INCIDENT ACTION PLAN

SMITH RIVER COMPLEX - SOUTH

CA-SRF-000968

P5QJ6L

BENJAMIN CHARLES SAPPER
FIREFIGHTER

ROGUE RIVER-SISKIYOU NF

August 4th, 2023

OPERATIONAL PERIOD

8/27/2023 0700

to

8/28/2023 0700

In Remembrance

On Wednesday we honored the life of first-year firefighter Benjamin Charles Sapper with a cordon of honor and flag ceremony in Gold Beach, Oregon. Benjamin was tragically killed in an on-duty vehicle accident that occurred near Powers, Oregon, on August 4th.

A memorial service is being planned for Benjamin on August 27th in his hometown of Boulder, Colorado, where we will continue to pay our respects and stand together with his family, friends, and co-workers in honor of his life and public service.

Benjamin was 21 years old. He joined the Forest Service because he had a desire to serve the community and be a part of a remarkable team. He had a passion for baseball, chess, skiing and engaging in deep discussions on topics ranging from philosophy to mathematics. Benjamin's zest for life was truly inspiring, and his crew said he left a lasting impact on everyone he encountered.

During this challenging time, let us come together to extend our support not only to Benjamin's grieving family but also to our fellow colleagues on the Gold Beach Ranger District and Rogue River-Siskiyou National Forest. Together, we can be a source of strength and solace for one another as we navigate this period of sorrow and loss.

Thank you for your unwavering support and for being part of a team that stands together in times of both triumph and tribulation. Let's remember Benjamin for the remarkable person he was and strive to make a positive difference in his honor.

Randy Moore
Chief

Forest Service
Washington Office

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: SMITH RIVER COMPLEX - SOUTH	2. Operational Period: Date From: 8/27/2023 Time From: 0700	Date To: 8/28/2023 Time To: 0700
---	--	-------------------------------------

3. Objective(s):

Strategic Direction

The Smith River Complex is being managed with a full suppression strategy. Personnel on the incident will implement risk-based decision making aligned to the ongoing ISAP process evaluations. Firefighting operations will implement tactics that offer the highest probability of success to suppress the fire while preventing unnecessary suppression related damage and protecting values at risk. Values include the safety of the public and firefighters; privately and tribally held timberlands; the communities and outlying areas near Gasquet, Pioneer, Lower Jones Creek, Washington Flat, Siskiyou Fork, French Hill, Coon Creek, Rock Creek, and Crescent City, as well as water resources, transportation routes, electrical infrastructure, and natural and cultural resources.

Leader's Intent

All resources assigned to the incident will work together as a team to provide the highest level of service, safety, and protection. All resources will ensure transparent, timely, and accurate communication while working to strengthen relationships with each other and with cooperators. All incident personnel should be prepared to take appropriate actions regarding safety, including the identification and mitigation of hazards to yourself and others through timely and thoughtful risk-based decision making. Personnel will manage fatigue by maintaining proper work/rest cycles. CAIIMT 15 expects professional behavior, conduct, and effective communication from all assigned personnel.

- Management Objectives**
- Provide for firefighter and public safety through hazard recognition and application of the risk management process. Coordinate public information to provide timely and continuous situation updates to affected agency partners, cooperators, and public.
 - Coordinate suppression and repair activities with READs to minimize impacts on natural and cultural resources.
 - Effectively manage and track costs for all incidents identified within the Smith River Complex.
 - Close coordination with Region VI fire leadership to ensure effective and efficient management of firefighting resources.

