

## INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b> Smith River Complex North	<b>2. Operational Period:</b> Date From: 09/11/23      Date To: 09/12/23 Time From: 0700      Time To: 0700															
<b>3. Objective(s):</b> Provide for the safety of firefighters and the public through the utilization of strategic and deliberate risk processes.  Develop strategic plans to protect businesses, homes, property, and critical infrastructure in and around the communities of the Illinois Valley including Cave Junction, O'Brien, Takilma, Sunstar, the Highway 101 and 199 corridors, and identified values within the planning area.  Protect and minimize impacts to cultural sites, Kalmiopsis and Siskiyou wilderness values, critical habitat, and the Smith River Wild and Scenic Corridor. Engage resource advisors to effectively protect natural resource values and minimize impacts of suppression efforts.  Engage in transparent communication and enhance relationships with agency partners, cooperators, stakeholders, and the public through timely and accurate information exchange. Ensure long-term strategies are communicated.  Provide initial attack support for new starts within the incident TFR or as requested through Oregon Department of Forestry, Rogue Siskiyou and Six Rivers National Forests. Coordinate responses with the local units.  Accurately track incident costs and ensure cost sharing measures are identified, applied, and documented for all fires within the Smith River Complex.  Provide an atmosphere free of discrimination, harassment, and other forms of inappropriate behavior.																
<b>4. Operational Period Command Emphasis:</b> We are at the time of the incident when operations can become routine and repetitive. Stay present in your task at hand. Look for opportunities to reduce risk, mitigate hazards and prioritize safety.																
General Situational Awareness You gain a false sense of security about risk when you perform a dangerous task without incident. Maybe your safety measures are effective, or maybe you are just lucky. Be cautious about taking greater risks because you feel your safety is a given rather than something you have to earn daily.																
<b>5. Site Safety Plan Required?</b> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> <b>Approved Site Safety Plan(s) Located at:</b>																
<b>6. Incident Action Plan</b> (the items checked below are included in this Incident Action Plan): <table style="width: 100%; border: none;"> <tr> <td style="width: 33%;"><input checked="" type="checkbox"/> ICS 203</td> <td style="width: 33%;"><input type="checkbox"/> ICS 207</td> <td style="width: 34%;"><u>Other Attachments:</u></td> </tr> <tr> <td><input checked="" type="checkbox"/> ICS 204</td> <td><input type="checkbox"/> ICS 208</td> <td><input checked="" type="checkbox"/> Fire Behavior Forecast</td> </tr> <tr> <td><input checked="" type="checkbox"/> ICS 205</td> <td><input checked="" type="checkbox"/> Map/Chart</td> <td><input type="checkbox"/> _____</td> </tr> <tr> <td><input type="checkbox"/> ICS 205A</td> <td><input checked="" type="checkbox"/> Weather Forecast</td> <td><input type="checkbox"/> _____</td> </tr> <tr> <td><input checked="" type="checkbox"/> ICS 206</td> <td></td> <td><input type="checkbox"/> _____</td> </tr> </table>		<input checked="" type="checkbox"/> ICS 203	<input type="checkbox"/> ICS 207	<u>Other Attachments:</u>	<input checked="" type="checkbox"/> ICS 204	<input type="checkbox"/> ICS 208	<input checked="" type="checkbox"/> Fire Behavior Forecast	<input checked="" type="checkbox"/> ICS 205	<input checked="" type="checkbox"/> Map/Chart	<input type="checkbox"/> _____	<input type="checkbox"/> ICS 205A	<input checked="" type="checkbox"/> Weather Forecast	<input type="checkbox"/> _____	<input checked="" type="checkbox"/> ICS 206		<input type="checkbox"/> _____

# Fire Weather Forecast

**FORECAST NO: 20**  
**PREDICTION FOR: Monday-Tuesday**  
**DATE: September 11, 2023**  
**FORECAST ISSUED: 1900 September 10, 2023**

