Time From:	0700	Time To:	0700																		
3. Objective(s): <u>Leaders Intent</u> <ul style="list-style-type: none"> - An aggressive full suppression strategy will be implemented on the Mosquito Fire. Efforts will be made to minimize impacts to private property, critical infrastructure, commercial timber assets, and surrounding communities through the application of well-planned tactical responses. 																					
<u>Management Objectives</u> <ul style="list-style-type: none"> - Ensure that strategies and tactics provide for firefighter and public safety through the application of sound risk management principles. - Minimize the threat and impacts to private property, communities, commercial timber assets, and critical infrastructure by employing tactics that have the highest probability of success while minimizing firefighter exposure. - Establish and strengthen cooperator, partner, tribal, and stakeholder relationships through frequent, transparent, and open communication. - Provide timely and accurate information regarding fire activity and potential smoke impacts to the communities, cooperators, and stakeholders through personal contacts, meetings, social media, and working closely with the local media outlets. 																					
<ul style="list-style-type: none"> - Keep the fire North of the American River. - Keep the fire South of Iowa Hill Road and Sugarpine Road. (FS-10) - Keep the fire East of American Canyon to Highway 193. - Keep the fire West of Ice House Road.

Mosquito Weather Forecast

FORECAST NO: 1
PREDICTION FOR: 0700-0700
SHIFT DATE: 9/10-9/11
FORECAST ISSUED: 2000 9/9

NAME OF FIRE: Mosquito
UNIT: TNF
SIGNED: Ryan Walbrun-IMET
Incident Meteorologist *R. Walbrun*

WEATHER DISCUSSION: Smoky skies will be the main driver of the fire environment as winds remain fairly light with some passing clouds from the remnants of Kay. General winds will be from the Southwest but generally light with smoke and shading limiting any strong canyon winds. The best chance of any thunderstorms looks to stay south of the fire and Highway 50. The general trend will be slight cooling and higher humidity compared to previous days as the ridge slowly weakens with thick smoke.

SATURDAY Weather: Thick smoke through midday or early afternoon with passing mid and high clouds. Partial clearing possible mid to late afternoon.

TEMPERATURES: 90-95 below 2000 feet and 84-89 2000-4000 feet. Temps cooler due to smoke shading.

MINIMUM HUMIDITY: Values 22-30% A trend of 4-8% higher due to smoke and onshore flow.

20 FT WINDS:

RIDGETOP - South 5 mph early then Southwest 5-10 mph afternoon hours.

SLOPE/VALLEY - Light through midday then upcanyon 3-7 mph gusts 10-12 mph late afternoon.

STABILITY/INVERSION: Strong morning inversion only slowly lifting by 1300 hours. **LAL:** 1

SATURDAY NIGHT: Heavy smoke settling over the area.

TEMPERATURES: 66-74

MAXIMUM HUMIDITY: 45-50% a trend of 5-10% wetter

20 FT WINDS:

RIDGETOP - Southwest 5-10 pm through sunset then turning East 4-8 mph.

SLOPE/VALLEY - Evening upcanyons 4-8 mph thru sunset then East downcanyon 2-5 mph

STABILITY/INVERSION: Strong inversion setting up overnight. **LAL:** 1

OUTLOOK FOR SUNDAY: General winds remain Southwest on the ridges 5-10 mph with smoke being the main driver of the fire environment. About a 15% chance of thunderstorms coming off the crest and over the fire Sunday afternoon. Otherwise similar temperatures and humidity though a trend of slightly cooler and wetter.

EXTENDED FORECAST: A weak trough along the West Coast will keep onshore winds in place with temperatures trending near or even slightly below normal this week. Highs in the 80s with lows in the 60s. No strong wind events with a dry forecast.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 1	TYPE OF FIRE: Wildland
FIRE NAME: Mosquito	OPERATIONAL PERIOD: 9/10-9/11, 0700-0700
DATE ISSUED: 9/9/2022	TIME ISSUED: 2000
UNIT: CA-TNF-001371	SIGNED: 
Typed/printed: Jonathan Pangburn, FBAN	

INPUTS

WEATHER SUMMARY: WARM WITH LIGHT WINDS

Slightly higher RH with better overnight recovery.