- Control Objectives**
- Implement a suppression strategy that keeps the fires:
- East of the Six Rivers National Forest boundary
 - West of the Six Rivers and Klamath National Forest boundary
 - North of the 15N01 Forest Road
 - South of the Rouge Siskiyou National Forest boundary

Fire Weather Forecast

FORECAST NO: 10
PREDICTION FOR: Sunday-Monday
DATE: August 27th, 2023
FORECAST ISSUED: 1800 August 26th, 2023

FIRE: Smith River Complex South
UNIT: CA-SRF-968
IMET: James White (240-778-5316)
SIGNED: *James White*

WEATHER DISCUSSION: * Valley elevations = 400ft (Gasquet), Ridgetop elevations = 3500 ft (Camp Six) *
 A largely steady and quiet weather pattern will continue today. Very slight cooling is expected under heavy smoke. Weak onshore winds combined with a strong, shallow inversion will allow for significant smoke accumulation in valleys. With the marine inversion intersecting the terrain even during the day. RH will continue to be highly variable with elevation. Large RH swings can be expected on ridgetops where the marine layer pops in and out. Monday will be similar albeit slightly stronger smoke transport should allow for very slight warming.

TODAY:

WEATHER: Clear. Heavy smoke in valleys near the fire.
MAX TEMP: Valleys: 70-75°F (2-4°F ↓)
 Ridgetops: 68-73°F (2-4°F ↓)
CHC WTG RAIN: 0% **LAL:** 1
MIN RH: Valleys: 50-60% (Little Change)
 Ridgetops: 55-65% (Little Change)
SFC VIS: 0.5-1 mile, better afternoon.
WINDS: Valleys: Morning downslope 2-4 mph afternoon upslope 3-6 mph.
 (20 feet) Ridgetops: Morning northeast 2-4 mph, southwest 4-8 mph gusts to 14 mph.
MIXING HEIGHT: Rising to 4,000 ft by 1400. **TRANSPORT WIND:** West 6-10 mph.

TONIGHT:

WEATHER: Mostly clear. Weak thermal belt 1500 to 4000 ft.
MIN TEMP: Valleys: 52-57° (Little Change)
 Ridgetops: 58-66° (Little Change)
CHC WTG RAIN: 0% **LAL:** 1
MAX RH: Valleys: 90-95% (Little Change)
 Ridgetops: 50-60% (3-6% ↑)
SFC VIS: 0.5 mile.
WINDS: Valleys: Downslope 2-4 mph.
 (20 FEET) Ridgetops: Northeast 4-8 mph infrequent gusts to 12 mph.
MIXING HEIGHT: Dropping to 1,500 ft by 100. **TRANSPORT WIND:** Northeast 3-6 mph.

MONDAY:

WEATHER: Clear. Heavy smoke in valleys near the fire.
MAX TEMP: Valleys: 72-77°F (1-3°F ↑)
 Ridgetops: 70-75°F (1-3°F ↑)
CHC WTG RAIN: 0% **LAL:** 1
MIN RH: Valleys: 50-60% (Little Change)
 Ridgetops: 55-65% (Little Change)
SFC VIS: 1-2 miles, better west in the afternoon
WINDS: Valleys: Morning downslope 2-4 mph afternoon upslope 3-6 mph.
 (20 feet) Ridgetops: Morning northeast 2-4 mph, west 5-10 mph gusts to 18 mph.
MIXING HEIGHT: Rising to 4,000 ft by 1400. **TRANSPORT WIND:** West 8-12 mph.

EXTENDED OUTLOOK: A similar, generally favorable pattern will continue into early next week. The main changing variable will be the depth and strength of the marine layer on any given day which will slightly modify overall conditions. Weather models show with high consistency a moderate but prolonged east wind event around next Wednesday through Thursday. Current model estimates show the highest wind gusts at night around 40 mph on ridgetops.