**FIRE: Smith River Complex North**  
**UNIT: CA-SRF-968**  
**IMET (T): William Iwasko (240-778-5301)**  
**SIGNED: *William Iwasko***

**WEATHER DISCUSSION:** Valley elevations = 1400 ft (Illinois Valley), Ridgetop elevations = 3300 ft (Monkey Ridge)  
 A cold front passed across the region last night. This will result in temperatures being 1-4 degrees cooler than yesterday. These cooler temperatures will help increase humidity values across the area 10-20 percent. Westerly winds are expected in the afternoon which will also help to clear out a lot of the smoke that lingered over the area on Sunday. Tuesday we will slowly begin to warm up and dry out over the fire with northwest winds expected over the fire during the afternoon.

### TODAY:

**WEATHER:** Mostly Sunny  
**MAX TEMP:** Valleys: 77-84°F (2-4 ↓)      **MIN RH:** Valleys: 30-35% (10-15 ↑)  
 Ridgetops: 66-71°F (1-3 ↓)      **Ridgetops:** 40-50% (10-20 ↑)  
**CHC WTG RAIN:** 0%      **LAL:** 1      **SFC VIS:** 6+ miles

**WINDS:** Valleys: Morning: downslope 2-4 mph. After 1200: West 6-9 mph gusts to 15 mph.  
**(20 feet)** Ridgetops: Morning: East 5-8 mph. After 1200: West 6-9 mph gusts to 15 mph.

**MIXING HEIGHT:** Rising to 5,000 ft by 1300.      **TRANSPORT WIND:** West around 10 mph.

### TONIGHT:

**WEATHER:** Mostly Clear.  
**MIN TEMP:** Valleys: 42-48° (Little Change)      **MAX RH:** Valleys: 90-100% (Little Change)  
 Ridgetops: 48-52° (Little Change)      **Ridgetops:** 75-85% (Little Change)  
**CHC WTG RAIN:** 0%      **LAL:** 1      **SFC VIS:** 6+ miles.

**WINDS:** Valleys: West 3-5 mph before 2000, then northeast 2-4 mph.  
**(20 FEET)** Ridgetops: West 4 to 7 mph before 2200, then northeast 5-9 mph gusts to 15 mph.

**MIXING HEIGHT:** Dropping to 1,000 ft by 2200.

### TUESDAY:

**WEATHER:** Sunny.  
**MAX TEMP:** Valleys: 78-85°F (1-3 ↑)      **MIN RH:** Valleys: 25-30% (3-6 ↓)  
 Ridgetops: 67-72°F (1-3 ↑)      **Ridgetops:** 37-47% (2-5 ↓)  
**CHC WTG RAIN:** 0%      **LAL:** 1      **SFC VIS:** 6+ miles.

**WINDS:** Valleys: Morning: downslope 2-4 mph. After 1200: Northwest 5-8 mph gusts to 15 mph.  
**(20 feet)** Ridgetops: Morning: East 5-8 mph gusts to 12 mph. After 1200: Northwest 7-10 mph gusts to 18 mph.

**MIXING HEIGHT:** Rising to 5,000 ft by 1300.      **TRANSPORT WIND:** West around 10 mph.

**EXTENDED OUTLOOK:** Temperatures are expected to warm significantly for the end of the week with readings 10 to 15 degrees above normal by Friday with RH values dropping.

## Fire Behavior Forecast #22

<b>Incident:</b> Smith River Cx North CA-SRF-000968	<b>TYPE OF FIRE:</b> Wildfire
<b>DATE/TIME ISSUED:</b> September 10, 2023 1900	<b>OPERATIONAL PERIOD:</b> September 11, 2023
<b>FBAN:</b> Tobin Kelley	<b>Signed:</b> /s/ Tobin Kelley

**Weather Summary** - See Incident Weather Forecast: Some moderation of temperature and RH today.

### Fuels

**Shrub:** Shrubs and brush 1 to 3 feet high with a low load of grass intermixed with sparse conifer. Manzanita brush and other live fuels are moderately available for consumption with independent fire. Low rates-of-spread are expected in this fuel type without strong winds to drive the fire.

