Fire Weather Forecast

FORECAST NO: 13

PREDICTION FOR: Wednesday-Thursday

DATE: August 30th, 2023

FORECAST ISSUED: 1800 August 29th, 2023

FIRE: Smith River Complex South

UNIT: CA-SRF-968

IMET: Donny Dumont (208-577-1622)

SIGNED: Donney Dumont

WEATHER DISCUSSION: * Valley elevations = 400ft (Gasquet), Ridgetop elevations = 3500 ft (Camp Six) Northeast wind regime will be established across the fire area today with strongest winds above surface inversion this morning before trending slightly lighter by afternoon. Smoke transport will be to the southwest with offshore flow, keeping the western side of the fire under smoke. Relative humidity will drop rapidly during the morning as the surface inversion breaks. Winds will increase once again after sunset above 2500ft with poor relative humidity recoveries. Weak surface inversion is still expected to develop in river valleys with smoke and low visibility development. On Thursday northeast winds will end with an approaching Pacific Northwest trough and surface cold front. Expect clouds to increase during the day with a slight chance for light precipitation by night with moderating fire weather conditions.

TODAY: ***Near Critical Fire Weather Conditions Possible Above 2500 ft Before Noon***

WEATHER: Mostly Clear. Heavy smoke in valleys near the fire with smoke transport to the southwest.

MAX TEMP: 79-85°F (8°F ↑) Vallevs: Ridgetops:

MIN RH: 25-35% (40% 1) Vallevs: 70-75°F (5°F 个) Ridgetops: 28-38% (30% 1)

CHC WTG RAIN: 0% LAL: 1 SFC VIS: 1/8 miles increasing to .5 to 1 mile

Valleys: Early morning downslope, then NE 5-10 mph gusts to 18 mph (peak wind gusts 10am - 12pm)

(20 feet) Ridgetops: Northeast 12-15 mph gusts to 28 mph through 11am decreasing in afternoon.

MIXING HEIGHT: Rising to 8,000 ft by 1400. TRANSPORT WIND: Northeast 15 mph.

TONIGHT: ***Near Critical Fire Weather Conditions Possible Above 2500 ft After Midnight ***

WEATHER: Partly cloudy with valley smoke below 2500ft. Smoke transport to the east overnight.

MIN TEMP: Vallevs: 52-57° (Little Change) MAX RH:

Vallevs: 80-85% (10% 1) Ridgetops: 28-38% (30% 1)

62-68° (1-2°F 个) Ridgetops:

CHC WTG RAIN: 0% SFC VIS: 1/8 mile in smoke. LAL: 1

WINDS: Valleys: Downslope 4-8 mph.

(20 FEET) Ridgetops: Northeast 4-8 mph gusts 12 mph, after 11pm northeast 10-12 mph gusts 22 mph

INVERSION: Inversion height 2500ft, develops at 11PM. TRANSPORT WIND: Northeast 15 mph.

THURSDAY:

WINDS:

WEATHER: Mostly Clear becoming mostly cloudy. Heavy smoke with smoke transport shifting to south.

MAX TEMP: Valleys: 69-74°F (10°F 1) MIN RH: Vallevs: 40-45% (5% 个)

> Ridgetops: 62-66°F (10°F 1) 30-35% (5% 个) Ridgetops:

CHC WTG RAIN: 5% SFC VIS: 1/8 miles increasing to .5 to 1 mile LAL: 1

WINDS: Valleys: Morning downslope, becoming southwest 5-8 mph in afternoon.

(20 feet) Ridgetops: Northeast 12-15 mph gusts to 22 mph through 10am becoming west 5-10 mph.

MIXING HEIGHT: Rising to 7,000 ft by 1400. TRANSPORT WIND: North 10 mph.

EXTENDED OUTLOOK: Upper-level low parks almost overhead and stalls out over the region. This will bring a cool marine influenced airmass and moderated fire weather conditions straight into the weekend. Afternoon showers are expected Friday through Saturday along with valley night fog and marine layer stratus intrusions. A drying trend is expected to begin by Sunday but no critical fire weather Nearby Weather Observations conditions are on the horizon.

