

## INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b> Smith River Complex North	<b>2. Operational Period:</b> Date From: 09/12/23    Date To: 09/13/23 Time From: 0700    Time To: 0700															
<b>3. Objective(s):</b> Provide for the safety of firefighters and the public through the utilization of strategic and deliberate risk processes.  Develop strategic plans to protect businesses, homes, property, and critical infrastructure in and around the communities of the Illinois Valley including Cave Junction, O'Brien, Takilma, Sunstar, the Highway 101 and 199 corridors, and identified values within the planning area.  Protect and minimize impacts to cultural sites, Kalmiopsis and Siskiyou wilderness values, critical habitat, and the Smith River Wild and Scenic Corridor. Engage resource advisors to effectively protect natural resource values and minimize impacts of suppression efforts.  Engage in transparent communication and enhance relationships with agency partners, cooperators, stakeholders, and the public through timely and accurate information exchange. Ensure long-term strategies are communicated.  Provide initial attack support for new starts within the incident TFR or as requested through Oregon Department of Forestry, Rogue Siskiyou and Six Rivers National Forests. Coordinate responses with the local units.  Accurately track incident costs and ensure cost sharing measures are identified, applied, and documented for all fires within the Smith River Complex.  Provide an atmosphere free of discrimination, harassment, and other forms of inappropriate behavior.																
<b>4. Operational Period Command Emphasis:</b> As conditions change and fire behavior increases, fire personnel need to identify the trigger points that would result in changes to the original plan. Communicate those changes to the appropriate operational resources and support personnel.																
General Situational Awareness Smoke impacts from our fire and other large fires in the vicinity may impact our planned operations and aviation support. Accountability of personnel after a disengagement from the primary plan is the highest priority. Re-evaluate LCES before taking new action.																
<b>5. Site Safety Plan Required?</b> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> <b>Approved Site Safety Plan(s) Located at:</b>																
<b>6. Incident Action Plan</b> (the items checked below are included in this Incident Action Plan): <table style="width: 100%; border: none;"> <tr> <td style="width: 33%;"><input checked="" type="checkbox"/> ICS 203</td> <td style="width: 33%;"><input type="checkbox"/> ICS 207</td> <td style="width: 34%;"><u>Other Attachments:</u></td> </tr> <tr> <td><input checked="" type="checkbox"/> ICS 204</td> <td><input type="checkbox"/> ICS 208</td> <td><input checked="" type="checkbox"/> Fire Behavior Forecast</td> </tr> <tr> <td><input checked="" type="checkbox"/> ICS 205</td> <td><input checked="" type="checkbox"/> Map/Chart</td> <td><input type="checkbox"/> _____</td> </tr> <tr> <td><input type="checkbox"/> ICS 205A</td> <td><input checked="" type="checkbox"/> Weather Forecast</td> <td><input type="checkbox"/> _____</td> </tr> <tr> <td><input checked="" type="checkbox"/> ICS 206</td> <td></td> <td><input type="checkbox"/> _____</td> </tr> </table>		<input checked="" type="checkbox"/> ICS 203	<input type="checkbox"/> ICS 207	<u>Other Attachments:</u>	<input checked="" type="checkbox"/> ICS 204	<input type="checkbox"/> ICS 208	<input checked="" type="checkbox"/> Fire Behavior Forecast	<input checked="" type="checkbox"/> ICS 205	<input checked="" type="checkbox"/> Map/Chart	<input type="checkbox"/> _____	<input type="checkbox"/> ICS 205A	<input checked="" type="checkbox"/> Weather Forecast	<input type="checkbox"/> _____	<input checked="" type="checkbox"/> ICS 206		<input type="checkbox"/> _____

# Fire Weather Forecast

**FORECAST NO: 21**  
**PREDICTION FOR: Tuesday-Wednesday**  
**DATE: September 12, 2023**  
**FORECAST ISSUED: 1900 September 11, 2023**

**FIRE: Smith River Complex North**  
**UNIT: CA-SRF-968**  
**IMET (T): William Iwasko (240-778-5301)**  
**SIGNED: *William Iwasko***

**WEATHER DISCUSSION: Valley elevations = 1400 ft (Illinois Valley), Ridgetop elevations = 3300 ft (Monkey Ridge)**

Today will see a slight uptick in temperatures especially on the ridge tops with temperatures peaking in the upper 60s to lower 70s while valley locations will see very similar temperatures to yesterday. These slightly warmer temperatures along with a drying airmass will result in RH values generally 3%-6% lower than what was experienced yesterday. Similar to the past few days typical diurnal winds will dominate in the morning and early afternoon with northwesterly winds expected in the afternoon and early evening. Unlike the past few nights though winds will become northeasterly overnight and accelerate especially along the ridgetops where gusts to 22 mph will be possible especially from Div. G to Div. K and points southwest. These stronger winds will also occur within relatively poor overnight RH recoveries especially when compared to the past few nights.

