

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Smith River Complex North	2. Operational Period: Date From: 09/13/23 Date To: 09/14/23 Time From: 0700 Time To: 0700															
3. Objective(s): Provide for the safety of firefighters and the public through the utilization of strategic and deliberate risk processes. Develop strategic plans to protect businesses, homes, property, and critical infrastructure in and around the communities of the Illinois Valley including Cave Junction, O'Brien, Takilma, Sunstar, the Highway 101 and 199 corridors, and identified values within the planning area. Protect and minimize impacts to cultural sites, Kalmiopsis and Siskiyou wilderness values, critical habitat, and the Smith River Wild and Scenic Corridor. Engage resource advisors to effectively protect natural resource values and minimize impacts of suppression efforts. Engage in transparent communication and enhance relationships with agency partners, cooperators, stakeholders, and the public through timely and accurate information exchange. Ensure long-term strategies are communicated. Provide initial attack support for new starts within the incident TFR or as requested through Oregon Department of Forestry, Rogue Siskiyou and Six Rivers National Forests. Coordinate responses with the local units. Accurately track incident costs and ensure cost sharing measures are identified, applied, and documented for all fires within the Smith River Complex. Provide an atmosphere free of discrimination, harassment, and other forms of inappropriate behavior.																
4. Operational Period Command Emphasis: Red flag conditions are forecasted for this shift. Continue to promote an increased awareness of the changing weather conditions and potential impacts to specific sections of the incident. Ensure effort is focused on re-enforcing lines and securing perimeter to withstand the predicted warmer, drier, and gustier conditions.																
General Situational Awareness We have experienced several days with moderate weather conditions. This can lead to complacency. With weather changes in the forecast and the possibility of an increase in fire behavior, this is not the time to go on autopilot. Keep your head in the game and maintain your situational awareness.																
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Approved Site Safety Plan(s) Located at:																
6. Incident Action Plan (the items checked below are included in this Incident Action Plan): <table style="width: 100%; border: none;"> <tr> <td style="width: 33%;"><input checked="" type="checkbox"/> ICS 203</td> <td style="width: 33%;"><input type="checkbox"/> ICS 207</td> <td style="width: 34%;"><u>Other Attachments:</u></td> </tr> <tr> <td><input checked="" type="checkbox"/> ICS 204</td> <td><input type="checkbox"/> ICS 208</td> <td><input checked="" type="checkbox"/> Fire Behavior Forecast</td> </tr> <tr> <td><input checked="" type="checkbox"/> ICS 205</td> <td><input checked="" type="checkbox"/> Map/Chart</td> <td><input type="checkbox"/> _____</td> </tr> <tr> <td><input type="checkbox"/> ICS 205A</td> <td><input checked="" type="checkbox"/> Weather Forecast</td> <td><input type="checkbox"/> _____</td> </tr> <tr> <td><input checked="" type="checkbox"/> ICS 206</td> <td></td> <td><input type="checkbox"/> _____</td> </tr> </table>		<input checked="" type="checkbox"/> ICS 203	<input type="checkbox"/> ICS 207	<u>Other Attachments:</u>	<input checked="" type="checkbox"/> ICS 204	<input type="checkbox"/> ICS 208	<input checked="" type="checkbox"/> Fire Behavior Forecast	<input checked="" type="checkbox"/> ICS 205	<input checked="" type="checkbox"/> Map/Chart	<input type="checkbox"/> _____	<input type="checkbox"/> ICS 205A	<input checked="" type="checkbox"/> Weather Forecast	<input type="checkbox"/> _____	<input checked="" type="checkbox"/> ICS 206		<input type="checkbox"/> _____

Fire Weather Forecast

FORECAST NO: 22
PREDICTION FOR: Wednesday-Thursday
DATE: September 13, 2023
FORECAST ISSUED: 1900 September 12, 2023

