Mosquito Weather Forecast

FORECAST NO: 2

PREDICTION FOR: 0700-0700

SHIFT DATE: 9/11-9/12

FORECAST ISSUED: 2000 9/10

NAME OF FIRE: Mosquito

UNIT: THE

SIGNED: Ryan Walbrun-IMET Incident Meteorologist

WEATHER DISCUSSION: Skies will remain mostly cloudy with the smoky inversion lingering over the fire for much of the day which will keep the overall environment stable. There is about a 10% chance of a stray thunderstorm drifting off the Sierra Crest that could impact the fire. Otherwise the overall trends will be cooler than normal with humidity values trending wetter. General winds will remain light and from the southwest along the ridges with light diurnal winds due to smoke shading. Smoke settles over the fire again tonight with light winds and moderate humidity recovery.

Sunday Weather: Thick smoke through midday or early afternoon with passing mid and high clouds. Partial clearing possible mid to late afternoon. A 10% chance of an afternoon thunderstorm.

TEMPERATURES: 84-88 below 2000 feet and 78-83 2000-4000 feet. Coolest under thick smoke.

MINIMUM HUMIDITY: 24-34% A trend of 2-5% wetter.

20 FT WINDS:

RIDGETOP - Light early then becoming Southwest 4-8 mph afternoon hours.

SLOPE/VALLEY - Light through midday then upcanyon 3-7 mph gusts 10-12 mph late afternoon.

INVERSION: Strong morning inversion only slowly lifting by 1400 hours. **MIXING HEIGHT:** 4000 feet

Sunday Night: Heavy smoke settling over the area with light winds and good humidity recovery.

TEMPERATURES: 63-67 a trend of 2-4 degrees cooler.

MAXIMUM HUMIDITY: 50-60% a trend of 5-10% wetter

20 FT WINDS:

RIDGETOP - Southwest 5-10 pm through sunset then turning East 4-8 mph.

SLOPE/VALLEY - Evening upcanyons 4-8 mph thru sunset then East downcanyon 2-5 mph

STABILITY/INVERSION: Strong inversion setting up overnight. LAL: 1

OUTLOOK FOR MONDAY: A weak trough will approach the West Coast on Monday with slightly stronger Southwest winds. A stray shower possible but no wetting rain and likely just some virga passing by. Temperatures trending near to below normal (75-85) with moderate humidity (28-38%).

EXTENDED FORECAST: A trough along the West Coast will keep onshore winds in place with temperatures trending near or even slightly below normal this week. General winds West to Southwest with better clearing. Highs mid 70s to mid 80s with lows 55-65 through midweek. Humidity 35% days with good recovery at night.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 2 TYPE OF FIRE: Wildland

FIRE NAME: Mosquito OPERATIONAL PERIOD: 9/11-9/12, 0700-0700

DATE ISSUED: 9/10/2022 TIME ISSUED: 2000

INPUTS

WEATHER SUMMARY:

COOLER WITH LIGHT WINDS

Cooler with higher RH.

Temp: 85-88 max; 63-67 min RH: 25-30% min; 50-60% max Wind: SW 4-8 day; NE >5 night

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Smoke coverage dictates overall fire behavior. Along with increased RH and lower temps, fire behavior should be subdued with lack of clear air. However, fuels are critically dry with record-breaking ERC and BI values. The fuels can generate sufficient heat to overpower the smoke inversion – don't let your guard down.

In the absence of weather conditions outside the forecast or extreme fire behavior conditions expect:

	Max. Flame Length	Max. Rate of Spread	Spotting	Probability of Ignition
Grass	<5' (1.5 m)	30-40 ft/min (0.5-0.7 km/hr)	< 0.1 mile (0.2 km)	45%
Grass-Shrub	5-10' (1.5-3 m)	20-30 ft/min (0.3-0.5 km/hr)	< 0.2 mile (0.3 km)	45%
Shrub	10-20' (3-6 m)	60-70 ft/min (1-1.3 km/hr)	< 0.3 mile (0.5 km)	45%
Timber Understory	5-10' (1.5-3 m)	10-15 ft/min (0.2-0.3 km/hr)	< 0.2 mile (0.3 km)	45%

^{**}minimum safety zone size is 0.8 acre (0.3 Ha) for a Strike Team of Engines in Brush.

