## FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 7	TYPE OF FIRE: Wildland
FIRE NAME: Mosquito	OPERATIONAL PERIOD: 9/16-9/17, 0700-0700
DATE ISSUED: 9/15/2022	TIME ISSUED: 2000
UNIT: CA-TNF-001371	SIGNED:  Jonathan Pangburn, FBAN

### INPUTS

**WEATHER SUMMARY: STABLE ATMOSPHERE**  
 Weather separated by two distinct zones: clear air & areas under smoke.  
 Temp: 70-75 max; 50-60 min  
 RH: 23-28% min (clear air) / 33-38% min (under smoke); 40-50% max  
 Wind (20'): SW 3-6, gust 10 ridges day; downcanyon 4-7 night

### OUTPUTS

**FIRE BEHAVIOR**  
**GENERAL: Clear Air: group torching and upslope/ridgeline runs; smolder under smoke.**  
 Different burning environments: under smoke (Branch 3/5/10) vs clear air (Branch 15/20). Fuels remain highly receptive with ERC, BI, 100-hr, & 1,000-hr values near 90<sup>th</sup> percentile.

In the absence of weather conditions outside the forecast or extreme fire behavior conditions expect:

	Max. Flame Length	Max. Rate of Spread	Spotting	Probability of Ignition
Grass	2-7' (0.5-2 m)	20-40 ft/min (0.3-0.7 km/hr)	< 0.1 mile (0.2 km)	75%
Grass-Shrub	3-7' (1-3 m)	10-20 ft/min (0.2-0.3 km/hr)	< 0.1 mile (0.2 km)	75%
Shrub	5-15' (1.5-4.5 m)	5-50 ft/min (0.1-0.9 km/hr)	< 0.3 mile (0.3 km)	75%
Timber Understory	5-15' (1.5-4.5 m)	5-15 ft/min (0.1-0.3 km/hr)	< 0.2 mile (0.3 km)	75%

**Probability of Ignition: 75% clear air | 35% under smoke**

**\*\*minimum safety zone size is 0.5 acre (0.2 Ha) for a Strike Team of Engines in Brush, Timber.**

**\*\*minimum safety zone size is 0.2 acre (0.1 Ha) for a Strike Team of Engines in Grass.**

**SPECIFIC:**

**Branch III / V / XXV:** Rollout, spotting, and wind gusts can cause additional control issues along Middle Fork.

**Branch X:** Group torching expected, even under smoke cover. DIV H fuels young manzanita, ceanothus, & conifer seedlings. DIV J mixed conifer. Brush not fully consuming but 1-, 10-, & 100-hr fully consuming.

**Branch XV:** Group torching with possible crown runs upslope and with wind gusts, especially with clear air. King Fire scar has pockets of continuous fuels. Proposed control lines have discontinuous fuels that may have difficulty obtaining clean black during firing; combination of RH & proper tools is key.

**Branch XX:** DIV GG minimal spread expected. DIV CC should see wind & slope drive fire toward Pigeon & Big Grizzly Canyons (DIV R). Blacklining needs strong depth by Rubicon River & Devil's Peak.

**AIR OPERATIONS:**

Clear air in the south; smoke impacts in the north.  
 Mixing height: 4,000 ft. AGL, Transport winds: SW 4-8 mph, Sunrise 0646, Sunset 1910.

### SAFETY

Limited visibility may give you a false sense of security. Lookouts are a must especially in thick brushy areas. Visibility is also hampered by smoke and dust. Make sure you know what the fire is doing at all times.

# Fuels and Fire Behavior Advisory

## Northern California

September 2<sup>nd</sup>, 2022

**Subject:** Potential for extreme fire behavior due to critically elevated fire danger indices, low live and dead fuel moistures, and very hot and dry conditions across much of northern California.

**Discussion:** An extended period of hot, dry weather with embedded periods of enhanced winds will impact Northern California. The elevated fire weather concerns with fuels reaching their yearly minimum moisture values will create conditions conducive to long range spotting, rapid fire growth, and high resistance to control.

**Difference from normal conditions:** The current values for Energy Release Component (ERC) are at or above the 90<sup>th</sup> percentile for the majority of Northern California, with live fuel moistures dropping to critical levels as herbaceous and woody fuels cure. These conditions will be exacerbated by a predicted heat wave, resulting in anomalous daytime highs with little relief in temperature or humidity recovery overnight. Some PSA's, may reach daily record ERC values, with all covered PSA's predicted to reach or exceed the 97<sup>th</sup> percentile for an extended period. The combination of extreme ERC's with high temperatures and poor overnight humidity recovery is highly correlated with extreme fire behavior in Northern California.

