# INCIDENT ACTION PLAN SMITH RIVER COMPLEX - SOUTH CA-SRF-000968

P5QJ6L

## OPERATIONAL PERIOD 8/28/2023 0700 to 8/29/2023 0700

## **INCIDENT OBJECTIVES (ICS 202)**

1. Incident Name:	2. Operational Period:	Date From:	8/28/2023	Date To:	8/29/2023
SMITH RIVER COMPLEX - SOUTH		Time From:	0700	Time To:	0700
3. Objective(s):	•				

#### Strategic Direction

The Smith River Complex is being managed with a full suppression strategy. Personnel on the incident will implement risk-based decision making aligned to the ongoing ISAP process evaluations. Firefighting operations will implement tactics that offer the highest probability of success to suppress the fire while preventing unnecessary suppression related damage and protecting values at risk. Values include the safety of the public and firefighters; privately and tribally held timberlands; the communities and outlying areas near Gasquet, Pioneer, Lower Jones Creek, Washington Flat, Siskiyou Fork, French Hill, Coon Creek, Rock Creek, and Crescent City, as well as water resources, transportation routes, electrical infrastructure, and natural and cultural resources.

#### Leader's Intent

All resources assigned to the incident will work together as a team to provide the highest level of service, safety, and protection. All resources will ensure transparent, timely, and accurate communication while working to strengthen relationships with each other and with cooperators. All incident personnel should be prepared to take appropriate actions regarding safety, including the identification and mitigation of hazards to yourself and others through timely and thoughtful risk-based decision making. Personnel will manage fatigue by maintaining proper work/rest cycles. CAIIMT 15 expects professional behavior, conduct, and effective communication from all assigned personnel.

#### Management Objectives

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Coordinate public information to provide timely and continuous situation updates to affected agency partners, cooperators, and public.
- Coordinate suppression and repair activities with READs to minimize impacts on natural and cultural resources.
- Effectively manage and track costs for all incidents identified within the Smith River Complex.
- Close coordination with Region VI fire leadership to ensure effective and efficient management of firefighting resources.

#### **Control Objectives**

Implement a suppression strategy that keeps the fires:

- East of the Six Rivers National Forest boundary
- West of the Six Rivers and Klamath National Forest boundary
- North of the 15N01 Forest Road

## **Fire Weather Forecast**

FORECAST NO: 11 PREDICTION FOR: Monday-Tuesday DATE: August 28<sup>th</sup>, 2023 FORECAST ISSUED: 1800 August 27<sup>th</sup>, 2023 FIRE: Smith River Complex South UNIT: CA-SRF-968 IMET: Donny Dumont (208-577-1622) SIGNED: Donney Demont

<u>WEATHER DISCUSSION</u>: \* Valley elevations = 400ft (Gasquet), Ridgetop elevations = 3500 ft (Camp Six) \* Another day of moderated fire weather conditions with marine intrusion airmass, light diurnally driven winds and smoke leading to significant shading below 3K feet on western side of fire. Expect extremely low visibility once again in the morning due to the combination of smoke and fog, with visibility improving on west side of fire by noon as inversion lifts. Downslope winds will become southwest during the afternoon but will remain light with gusts below 15mph on ridges. Inversion will develop overnight with weak easterly winds on the ridges and downslope winds in valleys. By Tuesday a weak trough moves through the area bringing slightly stronger westerly winds.

trough moves inland to our north. Winds will remain offshore moving smoke more westward than previous days along with warmer temperatures. Offshore wind pattern weakens by Thursday as another Pacific trough begins to develop off the coast with a return to southwest flow, increased cloud cover and a chance for showers and thunderstorms headed into Friday.

6. Work Assignments:								

#### 6. Work Assignments:

Keep the fire north of Highway 199 and east of County Road 305 in order to protect the natural, cultural, and infrastructure values utilizing dozer and handline, firing where appropriate, and providing holding forces during operations.

#### 7. Special Instructions:

-Be aware of retardant avoidance areas, mine shafts and naturally occuring asbestos.

-Maintain awareness of fire conditions affecting road systems in your area that might be a primary escape route and establish secondary egress to safe area. Ensure trigger points are established and re-evaluated throughout the shift.

#### 6. Work Assignments:

Prepare direct and indirect containment lines to keep fire east of the 305 Rd. utilizing direct/indirect lines, firing where appropriate, and providing holding forces during operations.