SPECIFIC:

Branch III / V: Areas of unburned fuels could present challenges to control lines. Watch for rollout.

Branch X: Prominent ridgelines & large drainages in alignment with wind. Potential for larger growth in Middle Fork American River, El Dorado Canyon, & Long Canyon. American Fire area now 9-year-old Grass-Shrub.

Branch XV: Potential for fuels-driven fire. King Fire mix of 8-year-old Grass-Shrub and Timber Understory. If fire establishes in Rubicon River, watch for wind eddies driving fire in multiple directions.

Branch XX / XXV: With the light SW wind, area of greatest potential for clear air. Expect attempts at plume development. Watch for rollout in Whaler Creek and Otter Creek.

AIR OPERATIONS:

Anticipate poor visibility with little improvement in smoke coverage. SW wind may open western flank in Branch XX and XXV.

Mixing height: 4,000 ft. AGL, Transport winds: SW 4-8 mph, Sunrise 0641, Sunset 1918.

SAFETY

Don't become complacent due to higher RH & lower temps. Volatile fuels + very steep canyons present a chance for major fire growth and fire behavior.

^{**}minimum safety zone size is 0.3 acre (0.1 Ha) for a Strike Team of Engines in Timber Understory, Grass, Grass-Shrub.

Fuels and Fire Behavior Advisory

Northern California

September 2nd, 2022

Subject: Potential for extreme fire behavior due to critically elevated fire danger indices, low live and dead fuel moistures, and very hot and dry conditions across much of northern California.

Discussion: An extended period of hot, dry weather with embedded periods of enhanced winds will impact Northern California. The elevated fire weather concerns with fuels reaching their yearly minimum moisture values will create conditions conducive to long range spotting, rapid fire growth, and high resistance to control.

Difference from normal conditions: The current values for Energy Release Component (ERC) are at or above the 90th percentile for the majority of Northern California, with live fuel moistures dropping to critical levels as herbaceous and woody fuels cure. These conditions will be exacerbated by a predicted heat wave, resulting in anomalous daytime highs with little relief in temperature or humidity recovery overnight. Some PSA's, may reach daily record ERC values, with all covered PSA's predicted to reach or exceed the 97th percentile for an extended period. The combination of extreme ERC's with high temperatures and poor overnight humidity recovery is highly correlated with extreme fire behavior in Northern California.

Concerns to Firefighters and the Public:

- The advisory coincides with the Labor Day holiday weekend that is likely to result in increased outdoor recreation and visitor use to public lands across Northern California. The increase in public use carries an increased risk of fire starts as well as potential for evacuations of visitors/ recreational users in the event of a fire starting.
- Energy Release Component (ERC) in areas covered by this advisory are at or above the 90th percentile and are expected to approach or exceed the 97th percentile. **Anticipate increased spread rates, long range spotting, and active nighttime burning.**
- The combination of persistent drought, a building heat wave, and a very dry atmosphere will continue to decrease already low fuel moisture values:
 - o 1000-hour fuel moistures are below average and approaching the 90th percentile.
 - Live woody fuel moisture in brush is near or slightly below average, making them readily available and will likely reach critical levels because of the forecasted hot, dry weather.
 - The above average herbaceous fuel load at low and mid elevations (below 5,000 ft.) is fully cured, with high elevation herbaceous fuels rapidly curing during the hot, dry forecast.
 - Higher than average surface fuel loading is present in areas that experienced winter snow and ice storms in the Coast Range and northern Sierra Nevada.

Expect fires to ignite easier and spread faster. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.

- Periods of enhanced winds are expected during the hot and dry period. Given the current and anticipated fuels conditions, increases in winds will make direct attack of any new starts difficult and may hamper use of aerial resources.
- · Review the current North Ops Outlooks and national fuels and fire behavior advisories.

Mitigation Measures:

- Suppression actions need to be based on good anchor points, escape routes, and safety zones.
 Remember LCES. Experienced lookouts are essential under these conditions.
- Base all actions on current and expected behavior of the fire. Augment initial attack resources as incident activity dictates
- Fire managers should be aware of high use recreation and visitor sites in their area. The holiday weekend will bring increased visitor use, increasing risk of starts during critical fire weather.

Area of Concern: Northern California except for the following Predictive Service Areas: North Coast, Bay Marine, and west of Highway 101 in Mid-Coast to Mendocino.

