INCIDEN	I OBJECTIVES (I	CS 202)							
1. Incident Name:	2. Operational Period:	Date From:	8/24/2023	Date To:	8/25/2023				
SMITH RIVER COMPLEX - SOUTH		Time From:	0700	Time To:	0700				
3. Objective(s):			390						
Strategic Direction									
The Smith River Complex is being managed with a decision making in all considerations. Firefighting cachieve the strategy of suppressing the fire, prever Values include the safety of the public and firefightenear Gasquet, Pioneer, Lower Jones Creek, Washi City, as well as water resources, transportation rou	pperations will implement to nting unnecessary suppresers; privately and tribally he ington Flat, Siskiyou Fork,	actics that offer the sion related dama eld timberlands; the French Hill, Coon	e highest proba age, and protec ne communities Creek, Rock C	ability of su ting values and outlyi creek, and	ccess to at risk.				
Leader's Intent									
All resources assigned to the incident will work togoresources will ensure transparent, timely, and accurelationships with each other and with cooperators safety, including the identification and mitigation of making. Personnel will manage fatigue by maintain effective communication from all assigned personnel.	rate communication at all I All incident personnel sho hazards to yourself and ot ing work/rest cycles. CAIII	evels of the incide ould be prepared the hers through time	ent while working take appropri ly and thoughtfold the control of	ng to streng ate actions ul risk-base	othen regarding ed decision				
Management Objectives			**************************************						
- Provide for firefighter and public safety through hazard recognition and application of the risk management process.									
Coordinate public information to provide timely and continuous situation updates to affected agency partners, cooperators, and public.									
- Coordinate suppression and repair activities with READs to minimize impacts on natural and cultural resources.									
- Effectively manage and track costs for all incidents identified within the Smith River Complex.									
- Close coordination with Region VI fire leadership				g resource	s.				
Control Objectives									
Implement a suppression strategy that keeps the fir	res:								
- East of the Six Rivers National Forest boundary									
- West of the Six Rivers and Klamath National For	rest boundary								
- North of the 15N01 Forest Road	oot boundary								
	•

Fire Weather Forecast

FORECAST NO: 7

PREDICTION FOR: Thursday-Friday

DATE: August 24th, 2023

FORECAST ISSUED: 1800 August 23rd, 2023

FIRE: Smith River Complex South

UNIT: CA-SRF-968

IMET: James White (240-778-5316)

SIGNED: James White

* Valley elevations = 400ft (Gasquet), Ridgetop elevations = 3500 ft (Cold Springs) * WEATHER DISCUSSION: Hot and dry conditions will peak today as surface high pressure lingers over the area. At the same time, an upper-level disturbance sliding over the area will bring better smoke mixing this afternoon alongside a chance (20%) of fast moving, mostly dry thunderstorms this afternoon and evening. Should thunderstorms form, they are likely to form quickly right over the immediate area. Much stronger marine influence with rapidly moderate conditions on Friday.

RED FLAG WARNING FROM 1500 TO 0200 TONIGHT FOR DRY FAST-MOVING THUNDERSTORMS

TODAY:

WEATHER: Clear. Heavy smoke in valleys near the fire in the morning. Chance (20%) of thunderstorms in the

afternoon. Any thunder would accompany dangerous lightning and erratic outflow to 40 mph.

MAX TEMP:

Valleys:

78-83°F (Little Change)

MIN RH:

Valleys:

33-38% (3-6% 1)

Ridgetops:

75-80°F (Little Change)

Ridgetops:

38-43% (2-4% J)

CHC WTG RAIN: 5%

LAL: 2

SFC VIS: 1-2 miles, improving afternoon all around.

WINDS:

Valleys: Morning downslope 2-4 mph afternoon upslope 3-6 mph.

(20 feet)

Ridgetops: Morning northeast 8-12 mph, southwest 4-8 mph gusts to 16 mph.

MIXING HEIGHT: Rising to 11,000 ft by 1100.

TRANSPORT WIND: Southwest 10-14 mph.

TONIGHT:

WEATHER:

Mostly clear. Weak thermal belt 2000 to 5000 ft. Chance of thunderstorms (20%) before 0300. Any

thunder would accompany dangerous lightning and erratic outflow to 40 mph.

MIN TEMP:

Valleys:

52-57° (2-4°F ↓)

MAX RH:

93-98% (3-6% 个)

Ridgetops:

58-66° (3-6°F J)

Vallevs: Ridgetops:

45-55% (10-15% 个)

CHC WTG RAIN: 0%

LAL: 2

SFC VIS: 1-2 miles.

WINDS:

Valleys: Downslope 2-4 mph.

(20 FEET)

Ridgetops: Northeast 2-5 mph.

