FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 32	TYPE OF FIRE: Wildland
FIRE NAME: Mosquito CA-TNF-001371	OPERATIONAL PERIOD: 10/24/2022 – 10/27/2022
DATE ISSUED: 10/23/2022	TIME ISSUED: 15:00 Hrs.
UNIT: Tahoe and El Dorado NF.	SIGNED:  Digitally signed by KEVIN OSBORNE Date: 2022.10.23 14:04:07Z Kevin Osborne (LTAN) 530-782-2712

INPUTS

WEATHER SUMMARY: Weather will continue to be highly variable, alternating between low-pressure areas and weak high-pressure ridges moving through the fire area. Main initial concerns will be brief return of low RH values and poor overnight recoveries along with some breezy winds lingering this morning. Better RH recoveries, cloudy skies and slight chances for precipitation return Tuesday and Wednesday. On Thursday, expect a return of clear, dry weather with some enhanced winds. Wind direction generally SW-W through the forecast period, Monday early morning lingering N to NE winds being the exception.

****See daily Weather Forecasts for details ****

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Light precipitation and good overnight humidity recoveries over the first part of the past weekend have reduced the availability of the overall fuel complex compared to previous weeks under the warm and dry high pressure that dominated the weather. This is evidenced by the recent drop in ERC values to well below the 90th percentile, though still above average for the time of year. Last night's RH recovery was not great, but the preceding days will continue to impact overall fuels availability long enough to get into the next period of elevated RH and slight chances for precipitation on Tuesday.

On Monday, expect any areas of remaining heat to have sufficient drying to produce visible smoke, particularly when exposed to sunlight. However, the reduced availability of the overall fuel complex should keep any active spread to very slow rates of spread and minimal flame lengths. Direct actions and mop-up by hand will be effective for any heat detected close enough to control lines to require attention. **The drying weather, uptick in winds on previous days, and clear skies may increase visibility of smoke for the public and thus increase calls for service, though no control issues are expected.**

From Tuesday onward, the return of cloudy weather with elevated daytime RH values, reasonable overnight RH recovery and slight chances for precipitation will further mute fire behavior, resulting in minimal to no active fire spread. Dry and clearer weather returns briefly on Thursday, with little change expected in fire behavior.

Consider reviewing pocket cards for local knowledge on fire environment triggers and thresholds:

El Dorado NF ERC Y Pocket Card:
NOTE - wind **is NOT** part of ERC

Tahoe NF West Side BI Y Pocket Card:
NOTE -wind **IS** a part of BI

SPECIFIC:

Branch 10 (North): No control issues expected as fire has reached 100% containment.

Branch 25 (South): No control issues expected as fire has reached 100% containment.

AIR OPERATIONS:

Fire behavior is not expected to require the use of aerial resources. If air resources are needed for logistical support or medical extraction, diminishing winds should be conducive but periods of breeziness in afternoon/ evening are possible. No significant smoke inversions expected due to alternating low-pressure systems providing good dispersion. Cloud cover mid-week may hamper air operations and will need to be assessed for specific mission requirements.

SAFETY

Mop-up and suppression repair are critical elements of overall successful fire suppression and fire management. Treat these missions with as much caution and thoughtfulness as an active fire suppression mission.

Be aware of stump holes, ash pits, snags and other areas that become more hazardous the longer fire burns and consumes organic material.