Fuels and Fire Behavior Advisory

Northern California September 2, 2022

This page is left intentionally blank.

Mosquito Fire - Safety Message

INC #CA-TNF-001371

DATE: 9/11-9/12/2022 TIME 0700-0700 Day/Night Shift

LIMITED MEDIVAC CAPABILITY DUE TO PERIODS OF SMOKE INVERSION

- Assign personnel with Advanced Life Support capability on the line.
- Cache emergency equipment (backboards, wheeled stokes, etc.) in various locations on the line.
- Assign Rapid Extraction Modules (REM) to respond in absence of air evacuation.
- Maintain ambulance at closest access point.
- Keep line personnel informed of this issue. Safety briefings to stress that extra care should be taken with high-risk tasks (i.e. tree falling, chainsaw use, etc.).
- Supervisors ensure that personnel with severe reaction to bee sting, etc. have "epi-kits" or consider leaving such individuals in camp.

Unfamiliar With Weather And Local Factors

- Base all actions on current and expected fire behavior.
- Post lookouts.
- · Establish escape routes and safety zones.
- Take extra caution! Discuss a fire where you relied on information from the local unit (perhaps where your fire knowledge and experience is very different from how they did things – southeast or Alaska).
- Recognize and report visual indicators (clouds, WX obs., cold front passage, inversion breaking).

Driving Safely with Civilian Traffic

- Maintain a safe following distance and allow space for cars to pass.
- Be diligent in using your mirrors as cars may be passing you.
- Use turnouts when available to let cars pass.
- Stay calm; we are not part of their race.
- Maintain a heightened level of awareness around blind corners.
- Watch out for park visitors that stop to take photos, and block the roadway.
- Slow down, slow down, and slow down!

Hydration and Heat Stress

- Drink water before, during and after shifts
- Carry up to 6 quarts to drink while on the line.
- Drink three quarts of water for each quart of electrolyte replacement.
- Be alert for signs of heat stress in yourself and others.
- Monitor mental status after any stumbling episodes.
- Don't dilute liquid electrolyte replacement drinks with water.
- Take "cool down breaks" as possible.

ICS (215A) DAY/NIGHT SHIFT

	INCIDENT RISK ANALYSIS	ICS (215A) DAY/NIGHT SHIFT						
BR/DV	HAZARDOUS ACTIONS – CONDITIONS	MITIGATIONS – WARNINGS – REMEDIES						
ALL	FIRE BEHAVIOR	 Are you seeing what we have predicted? Conduct thorough assessments before starting work. Ensure LCES is in place. Plan & communicate your exit strategy with your crew and adjacent resources. Provide additional briefing for new resources and maintain communications. Outflow winds from thunderstorms could negatively affect fire behavior. 						
ALL	TRAFFIC HAZARDS AND DRIVING	 Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on uphill side. Use spotters when backing or turning around. Practice "Defensive Driving" techniques. Assume other drivers are fatigued and complacent. Use warning lights when working on roads or traveling in smoke and heavy dust. Drive at or below posted speed limits. Use chock blocks, turn wheels into hill. Be alert for wildlife. Dusk to Dawn pose the greatest potential for accidents. UTV operators shall wear DOT approved helmets and have certification to drive. 						
ALL	HAZARD / DANGER TREES	 Follow Hazard Tree Safety Guidelines on page 20, IRPG. Limit number of personnel around snags and their exposure time. Fallers must be qualified for the trees being felled. Be alert around hazard trees during wind events, even green trees. The hazard zone extends a minimum of 2½ tree lengths. Avoid parking vehicles or taking breaks under or near hazard trees. 						
ALL	STEEP TERRAIN, MINE SHAFTS, ROLLING DEBRIS	 Maintain 8 ft 10 ft. spacing when working & walking. Do not work above any personnel. Flag mineshafts, advise Division and Safety Officer of the location. Evaluate necessity to send personnel in areas with limited access. 						
ALL	DIRECT / INDIRECT LINE CONSTRUCTION	 Establish and maintain LCES. Locate line in favorable location, lighter fuels, and gentler topography when possible. Utilize natural or existing barriers. Watch for and communicate spot fires. Stay in front of heavy equipment at least 100 feet or behind at least 50 feet. Do not approach heavy equipment until seen and acknowledged by the operator Watch for stump holes and ash pits. 						
ALL	HEAT RELATED ILLNESS	 Drink 2 bottles of water to 1 bottle of sports drink. Take frequent breaks, minimum of 10 minutes every hour. Recognize symptoms of HEAT RELATED ILLNESS which include low energy, cramping, headaches, dizziness, poor rest, poor eating habits, hot skin, and lack of sweating. 						
ALL	WILDLAND URBAN INTERFACE OPERATIONS	 Maintain continuous Situational Awareness based upon the fire environment, observed fire behavior, hazards and incident objectives. Refer to IRPG Page 11-15 for WUI preparation, preplanning, and hazards. Be active and engage in defense preparations & do not wait for the fire to arrive. Beware of unknown chemicals when working near structures or garden plots. Beware of downed powerlines. Be decisive in tactical engagement. Know when to engage or not. Establish management decision points, Safety Zones, TRA's, and Escape Routes. 						
ALL	AIR OPERATIONS	 Follow "Aviation Watch-Out Situations" on page 62, IRPG. Do not plan on air resources for tactical support or medical transportation. Refer to page 74, IRPG for directing bucket drops. Ensure positive communication with all air resources. Ensure crews are aware of water/retardant drop zones. 						
ALL	FIRING OPERATIONS	 Only personnel trained in the use of each devise will be authorized to use firing equipment. Ensure that all personnel are briefed and prepared for firing and holding operations. Ensure that all ground and aerial ignition plans are approved and signed by the IC prior to implementation 						
ALL	COMMUNICATIONS	 Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. Answer questions when asked by others. Ask for intel when you don't know the plan. Ensure all personnel are familiar with the incident and IA communications plans. 						
	INCIDENT NAME:	OPERATIONAL PERIOD:						