MIXING HEIGHT: Dropping to 2,000 ft by 2200.

TRANSPORT WIND: Northeast 2-5 mph.

FRIDAY:

WEATHER:

Clear. Heavy smoke in valleys near the fire.

MAX TEMP: Valleys: 70-75°F (6-10°F J)

MIN RH:

Valleys:

48-53% (10-20% 个)

68-73°F (6-10°F ↓) Ridgetops:

Ridgetops:

52-57% (10-20% 个)

CHC WTG RAIN: 0%

LAL: 1

SFC VIS: 1-2 miles, better west in the afternoon

WINDS:

Valleys: Morning downslope 2-4 mph afternoon upslope 3-6 mph.

(20 feet)

Ridgetops: Morning northeast 2-4 mph, southwest 4-8 mph gusts to 14 mph.

MIXING HEIGHT: Rising to 5,000 ft by 1100.

TRANSPORT WIND: Southwest 8-12 mph.

EXTENDED OUTLOOK: An upper-level trough stalling offshore will bring enhanced marine influence into early next week. Temperatures will cool around 70 with even daytime RH struggling to fall below 40%. Winds will be weak and diurnally driven with few gusts even reaching 15 mph. Weak winds and a sporadic marine inversion will promote strong smoke accumulation overnight but good clearing each

afternoon on the west side of the fire.

INPUTS

WEATHER SUMMARY: ** Red Flag Warning - See Fire Weather Forecast**

FUELS SUMMARY:

Due to the below normal amount of precipitation, live fuel moisture levels did not recover this spring, making the shrubs readily available for consumption. There are abundant snag patches within the fire scars; Biscuit (2002), Coon (2015), Eclipse Complex (2017) and Slater (2020). The fuel moistures of the manzanita are around 110% and the 1000-hour fuels 9%, below critical levels. Given the dryness of the vegetation, there is abundant available fuels to continue growth of all uncontained fires within the complex.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

We are currently in what is peak of fire season for this area of the state. Historically, the fuels along the riparian areas have been resistant to burning, but that is not the case this year. Under smoky conditions, the fire will consume the heavy dead surface fuels and have isolated tree torching where there is a higher fuel load under the timber canopy. Roll-out will continue to be a driver of growth in these areas. When the fire is exposed to a stronger wind or gets established on a steep slope with aligned fuels and topography, expect rapid rates of spread with sustained crown runs and moderate range spotting. A main driver of extreme fire behavior has been wind. There is a Red Flag Warning in effect today for thunderstorms and the potential for gusty and erratic winds.

Fire Danger Indices - 2022 IRPG Page 39

Energy Release Component (ERC): 95th (increasing) August Average ERC Percentile: 85th

2020 Slater Fire Large growth days (September 10th) - ERC Percentile: 99th **Peak Burn Period** (1400 – 2000) - Probability of Ignition (PIG): 40% (shaded), 60% (unshaded)

SPECIFIC:

Branch V: Determine the fires edge, especially as it relates to the heat above Gasquet in the Stony Creek, as early in the shift as possible. The North Fork of the Smith River has a good chance of checking the fire as it back down to it. If it does, it should buy extra time to prep the line coming down from Div. B. Post lookouts and if possible, utilize the UAS to determine where the heat is relative to the crew's location. The fire south of Hwy 190 will continue to back down off the ridge in the French Hill Road area and into the afternoon westerly winds.

Branch XX: The Coon fire will continue to grow towards Coon creek to the northwest as it closes the gap to the Kelly fire. The Hurdy Gurdy fire has heat along the western flank and is growing into an old fuel bed with no strategic holding features. This fire will become part of the Kelly fire over the next week.

Night shift: The diurnal winds will shift to an easterly flow around 2200. An inversion will keep warmer and drier conditions, extending above 2000' elevation.

AIR OPERATIONS:

Sunrise 0605, Last Light 2032 (Daylength: losing 2 min, 35 sec each day)

Smoke and marine layer will keep air support limited early in the shift. The afternoon westerly flow and less stability should provide conducive flying conditions by 1200.

SAFETY

There is a potential for thunderstorms in the area today. The IMET will be monitoring the radar and will send updates as appropriate. Call communications and ask for an update if you see anything of concern.

6. Work Assignments:		•							

6. Work Assignments:

Construct direct handline wherever feasible to maximize suppression efforts to minimize impacts to structures and Highway 199. Prepare and defend structures in Highway 199 corridor and adjacent communities. Conduct damage assessment in areas that the fire has impacted.

7. Special Instructions:

-Be aware of retardant avoidance areas, mine shafts and naturally occuring asbestos.