**TODAY:**

**WEATHER:** Sunny.  
**MAX TEMP:** Valleys: 81-86°F (Little Change )      **MIN RH:** Valleys: 20-25% (3-6 ↓)  
Ridgetops: 67-72°F (1-3 ↑)      **Ridgetops:** 35-41% (3-6 ↓)  
**CHC WTG RAIN:** 0%      **LAL:** 1      **SFC VIS:** 6+ miles.

**WINDS:** Valleys: Morning: downslope 2-4 mph. After 1200: Northwest 6-9 mph gusts to 15 mph.  
**(20 feet)** Ridgetops: Morning: East 5-8 mph gusts to 12 mph. After 1200: Northwest 7-10 mph gusts to 17 mph.

**MIXING HEIGHT:** Rising to 5,500 ft by 1300.      **TRANSPORT WIND:** Northwest around 10 mph.

**TONIGHT:**

**WEATHER:** Clear.  
**MIN TEMP:** Valleys: 42-47° (Little Change)      **MAX RH:** Valleys: 90-100% (Little Change)  
Ridgetops: 50-55° (1-3 ↑)      **Ridgetops:** 60-70% (5-10 ↓)  
**CHC WTG RAIN:** 0%      **LAL:** 1      **SFC VIS:** 6+ miles.

**WINDS:** Valleys: Northeast 3-5 mph.  
**(20 FEET)** Ridgetops: Northeast 8-13 mph gusts to 22 mph.

**MIXING HEIGHT:** Dropping to 500 ft by 2200.

**WEDNESDAY:**

**WEATHER:** Sunny.  
**MAX TEMP:** Valleys: 84-89°F (2-4 ↑)      **MIN RH:** Valleys: 17-22% (2-5 ↓)  
Ridgetops: 69-74°F (2-4 ↑)      **Ridgetops:** 29-35% (2-5 ↓)  
**CHC WTG RAIN:** 0%      **LAL:** 1      **SFC VIS:** 6+ miles.

**WINDS:** Valleys: Northeast 8-11 mph gusts to 17 mph.  
**(20 feet)** Ridgetops: Northeast 10-15 mph gusts to 22 mph.

**MIXING HEIGHT:** Rising to 5,000 ft by 1300.      **TRANSPORT WIND:** Northeast around 15 mph.

**EXTENDED OUTLOOK:** Temperatures are expected to warm significantly by the end of the week with readings 5 to 10 degrees above normal by Friday with very low RH values day and night.

### Fire Behavior Forecast #23

<b>Incident:</b> Smith River Cx North CA-SRF-000968	<b>TYPE OF FIRE:</b> Wildfire
<b>DATE/TIME ISSUED:</b> September 11, 2023 1900	<b>OPERATIONAL PERIOD:</b> September 12, 2023
<b>FBAN:</b> Tobin Kelley	<b>Signed:</b> /s/ Tobin Kelley

**Weather Summary** - See Incident Weather Forecast: Similar conditions to yesterday.

#### Fuels

**Shrub:** Shrubs and brush 1 to 3 feet high with a low load of grass intermixed with sparse conifer. Manzanita brush and other live fuels are moderately available for consumption with independent fire. Low rates-of-spread are expected in this fuel type without strong winds to drive the fire.

**Timber litter and shrub:** Primary carrier of the fire is understory brush with timber and leaf litter. Expect slow rates of spread under moderate weather conditions. Canopy closure shelters fuels from wind, making fire spread slow with low to moderate winds.

