Fire Weather Forecast

FORECAST NO: 6

PREDICTION FOR: Wednesday-Thursday

DATE: August 23rd, 2023

FORECAST ISSUED: 1800 August 22nd, 2023

FIRE: Smith River Complex South

UNIT: CA-SRF-968

IMET: James White (240-778-5316)

SIGNED: James White

WEATHER DISCUSSION: * Valley elevations = 400ft (Gasquet), Ridgetop elevations = 3500 ft (Cold Springs) High pressure will begin to build in today, kicking off a brief but marked change in weather. Temperatures will reach back near 80 where smoke allows with RH dropping back near 40%, especially on ridgetops. Winds will remain mostly gentle and terrain driven. Gusty, dry northeast winds will build back in quickly tonight around 2100 with high pressure helping push them lower near 1500 ft. These winds will shut off early by 0400 with generally hotter, and drier weather on Thursday. Greater instability Thursday will likely allow for slightly better mixing along with a slight chance (10%) of isolated thunder.

TODAY:

WEATHER: Clear. Heavy smoke in valleys near the fire in the morning.

MAX TEMP:

Valleys:

75-80°F (2-4°F 个)

MIN RH:

Valleys:

38-43% (1-3% 火)

Ridgetops:

72-77°F (4-7°F 个)

Ridgetops:

36-41% (15-25% 1)

CHC WTG RAIN: 0%

LAL: 1

SFC VIS: 1-2 miles, better west in the afternoon

WINDS:

Valleys: Morning downslope 2-4 mph afternoon upslope 3-6 mph.

(20 feet)

Ridgetops: Morning northeast 6-10 mph, northwest 4-8 mph gusts to 16 mph.

MIXING HEIGHT: Rising to 8,000 ft by 1300.

TRANSPORT WIND: Northwest 8-12 mph.

TONIGHT:

WEATHER:

Mostly clear. Strong thermal belt 1500 to 3500 ft. Strongest winds 2100 to 0200

MIN TEMP:

Valleys: Ridgetops:

55-60° (2-4°F 个) 62-68° (4-8°F 个) MAX RH:

Vallevs:

86-91% (3-6% J)

CHC WTG RAIN: 0%

LAL: 1

Ridgetops:

35-45% (5-10% 1)

SFC VIS: 1-2 miles, clearer east of the fire early morning

WINDS:

Valleys: Downslope 2-4 mph.

(20 FEET)

Ridgetops: Northeast 10-15 mph, infrequent gusts to 25 mph.

MIXING HEIGHT: Dropping to 1,500 ft by 2200.

TRANSPORT WIND: Northeast 10-14 mph.

THURSDAY:

WEATHER:

Clear. Heavy smoke in valleys near the fire in the morning. Very slight (10%) risk of thunderstorms in the afternoon. Any thunder would accompany dangerous lightning and erratic outflow to 40 mph.

MAX TEMP:

Valleys:

75-80°F (Little Change)

MIN RH: Valleys: 38-43% (2-4% 1)

Ridgetops:

75-80°F (2-4°F 个)

Ridgetops:

33-38% (3-6% 1)

CHC WTG RAIN: 0%

LAL: 2

SFC VIS: 1-2 miles, better west in the afternoon

WINDS:

Valleys: Morning downslope 2-4 mph afternoon upslope 3-6 mph.

(20 feet)

Ridgetops: Morning northeast 8-12 mph, northwest 4-8 mph gusts to 16 mph.

MIXING HEIGHT: Rising to 11,000 ft by 1100.

TRANSPORT WIND: Southwest 8-12 mph.

EXTENDED OUTLOOK: High pressure will be short lived with a persistent trough forming off the coast of central California brining regular, strong marine influence to the fire area this weekend into early next week. This will bring generally cooler and moister conditions alongside mostly gentle terrain winds.

