SMITH RIVER COMPLE	X - SOUTH			Time Fr	rom: 0700	Time To:	0700
3. Objective(s):							
Strategic Direction							
The Smith River Complex is be decision making aligned to the highest probability of success at risk. Values include the safe areas near Gasquet, Pioneer, Crescent City, as well as water	e ongoing ISAP pro- to suppress the fire ty of the public and Lower Jones Creek	cess ev while p firefigh k, Wash	aluations. Firefightin preventing unnecess iters; privately and t ington Flat, Siskiyon	ng operatio sary suppre ribally held u Fork, Fre	ns will implement tact ession related damage timberlands; the com nch Hill, Coon Creek,	tics that offe e and protect munities an Rock Creek	r the cting values nd outlying k, and
Leader's Intent							
All resources assigned to the i resources will ensure transpar and with cooperators. All incididentification and mitigation of will manage fatigue by maintai communication from all assign	ent, timely, and acc ent personnel shou hazards to yoursel ning proper work/re	curate could be professional from the course of the course	ommunication while repared to take appo hers through timely	working to ropriate act and though	o strengthen relationsl tions regarding safety htful risk-based decisi	nips with ear , including th on making.	ch other he Personnel
Management Objectives							
- Provide for firefighter and p	ublic safety through	n hazaro	d recognition and ap	plication o	f the risk managemen	t process.	
Coordinate public information public.	on to provide timely	and co	ntinuous situation u	pdates to a	affected agency partne	ers, coopera	ators, and
- Coordinate suppression and	d repair activities w	ith REA	Ds to minimize impa	acts on nat	ural and cultural reso	urces.	
Effectively manage and trace Close coordination with Reg					Contraction of the Contraction o	ng resource	es.
Control Objectives							
Implement a suppression strat	egy that keeps the	fires:					
- East of the Six Rivers Natio	nal Forest boundar	v					
- West of the Six Rivers and	Klamath National F	orest bo	oundary				
- North of the 15N01 Forest F		31.551	7112213

Fire Weather Forecast

FORECAST NO: 9

PREDICTION FOR: Saturday-Sunday

DATE: August 26th, 2023

FORECAST ISSUED: 1800 August 25th, 2023

FIRE: Smith River Complex South

UNIT: CA-SRF-968

IMET: James White (240-778-5316)

SIGNED: James White

* Valley elevations = 400ft (Gasquet), Ridgetop elevations = 3500 ft (Camp Six) * WEATHER DISCUSSION: As low pressure persists off the coast of Central California, a calm period marked by increased marine influence will continue to settle across the area. Where smoke allows, temperatures will gradually rise into the low 70s by late morning with RH around 50%. Increasing westerly wind each afternoon will both help mix out smoke along the west side of the fire and suppress any further warming and drying. Winds will remain gentle below 8 mph except in wind channeling terrain exposed to the west. Nights will be similarly as benign except poor recoveries as low as 45% will persist each night right above the inversion under the influence of gentle northeast winds.

TODAY:

WEATHER: Clear. Heavy smoke in valleys near the fire.

MAX TEMP: Valleys: 72-77°F (1-3°F 小)

MIN RH:

Vallevs: 50-60% (2-6% 人)

Ridgetops:

70-75°F (1-3°F 个)

Ridgetops:

55-65% (2-4% 1)

CHC WTG RAIN: 0%

LAL: 1

SFC VIS: 1-2 miles, better west in the afternoon

WINDS: (20 feet) Valleys: Morning downslope 2-4 mph afternoon upslope 2-6 mph. Ridgetops: Morning northeast 2-4 mph, west 4-8 mph gusts to 16 mph.

MIXING HEIGHT: Rising to 4,000 ft by 1400.

TRANSPORT WIND: West 6-10 mph.

TONIGHT:

WEATHER: Mostly clear. Weak thermal belt 1500 to 4000 ft.

MIN TEMP:

Valleys: 52-57° (1-3°F 个) MAX RH:

Valleys:

92-97% (1-3% 1)

Ridgetops:

58-66° (Little Change)

Ridgetops:

45-55% (2-4% 1)

CHC WTG RAIN: 0%

LAL: 1

SFC VIS: 1-2 miles.

WINDS:

Valleys: Downslope 2-4 mph.

(20 FEET)

Ridgetops: Northeast 4-8 mph infrequent gusts to 12 mph.

MIXING HEIGHT: Dropping to 1,500 ft by 2200.

Valleys:

TRANSPORT WIND: Northeast 3-6 mph.

SUNDAY:

WEATHER:

Clear. Heavy smoke in valleys near the fire.