-Maintain awareness of fire conditions affecting road systems in your area that might be a primary escape route and establish secondary egress to safe area. Ensure trigger points are established and re-evaluated throughout the shift.

REMS 1 & 4 assigned to Branch V

6. Work Assignments:								

6. Work Assignments:

Construct direct and indirect lines wherever feasible to maximize suppression efforts.

7. Special Instructions:

-Be aware of retardant avoidance areas, mine shafts and naturally occuring asbestos.

-Maintain awareness of fire conditions affecting road systems in your area that might be a primary escape route and establish secondary egress to safe area. Ensure trigger points are established and re-evaluated throughout the shift.

SAFETY MESSAGE

INCIDENT NAME: Smith River Complex CA-SRF-000968

Operational Period: 8/24/23

Day/Night

Life First, Everyone Goes Home Stop, Think, Talk and then Act

MAJOR HAZARDS AND RISKS:

Fatigue: With multiple days working in this terrain your body is most likely suffering some. Please ensure you are eating and drinking enough throughout the day and try to get enough rest.

Difficult Terrain: This incident has some of the most challenging topography. Always know where you are and the easiest and quickest way out. Don't wait until you have a problem. Use the LCES process and make sure your plan continues to stay valid throughout the day. The terrain you are in creates challenges to maintaining your escape routes and quality safety zones.

Hazardous Trees: Be alert of snags. Crews are working in very hazardous areas with numerous snags. Stay diligent, use lookouts, and flag hazardous areas. Damaged and weakened trees are a serious hazard that should not be taken lightly. Stay at least 1.5 to 2 lengths of the height of the tree away from any snag or hazard tree. Please ensure others around you are engaged in the prevention of a tree strike, we have already had one.

Hazardous Roads: These roads are narrow, steep, and unforgiving. Watch your speed and watch out for each other and wildlife on the roads. Take your time while driving and flag roads for others - into and out of the divisions.

Extreme Fire Behavior: Stay alert for changes in the smoke conditions, wind direction and intensity. Monitor temperature and RH throughout the day and pass that information on to other divisions. Establish trigger points and use lookouts. Make sure safety zones are within obtainable timeline.

Aircraft: If a helicopter is used, maintain good communication with the pilot and be clear of drop area. Always consider risk verses gain and pilot safety before a request for a ship is made. Read the IRPG section in the Blue Pages on directing bucket drops.

Rolling Rock/Debris: Utilize good spacing and post lookouts in hazardous areas. Never trust the stability of materials on the upslope and loudly shout out anything coming down the hill. Stay diligent while driving for roll out of rocks and trees.

Mines: There are numerous mines throughout this complex, please stay alert for any possible areas for mines. There are many vertical shafts that have claimed lives in this area over the years. If you see one, please GPS and flag the area and notify your Division.

SMITH RIVER COMPLEX - SOUTH	Time From:	0700	Time To:	0700

CTR and Shift Tickets:

- -If you have the ability to scan a QR code with your smartphone, scan the QR code at the bottom this page to get a fillable CTR or shift tickets. Using a .pdf format, you can scan and fill, then email to your Supervisor on the incident for signature and submission.
- -Another option is to complete a paper CTR / Shift Ticket, get it signed by your supervisor on the fire, and take a picture of it.

E-mailing CTRs and Shift Tickets Subject line: SOUTH TIME Include your Resource

Email to: 2023.smithrivercomplex.finance@firenet.gov

- -If you are emailing your CTR, SHIFT TICKET, or any type of pay documentation to FINANCE, please put SOUTH in the subject line.
- -This email can be used to submit finance check-in documents too, like manifests, copies of resource orders, AD casual hire forms, receipts, etc. Be sure to include your Resource Order number somewhere in the body of the email.
- -You're encouraged to submit time every two days if possible to stay current, and...

Contact us from: 0530 to 2200 Personnel Phone # 669-206-2317 Equipment Phone # 669-206-2316

REMEMBER, HARD PAPER COPIES OF DOCUMENTS ARE ALWAYS WELCOME TOO!!

Smith River Complex Fire Information

Name the six rivers that the Six Rivers National Forest is named after?

Answer: The forest is named after the 1. Eel, 2. Van Duzen, 3. Klamath, 4. Trinity, 5. Mad and 6. Smith rivers, which pass through or near the forest's boundaries. The Six Rivers National Forest is a U.S. National Forest located in the northwestern corner of California. It was established on June 3, 1947 by U.S. President Harry S. Truman from portions of Klamath, Siskiyou and Trinity National Forests. Its over one million acres (4,000 km2) of land contain a variety of ecosystems and 137,000 acres (550 km2) of old growth forest.[1] It lies in parts of four counties; in descending order of forestland area they are Del Norte, Humboldt, Trinity, and Siskiyou counties.