Fire Behavior: Minimal to moderate surface fire, occasional torching  Atmosphere: Partially Stable Max. spot distance: 0.25 mile Wild Rivers ERC%: 76 <sup>th</sup> percentile (down 3 points) BI: 75 <sup>th</sup> percentile down 2 points	<b>Fuel/Type Model</b>	<b>Maximum Rate of Spread</b>	<b>Maximum Flame Length</b>
	Shrub	3 feet/minute	4 ft.
	Timber litter shrub	3 feet/minute	3-5 ft.

Expected Fire Behavior is Based on the Warmest, Driest, Windiest Conditions Forecasted.

**General/Potential:** Expect creeping, surface fire and occasional tree torching in heavier canopies. Exposed fuels along ridgetops tend to be drier and will sustain fire when available. ERC and BI remain below average. Ridgetops will begin to see the start of the warming trend today. Relative humidity will drop and expect this will serve to increase fire activity. Change in Winds to Northwest after 1200.

**Golf:** Fire has been moderate intensity and expected to become more active with the NW winds. Northwest winds are expected to push directly into this bowl and increase fire activity earlier than has been seen in the past.

**Hotel:** Fuels will continue to dry and aid in fire activity, expect to see additional activity in timber stands which are dry enough to support moderate to active fire. Conditions should remain favorable for firing operations in the division. Northwest winds will be advantageous for firing operations along this division.

**India:** Little activity beyond smoldering and creeping expected. Potential remains for unburned islands of fuel to carry surface fire as warming and drying continues. A change in wind direction may work under timber stands differently and may bring up hot spots not seen recently.

**Kilo:** Expect smoldering and creeping fire activity. A change in wind direction may work under timber stands differently and may bring up hot spots not seen recently.

**Night Operations:** Relative humidity is expected to be about 10-15% higher which is expected to diminish fire activity sooner than the last few nights. Northeast winds gusting to 22 mph along the ridges may offset this change in RH.

#### Air Operations:

Airshed should be cleaner than yesterday for good flying conditions.

**Safety:** Gusty winds from different directions may affect fire activity and direction from previous days.

# 5 WAYS

## To Support Someone Who Might be Struggling

### Let others know you are open to talking about mental health

Our everyday words and actions communicate our attitudes about mental health. Be aware of the messages you might be sending to others. Normalize that mental health is part of our overall health. If you feel comfortable doing so, sharing your own experiences getting through hard times can send a strong message to others that you are a safe person to talk to.

*“Mental health is just as important as physical health.”*

*“I went through a rough time last year. I talked to a counselor, and it really helped.”*

### Start a Conversation

Sometimes it is hard to know what to say to someone we think might be struggling, so we just don't say anything at all. Talking about mental health is the first step to supporting others and helping someone get connected with resources that might help. Start by letting them know you care and that you've noticed a change. Ask questions to better understand.

*“Hey, I've noticed you haven't been joking around with us like you normally do, and yesterday you seemed pretty upset. I care about you and have been wondering how you're doing.”*

### Really Listen

Give your full attention to the person speaking. Ask questions to better understand the person's experience, and offer non-judgmental support. We often become distracted by the urge to share our own thoughts or offer solutions. We usually can't fix what's happening for the other person, but we can offer care and encouragement.

*“What you're going through sounds really hard. I'm glad you told me.”*

### Be Prepared to Talk About Difficult Topics, Including Suicide

If you are worried that someone is considering suicide, ask them directly. If someone shares they are having thoughts of suicide, let them know it's a signal that it's time to speak to a mental health professional, and let them know that help is available. If a person is at immediate risk of harming themselves or someone else, stay with them, call 911, or take them to the nearest emergency room. Never promise to keep thoughts of suicide a secret.

*“I know you're going through a lot right now and that things are really hard. I really think talking to someone to help you get through all of this could make a big difference.”*

### Help Make Connections

Taking the first steps to seek mental health or substance use care can be difficult. Offer to help find a provider or make connections with someone else who can help.

*“If you're comfortable, I can help you find a counselor. We can do it together.”*

If you are experiencing thoughts of suicide or are in distress, dial or text 988 for free, confidential support available 24/7.