FIRE BEHAVIOR FORECAST

Incident Name:

Operational Period: Date From:

8/23/23 Date To: 8/24/23

SMITH RIVER COMPLEX - SOUTH

Time From:

0700 Time To: 0700

Forecast Number: 06

Type of Fire: Wildfire

Unit:

Six Rivers National Forest - Gasquet District

INPUTS

WEATHER SUMMARY:

See Fire Weather Forecast

FUELS SUMMARY:

Due to the below normal amount of precipitation, live fuel moisture levels did not recover this spring, making the shrubs readily available for consumption. There are abundant snag patches within the fire scars; Biscuit (2002), Coon (2015), Eclipse Complex (2017) and Slater (2020). The fuel moistures of the manzanita are around 110% and the 1000-hour fuels 9%, below critical levels. Given the dryness of the vegetation, there is abundant available fuels to continue growth of all uncontained fires within the complex.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

We are currently in what is peak of fire season for this area of the state. Historically, the fuels along the riparian areas have been resistant to burning, but that is not the case this year. Under smoky conditions, the fire will consume the heavy dead surface fuels and have isolated tree torching where there is a higher fuel load under the timber canopy. Roll-out will continue to be a driver of growth in these areas. When the fire is exposed to a stronger wind or gets established on a steep slope with aligned fuels and topography, expect rapid rates of spread with sustained crown runs and moderate range spotting. Adding to the complexity of the fire environment is a daily wind shift as it turns westerly during the heat of the day and easterly overnight with limited humidity recovery on upper elevations.

> Fire Danger Indices - 2022 IRPG Page 39 Energy Release Component (ERC): 90th August Average ERC Percentile: 85th 2020 Slater Fire Large growth days (September 10th) - ERC Percentile: 99th Peak Burn Period (1400 - 2000) - Probability of Ignition (PIG): 40% (shaded), 60% (unshaded)

SPECIFIC:

Branch V: The afternoon westerly flow will be favorable for the Corral fire as it burns away from the 305 road. The Kelly fire continues to fill in on both flanks towards Patrick Creek. Pay special attention for gusty and erratic afternoon winds along the river and Hwy 199 corridor.

Branch XX: The portion of the Kelly fire south of the highway continues to have plenty of heat and will continue to burn to the south & west, Fire will continue to back against the afternoon westerly winds and down towards Hwy 199. The Coon & Kelly fires will likely grow together today. Think about your access and egress into your work locations, taking into consideration the afternoon westerly winds.

Night shift: Predicted high winds late tonight with gusts to 20 mph above 2000' with alignment can result in increased fire spread, especially at the upper elevations.

AIR OPERATIONS:

Sunrise 0604, Last Light 2033 (Daylength: losing 2 min, 35 sec each day)

Smoke will continue to be an issue for the foreseeable future. However, the afternoon westerly flow should provide another day of good conditions on the western portion of the complex.

SAFETY:

Monitor your escape route throughout the shift. Wind can produce prolific spotting, which could block your egress. Place lookouts that know your location and your escape route.

6. Work Assignments:

Construct direct and indirect lines wherever feasible to maximize suppression efforts. Conduct damage assessment in areas that the fire has impacted.

7. Special Instructions:

-Be aware of retardant avoidance areas, mine shafts and naturally occuring asbestos.

-Maintain awareness of fire conditions affecting road systems in your area that might be a primary escape route and establish secondary egress to safe area. Ensure trigger points are established and re-evaluated throughout the shift.

Safety Officers assigned to Branch XX: Patrick Cockrum and Keith Aggson

6. Work Assignments:						The sound of the s	

6. Work Assignments:

Construct direct and indirect lines wherever feasible to maximize suppression efforts.

7. Special Instructions:

-Be aware of retardant avoidance areas, mine shafts and naturally occuring asbestos.

-Maintain awareness of fire conditions affecting road systems in your area that might be a primary escape route and establish secondary egress to safe area. Ensure trigger points are established and re-evaluated throughout the shift.

Safety Officers assigned to Branch XX: Patrick Cockrum and Keith Aggson

SAFETY MESSAGE

INCIDENT NAME: Smith River Complex CA-SRF-000968 Operational Period: 8\23\23 Day\Night

Life First, Everyone Goes Home Stop, Think, Talk and then Act

MAJOR HAZARDS AND RISKS:

Fatigue: With multiple days working in this terrain your body is most likely suffering some. Please ensure you are eating and drinking enough through out the day and try to get enough rest.

Difficult Terrain: This incident has some of the most challenging topography. Always know where you are and the easiest and quickest way out. Don't wait until you have an problem. Use the LCES process and make sure your plan continues to stay valid through out the day. The terrain your in creates challenges to maintaining your escape routes and quality safety zones.

Hazardous Trees: Be alert of snags. Crews are working in very hazardous areas with numerous snags. Stay diligent, use lookouts, and flag hazardous areas. Damaged and weakened trees are a serious hazard that should not be taken lightly. Stay at least 1.5 to 2 lengths of the height of the tree away from any snag or hazard tree. Please ensure others around you are engaged in the prevention of a tree strike, we have already had one.