**Timber litter and shrub:** Primary carrier of the fire is understory brush with timber and leaf litter. Expect slow rates of spread under moderate weather conditions. Canopy closure shelters fuels from wind, making fire spread slow with low to moderate winds.

Fire Behavior: Minimal to moderate surface fire, occasional torching  Atmosphere: Partially Stable Max. spot distance: 0.25 mile Wild Rivers ERC%: 79 <sup>th</sup> percentile (up 3 points) BI: 77 <sup>th</sup> percentile up 2 points	<b>Fuel/Type Model</b>	<b>Maximum Rate of Spread</b>	<b>Maximum Flame Length</b>
	Shrub	3 feet/minute	4 ft.
	Timber litter shrub	3 feet/minute	3-5 ft.

Expected Fire Behavior is Based on the Warmest, Driest, Windiest Conditions Forecasted.

**General/Potential:** South and west aspects have dried out enough to sustain fire at moderate levels of activity. Expect creeping, surface fire and occasional tree torching in heavier canopies. Northerly aspects are still seeing higher fuel moistures from the last precipitation event. Exposed fuels along ridgetops tend to be drier and will sustain fire when available. ERC and BI values will continue to trend upward but remain below average. Slightly higher relative humidities and lower temperatures should have some moderating effect on fire activity today.

**Golf:** The timber stand in the bowl has started to show more activity. Expect this level to continue in the late afternoon. Fire has been low to moderate intensity and expect this to continue.

**Hotel:** Fuels will continue to dry and aid in fire activity, expect to see additional activity in timber stands which are dry enough to support moderate to active fire. Conditions should remain advantageous for firing operations in the division. Winds should swing more from the west and not be as strong as yesterday along the ridge.

**India:** Little activity beyond smoldering and creeping expected. Potential remains for unburned islands of fuel to carry surface fire as warming and drying continues.

**Kilo:** Expect smoldering and creeping fire activity. Continued drying may bring up hot spots along the division.

**Night Operations:** Fire activity will likely be moderated by weather conditions, but may still allow fire to be sustained into the evening. Diurnal winds may push fire downslope until relative humidity and temperature limit this activity.

### Air Operations:

May see some smoke cause visibility issues but not expected to impair aviation operations.

**Safety:** Other fires in the area are starting to demonstrate increased fire activity. Conditions are becoming more conducive for previously undetected hot spots to become active and spread.

<b>6. Control Operations/Work Assignments:</b>						
Task: Scout, assess and implement primary and secondary line locations. Purpose: To minimize impact of fire to the communities of Smith River and Brookings. End state: Impacts to the communities of Smith River and Brookings have been minimized.						
<b>7. Special Instructions:</b>						
*IA Resource						
REAFS Tony Saunders, Joe Porter, and Adam Butcher will contact DIVS upon entering and exiting their respective divisions. Please use bleach treatment in all water applied to the fire. Bleach is in supply and at the lunch pickup area. 1 gallon of bleach to 1,000 gallons of water.

## Health and Safety Message

Dehydration is the result of the body trying to regulate its temperature naturally through sweating. Maintaining body fluids is essential for sweating. You must hydrate before, during, and after work.

- Studies conducted on wildland firefighters indicate that during fire suppression activities firefighters need to drink a minimum of one quart of fluid each hour of work.
- Hyponatremia (abnormally low concentration of sodium in the blood) as a result of excessive water intake is a potentially life-threatening complication. It can be prevented when hydration is enhanced by electrolytes, through fluids or food containing sodium and potassium.
- After work, it is important to continue drinking to replace fluid losses. Thirst always underestimates fluid needs, so you should drink more than you think you need.
- You can assess your hydration by observing the volume, color, and concentration of your urine. Low volumes of dark, concentrated urine or painful urination indicate a serious need for rehydration. Other signs of dehydration include a rapid heart rate, weakness, excessive fatigue, and dizziness.