MAX TEMP:

72-77°F (Little Change)

MIN RH:

Valleys:

50-60% (Little Change)

Ridgetops:

70-75°F (Little Change)

Ridgetops:

55-65% (Little Change)

CHC WTG RAIN: 0%

LAL: 1

SFC VIS: 1-2 miles, better west in the afternoon

WINDS:

Valleys: Morning downslope 2-4 mph afternoon upslope 3-6 mph.

(20 feet)

Ridgetops: Morning northeast 2-4 mph, west 5-10 mph gusts to 18 mph.

MIXING HEIGHT: Rising to 4,000 ft by 1400.

TRANSPORT WIND: West 8-12 mph.

EXTENDED OUTLOOK: A similar, generally favorable pattern will continue into early next week. The main changing variable will be the depth and strength of the marine layer on any given day which will slightly modify overall conditions. Weather models show with high consistency and confidence and a moderate but prolonged east wind event around next Wednesday through Thursday. Current model

estimates show the highest wind gusts at night around 45 mph on ridgetops.

Nearby Weather Observations

FIRE BEHAVIOR FORECAST Incident Name: SMITH RIVER COMPLEX - SOUTH Forecast Number: 09 Type of Fire: Wildfire INPUTS FIRE BEHAVIOR FORECAST Operational Period: Date From: 8/26/23 Date To: 8/27/23 Time From: 0700 Time To: 0700 INPUTS WEATHER SUMMARY:

See Fire Weather Forecast

FUELS SUMMARY:

Due to the below normal amount of precipitation, live fuel moisture levels did not recover this spring, making the shrubs readily available for consumption. There are abundant snag patches within the fire scars; Biscuit (2002), Coon (2015), Eclipse Complex (2017) and Slater (2020). The fuel moistures of the manzanita are around 110% and the 1000-hour fuels 9%, below critical levels. Given the dryness of the vegetation, there is abundant available fuels to continue growth of the Kelly fire as it fills in the pockets between recent fire scars.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

We are currently in what is peak of fire season for this area of the state. Historically, the fuels along the riparian areas have been resistant to burning, but that is not the case this year. Under smoky conditions, the fire will consume the heavy dead surface fuels and have isolated tree torching where there is a higher fuel load under the timber canopy. Roll-out will continue to be a driver of growth in these areas. When the fire is exposed to a stronger wind or gets established on a steep slope with aligned fuels and topography, expect rapid rates of spread with sustained crown runs and moderate range spotting.

Fire Danger Indices - 2022 IRPG Page 39

Energy Release Component (ERC): 90th (trending down)
August Average ERC Percentile: 85th

August Average ERC Percentile: 85th

2020 Slater Fire Large growth days (September 10th) - ERC Percentile: 99th **Peak Burn Period (1400 – 2000)** - Probability of Ignition (PIG): 40% (shaded), 40% (unshaded)

SPECIFIC:

Branch V: Slightly drier conditions should allow for an earlier burn window in Div. D and B. The afternoon westerly flow will be favorable for this operation as well. The window for burning in Div. A will be later in the day due to its lower elevation being more likely to feel the effects of overnight smoke and marine layer intrusion. The burn window will also be shorter in Div. A than in the other divisions. The fire will continue to back down to the South Fork of Smith River in Div. MM. This creek appears narrower and more vegetated, so at some point the fire will spot across and make an uphill run towards DP 56.

Branch XX: The afternoon westerly flow will keep the fire backing off French Hill Road towards Hwy 199 and the Tahoe handline connecting the two. An area of concern in the longer term is connecting the 17N40 road south to Craigs Creek and up to the 2015 Coon fire scar. This piece will take some time to prep and fire ahead of the strong easterly winds predicted middle of next week. After an estimated 0.2" of rain the other evening, there was little heat showing on the Island and Prescott fires.

AIR OPERATIONS:

Sunrise 0607, Last Light 2028 (Daylength: losing 2 min, 35 sec each day)

Smoke and marine layer influence will keep air support limited early in the shift, with clearing expected in the afternoon.

SAFETY:

Communicate all burning operations with adjacent divisions to ensure all resources are aware of the plan.

6. Work Assignments:		9/1	MIKE HAPKE	1	0-105	0700-1900	WARD FIELD C	

6. Work Assignments

Keep the fire north of Highway 199 and east of County Road 305 in order to protect the natural, cultural, and infrastructure values utilizing dozer and handline, firing where appropriate, and providing holding forces during operations.

7. Special Instructions:

-Be aware of retardant avoidance areas, mine shafts and naturally occuring asbestos.