FIRE BEHAVIOR FORECAST	
Incident Name: SMITH RIVER COMPLEX - SOUTH	Operational Period: Date From: 8/27/23 Date To: 8/28/23 Time From: 0700 Time To: 0700
Forecast Number: 09	Type of Fire: Wildfire
Unit: Six Rivers National Forest - Gasquet District	
INPUTS	
WEATHER SUMMARY: ***See Fire Weather Forecast***	
FUELS SUMMARY: Due to the below normal amount of precipitation, live fuel moisture levels did not recover this spring, making the shrubs readily available for consumption. There are snag patches within the fire scars with scabbier fuels; Biscuit (2002), Coon (2015), Eclipse Complex (2017) and Slater (2020). The fuel moistures of the manzanita are around 110% and the 1000-hour fuels 9%, below critical levels. The fire scars, including the 2002 Biscuit fire, has hampered growth of the Corral, Diamond, and western portion of the Kelly fire.	
OUTPUTS	
FIRE BEHAVIOR	
GENERAL: We are currently on the tail end of what is peak of fire season for this area of the state. Under smoky conditions, the fire will consume the heavy dead surface fuels and have isolated tree torching where there is a higher fuel load under the timber canopy. Roll-out will continue to be a driver of growth in these areas. When the fire is exposed to a stronger wind or gets established on a steep slope with aligned fuels and topography, expect rapid rates of spread with sustained crown runs and moderate range spotting. Take advantage of a few more days of favorable conditions to secure as much of the fires edge as possible before a more adverse weather pattern brings drier conditions and easterly flow over	
Fire Danger Indices – 2022 IRPG Page 39 Energy Release Component (ERC): 85th August Average ERC Percentile: 85th 2020 Slater Fire Large growth days (September 10th) - ERC Percentile: 99th Peak Burn Period (1400 – 2000) - Probability of Ignition (PIG): 40% (shaded), 40% (unshaded)	
SPECIFIC:	
Branch V: A similar day weather wise is expected over the fire area. Anticipate the burn window to finish tying in the firing operation up the North Fork Smith River to the Biscuit to open around noon. This should be around the same time the westerly flow will kick in, so all signs point to good burning conditions. Aggressively mop-up and secure as much of the control lines north of Gasquet.	
Branch XX: Strong work tying in a tough piece of line and locking off the north slope of the French Hill Road down to Hwy 199. The afternoon westerly flow should keep the westerly progression of the main fire on both side of Craig's Creek from making any strong runs to the dozer line along the 17N40 Road in Div. YY. As always, post lookouts that can see the main fire and notify resources of changing conditions. This piece of the complex is going to likely have the biggest potential when the east winds arrive next week.	
Night shift: An inversion should settle in over the fire area around 2200. Most of the fire intensity during the day will	
AIR OPERATIONS:	
Sunrise 0608, Last Light 2027 (Daylength: losing 2 min, 35 sec each day)	
Smoke and marine layer influence will keep air support limited early in the shift, but afternoon westerly flow should allow for partial clearing along the westside of the complex.	
SAFETY:	
Heavy smoke mixed with the marine layer is producing dense fog on many of the access roads. Drive defensively and use your lights to ensure people can see you.

6. Work Assignments:									
Keep the fire north of Highway 199 and east of County Road 305 in order to protect the natural, cultural, and infrastructure values utilizing dozer and handline, firing where appropriate, and providing holding forces during operations. Continue to look for opportunity to construct direct fireline on the Corral and Diamond fires.									
7. Special Instructions:									
-Be aware of retardant avoidance areas, mine shafts and naturally occurring asbestos.									
-Maintain awareness of fire conditions affecting road systems in your area that might be a primary escape route and establish secondary egress to safe area. Ensure trigger points are established and re-evaluated throughout the shift.

6. Work Assignments:									
Keep the fire South of Highway 199 in order to protect the natural, cultural, and infrastructure values utilizing dozer and handline, firing where appropriate, and providing holding forces during operations. Conduct damage assessment in areas that the fire has impacted. Continue to coordinate operations with PNW Branch XIII Div K.									
7. Special Instructions:									
-Be aware of retardant avoidance areas, mine shafts and naturally occurring asbestos.									
-Maintain awareness of fire conditions affecting road systems in your area that might be a primary escape route and establish secondary egress to safe area. Ensure trigger points are established and re-evaluated throughout the shift.

