer conditions had the fuel and fire danger indices near historical averages during the initial stages of the fire. After experiencing a month of well above average fire danger, conditions are beginning to improve. The primary carrier of fire at lower elevations is timber litter with a substantial hardwood dead and down component resulting from an ice/snow event this past winter. Hazard trees remain a concern across the fire area.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The favorable weather trend continues, with cool daytime temperatures, excellent overnight humidity recovery, and light winds. The main concern will be fire weakened trees falling into a pocket of unburned fuel or causing roll-out. Although there have been a lot of trees mitigated already, it is impossible to remove them all. Treat every standing tree as a "widow maker" and limit the amount of time spent around any snag.

Fire Danger Indices - 2022 IRPG Page 39

Energy Release Component (Brush Mtn): 90th (decreasing) September Average ERC Percentile: 50th

Peak Burn Period (1600-2000) - Probability of Ignition (PIG): 50% (shaded), 60% (unshaded), <10% (overnight)

SPECIFIC:

Campbell: The unburned island on the east side will continue to slowly consume the dead ground fuel with very low intensity. The area is flat and appears to have higher moisture levels than other parts of the fire. Although it will have minimal threat to control lines, it should be monitored until a precipitation event occurs to extinguish it. Anticipate responding to periodic smoke calls from the public along the highway corridor.

Ammon: The fire perimeter looks great and most of the hose has been pulled. There is less concern of the heavy equipment starting a fire but keep lookouts in place and know the location/call sign of the engine nearest to the operation.

Initial Attack: If you are requested to support a new fire, the PDF maps for the SHF and SRF can be accessed with the QR code and opened in Avenza.

AIR OPERATIONS:

Sunrise 0655, Sunset 1928 (Daylength: losing 2 min, 39 sec)

Smoke continues to blanket the drainages and lower elevations. The ability to gain air support will depend on the location of the need.

SAFETY:

Limit the number of vehicles traveling the road systems within the interior of the burned area. Large trees and rocks are falling daily.

SAFETY MESSAGE/PLAN (ICS 208)

INCIDENT NAME: SRF Lightning Complex CA-SRF 000620 Operational Period: Day 09\13\22 0700-0700

Stay diligent, avoid complacency, maintain personal and personnel ACCOUNTABILITY.

Firefighter and public safety is our number one priority. Relationship building and clear communications will assist with hazard mitigation.

MAJOR HAZARDS AND RISKS:

Hazardous Trees: Be alert of snags. Crews are working in very hazardous areas with numerous snags. Stay diligent, use lookouts and flag hazardous areas. Damaged trees weaken every day and are a serious hazard that should not be taken lightly. Stay at least 1.5 to 2 lengths of the height of the tree away from any snag or hazard tree.

Extended Extraction Times: Know the medial plan and what it will take to extract a yellow or red tag patient. Discuss the plan before going on the line before you need to implement it. The incident no longer has a hoist or short haul ship assigned to the incident. CHP and Cal Fire can be utilized if available. READ the Helicopter Extraction Operations section in the IRPG.

Hazardous Roads: These roads are narrow, steep and unforgiving. Watch your speed and watch out for local drivers driving at higher rates of speed.

Heavy Equipment \ Chippers: When working around heavy equipment stay visible and above machinery. Do not approach heavy equipment unless the operator gives you the OK. Watch for rollout and falling debris. Only contractors will feed chippers. Crews may only bring material to the chipper.

Aircraft: If a helicopter is used maintain good communication with the pilot and be clear of drop area. Always consider risk versus gain and pilot safety before a request for a ship is made. Read the IRPG section in the Blue Pages on directing bucket drops.

Rolling Rock/Debris: Utilize good spacing and post lookouts in hazardous areas. Light rains in some areas may have loosened rocks above you.

Maintain Situational Awareness: Be aware of what's going on around you, stay engaged, and have a contingency plan if changes occur on the incident.

Prepared By: Rick Bertram and Tom Zeulner

FINANCE MESSAGE

NOTE REGARDING MEAL BREAKS, SHIFTS AND DEMOB

The incident is now in its final stages, moving to Type 3, at **89%** containment. We trust that times submitted are <u>accurate and integrous</u>, for example breaks are reflected on finance documentation. For those Contract resources with a crew, briefing begins at **0700**. CRWB's can start time then, but crew must be ½ hr later per agreement/contract.

If you are held at the line and unable to make it back to camp, please provide a 213 written justification for the late return.

Also, please be sure to submit all final shift tickets/CTRs **prior** to demob to ensure a quick and easy departure.

Email address: 2022.lightningcomplex.finance@firenet.gov

TIME

Electronic CTR's Shift Tickets and agreement information can be emailed to the address above. Hard copy documents can also be dropped off at the Finance Yurt, however electronic is preferred. Please reach out to a Finance team member if you would like assistance.

INTERIM PAYMENTS

Interim payments are available for Contractors and AD employees who have been at the incident over 14 days. Please see Finance to assist you with required documentation.