Temp: 88-92 max; 66-70 min

RH: 20-25% min; 50-55% max

Wind: SW 5-8 day; NE >5 night

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Fuels are critically dry with record-breaking ERC and BI values. Fire has burned actively overnight under poor RH conditions. Smoke coverage will be the big unknown factor. If the smoke clears, expect rapid rates of spread and plume creation.

In the absence of weather conditions outside the forecast or extreme fire behavior conditions expect:

	Max. Flame Length	Max. Rate of Spread	Spotting	Probability of Ignition
Shrub	10-20' (3-6 m)	60-70 ft/min (1-1.3 km/hr)	< 0.3 mile (0.5 km)	75%
Timber Understory	7-10' (2-3 m)	10-15 ft/min (0.2-0.3 km/hr)	< 0.2 mile (0.3 km)	75%

****minimum safety zone size is 1 acre (0.4 Ha) for a Strike Team of Engines in Brush.**

****minimum safety zone size is 0.3 acres (0.1 Ha) for a Strike Team of Engines in Timber Understory.**

SPECIFIC:

Branch III/IV: Expect continued upslope runs toward Foresthill Divide.

Branch X: Prominent ridgelines in alignment with wind. Potential for larger growth in East Branch El Dorado Canyon & North Branch Brushy Canyon.

Branch XV: With less alignment, fire will be driven by fuels. Don't count on the King Fire being a barrier to fire spread with 8-year-old brush.

Branch XX: Lower growth against the diurnal wind pattern.

AIR OPERATIONS:

Anticipate poor visibility with little improvement in smoke coverage.

Mixing height: 4,000 ft. AGL, Transport winds: W/SW 5-10 mph, Sunrise 0640, Sunset 1919.

SAFETY

Lower visibility from smoke/inversion. Volatile fuels + very steep canyons present a chance for major fire growth and fire behavior.

Fuels and Fire Behavior Advisory

Northern California

September 2nd, 2022

Subject: Potential for extreme fire behavior due to critically elevated fire danger indices, low live and dead fuel moistures, and very hot and dry conditions across much of northern California.

Discussion: An extended period of hot, dry weather with embedded periods of enhanced winds will impact Northern California. The elevated fire weather concerns with fuels reaching their yearly minimum moisture values will create conditions conducive to long range spotting, rapid fire growth, and high resistance to control.

Difference from normal conditions: The current values for Energy Release Component (ERC) are at or above the 90th percentile for the majority of Northern California, with live fuel moistures dropping to critical levels as herbaceous and woody fuels cure. These conditions will be exacerbated by a predicted heat wave, resulting in anomalous daytime highs with little relief in temperature or humidity recovery overnight. Some PSA's, may reach daily record ERC values, with all covered PSA's predicted to reach or exceed the 97th percentile for an extended period. The combination of extreme ERC's with high temperatures and poor overnight humidity recovery is highly correlated with extreme fire behavior in Northern California.

Concerns to Firefighters and the Public:

- The advisory coincides with the Labor Day holiday weekend that is likely to result in increased outdoor recreation and visitor use to public lands across Northern California. The increase in public use carries an increased risk of fire starts as well as potential for evacuations of visitors/ recreational users in the event of a fire starting.
- Energy Release Component (ERC) in areas covered by this advisory are at or above the 90th percentile and are expected to approach or exceed the 97th percentile. **Anticipate increased spread rates, long range spotting, and active nighttime burning.**
- The combination of persistent drought, a building heat wave, and a very dry atmosphere will continue to decrease already low fuel moisture values:
 - 1000-hour fuel moistures are below average and approaching the 90th percentile,
 - Live woody fuel moisture in brush is near or slightly below average, making them readily available and will likely reach critical levels because of the forecasted hot, dry weather.
 - The above average herbaceous fuel load at low and mid elevations (below 5,000 ft.) is fully cured, with high elevation herbaceous fuels rapidly curing during the hot, dry forecast.
 - Higher than average surface fuel loading is present in areas that experienced winter snow and ice storms in the Coast Range and northern Sierra Nevada.

Expect fires to ignite easier and spread faster. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.

- Periods of enhanced winds are expected during the hot and dry period. Given the current and anticipated fuels conditions, increases in winds will make direct attack of any new starts difficult and may hamper use of aerial resources.
- Review the current [North Ops Outlooks](#) and [national fuels and fire behavior advisories](#).

