Everyone will work as a team to provide the highest level of service and safety while assigned to the incident. All assigned resources will ensure transparent, timely, and accurate communication at all levels of the incident while working to strengthen relationships with each other and with cooperators. All incident personnel should be prepared to take appropriate actions regarding:

- Manage fatigue by taking breaks and maintaining work/rest cycles.
- Professional behavior, conduct, and timely/effective communication.
- Manage health and wellbeing and environmental impacts by following common sense, practicing good hygiene, communicable disease mitigations, and recycling.

**Management Objectives**

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Coordinate public information to provide timely and continuous situation updates to affected agency partners, cooperators, and public.
- Coordinate suppression and repair activities with READs to minimize impacts on natural and cultural resources.
- Effectively manage and track costs for all incidents identified within the SRF Lightning Complex.

ICS 206	9. PREPARED BY: (Medical Unit Leader) Jeff Cummings MEDL		10. REVIEWED BY: (Safety Officer) 					

Over the past several years on incidents improper parking on slopes has occurred. In wildland fire operations, we frequently exit vehicles quickly, but it is imperative that anytime a vehicle is left unattended, time is taken to assure it is parked safely and will not present a hazard to ourselves or others.

**Standard operating procedures for parking vehicles safely on slopes are:**

Turn the front wheels uphill or into the inside/embankment.

Firmly set the emergency brake.

Put the vehicle in park (if automatic transmission) or in forward gear (if manual transmission).

**Do Not** leave it in neutral.

Turn off the engine.

Chock the wheels. When utilizing chocks, make sure they are on the correct side in reference to the slope. Assure the chocks are approved to hold the weight of the vehicle and will grip on the road surface.

Be aware of safe parking on slopes during an incident when moving a vehicle frequently. When using engines in pumping operations along a roadway, it is easy to get complacent with procedures. Realize when the vehicle is on a slightly different slope and requires placing chocks differently. It is the driver's responsibility to assure not only that the vehicle is operated safely but is positioned and parked safely.

**With this incident winding down Do not Let you SA down!**

## FINANCE MESSAGE

- If you are within three (3) days of **demobing**, stop by the Finance trailer in the evening and review your time for missing dates and associated documentation such as resource order, casual hire if AD, or contractor agreements.

- *One way to see if you are missing anything is to stop by finance and look at a draft of your OF288 or OF286*
- *A better way to check on your time, is to email finance and we can email you back with a draft and what may be missing or not.*
