FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 8	TYPE OF FIRE: Wildland
FIRE NAME: Mosquito	OPERATIONAL PERIOD: 9/17-9/18, 0700-0700
DATE ISSUED: 9/16/2022	TIME ISSUED: 2000
UNIT: CA-TNF-001371	SIGNED: <u>Jonathan Pangburn</u> Jonathan Pangburn, FBAN

INPUTS

WEATHER SUMMARY: **GUSTY AFTERNOON WINDS**

Gusty winds will arrive around 1100 over the fire & reach peak winds around 1500.

Temp: 67-72 max; 44-50 min
 RH: 40-46% min; 75-90% max
 Wind (20'): SW 8-12, gust 25 ridges day; gusty evening, SW 4-8 ridges overnight / canyons downcanyon 4-7 night

OUTPUTS

FIRE BEHAVIOR

GENERAL: **Isolated torching. Mostly backing and smoldering outside of wind gusts.**

Spotting substantially increases with wind gusts. Potential for wind-driven runs along ridges. Fuels remain highly receptive with ERC, BI, 100-hr, & 1,000-hr values near 90th percentile.

In the absence of weather conditions outside the forecast or extreme fire behavior conditions expect:

	Max. Flame Length	Max. Rate of Spread	Spotting	Probability of Ignition
Grass	2-7' (0.5-2 m)	20-30 ft/min (0.3-0.5 km/hr)	< 0.1 mile (0.2 km)	45%
Grass-Shrub	3-7' (1-3 m)	10-20 ft/min (0.2-0.3 km/hr)	< 0.1 mile (0.2 km)	45%
Shrub	5-15' (1.5-4.5 m)	5-50 ft/min (0.1-0.9 km/hr)	< 0.2 mile (0.3 km)	45%
Timber Understory	5-15' (1.5-4.5 m)	5-15 ft/min (0.1-0.3 km/hr)	< 0.2 mile (0.3 km)	45%

Probability of Ignition: 45%

****minimum safety zone size is 0.5 acre (0.2 Ha) for a Strike Team of Engines in Brush, Timber.**
****minimum safety zone size is 0.2 acre (0.1 Ha) for a Strike Team of Engines in Grass.**

SPECIFIC:

Branch III / V / XXV: Rollout, spotting, and wind gusts can cause additional control issues along Middle Fork. Watch for wind to start picking up ~1100. Spotting potential highest in mid-morning through mid-afternoon.

Branch X / XV: Slow rate of spread, mostly smoldering unless clear air facilitates isolated torching and short, rapid bursts. Areas of continuous fuel could have upslope and ridgeline runs. Watch for wind gusts. Wind could scour out smoke and allow for an uptick in fire behavior into evening hours.

Branch XX: Rollout, spotting, and wind gusts can cause additional control issues along Rubicon.

AIR OPERATIONS:

Clear air in the south; smoke impacts in the north.
 Mixing height: 4,500 ft. AGL, Transport winds: SW 21 mph, Sunrise 0647, Sunset 1908.

SAFETY

Short intense fire runs are possible. Make sure you know where your safety zone is at and the time it takes to get there.

Fuels and Fire Behavior Advisory

Northern California

September 2nd, 2022

Subject: Potential for extreme fire behavior due to critically elevated fire danger indices, low live and dead fuel moistures, and very hot and dry conditions across much of northern California.

Discussion: An extended period of hot, dry weather with embedded periods of enhanced winds will impact Northern California. The elevated fire weather concerns with fuels reaching their yearly minimum moisture values will create conditions conducive to long range spotting, rapid fire growth, and high resistance to control.

Difference from normal conditions: The current values for Energy Release Component (ERC) are at or above the 90th percentile for the majority of Northern California, with live fuel moistures dropping to critical levels as herbaceous and woody fuels cure. These conditions will be exacerbated by a predicted heat wave, resulting in anomalous daytime highs with little relief in temperature or humidity recovery overnight. Some PSA's, may reach daily record ERC values, with all covered PSA's predicted to reach or exceed the 97th percentile for an extended period. The combination of extreme ERC's with high temperatures and poor overnight humidity recovery is highly correlated with extreme fire behavior in Northern California.

Concerns to Firefighters and the Public:

- The advisory coincides with the Labor Day holiday weekend that is likely to result in increased outdoor recreation and visitor use to public lands across Northern California. The increase in public use carries an increased risk of fire starts as well as potential for evacuations of visitors/ recreational users in the event of a fire starting.
- Energy Release Component (ERC) in areas covered by this advisory are at or above the 90th percentile and are expected to approach or exceed the 97th percentile. **Anticipate increased spread rates, long range spotting, and active nighttime burning.**
- The combination of persistent drought, a building heat wave, and a very dry atmosphere will continue to decrease already low fuel moisture values:
 - 1000-hour fuel moistures are below average and approaching the 90th percentile,
 - Live woody fuel moisture in brush is near or slightly below average, making them readily available and will likely reach critical levels because of the forecasted hot, dry weather.
 - The above average herbaceous fuel load at low and mid elevations (below 5,000 ft.) is fully cured, with high elevation herbaceous fuels rapidly curing during the hot, dry forecast.
 - Higher than average surface fuel loading is present in areas that experienced winter snow and ice storms in the Coast Range and northern Sierra Nevada.