Mosquito Fire

OPERATIONAL PERIOD: 0700 - 0700

September 11-12, 2022

Date/Time Prepared: 09/10/2022 - 1400 hrs

MOSQUITO FIRE Finance Process CA-TNF-001371

All FEDERAL Resources for the MOSQUITO fire please use one of the following methods to turn in your Shift Ticket/CTR using the format showing under New Resources:

- 1) Email to: 2022.mosquito.finance@firenet.gov,
- 2) Drop off to Federal Finance in the 1st building on your left as you come into the Roseville Fairgrounds marked FINANCE.
- 3) Turn them into the Federal TIME person at briefing.

Submit Equipment Shift Tickets or Crew Time Reports (CTRs) daily.

FOR NEW RESOURCES CHECKING IN:

Please either email all document for your Federal Resource to 2022.mosquito.finance@firenet.gov or drop off all documents when checking in the building marked Finance after checking in.

Contract Equipment MUST have their INSPECTIONS prior to seeing Finance or submitting documents to the email.

Email Subject Line: TIME (or CTR, EQUIPMENT, SHIFT TICKET)/Resource Order No./ Resource Name/Position Code – in the subject line with your information

(Example: TIME/O-200/SBear/Safety)

Email or bring in all documents that pertain to your assignment:

Agency Overhead	Agency ADs / EFFs	VIPR Resources	Contract / Agency Crews	Cooperators
Resource Order Crew Time Reports (CTRs)	Resource Order Casual Hire Form CTRs	Resource Order VIPR Agreement Schedule of Items Inspections Shift Tickets	Resource Order Manifest Agreement / Contract Schedule of Items Inspections CTRs	Resource Order Agreement Shift Tickets / CTRs

Please include your email address and phone number in the body of the email when sending your documents.

Any questions, please call:

FEDERAL TIME:

510-507-5898

FEDERAL CONTRACT EQUIPMENT: 510-495-9780

COMP/CLAIMS

Elaine Downing COMP Unit Leader

928-486-5295

Elaine_Downing@firenet.gov

For federal employees associated with the Mosquito Fire, if you are injured, please contact the COMP UL for the Authorization for Treatment (CA-16). We can issue the form directly to the hospital or clinic, but we need full names and SSN for the required forms prior to being able to do that. The employee or supervisor should contact me as soon as possible or upon arrival at the hospital, whichever is convenient.

For claims there are different forms needed based on the circumstances of the property loss or damage. Please contact me first to find out which forms are appropriate for your situation, and what additional information might be needed. This will expedite the process.