Mitigation Measures:

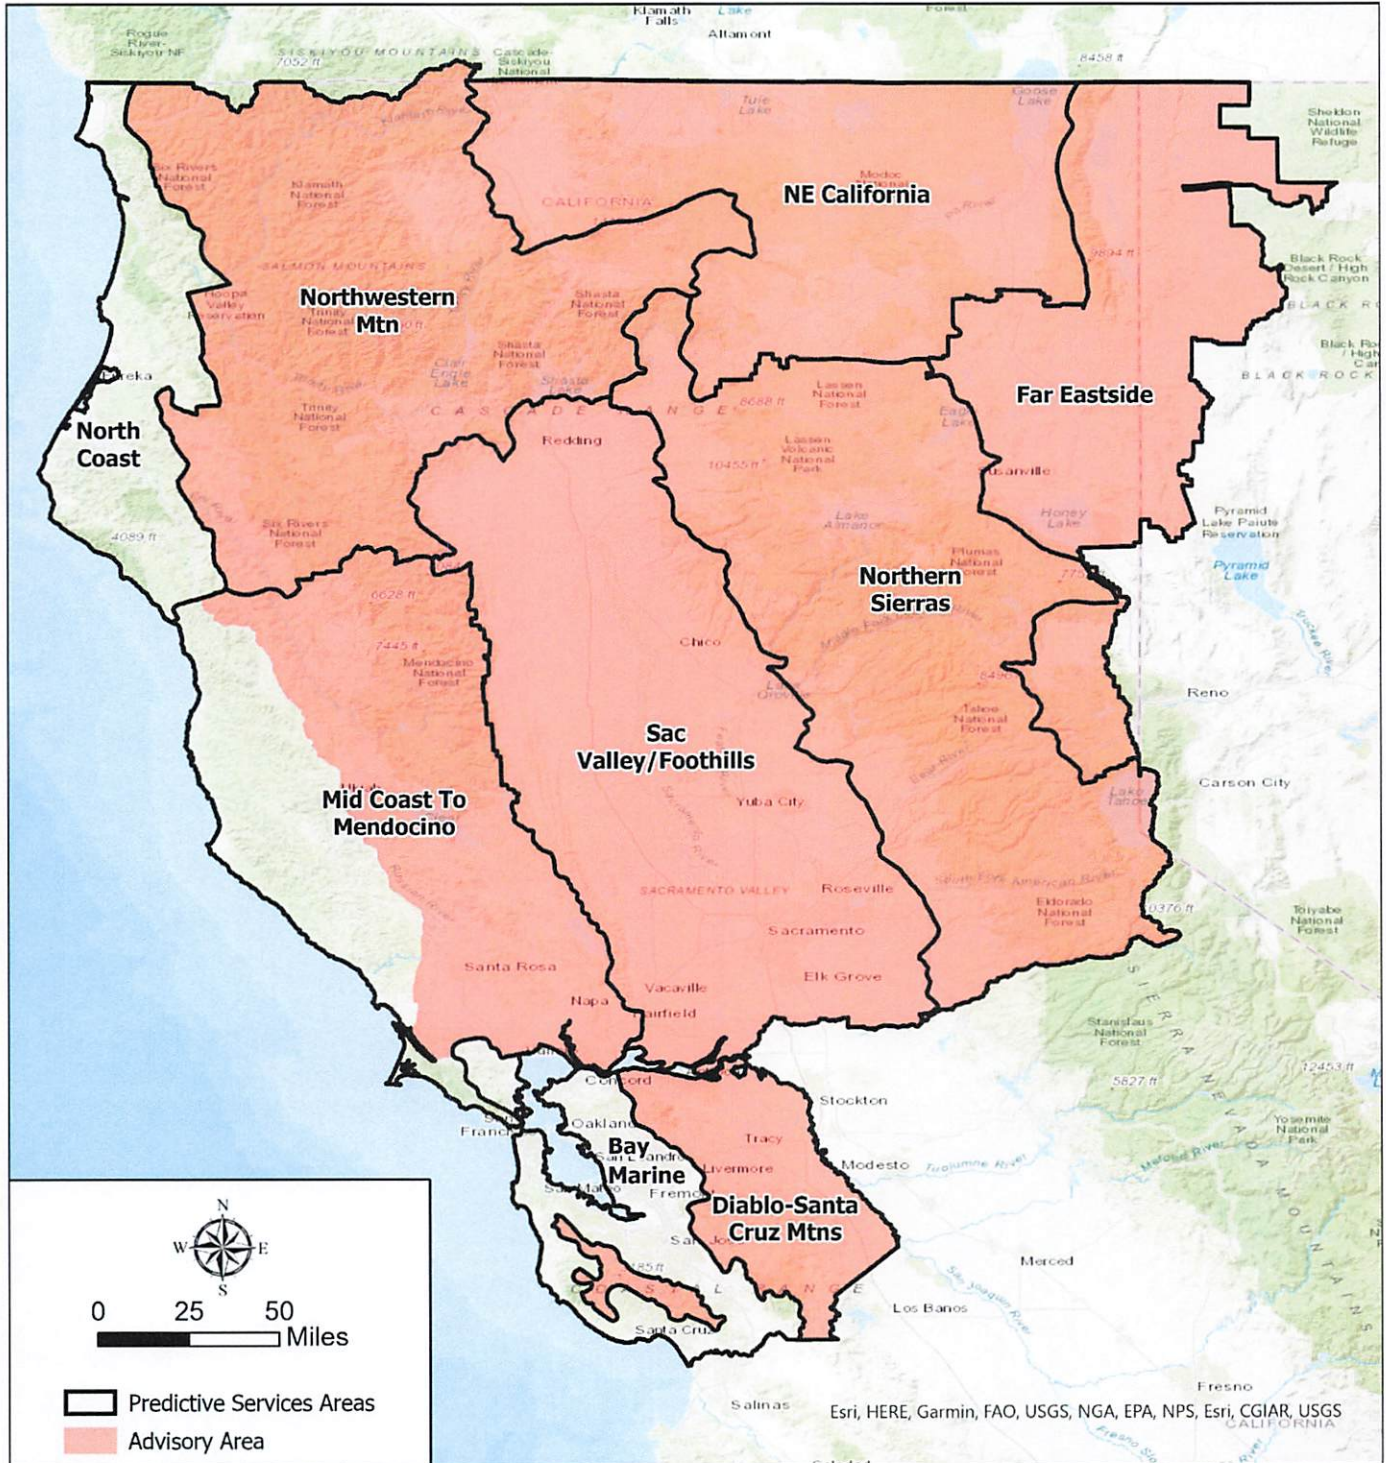

- Suppression actions need to be based on good anchor points, escape routes, and safety zones. **Remember LCES. Experienced lookouts are essential under these conditions.**
- Base all actions on current and expected behavior of the fire. **Augment initial attack resources as incident activity dictates**
- Fire managers should be aware of high use recreation and visitor sites in their area. **The holiday weekend will bring increased visitor use, increasing risk of starts during critical fire weather.**

Area of Concern: Northern California except for the following Predictive Service Areas: North Coast, Bay Marine, and west of Highway 101 in Mid-Coast to Mendocino.

Mosquito Incident – Safety Message

INCIDENT CA-TNF-001371

DATE:9/10/22 – 9/11/22 TIME:0700-0700 Day/Night

Major Hazards and Risks:

- Steep areas with great potential for rolling rocks, trees, etc.
- Narrow, winding roads with limited visibility due to smoke.
- Winds increasing or changing directions.
- Continued high temperatures and low humidity.
- Spot and slop fire could easily become explosive!!!

CONTINUE TO HYDRATE!!! HYDRATE!!! HYDRATE!!!!

Safety Around Heavy Equipment Operations

- Never assume that the operator can see you, especially at night.
- Ensure that communications are established with the operator.
- Use hand signals if other communications are unavailable.
- Maintain a 50' to 100' exclusion area around equipment.
- Use a spotter when backing.
- Beware of flying objects from masticators.

Air Operations

- Follow aviation watch out situations on page 62 of the 2022 IRPG.
- Don't plan on air resources for medical transport or resupply.
- Refer to page 74 of the 2022 IRPG for properly directing bucket drops.
- Ensure positive communications with all air resources.
- Look for flying objects and debris from nearby retardant and water drops.
- Be sure to always monitor the air to ground frequency so that you are not caught off guard.

Safety zones and escape routes... know where they are *before* you need them!!