# Fighting Stigma

Mental health stigma refers to negative reactions that society, the people around us, or we as individuals may have towards mental health difficulties. Mental health stigma involves common but inaccurate beliefs that people experiencing depression, anxiety, traumatic stress, or other mental health or substance use problems are different, weak, untrustworthy, or even dangerous.

Mental health stigma can create an environment in which people experience shame and fear related to mental health problems. This can make it difficult to speak up or asking for help we need. For these reasons, combatting stigma is a critical part of supporting each other and preventing suicide in our community.

## WHAT MENTAL HEALTH STIGMA SOUNDS LIKE

### Reducing mental health stigma in the wildland fire community depends on all of us.

#### 1. Know the facts.

Mental health difficulties can easily be misunderstood, leading to inaccurate beliefs and judgement. Educate yourself about mental health problems and recovery, especially experiences common among wildland fire personnel such as depression, anxiety, traumatic stress, and substance use disorders.

#### 2. Talk about mental health.

Stigma is maintained by silence. Mental health challenges are common, especially for those working in high-stress positions such as those in the wildland fire service. We can combat stigma and support those who are struggling by openly discussing mental health challenges, experiences of getting help, and stories of recovery in our community.

#### 3. Be aware of your words, attitudes, and behaviors.

Our beliefs about mental health are communicated to others through our words and actions. A joke, an eye roll, or stigmatizing language send powerful messages that can reinforce shame and silence. This stigma can keep others from seeking help.

#### 4. Normalize mental health care as part of overall health and readiness.

As public servants working in wildfire response, we take on unique roles and responsibilities that can be stressful and demanding. Routinely addressing physical and mental health needs is essential to effective performance and maintaining long-term health and wellbeing across a fire season or a career.

#### 5. Educate others.

Share accurate information about mental health, convey hope and support, and challenge myths and stereotypes. Know the resources available and be able to share when needed.

*If you are experiencing thoughts of suicide or are in distress, dial or text 988 for free, confidential support available 24/7.*

# Smith River Complex Demob Process

## **As your Demob day approaches:**

- Pay attention to the IAP Demob Schedule.
- Alert DMOB if there are issues. We can only fix things we know about.
- **PHONE: 541-414-6539; Email: [2023.smithrivercomplex.demob@firenet.gov](mailto:2023.smithrivercomplex.demob@firenet.gov)**
- NO CELL COVERAGE: See your Division Supervisor
  
- **Contact FINANCE 48 hours prior** to give them a heads-up you are departing.
- **Finance Phone: Equipment: 971-713-1521      Personnel: 206-376-7448**
- **Email: [2023.smithrivercomplex.finance@firenet.gov](mailto:2023.smithrivercomplex.finance@firenet.gov)** Turn in any outstanding or travel CTRs/Shift Tickets. Make sure they're SIGNED.
- **Confirm no missing financial documentation. See Finance Page for full information.**

## **Need COMMERCIAL AIR TRAVEL to get home?**

To schedule a flight home **you** need to complete the Commercial Air Travel Request form **72-hours ahead** of your last work day. The data is needed to purchase your flight and email you the itinerary prior to your demob date.

Link to Form: <https://forms.office.com/g/g2B3uHCxVp>

QR code for Form

Rogue Valley Expanded Dispatch will email the itinerary to the email address you enter into the form. Make sure it is an address you can access on this assignment.

Contact DMOB if Ground Support is needed to get to the airport. **541-414-6539.**

## **!!! We are using a virtual check-out process for demob. !!!**

### **On your Day of Demob:**

#### **STEP 1:**

- Return supplies to the Cache
- Return radios, antennas, etc., to Communications
- Contact Finance about closing out your paperwork
- If required, have all of your line-going vehicles (including UTVs) inspected by Ground Support for a release safety inspection
- If required, take your vehicle through weed wash

#### **STEP 2:**

Once the above items have been completed, SCAN the DMOB QR code and complete the questions.