### Concerns to Firefighters and the Public:

- The advisory coincides with the Labor Day holiday weekend that is likely to result in increased outdoor recreation and visitor use to public lands across Northern California. The increase in public use carries an increased risk of fire starts as well as potential for evacuations of visitors/ recreational users in the event of a fire starting.
- Energy Release Component (ERC) in areas covered by this advisory are at or above the 90<sup>th</sup> percentile and are expected to approach or exceed the 97<sup>th</sup> percentile. **Anticipate increased spread rates, long range spotting, and active nighttime burning.**
- The combination of persistent drought, a building heat wave, and a very dry atmosphere will continue to decrease already low fuel moisture values:
  - 1000-hour fuel moistures are below average and approaching the 90<sup>th</sup> percentile,
  - Live woody fuel moisture in brush is near or slightly below average, making them readily available and will likely reach critical levels because of the forecasted hot, dry weather.
  - The above average herbaceous fuel load at low and mid elevations (below 5,000 ft.) is fully cured, with high elevation herbaceous fuels rapidly curing during the hot, dry forecast.
  - Higher than average surface fuel loading is present in areas that experienced winter snow and ice storms in the Coast Range and northern Sierra Nevada.

**Expect fires to ignite easier and spread faster. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.**

- Periods of enhanced winds are expected during the hot and dry period. Given the current and anticipated fuels conditions, increases in winds will make direct attack of any new starts difficult and may hamper use of aerial resources.
- Review the current [North Ops Outlooks](#) and [national fuels and fire behavior advisories](#).

### Mitigation Measures:

- Suppression actions need to be based on good anchor points, escape routes, and safety zones. **Remember LCES. Experienced lookouts are essential under these conditions.**
- Base all actions on current and expected behavior of the fire. **Augment initial attack resources as incident activity dictates**
- Fire managers should be aware of high use recreation and visitor sites in their area. **The holiday weekend will bring increased visitor use, increasing risk of starts during critical fire weather.**

**Area of Concern:** Northern California except for the following Predictive Service Areas: North Coast, Bay Marine, and west of Highway 101 in Mid-Coast to Mendocino.

# Keep Your Guard Up!

- *Maintaining situational awareness takes effort!*
- *Continue planning to provide for safety then engage in your mission!*
- *Watch for complacency in others, and help them stay sharp.*
- *Traffic is increasing, drive defensively!*
- *Be methodical and meticulous in your tactics to get the job done safely!*

# Keep Your Head in the Game!

## Driving

- When driving keep speed at or below the posted speed limit and your headlights on.
- **Stay as far to the right of the road as is safely possible.**
- Stay alert for oncoming traffic that may “cheat” into your lane.
- Schools is in session, watch for school busses and children at bus stops.
- Always fasten your seat belt before the vehicle is set into motion.
- **Slow Down, Slow Down, Slow Down. Your actions represent this incident.**

There are three main types of distracted driving: **Visual**-taking your eyes off the road; **Manual**-taking your hands off the wheel; **Cognitive**-taking your mind away from the task at hand. Don't drive distracted!

## Stump Holes/ Ash Pits

- **Situational Awareness:** Be alert for stump holes and ash pits when mopping up.
- **Identify stump holes and ash pits** to all personnel.
- **Work with extreme caution in the area:** Wear and use all approved PPE properly. Use the Risk Management Process (IRPG p. 1) to engage.
- **Be alert for hidden hazards:** Burning root systems near stump holes can collapse when stepped on.
- **Beat the Odds:** Most significant burns occur from stump holes and ash pits.

For claims there are different forms needed based on the circumstances of the property loss or damage. Please contact me first to find out which forms are appropriate for your situation, and what additional information might be needed. This will expedite the process.

## Mosquito Fire September 16, 2022

### **HUMAN RESOURCE MESSAGE**

**Communication is a two-way street.** When communication becomes a one-way, it becomes a traffic jam and turns into an issue. Some examples are:

- Someone irritating you and getting on your nerves, but you don't say anything until it boils over and causes a crash.
- A misunderstanding of what someone was trying to communicate to you, but you didn't take the time to clarify what was said and just stewed about it.
- It can be like the telephone game. It starts with specific information and by the time it gets to the end it's very different than what was first communicated.

Whatever it is, clear the communication lines in a respectful manner and make it a smooth safe flowing two way street

**“The single biggest problem in communication is the illusion that it has taken place” ....by George Bernard Shaw**

Feel free to call/text or come by the HRSP yurt if you have questions, concerns, or just want to chat.

## PHOTOGRAPHS AND VIDEOS OF INCIDENT

Please use the QR code to upload fire-related photos and videos for public information. This really helps tell the fire story, shows the public your great work, and keeps the media and public informed. Please refrain from posting incident-related videos to your personal social media. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness. When this happens it could reflect poorly on all that are attached to this incident.

## MEDIA

The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property, and the news media may not interfere with incident operations. Please always treat the media with courtesy and respect and advise the PIO office if there are any issues.