**LIFELINE**

# Smith River Complex Demob Process

## **As your Demob day approaches:**

- Pay attention to the IAP Demob Schedule.
- Alert DMOB if there are issues. We can only fix things we know about.
- **PHONE: 541-414-6539; Email: [2023.smithrivercomplex.demob@firenet.gov](mailto:2023.smithrivercomplex.demob@firenet.gov)**
- NO CELL COVERAGE: See your Division Supervisor
  
- **Contact FINANCE 48 hours prior** to give them a heads-up you are departing.
- **Finance Phone: Equipment: 971-713-1521      Personnel: 206-376-7448**
- **Email: [2023.smithrivercomplex.finance@firenet.gov](mailto:2023.smithrivercomplex.finance@firenet.gov)** Turn in any outstanding or travel CTRs/Shift Tickets. Make sure they're SIGNED.
- **Confirm no missing financial documentation. See Finance Page for full information.**

## **Need COMMERCIAL AIR TRAVEL to get home?**

To schedule a flight home **you** need to complete the Commercial Air Travel Request form **72-hours ahead** of your last work day. The data is needed to purchase your flight and email you the itinerary prior to your demob date.

Link to Form: <https://forms.office.com/g/g2B3uHCxVp>

QR code for Form

Rogue Valley Expanded Dispatch will email the itinerary to the email address you enter into the form. Make sure it is an address you can access on this assignment.

Contact DMOB if Ground Support is needed to get to the airport. **541-414-6539.**

## **!!! We are using a virtual check-out process for demob. !!!**

### **On your Day of Demob:**

#### **STEP 1:**

- Return supplies to the Cache
- Return radios, antennas, etc., to Communications
- Contact Finance about closing out your paperwork
- If required, have all of your line-going vehicles (including UTVs) inspected by Ground Support for a release safety inspection
- If required, take your vehicle through weed wash

#### **STEP 2:**

Once the above items have been completed, SCAN the DMOB QR code and complete the questions.

Call Demob at 541-414-6539 to confirm the information has been received

North DEMOB

South DEMOB

# Mop-Up Standards, Waterbar guidelines, and the Top 5 Natural Resources Take-homes from Smith River Complex Fire

In addition to the upcoming task of constructing waterbars during Suppression Repair, as well as the current Mop-Up standards, here are the top 5 messaging points and/ or tidbits of info that we have shared that will prove useful whenever you are fighting fire in the Illinois Valley. Thank you for your most excellent work here and safe travels as you time out and return to your home units!

Constructing EFFECTIVE waterbars on firelines includes attention following the 5-D's; Distance, Divert, Diagonal, Discharge, and Dissipate. The purpose of waterbars is to slow water down as it travels downhill. When constructed correctly, waterbars help reduce excessive erosion and mitigate sediment transfer to streams and rivers.

<b>Fireline Slope</b>	<b>Maximum Spacing</b>
1-6%	300 ft.
7-9%	200 ft.
10-14%	150 ft.
15-20%	90 ft.
21-40%	50 ft.
41-60+%	25 ft.

Figure 1. *The Five-D System for Effective Fireline Waterbars.* Furniss (undated) PNW

## Mop-Up Standards for BLM- and USFS-Managed Lands

The following are the mop up standards for BLM- and USFS-managed lands. The intent of mop up is to make the likelihood of the fire escaping the containment perimeter very unlikely through the rest of the fire season or onset of significant rains. Mop up will be implemented to the degree and location necessary to meet the stated intent.

- The BLM's and USFS's approach to mop up, in order to minimize unnecessary exposure to firefighters, is not to specify a distance or percentage "standard." There may be parts of the fire that are too dangerous for any mop up (e.g., snag patches, extremely steep/rocky terrain).
- To reduce hazards during mop up, fall snags that pose "imminent" danger to firefighters (ref **Field Guide for Danger Tree Identification and Response**, RG-NR-FP-PR-01-08).
- Spot fires outside the control lines will be mopped up commensurate with exposure and values. The perimeter of spots will be mapped in GIS.
- Mop up of partially burned areas further inside the lines will be the exception and determined on a case-by-case basis by the Resource Advisor, Safety Officer, and Operations depending on the specific values at risk.
- As mop up specifications are met on a Division, Operations will work with the Resource Advisors to develop a plan for the resources and equipment to be left in place that may be required for future contingency actions.

## Mop-up Standards for State and Private Lands

The following are the mop up standards for Smith River Complex North **on State and private lands**. At no time shall firefighter safety be compromised to meet these standards. All hazards associated with these standards will be mitigated based on experience and deference to firefighter expertise prior to implementation.