Call Demob at 541-414-6539 to confirm the information has been received

North DEMOB

South DEMOB

# Mop-Up Standards, Waterbar guidelines, and the Top 5 Natural Resources Take-homes from Smith River Complex Fire

In addition to the upcoming task of constructing waterbars during Suppression Repair, as well as the current Mop-Up standards, here are the top 5 messaging points and/ or tidbits of info that we have shared that will prove useful whenever you are fighting fire in the Illinois Valley. Thank you for your most excellent work here and safe travels as you time out and return to your home units!

Constructing EFFECTIVE waterbars on firelines includes attention following the 5-D's; Distance, Divert, Diagonal, Discharge, and Dissipate. The purpose of waterbars is to slow water down as it travels downhill. When constructed correctly, waterbars help reduce excessive erosion and mitigate sediment transfer to streams and rivers.

<b>Fireline Slope</b>	<b>Maximum Spacing</b>
1-6%	300 ft.
7-9%	200 ft.
10-14%	150 ft.
15-20%	90 ft.
21-40%	50 ft.
41-60+%	25 ft.

Figure 1. *The Five-D System for Effective Fireline Waterbars.* Furniss (undated) PNW

## Mop-Up Standards for BLM- and USFS-Managed Lands

The following are the mop up standards for BLM- and USFS-managed lands. The intent of mop up is to make the likelihood of the fire escaping the containment perimeter very unlikely through the rest of the fire season or onset of significant rains. Mop up will be implemented to the degree and location necessary to meet the stated intent.

- The BLM's and USFS's approach to mop up, in order to minimize unnecessary exposure to firefighters, is not to specify a distance or percentage "standard." There may be parts of the fire that are too dangerous for any mop up (e.g., snag patches, extremely steep/rocky terrain).
- To reduce hazards during mop up, fall snags that pose "imminent" danger to firefighters (ref **Field Guide for Danger Tree Identification and Response**, RG-NR-FP-PR-01-08).
- Spot fires outside the control lines will be mopped up commensurate with exposure and values. The perimeter of spots will be mapped in GIS.
- Mop up of partially burned areas further inside the lines will be the exception and determined on a case-by-case basis by the Resource Advisor, Safety Officer, and Operations depending on the specific values at risk.
- As mop up specifications are met on a Division, Operations will work with the Resource Advisors to develop a plan for the resources and equipment to be left in place that may be required for future contingency actions.

## Mop-up Standards for State and Private Lands

The following are the mop up standards for Smith River Complex North **on State and private lands**. At no time shall firefighter safety be compromised to meet these standards. All hazards associated with these standards will be mitigated based on experience and deference to firefighter expertise prior to implementation.

- Mop up to the degree necessary to make the likelihood of escape very low, with mop up based on experience, terrain, fuel types, and fuel conditions, and current/predicted weather conditions. Engage in dialogue with your supervisor in order to determine the appropriate distance.