FIRE BEHAVIOR FORECAST Incident Name: SMITH RIVER COMPLEX - SOUTH Forecast Number: 13 Type of Fire: Wildfire FIRE BEHAVIOR FORECAST Operational Period: Date From: 8/30/23 Date To: 8/31/23 Time From: 0700 Time To: 0700 Unit: Six Rivers National Forest - Gasquet District

INPUTS

WEATHER SUMMARY:

Near Critical Fire Weather Today - See Fire Weather Forecast

FUELS SUMMARY:

Due to below normal precipitation last winter, live fuel moisture levels did not fully recover this spring, making the shrubs readily available for consumption. There are snag patches within the fire scars with scabbier fuels; Biscuit (2002), Coon (2015), Bear (2015), Oak (2017) and Slater (2020). The fuel moistures of the manzanita are around 110% and the 1000-hour fuels 9%, below critical levels. The fire scars, including the 2002 Biscuit fire, are a grass and low shrub fuel type (GS2) and have hampered growth of the Corral, Diamond, Island, Prescott, and western portion of the Kelly fires. Outside of the fire scars, the fuels are dominated by a high load conifer with shrub fuel type (TU5) and are highly variable based on elevation.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

We are currently on the tail end of what is peak of fire season for this area of the state. Under smoky conditions, the fire will consume the heavy dead surface fuels with relatively slow rates of spread. Roll-out is a driver of growth in these areas. When the fire is exposed to a stronger wind or gets established on a steep slope with aligned fuels and topography, expect rapid rates of spread with sustained crown runs and medium range spotting. Today, near critical fire weather conditions are expected with low humidity and strong easterly winds. Expect any heat near unburned vegetation, including sections recently burned, to become active.

Fire Danger Indices – 2022 IRPG Page 39
Energy Release Component (ERC): 85th
August Average ERC Percentile: 75th

2020 Slater Fire Large growth days (September 10th) - ERC Percentile: 99th Maximum Spotting Distance: 0.6 miles

Peak Burn Period (1400 - 2000) - Probability of Ignition (PIG): 70% (shaded), 80% (unshaded)

SPECIFIC:

Branch V: The western portion of the complex will have adverse wind conditions throughout the operational period. The flank north of Gasquet will continue to actively back towards the North Fork of Smith River. There is a piece of heat on the Kelly fire across the drainage, due east of the Diamond fire in the Biscuit scar, which will have wind and slope in alignment.

Branch XX: Div. MM and PP will have favorable winds to continue their operations. The fire backing down in the Craigs Creek area will have an adverse wind increasing rates of spread towards the primary control line along the 17N40 road. Fire will remain active along the 405 road in Div. YY/VV, but crews should have winds at their backs to continue firing operations to contain the eastern flank of the Coon fire.

Night shift: The fire is expected to remain active tonight, especially in the upper elevations exposed to the strong, gusty easterly winds. Conditions should be good to continue firing operation if needed.

AIR OPERATIONS:

Sunrise 0611, Last Light 2022 (Daylength: losing 2 min, 39 sec each day)

Smoke will be transporting to the southwest, so expect clearing early in the operational period on the east side of the fire and poor flying conditions over the western portion for most of the day.

SAFETY

Today is a heads-up day for near critical weather conditions with higher temperatures, lower humidity, and gusty east winds. These winds are from a different direction than usual. Pay attention to your location as it relates to the main fire

6 Work Assignments:	L	<u></u>				<u> </u>	<u> </u>	

6. Work Assignments:

Keep the fire north of Highway 199 and east of County Road 305 in order to protect the natural, cultural, and infrastructure values utilizing dozer and handline, firing where appropriate, and providing holding forces during operations.

7. Special Instructions:

-Be aware of retardant avoidance areas, mine shafts and naturally occuring asbestos.

-Maintain awareness of fire conditions affecting road systems in your area that might be a primary escape route and establish secondary egress to safe area. Ensure trigger points are established and re-evaluated throughout the shift.

6. Work Assignments:

Prepare direct and indirect containment lines to keep fire east of the 305 Rd. utilizing direct/indirect lines, firing where appropriate, and providing holding forces during operations.