#### 7. Special Instructions:

-Be aware of retardant avoidance areas, mine shafts and naturally occuring asbestos.

Maintain awareness of fire conditions affecting road systems in your area that might be a primary escape route and establish secondary egress to safe area. Ensure trigger points are established and re-evaluated throughout the shift.

6. Work Assignments:

Keep the fire north of Highway 199 and east of County Road 305 in order to protect the natural, cultural, and infrastructure values utilizing dozer and handline, firing where appropriate, and providing holding forces during operations. Prepare and defend structures in Highway 199 corridor and adjacent communities. Conduct damage assessment in areas that the fire has impacted.

#### 7. Special Instructions:

NIMS IAP

-Be aware of retardant avoidance areas, mine shafts and naturally occuring asbestos.

-Maintain awareness of fire conditions affecting road systems in your area that might be a primary escape route and establish secondary egress to safe area. Ensure trigger points are established and re-evaluated throughout the shift.

6. Work Assignments:

Keep the fire South of Highway 199 in order to protect the natural, cultural, and infrastructure values utilizing dozer and handline, firing where appropriate, and providing holding forces during operations. Conduct damage assessment in areas that the fire has impacted. Continue to coordinate operations with PNW Branch VIII Div K.

#### 7. Special Instructions:

-Be aware of retardant avoidance areas, mine shafts and naturally occuring asbestos.

-Maintain awareness of fire conditions affecting road systems in your area that might be a primary escape route and establish secondary egress to safe area. Ensure trigger points are established and re-evaluated throughout the shift.

Safety Officers assigned to Division MM: Bryon Shropshire

REMS 2, 3, & 5 are assigned to Branch XX

6. Work Assignments:

Keep the fire South of Highway 199 and East of the South Fork/G-O roads in order to protect the natural, cultural, and infrastructure values utilizing dozer and handline, firing where appropriate, and providing holding forces during operations.

7. Special Instructions:

-Be aware of retardant avoidance areas, mine shafts and naturally occuring asbestos.

-Maintain awareness of fire conditions affecting road systems in your area that might be a primary escape route and establish secondary egress to safe area. Ensure trigger points are established and re-evaluated throughout the shift.

6 Work Assignments			100 (1992)				

#### 6. Work Assignments:

Keep the fire South of Highway 199 and East of the South Fork/G-O roads in order to protect the natural, cultural, and infrastructure values utilizing dozer and handline, firing where appropriate, and providing holding forces during operations.

#### 7. Special Instructions:

-Be aware of retardant avoidance areas, mine shafts and naturally occuring asbestos.

-Maintain awareness of fire conditions affecting road systems in your area that might be a primary escape route and establish secondary egress to safe area. Ensure trigger points are established and re-evaluated throughout the shift.

Safety Officer(s) assigned to Division YY: Pat Cockrum

REMS 2, 3 & 5 assigned to Branch XX.

**REAFs:** Meingast, Chestnut

## HEALTH AND SAFETY MESSAGE

SAFETY starts with YOU We are <u>ALL</u> accountable for <u>SAFE</u> behaviors

For Day/Night Operations: August 28-29, 2023

Day: Monday Shift: Day Night

## Major Hazard and Risk:

- > Hazard Trees: Keep safe distance if possible, use spotters, maintain situational awareness.
- Driving and Traffic: Be prepared for adverse driving conditions due to a change in weather. Go slow to be fast.
- Heat/Cold Related Injuries: Stay hydrated, eat properly, take frequent breaks, and pay attention to your body. Utilize appropriate cold weather gear based on a current forecast to stay warm and dry.
- Extended Extraction Times: Be familiar with the medical plan. Develop a plan on how you would get an injured firefighter out timely. Factor in how smoke inversions and fog can reduce the likelihood of utilizing helicopters for a medivac. Pay attention to incoming weather for further complications with transport.

Standard Firefighting Order of the Day: Maintain control of your forces at all times.

Watch Out Situation #7: No communication link with crewmembers or supervisor

## Working around heavy equipment

- Ensure communications
- Avoid working below equipment
- Maintain separation

Thanks from your Safety Team!! Rick Bertram SOFC Ron Plummer SOF 2

## **Operational Tempo**

- Risk little to gain little
- Risk more to gain more
- The right tempo for the Job

There are no secrets to success. It is the result of preparation, hard work, and learning from failure.