Expect fires to ignite easier and spread faster. Do not expect fires to exhibit reduced fire behavior when entering areas of live fuels; anticipate increased spread rates and spotting.

- Periods of enhanced winds are expected during the hot and dry period. Given the current and anticipated fuels conditions, increases in winds will make direct attack of any new starts difficult and may hamper use of aerial resources.
- Review the current North Ops Outlooks and national fuels and fire behavior advisories.

Mitigation Measures:

- Suppression actions need to be based on good anchor points, escape routes, and safety zones. **Remember LCES. Experienced lookouts are essential under these conditions.**
- Base all actions on current and expected behavior of the fire. **Augment initial attack resources as incident activity dictates**
- Fire managers should be aware of high use recreation and visitor sites in their area. **The holiday weekend will bring increased visitor use, increasing risk of starts during critical fire weather.**

Area of Concern: Northern California except for the following Predictive Service Areas: North Coast, Bay Marine, and west of Highway 101 in Mid-Coast to Mendocino.

Mosquito Incident – Safety Message

INCIDENT: Mosquito CA-TNF-001371

DATE: 9/17-9/18/2022 TIME:0700–0700 Day/Night

Leadership is all about Character

Fire leaders set the example by exhibiting strong character. Character is based on values. It is the combination of actions and words that others appraise to determine if the leader can be trusted to do the right thing.

Leaders set the example by taking steps to build their character continually by:

- Knowing our values, reviewing them frequently, and looking for areas of improvement.
- Admitting when we are wrong.
- Taking time to reflect on our actions.
- Finding role models and emulate their command presence and ability to build relationships.

Operational Tempo

- Successfully maintaining operational tempo is not solely about speeding up to match or exceed the pace of the environment. It is also about knowing when operations should slow down and why.
- We are most vulnerable to accidents and errors when the operational tempo is changing, especially when it changes quickly.
- Maintaining good situation awareness in spite of change in operational tempo represents a considerable challenge.
- The key to managing operational tempo successfully is monitoring the changing environment and capabilities of the team, and then applying good judgment to determine whether to push forward or pull back while making necessary adjustments.

POINTS TO PONDER

- Vehicle accidents are a common cause of firefighter injuries – **Drive Smart.**
- FF’s are injured or killed annually from falling trees – **Look Up.**
- Ash pits and stump holes are the most common cause of burn injuries – **Look Down.**
- FF’s can be the cause of, or recipient of rolling debris – **Look Around.**
- Heat, long hours, and repetition can lead to complacency and injuries – **Pace Yourself.**
- Multiple Resources of multiple typing doing multiple jobs = Multiple potential for injury – **Stay Focused.**
- Communicate clearly and get confirmation that your message is understood – **Communicate Clearly.**

FIREFIGHTER STATISTICS

- NFPA estimates 64875 FF injuries occurred in the line of duty in 2020.
- One firefighter injury occurred every 8 minutes and 28 seconds.
- An estimated 35% of those injuries occurred during fire-ground operations.
- The leading cause of fireground injuries was overexertion or strain.
- An estimated 30% of those injuries involved loss of work.
- 8% of all injuries occurred while responding to or returning from an incident.