Unserviceable items must be turned into COMP/FINANCE if you are unable to replace at Supply. If items are lost or damaged on the fire line, the fire suppression module must provide a copy of the module's standard inventory with the documentation of broken or unserviceable items.

Motor Vehicle Accident	Property Loss or Damage of items that cannot be replaced in Supply			
SF-91, Motor Vehicle Accident	TEAM 5 MODIFIED 289			
SF-94 Witness Statement (if app)	TEAM 5 MODIFIED 289			

\$ FINANCE MESSAGE \$

Please No Off Site Feeding Unless Approved by a Finance Section Chief. Certain circumstances will need to apply for our approval.

CAL FIRE PERSONNEL

If anyone has any CalCard travel receipts and meal/lodging sign in sheets, please get a copy to Finance.

LOCAL GOVERNMENT RESOURCES

Make sure you check in with Finance for ABH or OES for F-42 Paperwork.

ALL HIRED EQUIPMENT

Make sure you get your shift ticket filled out by your **<u>Division Group</u> <u>Supervisor or Supervisor each shift.</u>**

ALL SUPERVISORS OF HIRED EQUIPMENT

Shift Tickets for hired equipment need to be signed and turned in to TIME daily. Ensure the shift ticket is filled out completely (including evaluation), accurately and legibly. **Example included in IAP.**

PROPERTY DAMAGE or INJURIES

Please report any property damage caused by suppression activities and/or injuries to the Comp/Claims Unit.

This document is intended to track, record and validate the amount of water used on a incident. It's not intended to review the performance of equipment using the water on an incident.

Human Resource Message

09/11/01

Honor the fallen

by discovering and giving the best of yourselves!

It's a privilege to work among the ranks of those who run in, when others run out; placing service before self.

For many of us, 9-11 will evoke memories and emotions of that tragic day. We may remember what we were doing, whom we were talking to, and where we were when we heard the news.

So today, let's recall what we learned about our resilience on September 11, 2001. We recall, acts of heroism and we remember once again how ordinary human beings, living their ordinary lives, reacted with extraordinary heroism when - without warning and in an instant - they were thrown face-to-face with the most fundamental questions of human existence. They taught us through their actions that day, what it means to be human. They showed us the immutable value of duty, loyalty, self-sacrifice, and love.

The moment of silence is a respectful manner to honor and remember the day ordinary people turned into extraordinary heroes!

True courage is being afraid,

then going ahead and doing your job anyway,

-Gen. Norman Schwarzkopf-

Instructions for Use of CDF 101 Property Certification of Location or Damage

Document Number: for use as a local number system or when attached to a FC-40 document.

Location / Incident Name: Enter the CDF facility property is assigned to. If submitting to an incident base, enter the Incident Name.

Incident Number: Enter the appropriate incident number

Unit: Enter the Unit the property is assigned to. If submitting to an incident base, enter the request number of the person certifying damage example E-320, C-14 or O-355.

Region: Enter the CDF Region where the property was assigned. If submitting to an incident base, enter the CDF Region responsible for the incident.

Date: Enter the date the P.L.or D. was completed.

The following items were: Enter either 'Broken', 'Left on Line', 'Damaged' or other status of the property. Reminder, this form cannot be used in place of the STD-152 to certify Lost, Stolen, Worn Out or Damaged beyond repair property.

Date of Occurrence: Enter the date the property was broken, left on line or damaged.

Quantity: Enter the quantity for the line item.

Unit of Measure: Enter the unit of measure for the line item (example ea = each).

CDF Stock Number: Enter the PIN or stock number.

Description: Enter the description of the line item, indicate size, make, model and type. Clearly describe the item and provide adequate data to effectively identify equipment or property.

Property Number: Enter the CDF property number assigned to the line item, Capitalized or sensitive property must have their property number entered here.

Location of Items: Where is the property now (example, left on Division B night shift 8/1/04, Drop Point 2). A GPS coordinate, Station 22 or Unit Service Center may also be used to describe Location.

Remarks: Enter specific remarks here, how was the property damaged, what specifically is wrong with it.

Signature of Person Certifying Occurrence as Described:

Signature: The CDF Employee certifying the occurrence must sign.

Printed Name: Enter the printed name of the signature.

Title: Enter the title of the signature.

Date: Enter the date of the signature.

