Fire Weather Forecast

FORECAST NO: 5

PREDICTION FOR: Tuesday-Wednesday

DATE: August 22nd, 2023

FORECAST ISSUED: 1800 August 21st, 2023

FIRE: Smith River Complex South

UNIT: CA-SRF-968

IMET: James White (240-778-5316)

SIGNED: James White

WEATHER DISCUSSION: * Valley elevations = 400ft (Gasquet), Ridgetop elevations = 3500 ft (Cold Springs) * The remnants of hurricane Hilary will help bring consistent cloud cover and moist, onshore winds today. Under consistent clouds, highs will struggle to rise above the low 70s with RH in the mid-50s. There is a very slight chance of drizzle and wetting rain in the morning but any accumulation will stay below 0.1 inches. Winds will be gentle out of the west. Transient high pressure will help warm and dry conditions on Wednesday with regular, diurnally driven winds returning.

TODAY:

WEATHER: Cloudy. Heavy smoke in valleys near the fires, Slight chance (10%) of rain in the morning. Total

accumulation of a trace to 0.1 inches.

MAX TEMP: Vallevs:

69-74°F (4-7°F 1)

MIN RH:

Valleys: 53-58% (2-4% 个)

Ridgetops:

65-70°F (3-6°F ↓)

Ridgetops:

52-57% (Little Change)

CHC WTG RAIN: 10%

LAL: 1

SFC VIS: 1-2 miles around the fire, better if rain occurs

WINDS:

Valleys: Morning downslope 1-3 mph afternoon upslope 2-4 mph.

(20 feet)

Ridgetops: Morning northeast 2-4 mph, northwest 4-8 mph gusts to 15 mph.

MIXING HEIGHT: Rising to 5,000 ft by 1400.

TRANSPORT WIND: Southwest 7-12 mph.

TONIGHT:

WEATHER: Mostly clear. Strong thermal belt 2500 to 3500 ft.

MIN TEMP:

Valleys: 55-60° (3-6°F ↓) MAX RH:

Valleys: 90-95% (3-6% 1)

Ridgetops:

62-68° (2-4°F ↑)

Ridgetops:

45-55% (10-15% J)

CHC WTG RAIN: 0%

LAL: 1

SFC VIS: 1-2 miles, clearer east of the fire early morning

WINDS:

Valleys: Downslope 2-4 mph.

(20 FEET)

Ridgetops: Northeast 5-10 mph, infrequent gusts to 15 mph.

MIXING HEIGHT: Dropping to 1,000 ft by 0100.

TRANSPORT WIND: Northeast 10-14 mph.

WEDNESDAY:

WEATHER: Clear. Heavy smoke in valleys near the fire in the morning.

MAX TEMP:

Valleys:

73-78°F (3-6°F 个)

MIN RH:

Valleys:

46-51% (4-10% J)

Ridgetops:

71-76°F (4-7°F 个)

Ridgetops:

33-38% (10-20% 1)

CHC WTG RAIN: 0%

LAL: 1

SFC VIS: 1-2 miles, better west in the afternoon

WINDS:

Valleys: Morning downslope 2-4 mph afternoon upslope 3-6 mph.

(20 feet)

Ridgetops: Morning northeast 4-8 mph, northwest 4-8 mph gusts to 18 mph.

MIXING HEIGHT: Rising to 7,000 ft by 1200.

TRANSPORT WIND: North 6-10 mph.

EXTENDED OUTLOOK: Warming and drying will continue into Thursday with temperatures approaching 80 and afternoon RH in the mid-30s. Winds will remain gentle and terrain driven, though high pressure will slightly enhance regular overnight northeast winds with poor overnight recoveries in the upper 30s. A prolonged cool a moist period is expected to build in this weekend into next week. Nearby Weather Observations

FIRE BEHAVIOR FORECAST Incident Name: SMITH RIVER COMPLEX - SOUTH Forecast Number: 05 Type of Fire: Wildfire Operational Period: Date From: 8/22/23 Date To: 8/23/23 Time From: 0700 Time To: 0700 Unit: Six Rivers National Forest - Gasquet District

INPUTS

WEATHER SUMMARY:

See Fire Weather Forecast

FUELS SUMMARY:

Due to the below normal amount of precipitation, live fuel moisture levels did not recover this spring, making the shrubs readily available for consumption. There are abundant snag patches within the fire scars; Biscuit (2002), Coon (2015), Eclipse Complex (2017) and Slater (2020). The fuel moistures of the manzanita are around 110% and the 1000-hour fuels 9%, below critical levels. Given the dryness of the vegetation, there is abundant available fuels to continue growth of all uncontained fires within the complex.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

We are currently in what is peak of fire season for this area of the state. Historically, the fuels along the riparian areas have been resistant to burning, but that is not the case this year. Under smoky conditions, the fire will consume the heavy dead surface fuels and have isolated tree torching where there is a higher fuel load under the timber canopy. Roll-out will continue to be a driver of growth in these areas. When the fire is exposed to a stronger wind or gets established on a steep slope with aligned fuels and topography, expect rapid rates of spread with sustained crown runs and moderate range spotting. Extreme fire behavior was experienced on the northern flank of the Kelly fire on August 17th, the southern flank on August 19th, and overnight on August 20th. Adding to the complexity of the fire environment is a daily wind shift as it turns westerly during the heat of the day and easterly overnight with limited humidity recovery on upper elevations.

Fire Danger Indices – 2022 IRPG Page 39
Energy Release Component (ERC): 90th
August Average ERC Percentile: 85th

2020 Slater Fire Large growth days (September 10th) - ERC Percentile: 99th Peak Burn Period (1400 – 2000) - Probability of Ignition (PIG): 40% (shaded), 60% (unshaded)

SPECIFIC:

Branch V: The afternoon westerly flow will be favorable for the Corral fire as it burns away from the 305 road. It has crossed the Still Creek to the north and although it is still in the Bisquet fire, it looks to have more continuous fuels. The Kelly fire has crossed the Wimer road and will continue chewing its way to the north. Pay special attention for squirrely afternoon winds where Highway 199 turns to the north, around DP 55.

Branch XX: The portion of the Kelly fire south of the highway has plenty of heat and will continue to burn in a westerly direction. It will want to make runs up the spur drainages towards Road 411. The Coon fire will burn actively to the north as it grows closer to the Kelly fire near the 411 and 405 roads. Think about your access and egress into your work locations, taking into consideration the afternoon westerly winds.

AIR OPERATIONS:

Sunrise 0602, Last Light 2035 (Daylength: losing 2 min, 34 sec each day)

Smoke will continue to be an issue for the foreseeable future. The best chance of clear air will be over the western portion of the complex in the late afternoon.

SAFETY:

Anticipate the diurnal wind shifts that occur over the fire each day. Easterly flow overnight, shifting to a westerly flow as temperatures increase around 1200.

Construct direct handline where feasible to maximize suppression efforts and limit Corral and Diamond fire spread. Where possible, utilize tactics to minimize the impact to natural, and cultural resources.

7. Special Instructions:

Be aware of retardant avoidance areas, mine shafts and naturally occuring asbestos.

Safety Officer(s) assigned to Branch V: Shaun Davis

HEALTH AND SAFETY MESSAGE

Day \ Night Operations August 22, 2023

INCIDENT: SRF Smith River Complex

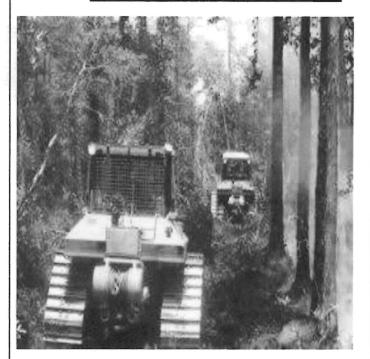

Day: Tuesday Shift: Day \ Night

Major Hazard and Risk:

- ➤ Hazard Tree Safety: Hazard trees, both dead snags and live green trees, are one of the most common risks encountered on the fireline. All firefighters should frequently survey their work area for potential hazards trees. This includes your sleeping areas in camp!
- Extended Extraction Times: Be familiar with the medical plan. Develop a plan on how you would get an injured firefighter out timely. Factor in how smoke inversions will reduce the likelihood of utilizing helicopters for extraction.
- Hazardous Roads: Narrow roads, steep drop-offs, erratic drivers, and operator fatigue are all prevalent on this and other assignments. If road conditions are an issue, contact your Division Supervisor to report.
- Camp Illness: As the number of resources increases so does the congestion in the camps and exposure to illnesses. Please practice good hygiene and as much as possible stay as a unit of one to reduce exposure to illness. If you don't feel well don't expose others.