6. Work Assignments:
Patrol, re-enforce, improve and continue work in Divisions and Structure Groups.

7. Special Instructions:
 -REMS and Ambulance 3 is available out of Gasquet
 -Be aware of retardant avoidance areas, mine shafts and naturally occurring asbestos.
 -Maintain awareness of fire conditions affecting road systems in your area that might be a primary escape route and establish secondary egress to safe area. Ensure trigger points are established and re-evaluated throughout the shift.
Safety Officers assigned to Division Night: Lucas Lambert

HEALTH AND SAFETY MESSAGE

SAFETY starts with *YOU*

We are ALL accountable for SAFE behaviors

Incident: Smith River Complex	Date: August 27, 2023	Shift: Day /night
---	---------------------------------	-----------------------------

SAFETY THOUGHT

Headlights on, buckle up, slow down, clean windshields.

MAJOR HAZARDS AND RISKS		
<ul style="list-style-type: none"> ➤ Hazard Trees ➤ Driving and Traffic ➤ Air Operations ➤ Extended Medical Timeframes 	<ul style="list-style-type: none"> ➤ Fatigue and overexertion ➤ Heavy Equipment ➤ Spot fires ➤ Steep Terrain/Rolling Debris 	<ul style="list-style-type: none"> ➤ Poor Communications ➤ Spike Camp ➤ Bucket drops

****YOU ARE RESPONSIBLE FOR YOUR OWN SAFETY****

-If you practice safety, your co-workers will appreciate it and your personal welfare can be protected-

Remember that it is your life that is on the line. You have the right to voice your opinion and concerns about personal safety. Don't hesitate to speak up if you feel uncomfortable with the situation or the circumstance in which you are. Firefighting is inherently hazardous. Discuss your concerns with your immediate supervisor or with a Safety Officer. We are in this together!

FIRE SAFETY BEGINS WITH U

- ✓ Most accidents happen on the smaller fires or on isolated portions of larger fires.
- ✓ Most fires are innocent in appearance before unexpected shifts in wind direction and/or speed results in "flare-ups" or "extreme fire behavior." In some cases, tragedies occur in the mop-up stage.
- ✓ Flare-ups generally occur in deceptively light fuels, such as grass and light brush.
- ✓ Fires run uphill surprisingly fast in chimneys, gullies, and on steep slopes.

Safety Officers:

Rick Bertram SOFC Ron Plummer SOF2

FINANCE MESSAGE

1. Incident Name:
SMITH RIVER COMPLEX - SOUTH

2. Operational Period: Date From: 8/27/2023 Date To: 8/28/2023
Time From: 0700 Time To: 0700

CTR and Shift Tickets:

-If you have the ability to scan a QR code with your smartphone, scan the QR code at the bottom this page to get a fillable CTR or shift tickets. Using a .pdf format, you can scan and fill, then email to your Supervisor on the incident for signature and submission.

-Another option is to complete a paper CTR / Shift Ticket, get it signed by your supervisor on the fire, and take a picture of it.

E-mailing CTRs and Shift Tickets

Subject line: SOUTH TIME

Include your Resource #

Email to: 2023.smithrivercomplex.finance@firenet.gov

-If you are emailing your CTR, SHIFT TICKET, or any type of pay documentation to FINANCE, please put SOUTH TIME in the subject line.

-This email can be used to submit finance check-in documents too, like manifests, copies of resource orders, AD casual hire forms, receipts, etc. Be sure to include your Resource Order number somewhere in the body of the email.

-You're encouraged to submit time every two days if possible to stay current, and...

REMEMBER, HARD PAPER COPIES OF DOCUMENTS ARE ALWAYS WELCOME TOO!!

Resources need to check with Finance:

c/o Smith River Complex Incident

Del Norte Fairgrounds

421 U.S. 101

Crescent City, CA 95531

About the Six Rivers National Forest – Where we Are

President Harry S. Truman established the Six Rivers National Forest by Presidential proclamation on June 3, 1947. The new Forest's initial 900,000 acres were carved from the western portions of the Klamath and Trinity National Forests and the southern portion of the Siskiyou National Forest.