- Mop up to the degree necessary to make the likelihood of escape very low, with mop up based on experience, terrain, fuel types, and fuel conditions, and current/predicted weather conditions. Engage in dialogue with your supervisor in order to determine the appropriate distance.

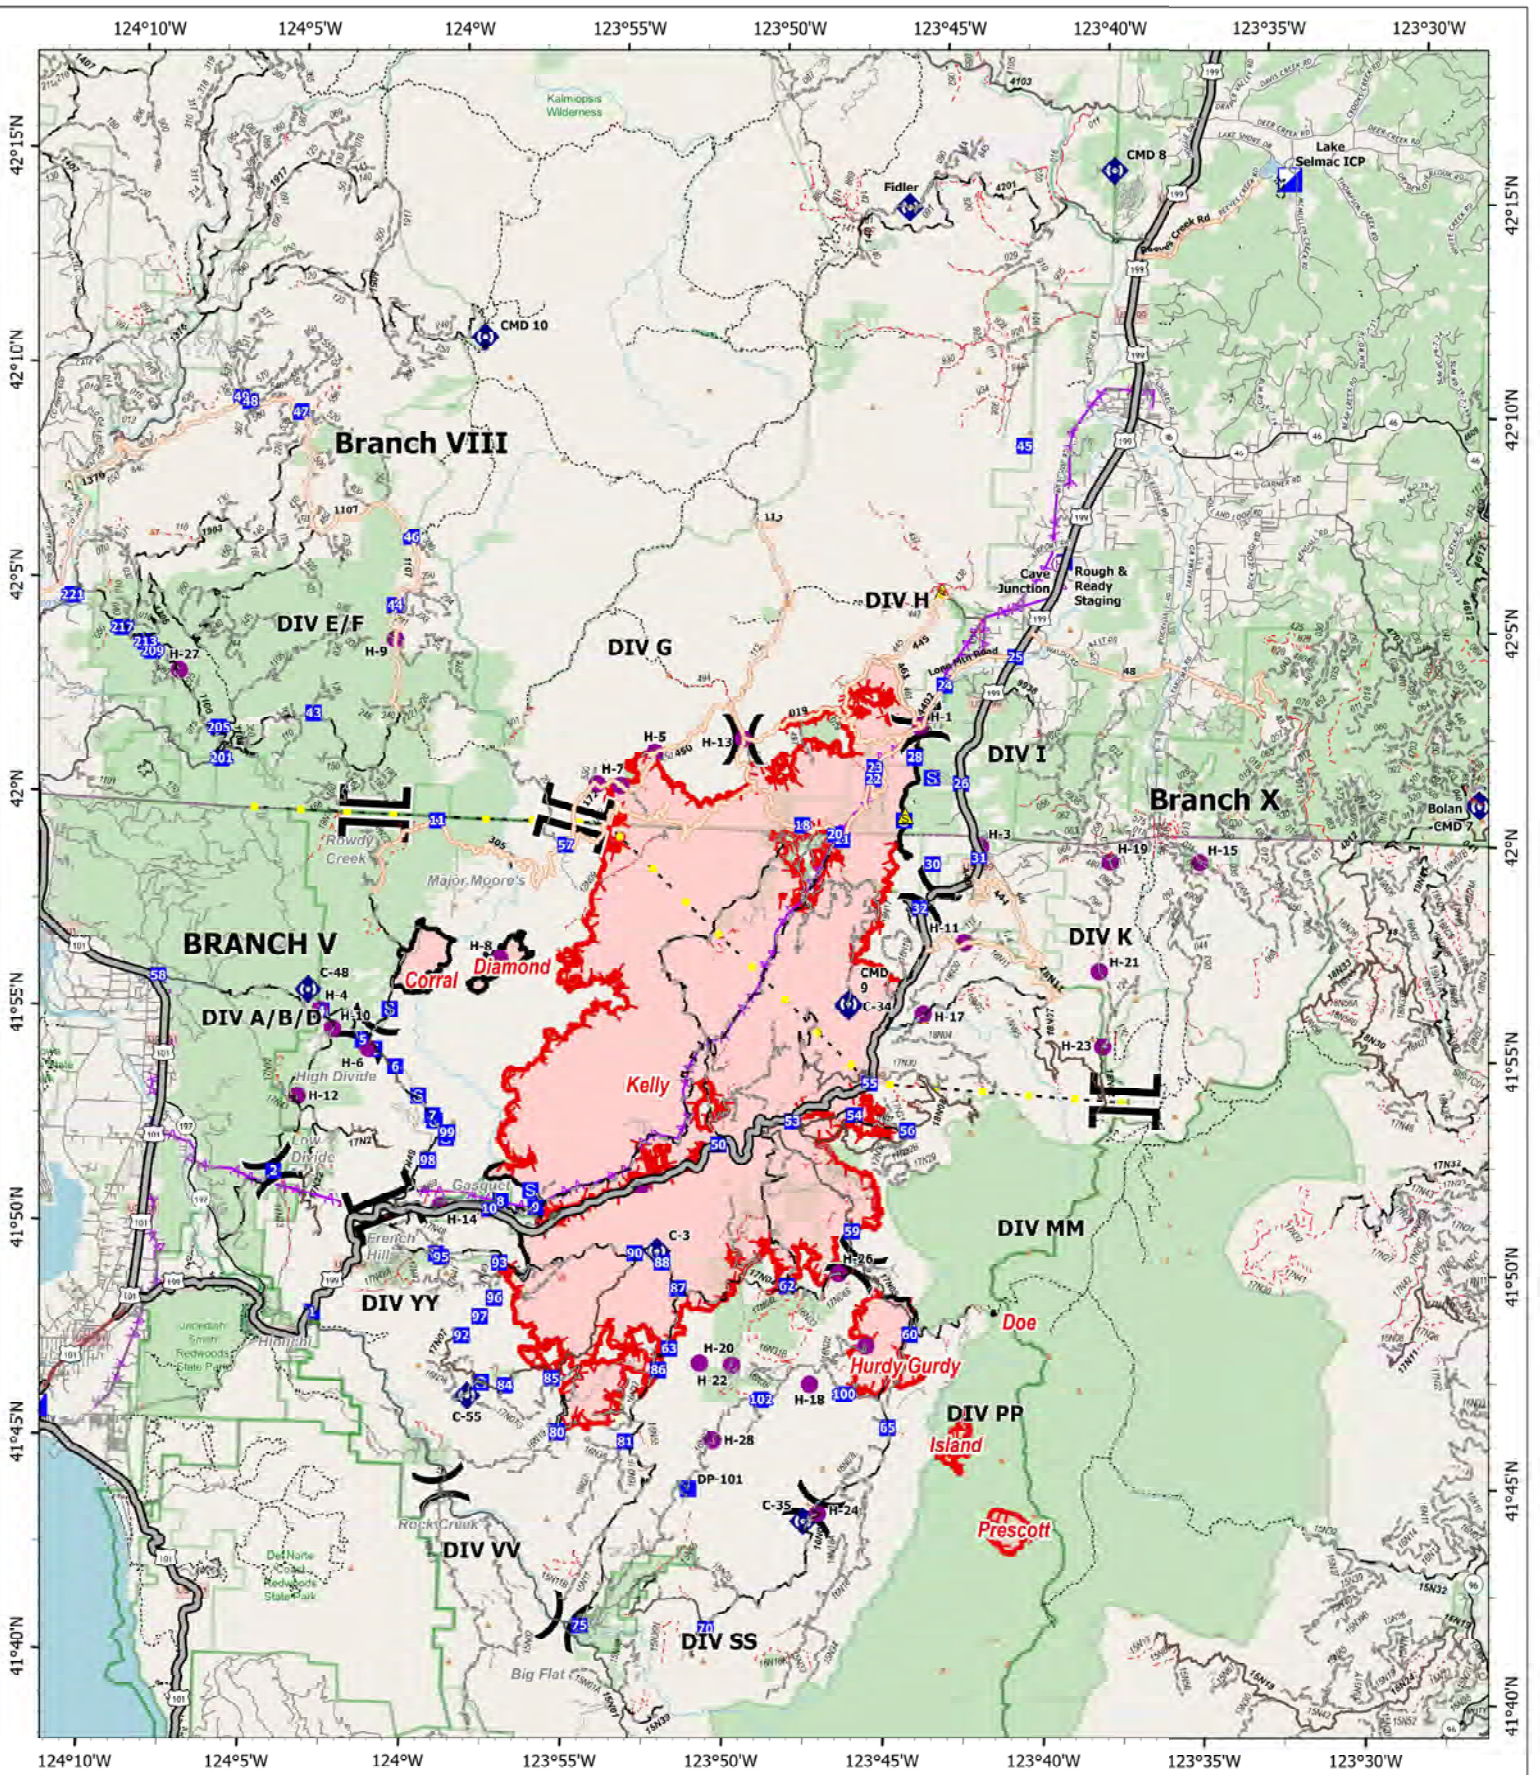

- Snag and hazard tree removal: complete felling of all snags and fire damaged trees that have been identified as a safety concern or have the potential to cause spotting outside the control lines.
- Mop up a minimum of 200 ft or 1 tree length along the perimeter with the following exceptions;
  - Some areas may require additional mop up commensurate with the risk of possible escape (i.e. dirty-burn areas). Verify mop up of perimeter with the use of IR equipment in those areas of heavy fuel concentrations.
  - Structures - 300 ft
  - Dirty burn areas – 300 ft
  - Unburned areas within fire perimeter (i.e. islands, drainages, etc) – 300 ft.
- Fire must be secured from rolling material or falling trees/snags crossing the fire lines.
- Avoid creating erosion when using water to mop up.
- Mop up all spot fires outside the main fire perimeter 100%.
- Knock down and scatter all dozer berms during mop up operations.

## Top 5 Natural Resource Take-Homes from the Smith River Complex North

- 1) **WE ARE WITHIN THE RANGE OF PORT-ORFORD CEDAR AND ROOT-ROT, WHICH IS WHY WE BLEACH OUR WATER WITH A 1% SOLUTION (BLEACH KILLS THE ROOT-ROT SPORES).**