Hazardous Roads: These roads are narrow, steep, and unforgiving. Watch your speed and watch out for each other and wildlife on the roads. Take your time while driving and flag roads for others into and out of the divisions

Extreme Fire Behavior: Stay alert for changes in the smoke conditions, wind direction and intensity. Monitor temperature and RH throughout the day and pass that information on to other divisions. Establish trigger points and use lookouts. Make sure safety zones are within obtainable timeline.

Aircraft: If a helicopter is used, maintain good communication with the pilot and be clear of drop area. Always consider risk verses gain and pilot safety before a request for a ship is made. Read the IRPG section in the Blue Pages on directing bucket drops.

Rolling Rock/Debris: Utilize good spacing and post lookouts in hazardous areas. Never trust the stability of materials on the upslope and loudly shout out anything coming down the hill. Stay diligent while driving for roll out of rocks and trees.

Mines: There are numerous mines throughout this complex, please stay alert for any possible areas for mines. There are many vertical shafts that have claimed lives in this area over the years. If you see one, please GPS and flag the area and notify your Division.

	FINANCE MESSAGE			
1. Incident Name:	2. Operational Period: Date From:	8/23/2023	Date To:	8/24/2023
SMITH RIVER COMPLEX - SOUTH	Time From:	0700	Time To:	0700

CTR and Shift Tickets:

- -If you have the ability to scan a QR code with your smartphone, scan the QR code at the bottom this page to get a fillable CTR or shift tickets. Using a .pdf format, you can scan and fill, then email to your Supervisor on the incident for signature and submission.
- -Another option is to complete a paper CTR / Shift Ticket, get it signed by your supervisor on the fire, and take a picture of it.

E-mailing CTRs and Shift Tickets

Subject line: SOUTH TIME Include your Resource #

Email to: 2023.smithrivercomplex.finance@firenet.gov

- -If you are emailing your CTR, SHIFT TICKET, or any type of pay documentation to FINANCE, please put SOUTH in the subject line.
- -This email can be used to submit finance check-in documents too, like manifests, copies of resource orders, AD casual hire forms, receipts, etc. Be sure to include your Resource Order number somewhere in the body of the email.
- -You're encouraged to submit time every two days if possible to stay current, and...

Contact us from: 0530 to 2200 Personnel Phone # 669-206-2317 Equipment Phone # 669-206-2316

REMEMBER, HARD PAPER COPIES OF DOCUMENTS ARE ALWAYS WELCOME TOO!!

Smith River Complex Incident: Resource Advisor Message

Resource Advisors are Available to all Divisions. The goal is to support the mission of containing this wildfire, while minimizing resource damage. Utilize READ/REAFs for cultural and environmental resource concerns.

READ Flagging -

- Yellow/white striped 'Equipment Exclusion'
- Blue and white Resource Avoidance

Fish Screens: Coho Salmon Critical Habitat

Most rivers and streams in this area are considered critical habitat for Threatened Coho salmon. Please ensure that Mark 3 and Engine/Tender suction hoses have the appropriate screen attached. Talk to a READ if you think you need a screen!

Port Orford Cedar root disease

Some local drainages are infected with a root disease that spreads via mud and water. To prevent spreading this disease to uninfected areas, all water tenders and engines will apply bleach to their tanks in a 1 to 1000 ratio (using bleach with 6.0 % Sodium hypochlorite). Talk to a READ if you need some bleach!

Cultural and Heritage Resources:

The area you are working in is rich in cultural and heritage resources which may be encountered while fighting fire. When potential cultural or heritage resource are encountered, that they are not disturbed.

- GPS its location and take a photo, but do not remove or collect anything. Work with your division to notify a READ for recommendations on how to proceed.
- Some cultural resources present hazardous conditions, such as mining shafts. Be attentive to these potential hazards when working around known mining areas or in rocky areas.
- Known resources may be flagged ahead in work areas.
- Finding of cultural resources should not be reported over the radio.
- Coordinate with READs on all dozer operations to minimize impacts to cultural and heritage sites. Limit dozer operations to pre-existing dozer lines and limit widths to the extent possible.

TRAINING SPECIALIST MESSAGE

A Training Specialist is on the incident.
All federal, state, and local government agency trainees working on position task books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment.

The TNSP desk is in ICP trailer row.

PLEASE CALL or TEXT if you have any questions.

John LeBlanc
Training Specialist

Sign in training