-Maintain awareness of fire conditions affecting road systems in your area that might be a primary escape route and establish secondary egress to safe area. Ensure trigger points are established and re-evaluated throughout the shift.

Safety Officers assigned to Division B/D: Ray Franco and Shaun Davis(t)

6. Work Assignments:

Keep the fire South of Highway 199 and East of the South Fork/G-O roads in order to protect the natural, cultural, and infrastructure values utilizing dozer and handline, firing where appropriate, and providing holding forces during operations.

7. Special Instructions:

-Be aware of retardant avoidance areas, mine shafts and naturally occuring asbestos.

-Maintain awareness of fire conditions affecting road systems in your area that might be a primary escape route and establish secondary egress to safe area. Ensure trigger points are established and re-evaluated throughout the shift.

Patrol, re-enforce, improve and continue work in Divisions and Structure Groups.

7. Special Instructions:

- -REMS available out of Gasquet.
- -Be aware of retardant avoidance areas, mine shafts and naturally occuring asbestos.
- -Maintain awareness of fire conditions affecting road systems in your area that might be a primary escape route and establish secondary egress to safe area. Ensure trigger points are established and re-evaluated throughout the shift.

Safety Officers assigned to Division Night: Lucas Lambert

HEALTH AND SAFETY MESSAGE

Life First: Stop, Think, Talk then Act.

INCIDENT: Smith River Complex South DATE: 8.26 Day \ 8.27 Night

Major Hazards and Risks:

- ❖ STEEP TERRAIN: Watch your footing at all times in steep terrain.
- * ROLLING ROCKS: Watch and listen for rolling rocks...they are coming down.
- **DEHYDRATION:** Remember to drink 4-6 quarts of fluid each operational period.
- * DRIVING: Keep speeds down and lights on. These roads present a variety of hazards.
- * HAZARD TREES: Assess ALL Trees in Work Area. In addition to suppression and mop-up operations, assess hazard trees where you sleep or take breaks.

<u>Narrative:</u> The Fire Orders and Watch Outs in your IRPG are not just reading material. They are to be taken seriously and should be second nature in everything you do on the fire every day. Just as you get on a bike and ride it, those orders and watch outs should be second nature to you and if you aren't sure you should look it up. Don't short cut it or think you have a better way of doing it because unfortunately a good portion of the IRPG is written out of tragedy.

DRIVING

- Make sure you know where the other resources are in your division.
- Know your way out and safety zone locations if you need to pull back.
- Ensure vehicles are properly positioned on the fire for easy egress.
- Increase spacing on dirt and dusty roads.
- Although some roads are closed, don't assume the public will not get in there.
- Access the stability of the road shoulder before attempting to turn around on mountain roads.
- Exercise caution on Hwy 199, you know the hazards.

HAZARD TREE SAFETY

Hazard Tree Indicators:

- ✓ Trees that have burned
- ✓ Shallow tree root systems
- ✓ Dead & broken top trees
- ✓ Leaning or hung up trees
- √ Many trees have no indicators

Feeling comfortable?

Rick Bertram - Team Safety 925 588 6109

Smith River Complex Fire Information

Name the six rivers that the Six Rivers National Forest is named after?

Answer: The forest is named after the 1. Eel, 2. Van Duzen, 3. Klamath, 4. Trinity, 5. Mad and 6. Smith rivers, which pass through or near the forest's boundaries. The Six Rivers National Forest is a U.S. National Forest located in the northwestern corner of California. It was established on June 3, 1947 by U.S. President Harry S. Truman from portions of Klamath, Siskiyou and Trinity National Forests. Its over one million acres (4,000 km2) of land contain a variety of ecosystems and 137,000 acres (550 km2) of old growth forest.[1] It lies in parts of four counties; in descending order of forestland area they are Del Norte, Humboldt, Trinity, and Siskiyou counties.

IMPORTANT: Yellow/Black Striped flagging indicates resource **AVOIDANCE** areas.

Cultural and Heritage Resources:

The area you are working in is rich in cultural and heritage resources which may be encountered while fighting fire. When potential cultural or heritage resource are encountered, that they are not disturbed. There is a potential that undocumented cultural resources will be encountered while fighting fire. It is important when a potential cultural resource is encountered that they are not disturbed in any manner.

GPS its location and take a photo, but do not remove or collect anything. Findings of cultural resources should not be reported over the radio. Work with your division to notify a resource advisor for recommendations on how to proceed.