3. SAFETY ZONES AND ESCAPE ROUTES NOT IDENTIFIED

INCIDENT RISK ANALYSIS

ICS (215A) DAY/NIGHT SHIFT

BR/DV	HAZARDOUS ACTIONS – CONDITIONS	MITIGATIONS – WARNINGS – REMEDIES
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> • Are you seeing what we have predicted? • Conduct thorough assessments before starting work. • Ensure LCES is in place • Plan & communicate your exit strategy with your crew and adjacent resources. • Provide additional briefing for new resources and maintain communications. • Outflow winds from thunderstorms could negatively affect fire behavior.
ALL	HEAT RELATED ILLNESS	<ul style="list-style-type: none"> • Drink 2 bottles of water to 1 bottle of sports drink. • Take frequent breaks, minimum of 10 minutes every hour. • Recognize symptoms of HEAT RELATED ILLNESS which include low energy, cramping, headaches, dizziness, poor rest, poor eating habits, hot skin, and lack of sweating.
ALL	DIRECT / INDIRECT LINE CONSTRUCTION	<ul style="list-style-type: none"> • Establish and maintain LCES. • Locate line in favorable location, lighter fuels, and gentler topography when possible. • Utilize natural or existing barriers. Watch for and communicate spot fires. • Stay in front of heavy equipment at least 100 feet or behind at least 50 feet. • Do not approach heavy equipment until seen and acknowledged by the operator • Watch for stump holes and ash pits.
ALL	WILDLAND URBAN INTERFACE OPERATIONS	<ul style="list-style-type: none"> • Maintain continuous Situational Awareness based upon the fire environment, observed fire behavior, hazards and incident objectives. • Refer to IRPG Page 11-15 for WUI preparation, preplanning, and hazards. • Be active and engage in defense preparations & do not wait for the fire to arrive. • Beware of unknown chemicals when working near structures or garden plots. • Beware of downed powerlines • Be decisive in tactical engagement. Know when to engage or not. • Establish management decision points, Safety Zones, TRA's, and Escape Routes.
ALL	AIR OPERATIONS	<ul style="list-style-type: none"> • Follow "Aviation Watch-Out Situations" on page 62, IRPG. • Do not plan on air resources for tactical support or medical transportation. • Refer to page 74, IRPG for directing bucket drops. • Ensure positive communication with all air resources. • Ensure crews are aware of water/retardant drop zones.
ALL	STEEP TERRAIN & ROLLING DEBRIS	<ul style="list-style-type: none"> • Maintain 8 ft. - 10 ft. spacing when working & walking. • Do not work above any personnel. • Evaluate necessity to send personnel in areas with limited access.
ALL	FIRING OPERATIONS	<ul style="list-style-type: none"> • Only personnel trained in the use of each device will be authorized to use firing equipment. • Ensure that all personnel are briefed and prepared for firing and holding operations. • Ensure that all ground and aerial ignition plans are approved and signed by the IC prior to implementation
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines on page 20, IRPG. • Limit number of personnel around snags and their exposure time • Fallers must be qualified for the trees being felled. • Be alert around hazard trees during wind events, even green trees. • The hazard zone extends a minimum of 2½ tree lengths. • Avoid parking vehicles or taking breaks under or near hazard trees.
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on uphill side. Use spotters when backing or turning around. • Practice "Defensive Driving" techniques. Assume other drivers are fatigued and complacent. • Use warning lights when working on roads or traveling in smoke and heavy dust • Drive at or below posted speed limits. • Use chock blocks, turn wheels into hill. • Be alert for wildlife. Dusk to Dawn pose the greatest potential for accidents. • UTV operators shall wear DOT approved helmets and have certification to drive.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. • Answer questions when asked by others. Ask for intel when you don't know the plan. • Ensure all personnel are familiar with the incident and IA communications plans.

INCIDENT NAME:
Mosquito Fire

OPERATIONAL PERIOD:
0700 - 0700
September 10-11, 2022
Date/Time Prepared: 09/09/2022 – 1400 hrs

**MOSQUITO FIRE
Finance Process
CA-TNF-001371**

All **FEDERAL Resources** for the MOSQUITO fire please use one of the following methods to turn in your Shift Ticket/CTR using the format showing under New Resources:

- 1) Email to: 2022.mosquito.finance@firenet.gov,
- 2) Drop off to Federal Finance in the 1st building on your left as you come into the Roseville Fairgrounds marked FINANCE.
- 3) Turn them into the Federal TIME person at briefing.

Submit Equipment Shift Tickets or Crew Time Reports (CTRs) daily.

FOR NEW RESOURCES CHECKING IN:

Please either email all document for your Federal Resource to 2022.mosquito.finance@firenet.gov or drop off all documents when checking in the building marked Finance after checking in.