<u>Narrative:</u> A lot of new resources are coming into the incident, congesting the narrow mountain roads assigned. You are driving heavy equipment on roads not necessarily designed for that purpose. Please be careful of soft shoulders to prevent the shoulder blowing out and your vehicle going over the side.

Working around heavy equipment

Safety Officers: Rick Bertram 805-471-8076 Patrick Cockrum 916-220-0335 Shaun Davis 805-205-0918 Keith Aggison 805-748-9403

Safety around heavy equipment

- Always maintain visual and radio communications with operator.
- Never stand behind heavy equipment
- Do not approach equipment until the blade is lowered and it is powered down or off and the operator waives you in
- Do not climb onto running equipment
- Do not work below a dozer if at all possible due to rolling material
- Maintain 1.5 to 2 the times the height of the trees distance from the dozer while working in trees.
- Let the operator know of any hazards they may not see.

Prepared: 8.21.23

| | FINANCE MESSAGE | | | |
|-----------------------------|-----------------------------------|-----------|----------|-----------|
| 1. Incident Name: | 2. Operational Period: Date From: | 8/22/2023 | Date To: | 8/23/2023 |
| SMITH RIVER COMPLEX - SOUTH | Time From: | 0700 | Time To: | 0700 |

CTR and Shift Tickets:

- -If you have the ability to scan a QR code with your smartphone, scan the QR code at the bottom this page to get a fillable CTR or shift tickets. Using a .pdf format, you can scan and fill, then email to your Supervisor on the incident for signature and submission.
- -Another option is to complete a paper CTR / Shift Ticket, get it signed by your supervisor on the fire, and take a picture of it.

E-mailing CTRs and Shift Tickets Subject line: SOUTH TIME Include your Resource

Email to: 2023.smithrivercomplex.finance@firenet.gov

- -If you are emailing your CTR, SHIFT TICKET, or any type of pay documentation to FINANCE, please put SOUTH in the subject line.
- -This email can be used to submit finance check-in documents too, like manifests, copies of resource orders, AD casual hire forms, receipts, etc. Be sure to include your Resource Order number somewhere in the body of the email.
- -You're encouraged to submit time every two days if possible to stay current, and...

REMEMBER, HARD PAPER COPIES OF DOCUMENTS ARE ALWAYS WELCOME TOO!!

Smith River Complex Incident: Resource Advisor Message

Resource Advisors are Available in all Divisions. The goal is to support the mission of containing this wildfire, while minimizing resource damage. Utilize READ/REAFs for cultural and environmental resource concerns.

Fish Screens: Coho Salmon Critical Habitat

Most rivers and streams in this area are considered critical habitat for Threatened Coho salmon. Please ensure that Mark 3 and Engine/Tender suction hoses have the appropriate screen attached. Talk to a READ if you think you need a screen!

Port Orford Cedar root disease

Some local drainages are infected with a root disease that spreads via mud and water. To prevent spreading this disease to uninfected areas, all water tenders and engines will apply bleach to their tanks in a 1 to 1000 ratio (using

bleach with 6.0 % Sodium hypochlorite). Talk to a READ if you need some bleach!

Cultural and Heritage Resources:

The area you are working in is rich in cultural and heritage resources which may be encountered while fighting fire. When potential cultural or heritage resource are encountered, that they are not disturbed.

- GPS its location and take a photo, but do not remove or collect anything.
 Work with your division to notify a READ for recommendations on how to proceed.
- Some cultural resources present hazardous conditions, such as mining shafts. Be attentive to these potential hazards when working around known mining areas or in rocky areas.

- Known resources may be flagged ahead in work areas.
- Finding of cultural resources should not be reported over the radio.
- Coordinate with READs on all dozer operations to minimize impacts to cultural and heritage sites. Limit dozer operations to pre-existing dozer lines and limit widths to the extent possible.

TRAINING SPECIALIST MESSAGE

A Training Specialist is on the incident.
All federal, state, and local government agency trainees working on position task books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment.

