FORECAST NUMBER: 31	TYPE OF FIRE: Wildland
FIRE NAME: Mosquito CA-TNF-001371	OPERATIONAL PERIOD: 10/21/2022 – 10/23/2022
DATE ISSUED: 10/20/2022	TIME ISSUED: 15:00 Hrs.
UNIT: Tahoe and El Dorado NF.	SIGNED:  Digitally signed by KEVIN OSBORNE Date: 2022.10.20 16:23:40 -0700 Kevin Osborne (LTAN) 530-782-2712

INPUTS

WEATHER SUMMARY: Friday will see increasing SW to W winds ahead of an approaching system, though these winds will be accompanied by increasing RH values and lower temperatures. Precipitation chances highest Saturday. Northerly winds and lowering RH on Sunday may impact the area.

*See daily Weather Forecasts for details *

	Day	Night
Sky Weather	Increasing clouds Friday and Saturday, clearing Sunday	Generally cloudy through Saturday evening, then clearing
Temp (F)	Cooling, upper 70s Friday, then upper 50s	Much cooler, low 40s to upper 30s
RH %	Mid 20's on Friday, then increasing to near 50% Saturday and dropping to teens Sunday	Much better recovery over 50%, near 100% Saturday.
20 ft. Winds	Winds increasing Friday through the forecast period. SW to W winds Friday and Saturday become northerly Sunday. Gusts 20-25 mph.	Strongest winds expected Friday night into Saturday morning. Gusts reaching near 30 mph. General winds will overpower diurnal winds.
Stability	Increasing winds and instability will result in good ventilation.	Increasing winds and instability will result in good ventilation.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Fire activity and satellite heat detections have diminished in recent days because of consumption of most interior fuels. For Friday, potential for active fire spread remains in areas of isolated heat with unburned fuels or significant accumulations of needle fall. Increasing winds from the SW and W will be adverse to control lines on the eastern flanks of the fire, though limited residual heat, cooler temperatures, and increasing RH values reduce fire behavior concerns. Increasing overnight RH values will also reduce fine fuel availability and reduce fire behavior potential.

Saturday has the least potential for active fire behavior due to highest RH values, cloud cover and precipitation chances. There will be minimal fire spread and smoke production in these conditions, with low to non-existent flame lengths.

From Sunday onward, winds become more northerly with some periods of breeziness. Expect continued elevated overnight RH values but a drop in daytime humidity back to low 20's or upper teens. Residual moisture from Saturday precipitation should continue to limit fire behavior potential. However, if precipitation does not occur and winds impact areas of heat near control lines, moderate spread and low flame lengths are possible.

Consider reviewing pocket cards for local knowledge on fire environment triggers and thresholds:

El Dorado NF ERC Y Pocket Card:
NOTE - wind is NOT part of ERC

Tahoe NF West Side BI Y Pocket Card:
NOTE -wind IS a part of BI

SPECIFIC:

Branch 10 (North): Increasing winds Friday and Saturday are across lines in Div. K&J, though no problematic fire behavior expected. Higher elevations have best chance for precipitation Saturday.

Branch 25 (South): Increasing winds Friday and Saturday are adverse to lines in Div. M & R, though no significant movement expected due to elevated RH and reductions in overall remaining heat. Winds on subsequent days adverse to Div. Y & U, though no control issues anticipated. Best chances for precipitation at highest, eastern elevations on Saturday.

AIR OPERATIONS:

Air operations may be challenging as breezy winds develop and change direction over the coming days. Precipitation and clouds may also inhibit aerial operations. Fire behavior not expected to necessitate air resources.

SAFETY

The fire area has not had a significant wind test for multiple weeks. Though problematic fire behavior is not expected, winds can still have impacts on patrol and repair operations. **Be aware of fire weakened trees, hangers, and widow-makes as winds increase and change direction.**

Trailer @ Placerville Fair Grounds

October 22, 2022

Traffic is increasing with the nice weather and weekend. Tourists, semi-trucks, and Fire traffic create a Watch Out situation:

1. The obvious situation as pictured above (replace “accident” with “fire”) as non-local traffic sight-see down the highways.
2. Your chances of interacting with people who have not been living the Mosquito Fire from day one and who may be pissed that they can’t just drive when and where they want.
3. Many of us have been doing this fire season for more than one roll out, and may be a little tired by now.

Please continue to be your professional and considerate selves when you meet someone on the road. When you encounter a not so happy motorist, take a deep breath and consider your LCES before you engage.

MOSQUITO FIRE DEMOB MESSAGE

DMOB unit phone # 1-530-264-8701

Currently, the ICP at Placerville will be the main location where resources will be released. A tentative release page will be in the IAP identifying resources that are timing out and/or excess to the incident.

The time identified for your release is the time to report to finance. You can pick up the 221-checkout sheet in the morning prior to that and gather the other required signatures.

If you have checked out any communication equipment, you will need to return it to the communication trailer located at the Placerville fairgrounds.

For incident replacement, fill out a general message and send it electronically to the ordering manager at CIIMT10ordering@gmail.com. If you have any questions, please call Tracey at 1-916-201-4366 and she can help you with the process.

There is ground support at Placerville for post vehicle inspections and fuel. Currently, vehicle inspections can be done at Sugar Pine so equipment does not have to travel to the ICP.

If you are at Sugar Pine, you may utilize sending in your finance documents electronically. Please follow the guidelines in the finance message and have **patience** when receiving your draft or final documents.

Finish the process by coming back to DMOB with your completed 221 or calling the number above to set your travel home.