Unit Supervisors Approval:

If submitted on an incident this section must be completed by the supervisor of the property custodian. This may be the Strike Team Leader, Division Supervisor, Receiving and Distribution Manager, Supply Unit Leader, Logistics Section Chief, Agency Representative or Incident Commander.

If submitted at the home Unit this section must also be completed by the supervisor of the property custodian. This may be a Battalion or Division Chief.

Comments: Supervisors may enter comments of approval or disapproval.

Signature of Unit Administrator: Signature of Unit Supervisor reviewing the certification described.

Title: Title of the signature. Date: Date of the signature.

Notes:

This document is NOT required if exchanging property at an incident base with the exception of capitalized or sensitive property assigned a CDF property number.

This document is required as certification when submitting an MRT to your local Service Center for replacement of property.

An OF-315 (Incident Replacement Requisition) is required as authorization to purchase fire replacement items at your local Unit. This document is required when submitting an MRT to you local Service Center for fire replacement items. A CDF-101 and/or A STD-152 are required for the certification of the status of property being requisitioned for replacement.

Logistics Message

- We have included an updated Incident Base map and travel plan into the IAP
- Motels has a new phone number. Please contact Nick at # 530-559-8313
- Please place all trash inside dumpsters or trash cans.
 Backhaul your trash off the line
- Supply is now open. For all line orders, route through division and request through communications
- Supply's hours are 0600-2000
- Ground Support is located at basecamp, contact the 24 hour repair line (510) 507-1140 for repairs or issues
- Fuel is set at Staging and at incident base

Mosquito Road Map

Take I-80 to HWY 65

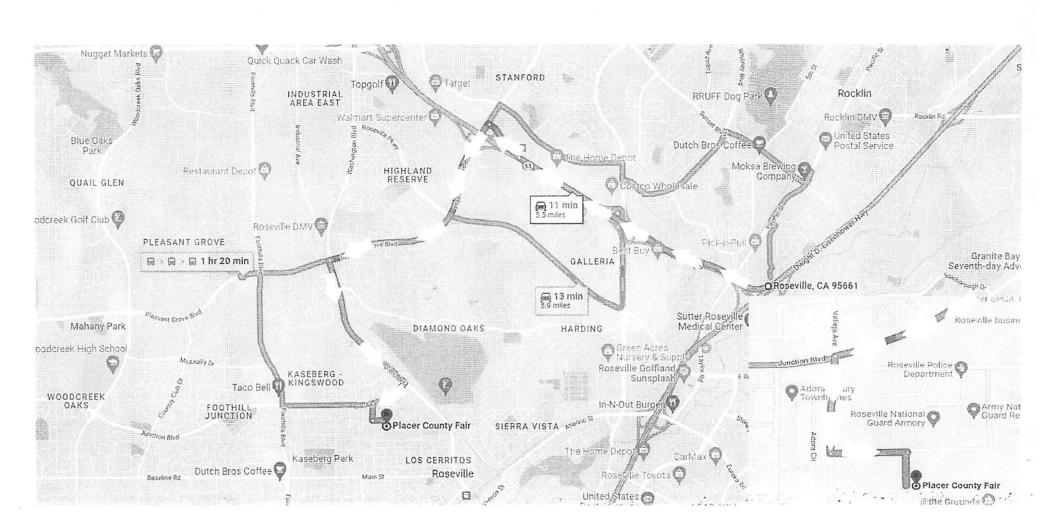

Exit Pleasant Grove, turn left onto Pleasant Grove.