- Colin Powell

Kitchen Hours Breakfast 0600 -1000

Management

Dinner 1800 - 2200

## **Shower Hours**

0500 - 1200, 1400 - 2200

## Laundry Hours

0530 - 2300 Gasquet Only

## **Fuel Tenders Hours**

0630 - 1200, 1400 - 2100 Vehicles are only permitted to refuel at the designated fueling station. No refueling permitted in camp.

## Weed Wash Hours

0630 - 1200, 1400 - 2100

Lunches, water, and ice are available at Gasquet Base Camp at the far west end of the runway.

	FINANCE MESSAGE			
1. Incident Name:	2. Operational Period: Date From:	8/28/2023	Date To:	8/29/2023
SMITH RIVER COMPLEX - SOUTH	Time From:	0700	Time To:	0700

## **CTR and Shift Tickets:**

-If you have the ability to scan a QR code with your smartphone, scan the QR code at the bottom this page to get a fillable CTR or shift tickets. Using a .pdf format, you can scan and fill, then email to your Supervisor on the incident for signature and submission.

-Another option is to complete a paper CTR / Shift Ticket, get it signed by your supervisor on the fire, and take a picture of it.

## **E-mailing CTRs and Shift Tickets**

## Subject line: SOUTH TIME

## Include your Resource #

## Email to: 2023.smithrivercomplex.finance@firenet.gov

-If you are emailing your CTR, SHIFT TICKET, or any type of pay documentation to FINANCE, please put SOUTH TIME in the subject line.

-This email can be used to submit finance check-in documents too, like manifests, copies of resource orders, AD casual hire forms, receipts, etc. Be sure to include your Resource Order number somewhere in the body of the email.

-You're encouraged to submit time every two days if possible to stay current, and...

## **REMEMBER, HARD PAPER COPIES OF DOCUMENTS ARE ALWAYS WELCOME TOO!!**

	Resources nee	d to check w	vith Finance:	
0-185	0-155	E-97	E-125	C-23
0-154	E-205	E-280	E-292	C-2
E-248	E-273	0-126	0-113	

## NOTE: Contractor Evaluation forms can be found under the Incident QR code.

# TRAINING SPECIALIST MESSAGE

A Training Specialist is on the incident. All federal, state, and local government agency trainees working on position task books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment.

The TNSP desk is in ICP trailer row. PLEASE CALL or TEXT if you have any questions.

John LeBlanc

Training Specialist

# Smith River Complex—South Fire Information

#### Contacts

Send us pictures! Send to: 2023.smithrivercomplex@firenet.gov Phone: 707.383.9727

## **Snail Mail**

Name, E# or O# c/o Smith River Complex Incident Del Norte Fairgrounds 421 U.S. 101 Crescent City, CA 95531

### Today's trivia...

What are the three largest fires in California history?

#### Answer:

- 1. August Complex 1.32 million acres. Date: August 26, 2020
- 2. Dixie Fire 963,309 acres. Date: 2021
- 3. Mendocino Complex. 459, 123 acres. Date: 2018

## **IMPORTANT:** <u>Yellow/Black Striped flagging</u> indicates resource <u>AVOIDANCE</u> areas.

## **Cultural and Heritage Resources:**

The area you are working in is rich in cultural and heritage resources which may be encountered while fighting fire. When potential cultural or heritage resource are encountered, that they are not disturbed. There is a potential that undocumented cultural resources will be encountered while fighting fire. It is important when a potential cultural resource is encountered that they are not disturbed in any manner.

GPS its location and take a photo, but do not remove or collect anything. Findings of cultural resources should not be reported over the radio. Work with your division to notify a resource advisor for recommendations on how to proceed.

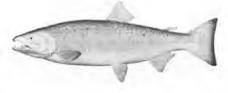

## Invasive Plant Species – PLEASE USE WEED WASH

The area in and around the Smith River Complex, are home to many sensitive species. Infestations of highly invasive plant species are one of the largest threats to sensitive species populations here. Spread via vehicles and foot traffic as well as re-activation via fire is of high concern. To help protect these sensitive places, do not park in <u>and</u> try to avoid areas flagged areas. **Make sure to visit the WEED WASH at end of shift AND at demob.** Located on Hwy 199 on the right just past the Ranger Station.

## Fish Screens: Coho Salmon Critical Habitat

Most rivers and streams in this area are considered critical habitat for Threatened Coho salmon. Please ensure that Mark 3 and Engine/Tender suction hoses have the appropriate screen attached. Talk to a READ if you think you need a screen!