7. Special Instructions:

-Be aware of retardant avoidance areas, mine shafts and naturally occuring asbestos.

Maintain awareness of fire conditions affecting road systems in your area that might be a primary escape route and establish secondary egress to safe area. Ensure trigger points are established and re-evaluated throughout the shift.

6. Work Assignments:

Keep the fire South of Highway 199 in order to protect the natural, cultural, and infrastructure values utilizing dozer and handline, firing where appropriate, and providing holding forces during operations. Conduct damage assessment in areas that the fire has impacted. Continue to coordinate operations with PNW Branch VIII Div K.

7. Special Instructions:

-Be aware of retardant avoidance areas, mine shafts and naturally occuring asbestos.

-Maintain awareness of fire conditions affecting road systems in your area that might be a primary escape route and establish secondary egress to safe area. Ensure trigger points are established and re-evaluated throughout the shift.

Safety Officers assigned to Division MM: Bryon Shropshire

6. Work Assignments:

Keep the fire South of Highway 199 and East of the South Fork/G-O roads in order to protect the natural, cultural, and infrastructure values utilizing dozer and handline, firing where appropriate, and providing holding forces during operations.

7. Special Instructions:

-Be aware of retardant avoidance areas, mine shafts and naturally occuring asbestos.

-Maintain awareness of fire conditions affecting road systems in your area that might be a primary escape route and establish secondary egress to safe area. Ensure trigger points are established and re-evaluated throughout the shift.

6. Work Assignments:								

Patrol, re-enforce, improve and continue work in Division A and Structure Groups.

7. Special Instructions:

-Ambulance 3 available out of Gasquet. REMS 3 available in Night YY.

-Be aware of retardant avoidance areas, mine shafts and naturally occuring asbestos.

-Maintain awareness of fire conditions affecting road systems in your area that might be a primary escape route and establish secondary egress to safe area. Ensure trigger points are established and re-evaluated throughout the shift.

Safety Officer(s) assigned to Night: Lucas Lambert

HEALTH AND SAFETY MESSAGE

SAFETY starts with YOU.

We are <u>ALL</u> accountable for <u>SAFE</u> behaviors.

For Day/Night Operations:

INCIDENT: Smith River

DATE: August 30-31, 2023

Major Hazards and Risks:

- * STEEP TERRAIN: Be aware of resources working below you, watch your footing.
- * DRIVING: Be aware of driving in low visibility keep spacing drive for conditions
- HAZARD TREES: Assess ALL Trees in Work Area, in addition to suppression and mop-up operations, assess hazard trees where you sleep or take breaks.
- CRITTERS: Watch out for bears, rattlesnakes, stinging insects.
- ❖ MEDICAL PAITENT LONG EXTRACTION TIMES -: Review Medical Plan and 8 lines in IAP.

Transitions Multiple things transitioning over next 24 hours.

Weather -Transitioning into different patterns predicted.

Command - know who you are working for and ensure communication.

Resources -Brief incoming resources, debrief before you leave.

COMMON DENOMINATORS OF FIRE BEHAVIOR ON TRAGEDY FIRES

- Relatively small fires quiet areas of large fires
- > In light fuels such as as grass and light brush
- Unexpected wind shift in direction or speed
- When fire responds to topographic conditions and runs up hill
- > During critical burn periods

Thanks, from your Safety Team!!
Rick Bertram SOFC Ron Plummer SOF2

Communication responsibility's

- * Brief others as needed
- Debrief your actions
- * Communicate hazards to others
- Acknowledge Message
- Ask if you don't know

	FINANCE MESSAGE			
1. Incident Name:	2. Operational Period: Date From:	8/30/2023	Date To:	8/31/2023
SMITH RIVER COMPLEX - SOUTH	Time From:	0700	Time To:	0700

CTR and Shift Tickets:

-If you have the ability to scan a QR code with your smartphone, scan the QR code at the bottom this page to get a fillable CTR or shift tickets. Using a .pdf format, you can scan and fill, then email to your Supervisor on the incident for signature and submission.

-Another option is to complete a paper CTR / Shift Ticket, get it signed by your supervisor on the fire, and take a picture of it.