Contract Equipment **MUST** have their INSPECTIONS prior to seeing Finance or submitting documents to the email.

Email Subject Line: TIME (or CTR, EQUIPMENT, SHIFT TICKET)/Resource Order No./Resource Name/Position Code – in the subject line with your information

(Example: TIME/O-200/SBear/Safety)

Email or bring in all documents that pertain to your assignment:

Agency Overhead	Agency ADs / EFFs	VIPR Resources	Contract / Agency Crews	Cooperators
Resource Order Crew Time Reports (CTRs)	Resource Order Casual Hire Form CTRs	Resource Order VIPR Agreement Schedule of Items Inspections Shift Tickets	Resource Order Manifest Agreement / Contract Schedule of Items Inspections CTRs	Resource Order Agreement Shift Tickets / CTRs

Please include your email address and phone number in the body of the email when sending your documents.

Any questions, please call:

FEDERAL TIME: 510-507-5898

FEDERAL CONTRACT EQUIPMENT: 510-495-9780

COMP / CLAIMS

Elaine Downing COMP Unit Leader

928-486-5295

Elaine_Downing@firenet.gov

For federal employees associated with the Mosquito Fire, if you are injured, please contact the COMP UL for the Authorization for Treatment (CA-16). We can issue the form directly to the hospital or clinic, but we need full names and SSN for the required forms prior to being able to do that. The employee or supervisor should contact me as soon as possible or upon arrival at the hospital, whichever is convenient.

For claims there are different forms needed based on the circumstances of the property loss or damage. Please contact me first to find out which forms are appropriate for your situation, and what additional information might be needed. This will expedite the process.

Unserviceable items must be turned into COMP/FINANCE if you are unable to replace at Supply. If items are lost or damaged on the fire line, the fire suppression module must provide a copy of the module's standard inventory with the documentation of broken or unserviceable items.

Motor Vehicle Accident	Property Loss or Damage of items that cannot be replaced in Supply
<i>SF-91, Motor Vehicle Accident SF-94 Witness Statement (if app)</i>	<i>TEAM 5 MODIFIED 289</i>

Human Resource Message

SUICIDE PREVENTION WEEK
SEPTEMBER 4 THROUGH SEPTEMBER 10, 2022
WORLD SUICIDE PREVENTION DAY
SEPTEMBER 10 EVERY YEAR

Mental Health is part of our overall health. Our minds and bodies have to be in sync to help us to achieve and maintain optimal overall health and performance.

For so long there has been a stigma around mental health. Here are some facts:

- Suicide is the 12th leading cause of death in the US.
- In 2020, 45,979 Americans died by suicide.
- In 2020, there were an estimated 1.20 Million suicide attempts. (And that is just what is reported).
- Firefighters and Police Officers are more likely to die by suicide than in the line of duty.

These are just a few troubling facts. Be part of the solution. Let's break that cycle and silence. Let's be part of the movement to stop suicide. We are all human, and have emotions that, when expressed, used to be deemed as a sign of weakness. That is not true. If you or anyone you know is struggling, there is support and help. Reach out, listen up, speak up.

There is a new number 988. Call from anywhere for suicide and crisis prevention.

National Suicide Prevention Hotline: 800-273-8255

REQUEST ACCESS TO ARCGIS FIELD MAPS

for interactive mobile maps and field data collection

STEP 1

Request a NIFC ArcGIS Account if you do not already have one

NIFC Account Request Form
<https://bit.ly/3OLBG1W>

STEP 2

Request access to collect and/or view incident data

Email Dawn_Hutchinson@firenet.gov
Subject: Request Mosquito Access Include your name, position, and NIFC login in your email.