Snail Mail

Name, E# or O# c/o Smith River Complex Incident Del Norte Fairgrounds 421 U.S. 101 Crescent City, CA 95531

More: including maps and Facebook pages.

IMPORTANT: Yellow/Black Striped flagging indicates resource AVOIDANCE areas.

Cultural and Heritage Resources:

The area you are working in is rich in cultural and heritage resources which may be encountered while fighting fire. When potential cultural or heritage resource are encountered, that they are not disturbed. There is a potential that undocumented cultural resources will be encountered while fighting fire. It is important when a potential cultural resource is encountered that they are not disturbed in any manner.

GPS its location and take a photo, but do not remove or collect anything. Findings of cultural resources should not be reported over the radio. Work with your division to notify a resource advisor for recommendations on how to proceed.

Invasive Plant Species - PLEASE USE WEED WASH

The area in and around the Smith River Complex, are home to many sensitive species. Infestations of highly invasive plant species are one of the largest threats to sensitive species populations here. Spread via vehicles and foot traffic as well as re-activation via fire is of high concern. To help protect these sensitive places, do not park in <u>and</u>try to avoid areas flagged areas. **Make sure to visit the WEED WASH at end of shift AND at demob.** Located on Hwy 199 on the right just past the Ranger Station.

Fish Screens: Coho Salmon Critical Habitat

Most rivers and streams in this area are considered critical habitat for Threatened Coho salmon. Please ensure that Mark 3 and Engine/Tender suction hoses have the appropriate screen attached. Talk to a READ if you think you need a screen!

Port Orford Cedar root disease

Some local drainages are infected with a root disease that spreads via mud and water. To prevent spreading this disease to uninfected areas, all water tenders and engines will apply bleach to their tanks in a 1:1000 ratio (using bleach with 6.0 % Sodium hypochlorite). Talk to a READ if you need some bleach!

TRAINING SPECIALIST MESSAGE

A Training Specialist is on the incident.
All federal, state, and local government agency trainees working on position task books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment.

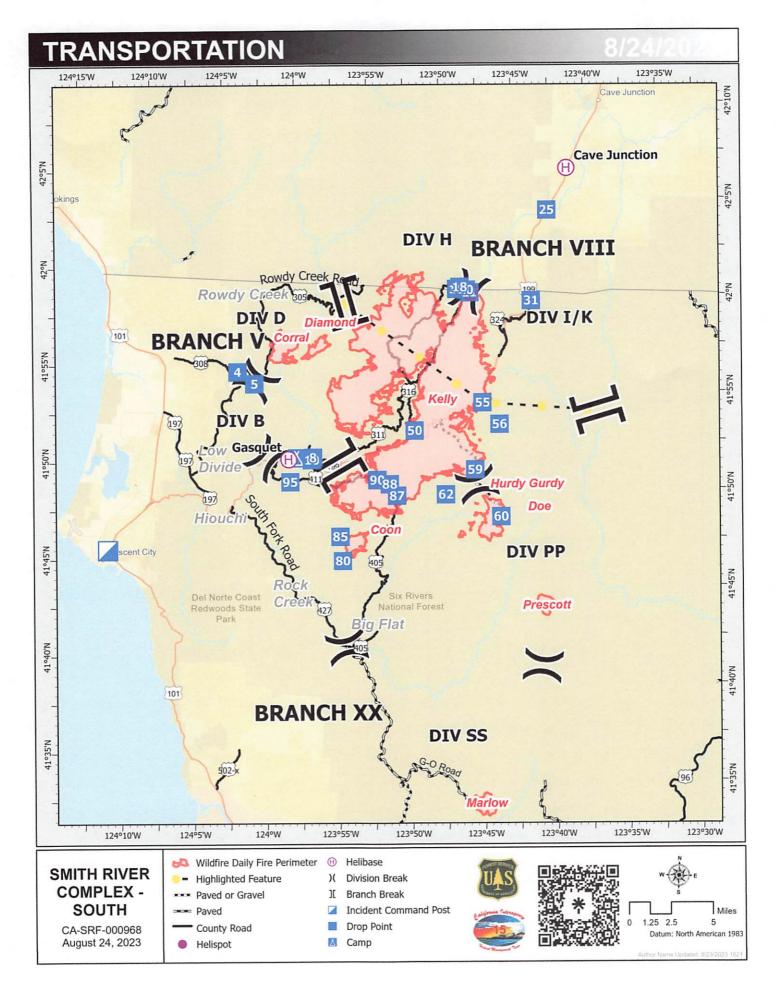

The TNSP desk is in ICP trailer row.

PLEASE CALL or TEXT if you have any questions.

John LeBlanc
Training Specialist