FIRE CACHE/NON-CACHE REPLACEMENT ITEMS

<u>Cache Items:</u> Complete a 213 signed by DIVS verifying lost or damaged items and explanation of circumstances and take the 213 to Ordering. Any items that can't be filled by supply will need FSC, INBA, or IC signature to approve replacement for cache equivalent of lost/damaged items. Be sure to bring the damaged item with you.

Non-Cache Items: For replacement of non-cache items, please submit a completed OF213 explaining in detail the circumstances of how the item(s) were lost/damaged. Additionally, please complete an OF-289 form and include pictures, police report (if any) for property loss/damage or vehicle damage. Forms are available at Finance.

-Damaged items will be surrendered to the Supply Unit. Replacement for normal wear and tear is completed through home unit project funds.

TRAINING SPECIALIST MESSAGE

- -A Training Specialist is assigned to the incident.
- -It is to your advantage to complete the quick registration process sooner than later.
- -You can contact Jesse Roach at 530-966-3459 tor training related questions.

We would appreciate photos from the field: fire activity, people at work, etc. Please EMAIL these photos and include the location, date taken, involved crew, and photo credit. If the photo has people working, please make sure they are in full PPE.

Online Information For The Public

STAGE 1 Fire Suppression Repair Cheat Sheet

Remember, if you have any doubts or questions about the ideal end state of these repairs, get in touch with a READ!

Overall Objective: Repair damage caused by <u>suppression activities</u>, and thus minimize short and long-term environmental impacts. Impacts caused by the direct effects of fire will be mitigated or corrected during this repair phase, <u>only those impacts caused by the suppression of the fire</u>.

General Guidelines for Stage 1 Repair (consult signed Suppression Repair Plan (SR Plan))

Dozer and Hand Lines:

- Construct water bars and/or rolling dips where access is no longer needed and erosion is a concern. Knock down berms into the fire line. (see SR Plan page 13)
- Firelines that cross draws/channels will be cleaned of debris and re-contoured (see SR Plan page 15)
- Remove suppression created fuels and logs from firelines via chipping, piling, lop & scatter, and decking, advised.
- Trench handlines should be pulled back and contoured.
- Obliterate hand lines where they intersect FS trails.
- Strategic firelines intended for future use should have suppression general debris chipped and little to no debris or brush scattered over them. Only pile after all other repair activities are complete.

Safety Zones, Drop Points, Helispots, Sling Sites, Staging Areas, etc:

- Restore to pre-existing condition.
- Knock down berms, de-compact soil, and restore natural drainage flows.
- Only pull enough slash across the area to reduce erosion and prevent further impacts.
- Chip and pile debris, as advised.

Roads and Trails:

- Clean ditches, side drains, rolling dips, and other drainage features along roads damaged by suppression activities (see SR Plan page 14).
- Where needed, water and grade surfaces and remove berms along roads impacted by suppression activities.
- Chip side-cast slash on roads, construct slash piles, lop and scatter, or deck logs, as advised.
- Repair damaged earthen barriers for Maintenance Level 1, decommissioned, and non-system roads (see SR Plan page 16).

Miscellaneous Resources:

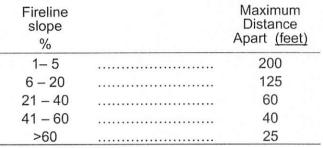

- Maintain the integrity of Wilderness, Inventoried Roadless Areas and Wild and Scenic River Corridor characteristics
- SITES WITH YELLOW/BLACK FLAGGING: Sites: No repair work may commence without consultation with an assigned Archaeologist and the Hoopa Tribal Representative, and/or and the lead Resource Advisor to the fire.
- Remove all equipment, gear, hose, flagging, and trash from firelines and dispersal sites following repair actions.

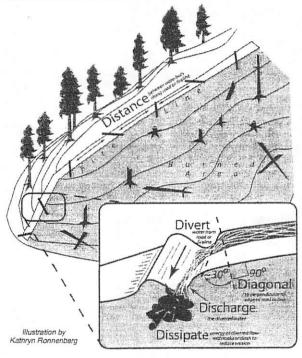

Fences and Gates:

Repair any fences and gates damaged by suppression activities.

Water Sources:

- Remove dams, dikes, and other impoundments.
- Restore damaged stream banks to natural contours.
- Report fuel and oil spills.

For repairs along 06N06 & 06N08 – See READ for specific vehicle washing procedures!

HUMAN RESOURCES MESSAGE

Transitioning

Some of us are on our way out, leaving the incident within the next few days, and it helps to start thinking about the transition that not only are we going to be experiencing in returning home, but also the transition our families will be experiencing as well. We've been away for a little bit, and our families have had to take care of things without us. We've become somewhat used to the way things have been going, but we need to expect that our homes aren't

going to be the exact same way we left it, that there are bound to be some differences. For example, before I left my house, I cleaned my kitchen because a clean, spotless kitchen makes me very happy. However, my wife just told me she cooked breakfast this morning, so I know that when I get back home, my kitchen is going to make me very sad.

So, the main thing here is to just try to be understanding of the changes, try to be patient with the adjustments, and try to be kind to the people who support us when we need it.

HRSP: Sterling Flores, (707) 980-2043