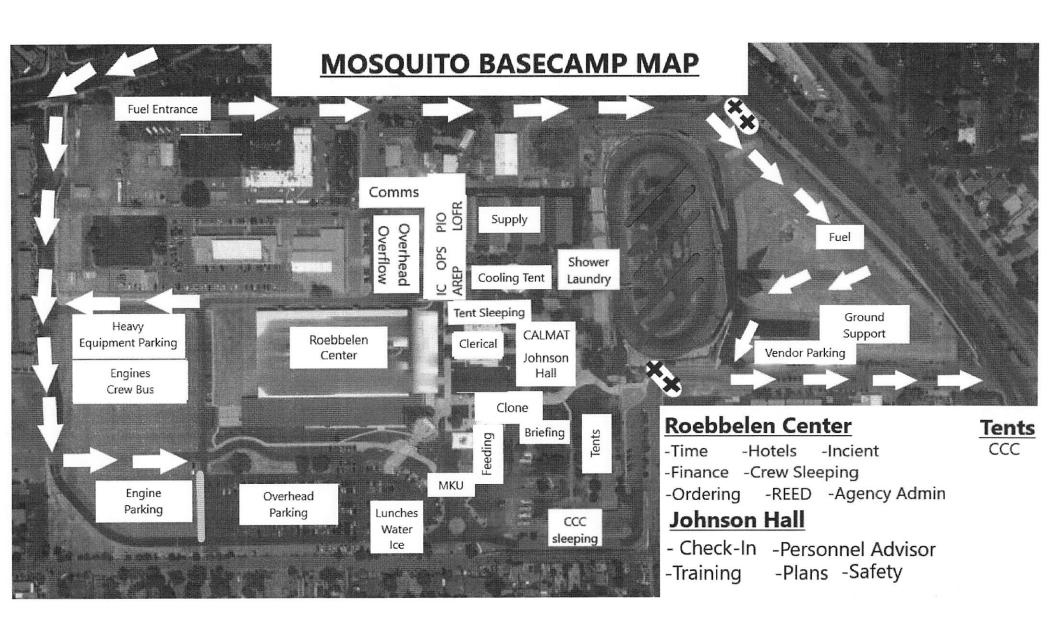

Turn left onto Washington Blvd.

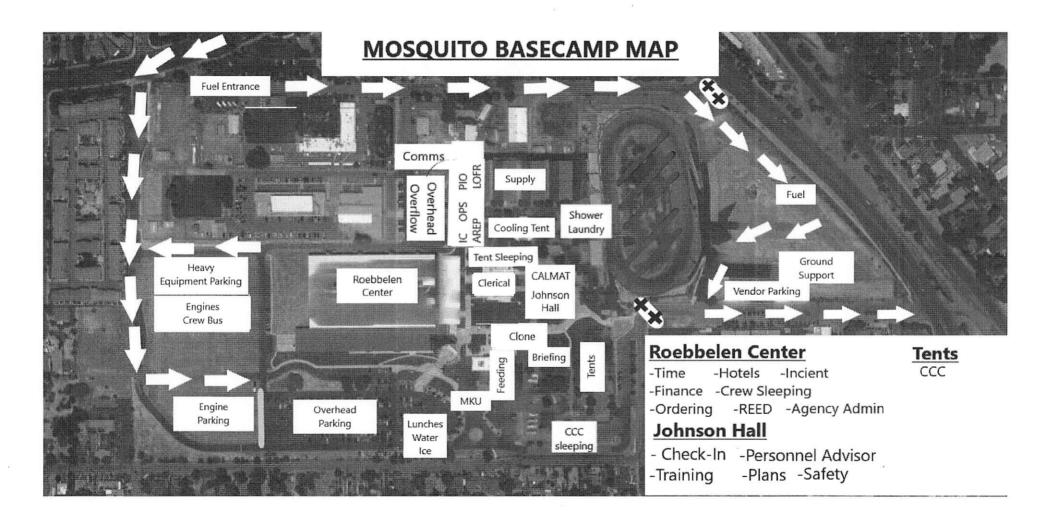

Turn right onto Junction Blvd.

Turn left onto Event Center Dr.

Fairgrounds entrance will be on the left.

Training Check In

Trainee Exit Interview

"RED IWI" MEDICAL-EMERGENCY PLAN:

- Contact Communications on Command and declare you have a RED IWI
- Following the 8-Line on the back of the IAP or page 118 of the 2022 IRPG
- Tell them Who you are, Where you are, What you have, and What you need.
- Update Communications once the patient has been transported.
- Close the loop with MEDL at the end of shift.

"Yellow or Green" NON-EMERGENCY MEDICAL PLAN:

- Contact Division / Communications and declare you have a "Non-Emergency Medical."
- Complete the 8-line if needed and turn it in to the medical unit at the end of the shift

ICP/Camp Emergencies

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)

"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergence		□ RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.							
AND	□YEI	LLOW / PRIORITY 2 Ser	ious Injury or illness. Ev	acuation may be D	ELAYED if n	ecessary.			
Transport Priority	Ex	: Significant trauma, unable	to walk, 2° – 3° burns not more	than 1-3 palm sizes.