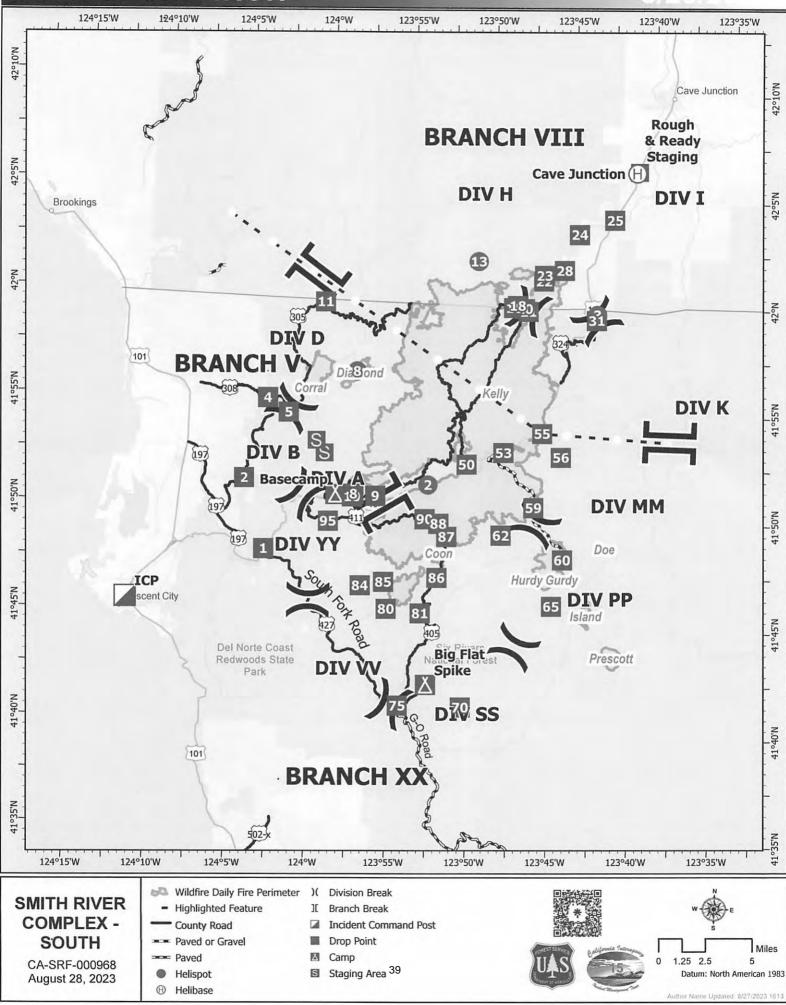

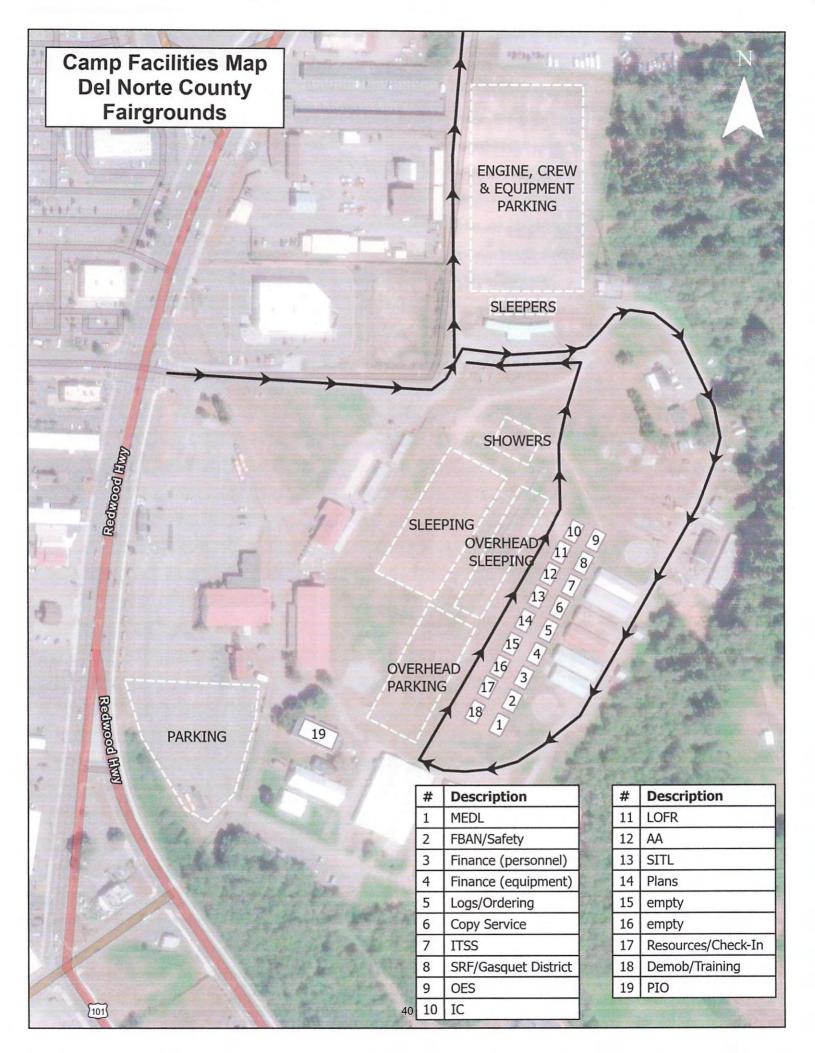

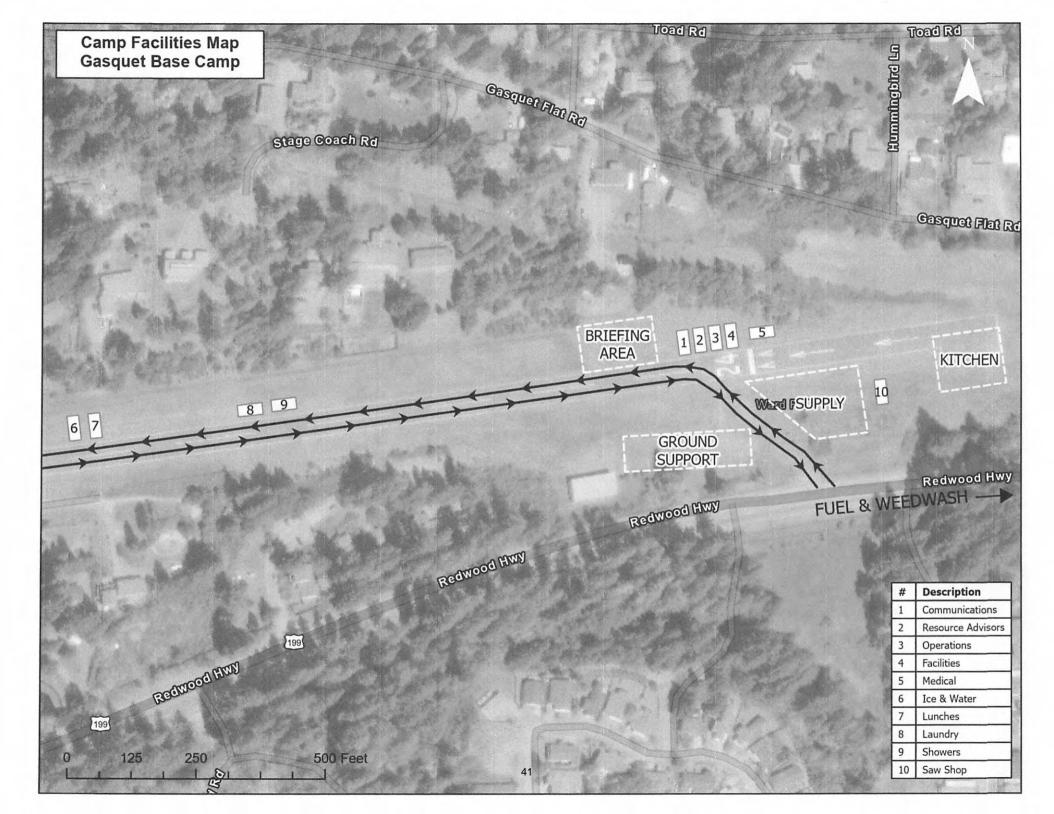

## Port Orford Cedar root disease

Some local drainages are infected with a root disease that spreads via mud and water. To prevent spreading this disease to uninfected areas, all water tenders and engines will apply bleach to their tanks in a 1:1000 ratio (using bleach with 6.0 % Sodium hypochlorite). Talk to a READ if you need some bleach!