INCIDENT RISK ANALYSIS

ICS (215A) DAY/NIGHT SHIFT

BR/DV	HAZARDOUS ACTIONS – CONDITIONS	MITIGATIONS – WARNINGS – REMEDIES
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> • Are you seeing what we have predicted? • Conduct thorough assessments before starting work. • Ensure LCES is in place. • Plan & communicate your exit strategy with your crew and adjacent resources. • Provide additional briefing for new resources and maintain communications. • Outflow winds from thunderstorms could negatively affect fire behavior.
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on uphill side. Use spotters when backing or turning around. • Practice "Defensive Driving" techniques. Assume other drivers are fatigued and complacent. • Use warning lights when working on roads or traveling in smoke and heavy dust. • Drive at or below posted speed limits. • Use chock blocks, turn wheels into hill. • Be alert for wildlife. Dusk to Dawn pose the greatest potential for accidents. • UTV operators shall wear DOT approved helmets and have certification to drive.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p. 20) • Limit number of personnel around snags and their exposure time. • Fallers must be qualified for the trees being felled. • Be alert around hazard trees during wind events, even green trees. • The hazard zone extends a minimum of 2½ tree lengths. • Avoid parking vehicles or taking breaks under or near hazard trees.
ALL	STEEP TERRAIN, MINE SHAFTS, ROLLING DEBRIS	<ul style="list-style-type: none"> • Maintain 8 ft. - 10 ft. spacing when working & walking. • Do not work above any personnel. • Flag mineshafts, advise Division and Safety Officer of the location. • Evaluate necessity to send personnel in areas with limited access.
ALL	DIRECT / INDIRECT LINE CONSTRUCTION	<ul style="list-style-type: none"> • Establish and maintain LCES. • Locate line in favorable location, lighter fuels, and gentler topography when possible. • Utilize natural or existing barriers. Watch for and communicate spot fires. • Stay in front of heavy equipment at least 100 feet or behind at least 50 feet. • Do not approach heavy equipment until seen and acknowledged by the operator • Watch for stump holes and ash pits.
ALL	HEAT RELATED ILLNESS	<ul style="list-style-type: none"> • Drink 2 bottles of water to 1 bottle of sports drink. Avoid energy drinks. • Take frequent breaks, minimum of 10 minutes every hour. • Recognize symptoms of HEAT RELATED ILLNESS which include low energy, cramping, headaches, dizziness, poor rest, poor eating habits, hot skin, and lack of sweating.
ALL	MOP UP OPERATIONS	<ul style="list-style-type: none"> • Evaluate areas for hazard trees and locate stump holes for avoidance. • Monitor fatigue, shorten shifts to increase rest where appropriate. • Provide motivation to workers to maintain situational awareness and avoid complacency. • Evaluate mop up distances against what is safe and necessary. • Review and follow "Look Up, Look Down, Look Around" (IRPG p. 34) • Avoid areas of hazardous materials.
ALL	AIR OPERATIONS	<ul style="list-style-type: none"> • Follow "Aviation Watch-Out Situations" (IRPG p. 62) • Do not plan on air resources for tactical support or medical transportation. • Refer to page 74, IRPG for directing bucket drops. • Ensure positive communication with all air resources. • Ensure crews are aware of water/retardant drop zones.
ALL	FIRING OPERATIONS	<ul style="list-style-type: none"> • Only personnel trained in the use of each devise will be authorized to use firing equipment. • Ensure that all personnel are briefed and prepared for firing and holding operations. • Ensure that all ground and aerial ignition plans are approved and signed by the IC prior to implementation.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. • Answer questions when asked by others. Ask for intel when you do not know the plan. • Ensure all personnel are familiar with the incident and IA communications plans.

Ann_Carlson@firenet.gov

For federal employees associated with the Mosquito Fire, if you are injured, please contact the COMP UL for the Authorization for Treatment (CA-16). We can issue the form directly to the hospital or clinic, but we need full names and SSN for the required forms prior to being able to do that. The employee or supervisor should contact me as soon as possible or upon arrival at the hospital, whichever is convenient.

For claims there are different forms needed based on the circumstances of the property loss or damage. Please contact me first to find out which forms are appropriate for your situation, and what additional information might be needed. This will expedite the process.

Unserviceable items must be turned into COMP/FINANCE if you are unable to replace at Supply. If items are lost or damaged on the fire line, the fire suppression module must provide a copy of the module's standard inventory with the documentation of broken or unserviceable items.

Identifying & Managing Stress

What does it look like?

- Increased emotional response: someone who is normally calm suddenly becomes irritable, angry, or quick tempered
- Decreased Emotional Response: someone who is normally animated and social becomes quiet, withdrawn, or begins to isolate themselves
- Other abrupt changes in emotions or behaviors

What can you do about stress?

Focus on what you're able to control:

- **Eat right, stay hydrated!**
- **Get enough rest!**
- **Communicate with friends and family!**

If you're feeling overwhelmed, or if you feel like talking to someone can be helpful – HR is able to assist and/or point you in the right direction.

PHOTOGRAPHS AND VIDEOS OF INCIDENT

Please use the QR code to upload fire-related photos and videos for public information. This really helps tell the fire story, shows the public your great work, and keeps the media and public informed. Please refrain from posting incident-related videos to your personal social media. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness. When this happens it could reflect poorly on all that are attached to this incident.

MEDIA

The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property, and the news media may not interfere with incident operations. Please always treat the media with courtesy and respect and advise the PIO office if there are any issues.

You haven't looked at your task book since checking in last week.

Your task book has tasks signed off in May of 2013.

You're finally going to get that training assignment as _____, and you forgot your task book!

You see your trainer driving out of camp, heading home, and you still haven't gone over your task book.

It's Day 5 of the incident and your trainer still can't remember your name.
