

Map ID	Condition	Values at Risk	Resources/Notifications	Actions
MAP 20, Lower Smith	Fire reaches or is expected to reach MAP20 line with the potential to impact Gasquet and Hwy 199, in the next 48-72 hours.	Gasquet Hwy 199 transportation route Smith River	IC LOFR California Highway Patrol Cal Trans Del Norte Sheriff	Consider actions based on current and forecasted fire weather and behavior, the time of season and probability of a season-ending event. 1. Consider an area evacuation and closure of Hwy 199. 2. IC to notify AA of structure protection implementation. 3. Begin implementing structure protection operations.
MAP 21, Upper North Fork	Fire reaches or is expected to reach MAP21 line with the potential to reach control line on 17N49 rd within the next 3 to 4 days.	High and Low Divide communities Rowdy Creek and Copper Creek watershed	AA LOFR California Highway Patrol Cal Trans Del Norte Sheriff	Consider actions based on current and forecasted fire weather and behavior, the time of season and probability of a season-ending event. 1. Consider area closure. 2. Inform Agency Administrator of evacuation and protection action. 3. Consider level 2 evacuation of High and Low Divide Communities. 4. Implement structure protection for residents in danger from the fire. 5. Implement tactical firing operation to defend primary control line.
MAP 22, Hardscrabble	Fire is likely to reach MAP22 line with the potential to reach High and Low Divide.	High and Low Divide State and Private lands west of National Forest Green Diamond Timber Interests	AA LOFR California Highway Patrol Cal Trans Del Norte Sheriff	Consider actions based on current and forecasted fire weather and behavior, the time of season and probability of a season-ending event. 1. Recommend level 3 Evacuation for High and Low Divide communities. 2. Implement structure protection preparation on High and Low Divide and Implement structure protection preparation on High and Low Divide communities. 3. Consider Unified Command with Cal Fire.
MAP 23, Moores	When the fire crosses the MAP and is expected to reach the cabin, and ranch within 72 hours.	Major Moore Homes and improvements Major Moore Campground Boat Launch	AA LOFR California Highway Patrol Cal Trans Del Norte Sheriff	Consider actions based on current and forecasted fire weather and behavior, as well as the time of season and current probability of a season-ending event. 1. Consider an area closure. 2. Communicate fire situation to Major Moore residents. 3. Inform Agency Administrator of structure protection implementation. 4. Structure preparation should be implemented. Ensure READ is present to address any natural/cultural resource issues. 5. Consider implementing firing operations.
MAP 24, South Fork Road	The fire crosses the MAP24 and is expected to impact contingency line with the next 48-72 hours.	Greater Houchi Community State and Private lands west of National Forest Jedediah Smith Redwoods State Park	AA LOFR California Highway Patrol Cal Trans Del Norte Sheriff	Consider actions based on current and forecasted fire weather and behavior, the time of season and probability of a season-ending event. 1. Consider an area closure. 2. Consider Unified Command with Cal Fire 3. Communicate fire situation to Greater Houchi residents. 4. Inform Agency Administrator of structure protection implementation. 5. Structure preparation should be implemented. 6. Consider implementing firing operations. 7. Coordinate with Resource Advisors to identify and mitigate potential impacts to archeological or cultural values.
MAP 25, Myrtle Creek	When the fire approaches MAP25 and is predicted to impact control line.	Low Divide Community Greater Houchi Community Jedediah Smith Redwoods State Park Hwy 199 transportation corridor	AA LOFR California Highway Patrol Cal Trans Del Norte Sheriff	Consider actions based on current and forecasted fire weather and behavior, time of season and probability of a season-ending event. 1. Assess and implement structure protection or fuels mitigation options for identified values in the Greater Houchi and Low Divide communities. 2. IC to notify AA. Consider Level 3 evacuation notices for residents of Houchi and Low Divide 3. Consider expanding area closure. 4. Consider structure protection.
MAP 26, Big Flat	Fire threatens MAP 26 with potential to reach Big Flat Communities and residents in the next 48-72 hours.	Rock Creek Community Big Flat Community	AA LOFR California Highway Patrol Cal Trans Del Norte Sheriff	Consider actions based on current and forecasted fire weather and behavior, time of season and probability of a season-ending event. 1. Consider level 3 evacuation. 2. Implement structure protection on structures at risk. 3. Use Defensive tactical firing to defend community if practicable.
MAP 27, Siskiyou Fork	Fire crosses Siskiyou Fork and becomes established to the north or east and there is low probability of suppression.	Siskiyou Fork Wild and Scenic River watershed Siskiyou Wilderness Values	AA LOFR Branch Ops	Consider actions based on current and forecasted fire weather and behavior, time of season and probability of a season-ending event. 1. Consult with the AA on what actions should be taken as the fire moves east 2. Consider increasing direct suppression actions commensurate with the Values at Risk. 3. Retardant is not an option in the protected watershed. 4. Consider continuing prep on the dozer line and Fall Creek road system
MAP 28, Washington Peak	Fire becomes established across primary control features to the east or north (Washington Ridge Road and dozer lines) and is not likely to be suppressed.	Siskiyou Wilderness Values Stevens Creek watershed	AA LOFR Branch Ops	Consider actions based on current and forecasted fire weather and behavior, time of season and probability of a season-ending event. 1. Consider continuing prep on the Washington Peak Road as a secondary containment line. 2. Consider increasing direct suppression actions commensurate with the Values at Risk. 3. Retardant is not an option in the Stevens Creek watershed. 4. Consult with the AA on what actions should be taken if the fire breaches the secondary containment line.
MAP 29, WP Firing	Fire behavior increases and moves to threaten the established control features.		AA LOFR Branch Ops	Consider actions based on current and forecasted fire weather and behavior, time of season and probability of a season-ending event. Consider initiating firing operations to keep fire within the primary control line (18N00) road.