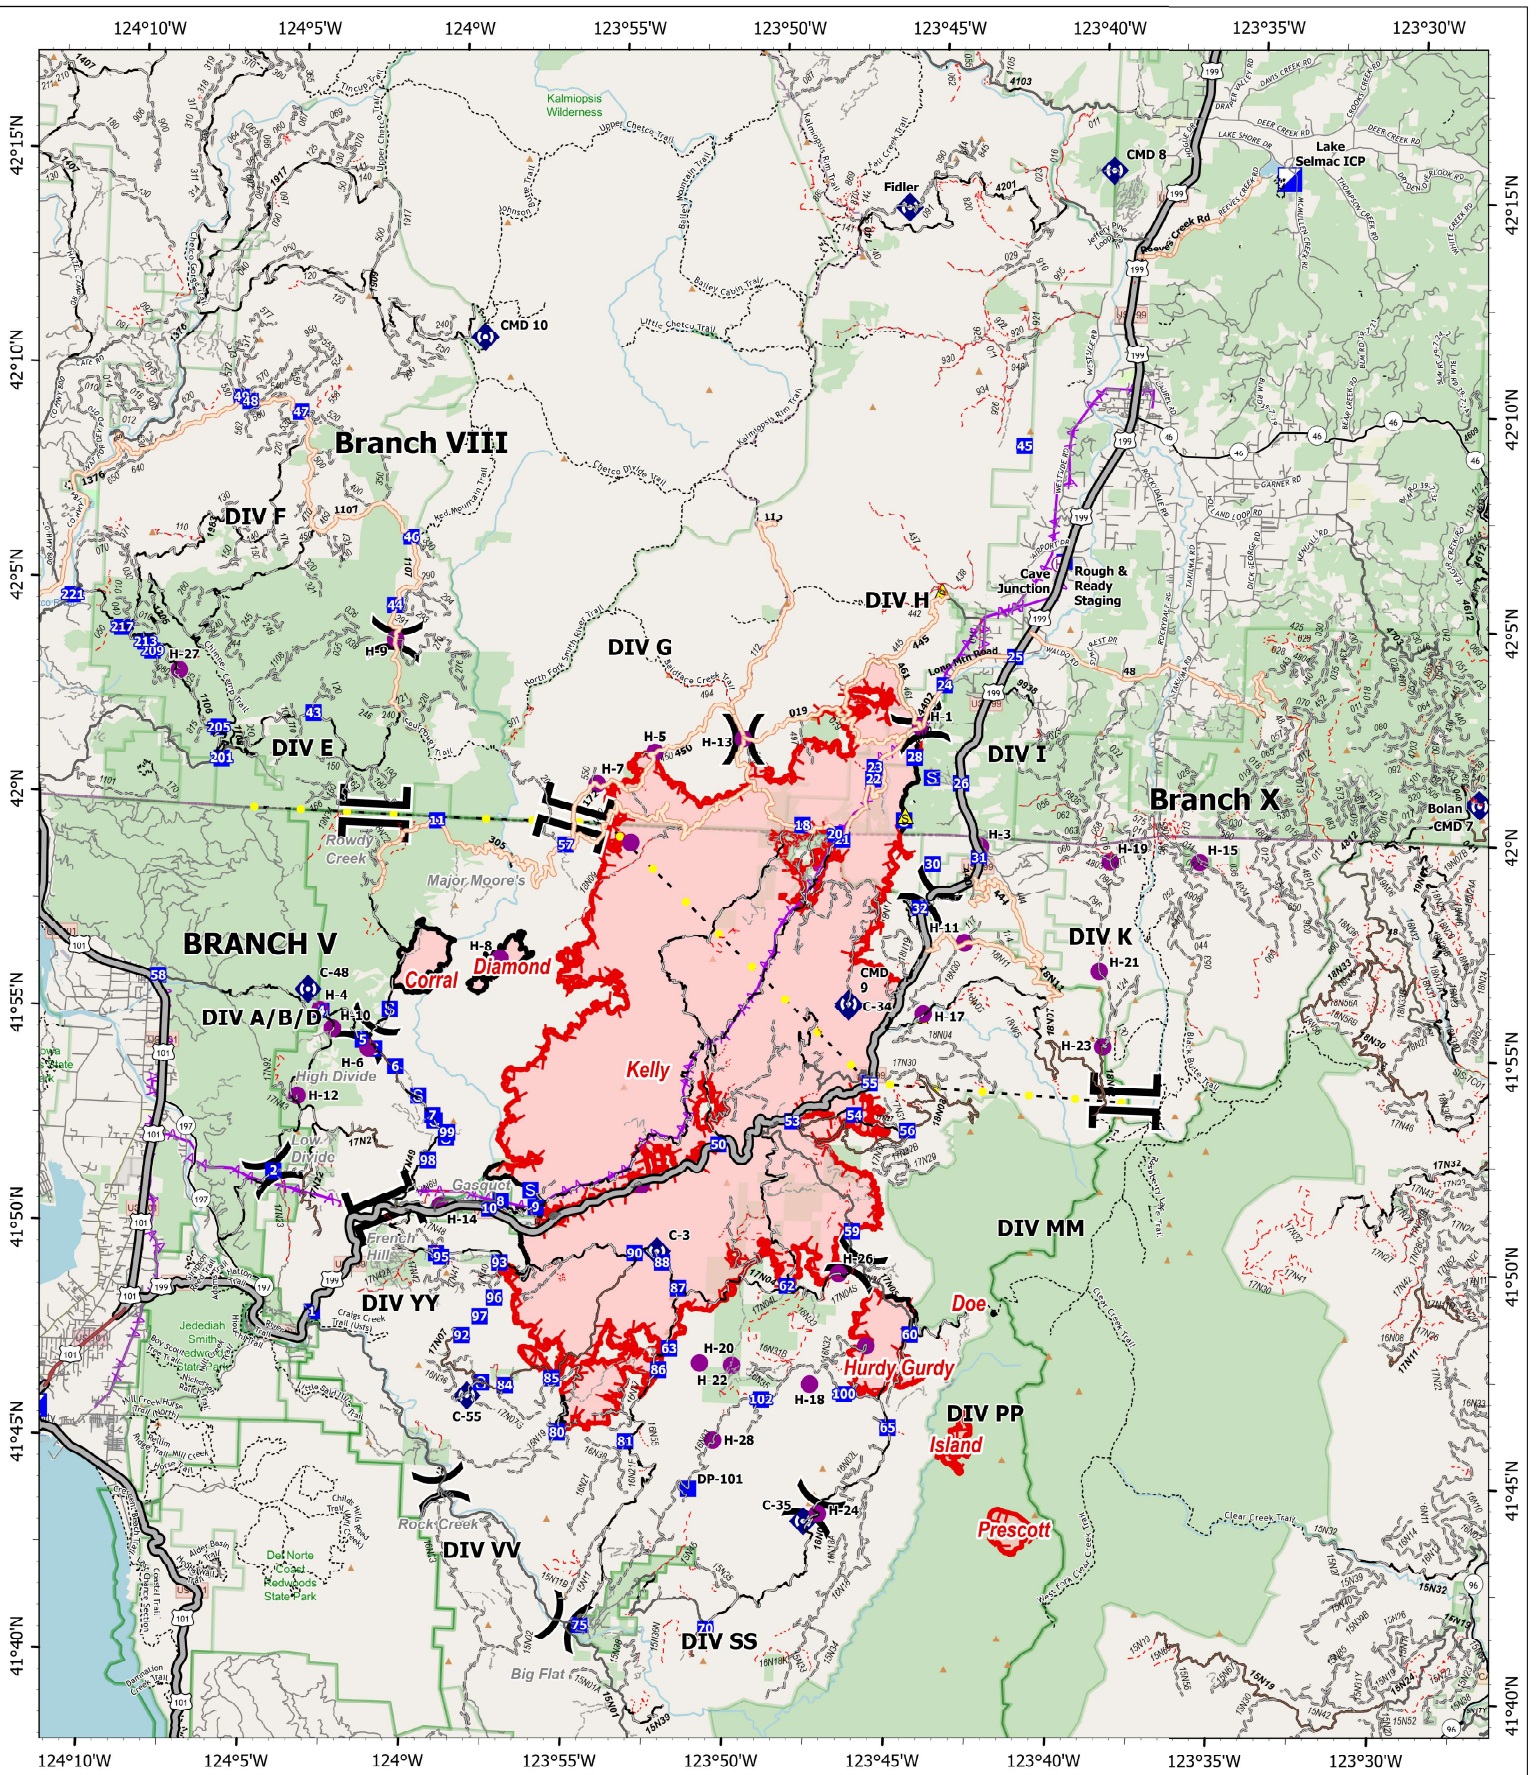

- Snag and hazard tree removal: complete felling of all snags and fire damaged trees that have been identified as a safety concern or have the potential to cause spotting outside the control lines.
- Mop up a minimum of 200 ft or 1 tree length along the perimeter with the following exceptions;
  - Some areas may require additional mop up commensurate with the risk of possible escape (i.e. dirty-burn areas). Verify mop up of perimeter with the use of IR equipment in those areas of heavy fuel concentrations.
  - Structures - 300 ft
  - Dirty burn areas – 300 ft
  - Unburned areas within fire perimeter (i.e. islands, drainages, etc) – 300 ft.
- Fire must be secured from rolling material or falling trees/snags crossing the fire lines.
- Avoid creating erosion when using water to mop up.
- Mop up all spot fires outside the main fire perimeter 100%.
- Knock down and scatter all dozer berms during mop up operations.

## Top 5 Natural Resource Take-Homes from the Smith River Complex North

- 1) **WE ARE WITHIN THE RANGE OF PORT-ORFORD CEDAR AND ROOT-ROT, WHICH IS WHY WE BLEACH OUR WATER WITH A 1% SOLUTION (BLEACH KILLS THE ROOT-ROT SPORES).**
- 2) Control efforts and economic losses stemming from noxious weeds are extremely costly – upwards of \$125 million, in Oregon alone. In the Illinois Valley, we have a noxious weed, Alyssum (*Alyssum corsicum* and *Alyssum murale*), that is the only infestation known in North America. Noxious weed seeds can remain viable for 1 – 80 years, depending on species; Alyssum seeds can remain viable for 10-20 years. The best thing we can do is to prevent the spread; use the weed wash whenever possible, check your clothing for seeds, and ensure no plant parts/seeds make the journey home with you.
