**Strategic Direction**  
 The SRF Lightning Complex is managed with a full suppression strategy. Firefighting resources will follow risk-based decision making and implement tactics that offer the highest probability of success to achieve the strategy of suppressing the fire and restoring suppression related damages while protecting local values.

Values at risk include the safety of the public and firefighters; privately and tribally held timberlands; the communities and outlying areas near Willow Creek, Hawkins Bar, Burnt Ranch, and Salyer; water, transportation, electrical infrastructure as well as natural and cultural resources.

**Leaders' Intent**  
 Everyone will work as a team to provide the highest level of service and safety while assigned to the incident. All assigned resources will ensure transparent, timely, and accurate communication at all levels of the incident while working to strengthen relationships with each other and with cooperators. All incident personnel should be prepared to take appropriate actions regarding:

- Safety - including the identification and mitigation of hazards to yourself and others.
- Timely and thoughtful risk-based decision making.
- Manage fatigue by taking breaks and maintaining work/rest cycles.
- Professional behavior, conduct, and timely/effective communication.
- Manage health and wellbeing and environmental impacts by following common sense, practicing good hygiene, communicable disease mitigations, and recycling.

**Management Objectives**

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Coordinate public information to provide timely and continuous situation updates to affected agency partners, cooperators, and public.
- Coordinate suppression and repair activities with READs to minimize impacts on natural and cultural resources.
- Effectively manage and track costs for all incidents identified within the SRF Lightning Complex.
- Reduce incident generated waste by encouraging recycling throughout the incident.

**Control Objectives**  
 Prevent the fire from spreading to private property, surrounding communities and values at risk.

**Campbell Fire**  
 - Keep the fire within the current perimeter.

**Ammon Fire**  
 - Keep the fire within the current perimeter.

Even with this winding down nutrition is still a critical part of the health and safety of wildland fire suppression personnel. This is the fuel for the body to perform the work and maintain cognitive abilities.

**Consider the following key points when choosing your meal:**

3 major energy sources in food: carbohydrates, protein, and fats.

**Carbohydrates** offer an immediate source of energy for your body. They provide the fuel for your muscles and organs, such as your brain.

**Proteins** are the basic building blocks of the human body; made up of amino acids that help build muscles, blood, skin, and internal organs.

**Fats** is an essential nutrient that provides energy, energy storage, insulation, and contour to the body.

To keep the body fueled eating every two hours 150-300 calories during the work shift to maintain blood glucose and energy levels.

**Carbohydrates:**

Carbohydrates are your body's first choice for fuel. If given a choice of several types of foods simultaneously, your body will use the energy from carbohydrates first.

If you do not eat enough carbohydrates, the following can occur:

- Fatigue.
- Muscle cramps.
- Poor mental function.

Fire camp lunches are designed to allow firefighters small amounts of food that can be easily eaten throughout the work shift.

Remember follow the 8x8 rule, which recommends drinking eight 8-ounce glasses, or about half a gallon of water daily. Good rule of thumb 2-bottle of water to 1 sport drink and avoid energy drink before and during shift.

## FINANCE MESSAGE

- If you are within three (3) days of **demobing**, stop by the Finance trailer in the evening and review your time for missing dates and associated documentation such as resource order, casual hire if AD, or contractor agreements.

- *One way to see if you are missing anything is to stop by finance and look at a draft of your OF288 or OF286*
- *A better way to check on your time, is to email finance and we can email you back with a draft and what may be missing or not.*