E-mailing CTRs and Shift Tickets

Subject line: SOUTH TIME

Include your Resource #

Email to: 2023.smithrivercomplex.finance@firenet.gov

- -If you are emailing your CTR, SHIFT TICKET, or any type of pay documentation to FINANCE, please put SOUTH TIME in the subject line.
- -This email can be used to submit finance check-in documents too, like manifests, copies of resource orders, AD casual hire forms, receipts, etc. Be sure to include your Resource Order number somewhere in the body of the email.
- -You're encouraged to submit time every two days if possible to stay current, and...

REMEMBER, HARD PAPER COPIES OF DOCUMENTS ARE ALWAYS WELCOME TOO!!

Resources need to check with Finance:

E-125	E-146	E-205	E-273	E-280
E-292	E-335	E-355	E-97	
0-113	0-126	0-185		

NOTE: Contractor Evaluation forms can be found under the Incident QR code.

Today's trivia...

What's the tallest mountain in California?

- A. Mount Dawson
- B. Mount Williamson
- C. Mount Whitney
- D. Mount Shasta

Answer: C

IMPORTANT: Yellow/Black Striped flagging indicates resource AVOIDANCE areas.

Cultural and Heritage Resources:

The area you are working in is rich in cultural and heritage resources which may be encountered while fighting fire. When potential cultural or heritage resource are encountered, that they are not disturbed. There is a potential that undocumented cultural resources will be encountered while fighting fire. It is important when a potential cultural resource is encountered that they are not disturbed in any manner.

GPS its location and take a photo, but do not remove or collect anything. Findings of cultural resources should not be reported over the radio. Work with your division to notify a resource advisor for recommendations on how to proceed.

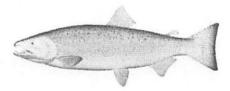

Invasive Plant Species - PLEASE USE WEED WASH

The area in and around the Smith River Complex, are home to many sensitive species. Infestations of highly invasive plant species are one of the largest threats to sensitive species populations here. Spread via vehicles and foot traffic as well as re-activation via fire is of high concern. To help protect these sensitive places, do not park in <u>and</u> try to avoid areas flagged areas. **Make sure to visit the WEED WASH at end of shift AND at demob.** Located on Hwy 199 on the right just past the Ranger Station.

Fish Screens: Coho Salmon Critical Habitat

Most rivers and streams in this area are considered critical habitat for Threatened Coho salmon. Please ensure that Mark 3 and Engine/Tender suction hoses have the appropriate screen attached. Talk to a READ if you think you need a screen!

Port Orford Cedar root disease

Some local drainages are infected with a root disease that spreads via mud and water. To prevent spreading this disease to uninfected areas, all water tenders and engines will apply bleach to their tanks in a 1:1000 ratio (using bleach with 6.0 % Sodium hypochlorite). Talk to a READ if you need some bleach!

TRAINING SPECIALIST MESSAGE

A Training Specialist is on the incident.
All federal, state, and local government agency trainees working on position task books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment.

The TNSP desk is in ICP trailer row.
PLEASE CALL or TEXT if you have any questions.

John LeBlanc
Training Specialist

john_leblane@firenet.gov

Sign in training

ALL DEMOBING RESOURCES

The following are the necessary steps to complete the Demob process as efficiently as possible:

- If you are a demobing resource start by receiving your ICS 221 (demob sheet) located in the Facilities/Demob tent at Ward Airfield.
- Go by and get the following signatures from the Gasquet Base Camp **BEFORE** leaving for ICP:
 - 1. Ground Support (at your assigned time NOT before)
 - 2. Weed Wash (after Ground Support)
 - 3. Supply
 - 4. Communication Trailer
- After obtaining those 4 signatures finish the process by completing your times at the ICP and turn in your ICS 221 (demob sheet) to DEMOB / Check-In to give your travel info.

****If your flying DEMOB needs at-least 72 hour's notice****

Make sure to call in or stop by to make sure all necessary info is obtained to get the flight that is required

Call or email with any questions

619-206-2271

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)
"This will be the Trout Meadow Medical Incident IC is TFLD Jones EMT Smith is providing medical care."

Severity of Emergency	□RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented. □YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes. □GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.