- 3) Avoid drafting from smaller streams – if you need to dam up a source, ensure at least 50% of the outflow remains, and pull the fine gravel (which salmonids use for spawning) to the side so that it can be easily re-integrated into the pool. And make sure your absorbent pads are changed when they become 50% saturated.
- 4) **Serpentine soils account for a high number of native endemic plants in this area, including the California pitcher plant (*Darlingtonia californica*), a carnivorous species that is found fens, or areas with constant flow of shallow water.**
- 5) You'd be surprised how long trash persists; a Ziplock bag takes ~ 1,000 years to decompose! Thanks for keeping our yard clean!!

**Final fun fact; one-half inch of rain over the 83K acres that the Smith River Complex fire encompasses equates to roughly 1,150,769,228 gallons of water over the area PER event.**

# MEDICAL PLAN (ICS 206 WF)

7.Prepared By (Medical Unit Leader)	8.Date/Time	9.Approved By (Safety Officer)	10.Date/Time
Meredith Lund MEDL <i>Meredith Lund</i>	9/10/2023 1800	Dean Whitney <i>Dean Whitney</i>	9/10/2023 1800

## Special Medical Emergency Procedures:

### Special Medical Emergency Procedures:

**Green-** Contact local/incident Medics for assistance. Medics will follow up with ICP MEDL by the end of shift.

**Yellow/Red-** Immediately contact local/incident medics for assistance and contact North Communications on Command using the Medical Incident Report (MIR) on the back of the IAP. Additional resources such as High Angle Rescue and Short Haul, if needed, will be facilitated by MEDL. A contingency plan for extraction should be in place in the event that above resources are unavailable.

**ICP/In Camp-** Contact Communications on Command or by phone.

Communications for Medical Emergencies 971-245-0255

The CDC recommends that you wash your hands to remove germs and keep yourself healthy on the line.

### Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

Use the following items to communicate situation to communications/dispatch.

**1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)**

*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*

**2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.**

*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location &amp; Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

**3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)**

Patient Assessment: See IRPG page 106

Treatment:

**4. TRANSPORT PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

*Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication*

**6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable**

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

**7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.**

**8. ADDITIONAL INFORMATION: Updates/Changes, etc.**

**REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.**
