OUTPUTS

FIRE BEHAVIOR

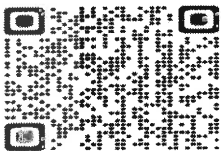

GENERAL AREA: (In the event fire spots outside the line or we support a new IA) **Surface Fire activity. Expect slow to moderate rates of spread unless fire lines up with slope and wind especially in areas with continuous grass and brush, if this occurs, torching is possible. Review pocket cards to track trends and thresholds for the area.**

Fine dead fuel moistures support fire spread, break point is FDFM <5. Rates of spread generally 1-8ch/hr. If fire gets established in an open area aligned with wind and slope, spread rates increase to 8-22ch/hr.

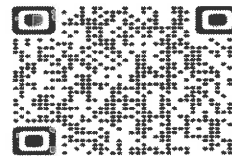

Torching possible. Spotting distances will be short range less than 3/10 of a mile max (wind speed dependent).

Fire activity continues in areas of the fire that are inaccessible as heavy fuels and duff layers continue to hold heat. Expect hot spots to show themselves in the afternoon.

ENF Pocket Card ERC-Y

TNF Pocket Card BI-G

ERC Forecast from WIMS: South area of fire, ENF FDRA 335: 55-63 Moderate-High; (Energy Release Component does not include wind)

BI Forecast from WIMS: North area of fire, TNF FDRA 350/354: 45-72 Moderate-High; (Burning Index Includes Wind)

SPECIFIC:

Branch 10: Existing containment lines are expected to hold. Smoldering and creeping fire. Minimal fire spread/growth in the forecast. Isolated inaccessible areas still hold heat.

Branch 25: Smoldering and creeping fire. Containment lines expected to hold. Minimal fire spread/growth in the forecast. Isolated inaccessible areas still hold heat.

AIR OPERATIONS:

Moderate inversion sets up overnight, light smoke settling in drainages in the AM.
 See daily weather forecast for specifics.

SAFETY

On relatively small fires or deceptively quiet areas of large fires. (IRPG Common Denominators)
 Fire weakened timber poses overhead hazards. Stump holes will continue to hold heat.

Hazards & Risks

Transfer of Command: Today is transition day from Team 2 to Team 12. Please keep in mind challenges that come with transfer of command. Some things to think about on transition day: has the communication plan changed? Changes to the IAP in leadership? New Division or Branch you are reporting to? Ensure you are receiving and giving thorough briefings and establish good communication with the incoming resources. Sharing of information is key to the safety of all.

Working around and with Heavy Equipment: Remember the limited visibility of the operator. If you can't see his or her face, chances are they can't see you. When working directly with Heavy Equipment, maintain a safe distance and eye contact with the operator. Sometimes radio communications can be challenging with the noise levels in the area. Conduct a briefing with the operator before getting to work and have a plan. Reference the IRPG for specific guidance.

Heat Related Illness: With the temperatures being mild we need to remember heat related illness can still happen. Know the signs and symptoms of heat related stress. Staying well hydrated throughout your entire shift is essential. Good nutrition, fitness level and drinking plenty of electrolyte-replacing fluids along with frequent rest breaks will help reduce the chances of becoming sick.

- **Understand that heat stroke is a life-threatening condition!**
- Review the signs & symptoms and patient treatment guidelines found in the IRPG.

Stay Hydrated and take frequent breaks!