- 2) Control efforts and economic losses stemming from noxious weeds are extremely costly – upwards of \$125 million, in Oregon alone. In the Illinois Valley, we have a noxious weed, Alyssum (*Alyssum corsicum* and *Alyssum murale*), that is the only infestation known in North America. Noxious weed seeds can remain viable for 1 – 80 years, depending on species; Alyssum seeds can remain viable for 10-20 years. The best thing we can do is to prevent the spread; use the weed wash whenever possible, check your clothing for seeds, and ensure no plant parts/seeds make the journey home with you.
- 3) Avoid drafting from smaller streams – if you need to dam up a source, ensure at least 50% of the outflow remains, and pull the fine gravel (which salmonids use for spawning) to the side so that it can be easily re-integrated into the pool. And make sure your absorbent pads are changed when they become 50% saturated.
- 4) **Serpentine soils account for a high number of native endemic plants in this area, including the California pitcher plant (*Darlingtonia californica*), a carnivorous species that is found fens, or areas with constant flow of shallow water.**
- 5) You'd be surprised how long trash persists; a Ziplock bag takes ~ 1,000 years to decompose! Thanks for keeping our yard clean!!

**Final fun fact; one-half inch of rain over the 83K acres that the Smith River Complex fire encompasses equates to roughly 1,150,769,228 gallons of water over the area PER event.**

# MEDICAL PLAN (ICS 206 WF)

7.Prepared By (Medical Unit Leader)	8.Date/Time	9.Approved By (Safety Officer)	10.Date/Time
Meredith Lund MEDL <i>Meredith Lund</i>	9/11/2023 1800	Dean Whitney <i>Dean Whitney</i>	9/11/2023 1800

## Special Medical Emergency Procedures:

### Special Medical Emergency Procedures:

**Green-** Contact local/incident Medics for assistance. Medics will follow up with ICP MEDL by the end of shift.

**Yellow/Red-** Immediately contact local/incident medics for assistance and contact North Communications on Command using the Medical Incident Report (MIR) on the back of the IAP. Additional resources such as High Angle Rescue and Short Haul, if needed, will be facilitated by MEDL. A contingency plan for extraction should be in place in the event that above resources are unavailable.

**ICP/In Camp-** Contact Communications on Command or by phone.

Communications for Medical Emergencies 971-245-0255

**The CDC recommends that you wash your hands to remove germs and keep yourself healthy on the line.**

### Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

Use the following items to communicate situation to communications/dispatch.

**1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)**

*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*

**2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.**

*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location &amp; Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

**3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)**

Patient Assessment: See IRPG page 106

Treatment:

**4. TRANSPORT PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

*Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication*

**6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable**

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

**7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.**

**8. ADDITIONAL INFORMATION: Updates/Changes, etc.**

**REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.**