STEP 3

Download ArcGIS Field Maps app

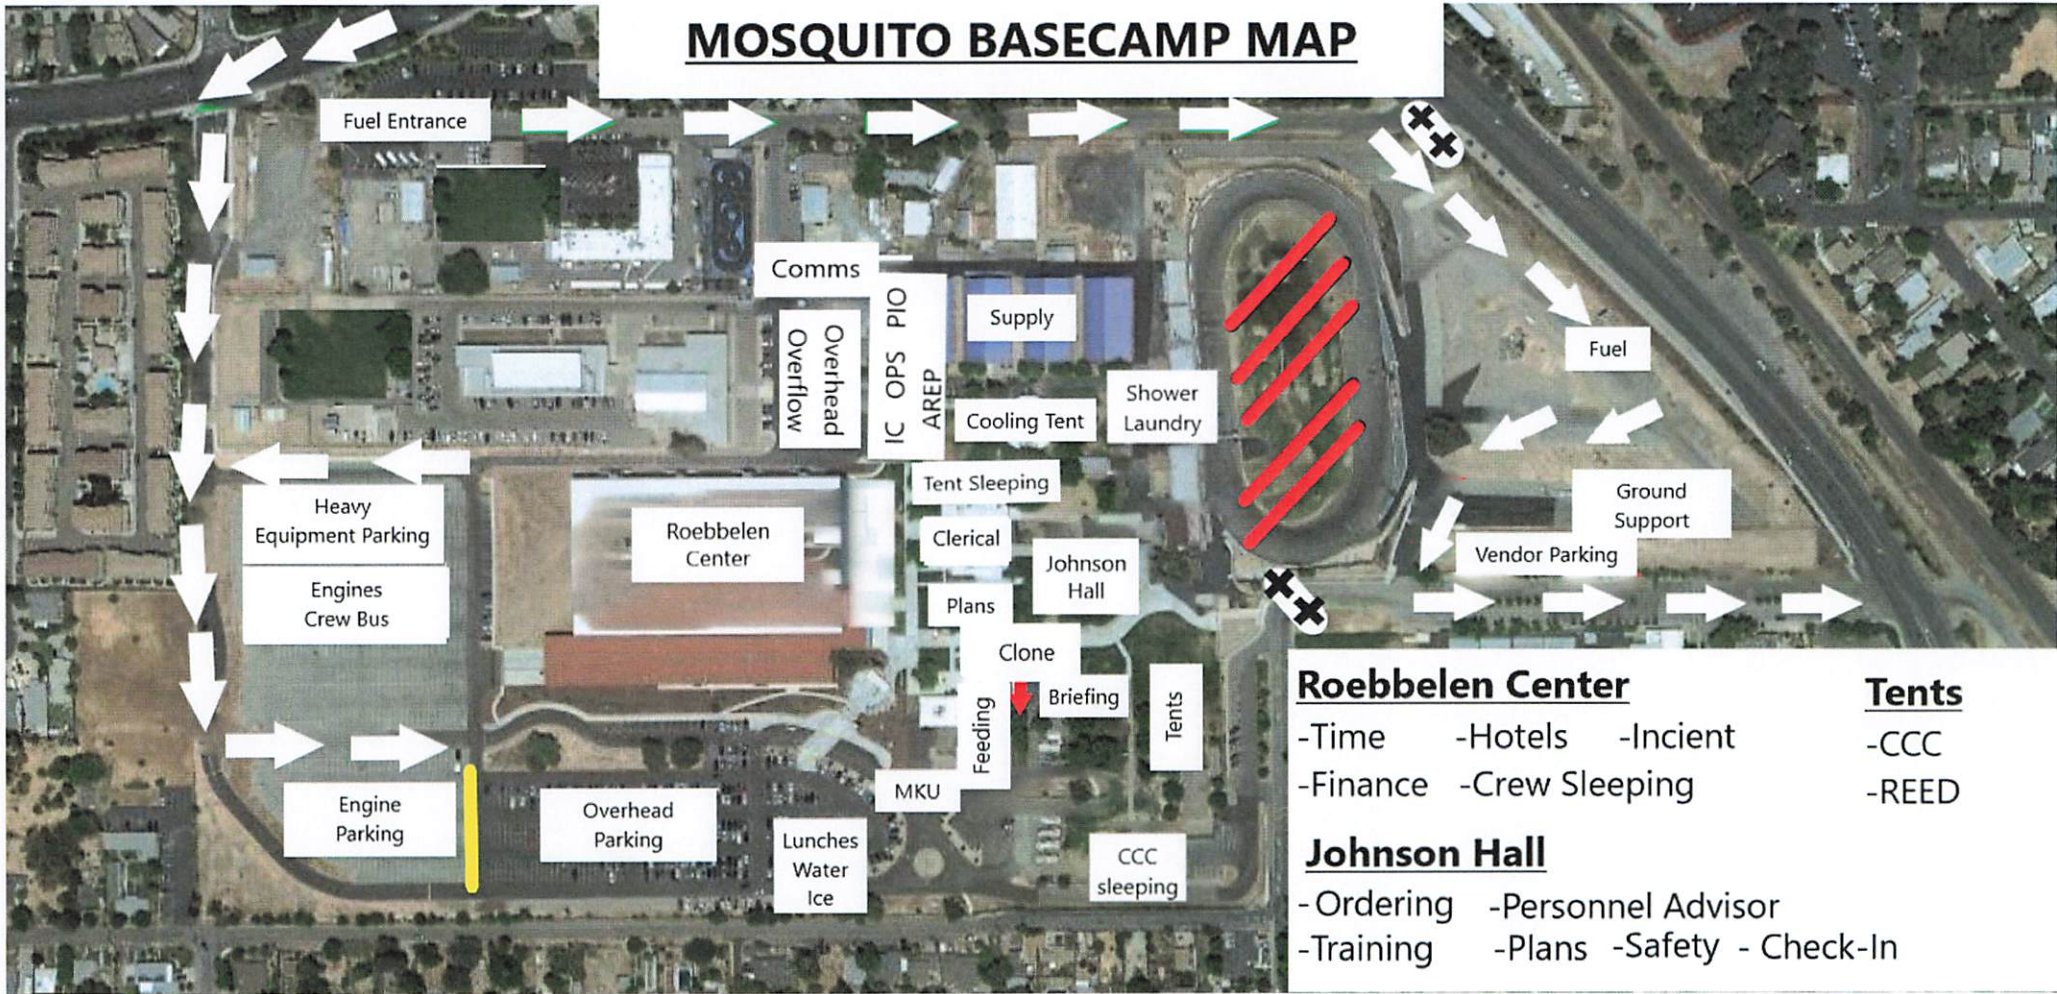

- Search “ArcGIS Field Maps” in the App Store for iPhone & on Google Play for Androids Sign into your NIFC ArcGIS account through the app once installed

For More Instructions on how to use Field Maps, scan code below:

- We have included an updated Incident Base map and travel plan into the IAP.
- Motels has a new phone number. Please contact Nick at # 530-559-8313.
- Please place all trash inside dumpsters or trash cans. Backhaul your trash off the line.
- Supply is now open. For all line orders, route through division and request through communications.
- Supply's hours are 0600-2000
- Ground Support is located at basecamp, contact the 24 hour repair line #1 (510) 507-1140 for repairs or issues.
- Fuel is set at Staging and at incident base

8. MEDICAL EMERGENCY PROCEDURES

"RED IWI" MEDICAL-EMERGENCY PLAN:

- Contact Communications on **Command** and declare you have a **RED IWI**
- Following the 8-Line on the back of the IAP or page 118 of the 2022 IRPG
- Tell them **Who** you are, **Where** you are, **What** you have, and **What** you need.
- Update Communications once the patient has been transported.
- Close the loop with **MEDL** at the end of shift.

"Yellow or Green" NON-EMERGENCY MEDICAL PLAN:

- Contact Division / Communications and declare you have a **"Non-Emergency Medical."**
- Complete the 8-line if needed and turn it in to the medical unit at the end of the shift

ICP/Camp Emergencies

- ICP- Dial 911

9. PREPARED BY

SOF1 - Dave Welch *D Welch*

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE **"MEDICAL EMERGENCY"** TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)
 Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.
 Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.
 Requesting air ambulance to Forest Road 1 at (Lat./Long.)
 "This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency AND Transport Priority (priority 1, 2, 3)	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2 ^o – 3 ^o burns more than 4 palm sizes, heat stroke, disoriented.	
	<input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2 ^o – 3 ^o burns not more than 1-3 palm sizes.	
<input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.		
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Crew Patient Care		Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Agency Affiliation: (NO PATIENT NAMES) Federal Contractor Local Government

Patient Assessment: Age: Weight: Chief Complaint:

(If pertinent to Injury) Skin Signs: (color/moisture/temp) Level of Consciousness: BP: HR: Respirations:

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (drop point, intersection, helispot, Lat. / Long, hazards) Patient's ETA to Location:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Paramedic / EMT - Crews - Immobilization Devices - AED - Oxygen - Trauma Bag - IV/Fluid(s) - Splints - Rope rescue - Wheeled litter - HAZMAT - Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method?
 Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert - Keep Calm - Think Clearly - Act Decisively

*** Follow up with MEDL upon return to ICP ***