The TNSP desk is in ICP trailer row.

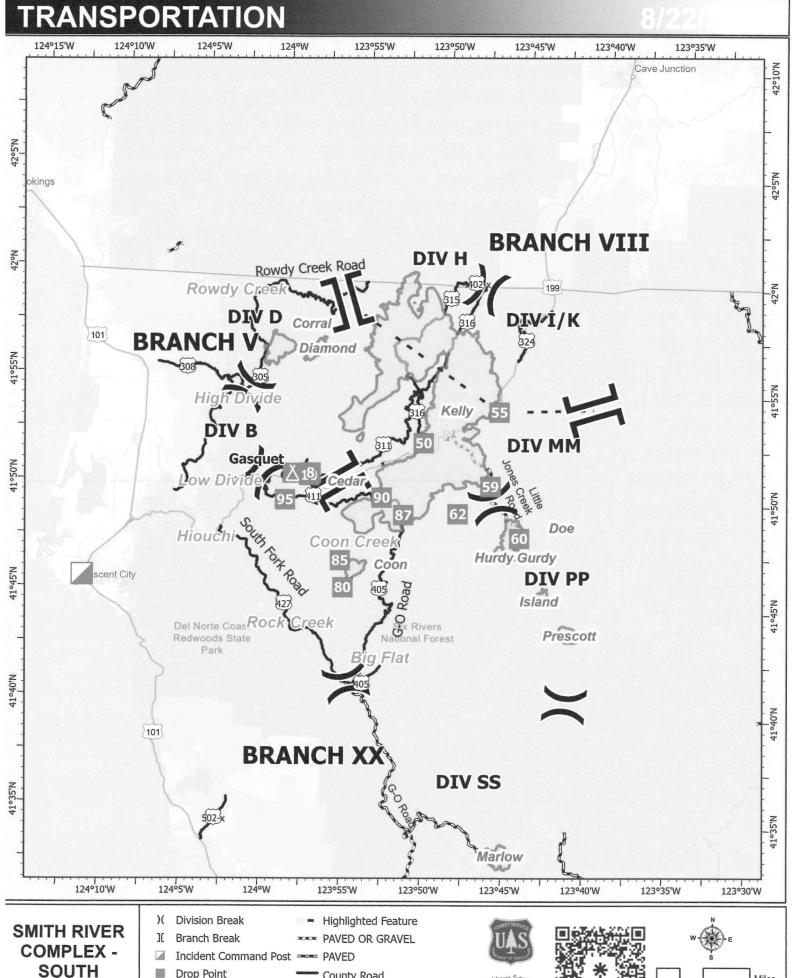

PLEASE CALL or TEXT if you have any questions.

LINE "MEDICAL EMERGENCY" PLAN:

Crew Supervisor to contact Division Supervisor/Operations with:

- Patient Complaint, Condition and Location via Tactical or Command Frequency. Priority 1/Red & 2/Yellow patients
 - Triggers Incident within Incident (IWI)

Division Supervisor/*POC contacts South Smith Communications:

- Division Supervisor or *POC will run <u>"Medical-Emergency"</u> on Command Frequency.
- Division Supervisor or *POC to use "Medical Plan (ICS 206 WF)" worksheet in the IAP or IRPG.
- Communications contacts Medical Unit Leader on the Command Frequency or cell phone (805-570-9061)

*POC (Point of Contact)

LINE "NON-EMERGENCY INCIDENT" PLAN:

Crew Supervisor to contact Division Supervisor with:

- Patient Complaint, Condition and Location via Tactical or Command Frequency. Priority 3/Green Patients
 - · Does not trigger Incident within Incident (IWI).

Division Supervisor/POC Contacts South Smith Communications

- Division Supervisor or *POC will run "Non-Emergency Incident" on the Command Frequency.
- Division Supervisor or *POC to use "Medical Incident Report" worksheet on back of this page or in IRPG.
- Communications contacts Medical Unit Leader on the Command Frequency or Cell Phone (805) 570-9061

IN-CAMP - 24 HOUR MEDICAL

Contact South Smith Communications with: Patient Complaint, Condition, and Location via phone (760) 220-2863 or Command Frequency