The Six Rivers—named for the six major rivers that run within its boundaries: the Smith, Klamath, Trinity, Mad, Van Duzen and Eel—has more than 1,500 miles of streams, constituting 9 percent of California's total freshwater runoff. The Smith, Klamath, Trinity, and Eel River watersheds include more than 365 miles of designated Wild and Scenic River. The Salmon River on the Ukonom Ranger District is also a Wild and Scenic River. The Smith River is the only major undammed, naturally flowing river remaining in California. The rivers provide many recreational opportunities. While rafting and kayaking are popular water-based recreational activities, the resilient watersheds of the forest are perhaps best known for providing some of the best anadromous fishing opportunities in California. In addition to river recreation, popular activities in the Six Rivers include camping, hiking, backpacking, picnicking, and motorized vehicle use.

The Six Rivers shares management of four wilderness areas—the Siskiyou, Trinity Alps, Yolla-Bolly, and Marble Mountain—with nearby national forests, and has sole responsibility for managing the North Fork Wilderness. The federally designated Smith River National Recreation Area consists of 307,973 acres of the northernmost section of the forest. Commercial uses in the forest include timber harvesting and grazing, and, to a lesser extent, mineral extraction and harvest of special forest products, such as Christmas trees and mushrooms. Additionally, the Six Rivers contains more than 1,260 known historical or archaeological sites.

Smith River Complex Incident: Resource Advisor Message

IMPORTANT: Yellow/Black Striped flagging indicates resource **AVOIDANCE** areas.

Cultural and Heritage Resources:

The area you are working in is rich in cultural and heritage resources which may be encountered while fighting fire. When potential cultural or heritage resource are encountered, that they are not disturbed. There is a potential that undocumented cultural resources will be encountered while fighting fire. It is important when a potential cultural resource is encountered that they are not disturbed in any manner.

GPS its location and take a photo, but do not remove or collect anything. Findings of cultural resources should not be reported over the radio. Work with your division to notify a resource advisor for recommendations on how to proceed.

Invasive Plant Species – PLEASE USE WEED WASH

The area in and around the Smith River Complex, are home to many sensitive species. Infestations of highly invasive plant species are one of the largest threats to sensitive species populations here. Spread via vehicles and foot traffic as well as re-activation via fire is of high concern. To help protect these sensitive places, do not park in and try to avoid areas flagged areas. **Make sure to visit the WEED WASH at end of shift AND at demob.** Located on Hwy 199 on the right just past the Ranger Station.

Fish Screens: Coho Salmon Critical Habitat

Most rivers and streams in this area are considered critical habitat for Threatened Coho salmon. Please ensure that Mark 3 and Engine/Tender suction hoses have the appropriate screen attached. Talk to a READ if you think you need a screen!

Port Orford Cedar root disease

Some local drainages are infected with a root disease that spreads via mud and water. To prevent spreading this disease to uninfected areas, all water tenders and engines will apply bleach to their tanks in a 1:1000 ratio (using bleach with 6.0 % Sodium hypochlorite). Talk to a READ if you need some bleach!

TRAINING SPECIALIST MESSAGE

**A Training Specialist is on the incident.
All federal, state, and local government agency
trainees working on position task books will need
to register with the Incident Training Specialist in
order to receive proper credit for your
assignment.**

**The TNSP desk is in ICP trailer row.
PLEASE CALL or TEXT if you have any questions.**

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)
 Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure
 Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.
 Requesting air ambulance to Forest Road 1 at (Lat./Long.)
 *This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency AND Transport Priority (priority 1, 2, 3)	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented. <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes. <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.
Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location	Descriptive Location & Lat. / Long. (WGS84)
Incident Name	Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander	Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Crew Patient Care	Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Agency Affiliation: (NO PATIENT NAMES) Federal Contractor Local Government

Patient Assessment: Age: Weight: Chief Complaint:

(If pertinent to Injury) Skin Signs: (color/moisture/temp) Level of Consciousness: BP: HR: Respirations:

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (drop point, intersection, helispot, Lat. / Long, hazards) Patient's ETA to Location:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Paramedic / EMT - Crews - Immobilization Devices - AED - Oxygen - Trauma Bag - IV/Fluid(s) - Splints - Rope rescue - Wheeled litter - HAZMAT - Extraction

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method?
 Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert - Keep Calm - Think Clearly - Act Decisively

*** Follow up with MEDL upon return to ICP ***