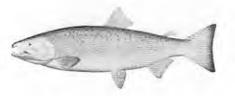

Invasive Plant Species – PLEASE USE WEED WASH

The area in and around the Smith River Complex, are home to many sensitive species. Infestations of highly invasive plant species are one of the largest threats to sensitive species populations here. Spread via vehicles and foot traffic as well as re-activation via fire is of high concern. To help protect these sensitive places, do not park in <u>and</u> try to avoid areas flagged areas. **Make sure to visit the WEED WASH at end of shift AND at demob.** Located on Hwy 199 on the right just past the Ranger Station.

Fish Screens: Coho Salmon Critical Habitat

Most rivers and streams in this area are considered critical habitat for Threatened Coho salmon. Please ensure that Mark 3 and Engine/Tender suction hoses have the appropriate screen attached. Talk to a READ if you think you need a screen!

Port Orford Cedar root disease

Some local drainages are infected with a root disease that spreads via mud and water. To prevent spreading this disease to uninfected areas, all water tenders and engines will apply bleach to their tanks in a 1:1000 ratio (using bleach with 6.0 % Sodium hypochlorite). Talk to a READ if you need some bleach!

TRAINING SPECIALIST MESSAGE

A Training Specialist is on the incident.
All federal, state, and local government agency trainees working on position task books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment.

The TNSP desk is in ICP trailer row.

PLEASE CALL or TEXT if you have any questions.

John LeBlanc

6. MEDICAL EMERGENCY PROCEDURES

LINE "MEDICAL EMERGENCY" PLAN:

Crew Supervisor to contact Division Supervisor/Operations with:

- Patient Complaint, Condition and Location via Tactical or Command Frequency. **Priority 1/Red & 2/Yellow** patients
 - Triggers Incident within Incident (IWI)

Division Supervisor/*POC contacts South Smith Communications:

- Division Supervisor or *POC will run <u>"Medical-Emergency"</u> on Command Frequency.
- Division Supervisor or *POC to use "Medical Plan (ICS 206 WF)" worksheet in the IAP or IRPG.
- Communications contacts Medical Unit Leader on the Command Frequency or cell phone.

*POC (Point of Contact)

LINE "NON-EMERGENCY INCIDENT" PLAN:

Crew Supervisor to contact Division Supervisor with:

- Patient Complaint, Condition and Location via Tactical or Command Frequency. **Priority 3/Green** Patients
- <u>Does not</u> trigger Incident within Incident (IWI). Contact Communications via cell Phone (760) 220-2863 or Command if no cell service.

Division Supervisor/POC Contact Smith River Communications

- Division Supervisor or *POC will run "Non-Emergency Incident" via Cell phone or Command if no Cell service.
- Division Supervisor or *POC to use "Medical Incident Report" worksheet on back of this page or in IRPG.
- Communications contacts Medical Unit Leader on the Command Frequency or Cell Phone (805) 570-9061

IN-CAMP - 24 HOUR MEDICAL

Contact Smith River Communications with: Patient Complaint, Condition, and Location via phone (760) 220-2863, Command Frequency, or 911.

Medical Incident Report

FOR A <u>NON-EMERGENCY INCIDENT</u>: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A <u>MEDICAL EMERGENCY</u>: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)

	"This will be t	he Trout Meadow Medical Inc	cident, IC is TFLD Jones. EMT Smith	h is providing medical care)."
Transp	of Emergency AND port Priority rity 1, 2, 3)	Ex: Unconscious, difficu "YELLOW / PRIORITY : Ex: Significant trauma, u "GREEN / PRIORITY 3	fe or limb threatening injury of ulty breathing, bleeding severely, 2° 2 Serious Injury or illness. Example to walk, 2° – 3° burns not more Minor Injury or illness. Non-limber 1.	- 3° burns more than 4 pail vacuation may be DEt re than 1-3 palm sizes.	lm sizes, heat stroke, disoriented.
Nature of	Injury or Illness	Ex: Sprains, strains, min	or heat-related illness.		
	& nism of Injury			Brief Sur (Ex: Uncons	mmary of Injury or Illness scious, Struck by Falling Tree)
Transp	ort Request				bulance / Short Haul/Hoist and Ambulance / Other
Patier	nt Location			Descriptive Lo	ocation & Lat. / Long. (WGS84)
Incide	ent Name				phic Name + "Medical" Frout Meadow Medical)
On-Scene Inc	cident Commander				scene IC of Incident within an lent (Ex: TFLD Jones)
Crew P	Patient Care				ne of Care Provider
3. INITIAL PAT	TENT ASSESSMENT: C	complete this section for each pa	atient as applicable (start with the most	severe patient)	(Ex: EMT Smith)
	on: (NO PATIENT NAME		Contractor		vernment