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> • Watch for rocks and wildlife, especially from dusk to dawn. • SLOW DOWN! Watch your speeds or come to the “front of the line” DEMOB • Narrow, steep, unforgiving native surfaced roads within the fire area. • Drive defensively! Expect the unexpected around every curve. • Observe posted speed limits. Always use headlights
All	WEATHER	<ul style="list-style-type: none"> • Winds will enhance wind chill factor effecting resources at camps. • Check for hazard trees & “widow-makers” in sleeping areas prior to using • Secure tents and other loose items.
ALL	FATIGUE/COMPLACENCY	<ul style="list-style-type: none"> • Be alert for signs of fatigue and take breaks as necessary. • Maintain 2:1 work/rest ratio. • Repeated assignments in the same area can lead to complacency. • A feeling of being satisfied with your safety may be a sign of complacency.
ALL	HAZARD TREES	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p. 22). • Limit number of personnel around snags and their exposure time; fallers must be qualified for trees being fallen. • Use all required PPE. Minimize exposure to personnel. • Be especially alert around snags during wind events or changing wind direction.
ALL	LONG MEDICAL TRANSPORT TIMES	<ul style="list-style-type: none"> • Always be thinking “How are you going to move this patient to care”. • Incorporate transportation times into your “tactical operational plan”. • Don’t rely on aircraft.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Answer questions when asked by others. Ask for intel when you don’t know the plan. • Ensure all personnel are familiar with the incident communications plan.
ALL	EXTREMELY STEEP TERRAIN AND ROLLING MATERIAL	<ul style="list-style-type: none"> • Evaluate necessity to send personnel in areas with limited access. • Concentrate on your footing placement; take your time. • Post lookouts to warn of rolling debris. SHOUT out to warn others. • Look Up, Down and Around Frequently.
ALL	CHIPPING OPERATIONS	<ul style="list-style-type: none"> • Ensure JHA is provided and signed by operator. • Only qualified personnel will feed chipper. Wear proper PPE.
ALL	MOP UP	<ul style="list-style-type: none"> • Conduct thorough briefing for all personnel (inside rear cover IRPG). • Use all required PPE, including eye protection. • When looking at interior smokes determine if it makes tactical sense to send firefighters in.
ALL	HEAVY EQUIPMENT/DOZERS	<ul style="list-style-type: none"> • Utilize appropriate PPE and other equipment safety mechanisms. • Take time to understand new types of mechanical equipment and their capabilities and limitations. • Maintain safe working distances. Utilize observer or spotter. • Ensure the use of effective communication (radio, hand signals).
ALL	NON-FIRE PERSONNEL IN AREA	<ul style="list-style-type: none"> • Educate and advise public of fire area closure. • Use chain of command to request Law Enforcement if needed.
ALL	ENVIROMENTAL HAZARDS	<ul style="list-style-type: none"> • Manage trash in spike camps to avoid attracting bears • Keep alert for wildlife, rattlesnakes, insects, and plants. Watch footing and hand placement around rocks. • Pick up and remove all trash from fire line. Don’t allow storage of food in tents
ALL	ATV/UTV USE	<ul style="list-style-type: none"> • Ensure equipment is inspected and safe to use. • Ensure operator is trained and certified to operate. • Ensure operator has proper PPE according to the Redbook/RMA.
ALL	INFECTIOUS DISEASE	<ul style="list-style-type: none"> • Maintain 6’ foot distance whenever possible. Wear masks when appropriate. • Do frequent handwashing/sanitizing and disinfecting common surfaces. • Notify MEDL if any symptoms arise.

Communication is a two way street. When communication becomes a one way, it becomes a traffic jam and turns into an issue.

Whatever it is, clear the communication lines in a respectful manner and make it a smooth safe flowing two way street!

MOSQUITO FIRE DEMOB MESSAGE
DMOB unit phone # 1 510-951-1476

Currently, the ICP at Placerville will be the main location where resources will be released. A tentative release page will be in the IAP identifying resources that are timing out and/or excess to the incident.

The time identified for your release is the time to report to finance. You can pick up the 221-checkout sheet in the morning prior to that and gather the other required signatures.

If you have checked out any communication equipment, you will need to return it to the communication trailer located at the Placerville fairgrounds.

For incident replacement, fill out a general message and send it electronically to the ordering manager at CIIMT10ordering@gmail.com. If you have any questions, please call Tracey at 1-916-201-4366 and she can help you with the process.

There is ground support at Placerville for post vehicle inspections and fuel. Currently, vehicle inspections can be done at Sugar Pine so equipment does not have to travel to the ICP.

If you are at Sugar Pine, you may utilize sending in your finance documents electronically. Please follow the guidelines in the finance message and have **patience** when receiving your draft or final documents.

Finish the process by coming back to DMOB with your completed 221 or calling the number above to set your travel home.