FIRE: Smith River Complex North
UNIT: CA-SRF-968
IMET: Phil Manuel (540-239-8961)
SIGNED: *Phil Manuel*

WEATHER DISCUSSION:

RED FLAG WARNING FOR BRANCH VIII
 1700 Wednesday through 0800 Thursday

An east-northeast wind event is expected today and tonight with ridgetop wind gusts of 20 to 30 mph. The stronger winds are favored for areas west of the county line or west of the 112 road, west of H13. For Branch X, east of the 112 road, and into the Illinois Valley, it will not be as breezy, however, it will be very dry with humidity minimums between 15% and 20%. For tonight, and the next several nights, expect poor humidity recovery, favoring burn conditions through the night.

TODAY:

WEATHER: Sunny. Breezy and dry.
MAX TEMP: Valleys: 85-90°F (2-5 ↑) **MIN RH:** Valleys: 18-24% (2-5 ↓)
 Ridgetops: 70-75°F (2-4 ↑) Ridgetops: 25-32% (4-8 ↓)
CHC WTG RAIN: 0% **LAL:** 1 **SFC VIS:** 6+ miles.
WINDS: Valleys: Northeast 8-11 mph gusts 15 to 20.
(20 feet) Ridgetops: Northeast 15-20 mph gusts 25 to 30 mph.

MIXING HEIGHT: Rising to 5,000 ft by 1300. **TRANSPORT WIND:** Northeast around 15 mph.

TONIGHT:

WEATHER: Clear.
MIN TEMP: Valleys: 50-55° (4-8 ↑) **MAX RH:** Valleys: 60-70% (20-30 ↓)
 Ridgetops: 59-65° (4-8 ↑) Ridgetops: 35-45% (20-30 ↓)
CHC WTG RAIN: 0% **LAL:** 1 **SFC VIS:** 6+ miles.
WINDS: Valleys: Northeast 4-8 mph with gusts 10 to 15 mph..
(20 FEET) Ridgetops: Northeast 12-18 mph gusts 22 to 28 mph.

MIXING HEIGHT: No Inversion.

THURSDAY:

WEATHER: Sunny. Hot and dry.
MAX TEMP: Valleys: 92-97°F (2-5 ↑) **MIN RH:** Valleys: 13-17% (2-5 ↓)
 Ridgetops: 78-83°F (2-5 ↑) Ridgetops: 20-30% (2-5 ↓)
CHC WTG RAIN: 0% **LAL:** 1 **SFC VIS:** 6+ miles.
WINDS: Valleys: Northeast 5-10 mph gusts to 15 mph.
(20 feet) Ridgetops: Northeast 4-8 mph gusts to 15 mph.

MIXING HEIGHT: Rising to 6,000 ft by 1300. **TRANSPORT WIND:** Northeast around 15 mph.

EXTENDED OUTLOOK: Hot and dry weather is expected through Saturday with temperatures 5 to 10 degrees above normal coinciding with very low RH values day and night. Winds will diminish, but it will be unstable during the afternoon.

Nearby Weather Observations

Please send weather observations to Phil Manuel (IMET) at phillip.manuel@noaa.gov or 540-239-8961

Fire Behavior Forecast #24

Incident: Smith River Cx North CA-SRF-000968	TYPE OF FIRE: Wildfire
DATE/TIME ISSUED: September 12, 2023 1900	OPERATIONAL PERIOD: September 13, 2023
FBAN: Tobin Kelley	Signed: /s/ Tobin Kelley

Weather Summary - See Incident Weather Forecast: Critical Fire Weather Day/Red Flag Warning

Fuels

Shrub: Shrubs and brush 1 to 3 feet high with a low load of grass intermixed with sparse conifer. Manzanita brush and other live fuels are moderately available for consumption with independent fire. These fuels will be more reactive to higher wind speeds and show greater rates-of-spread.

Timber litter and shrub: Primary carrier of the fire is understory brush with timber and leaf litter. Expect moderate spread rates in sheltered areas. Canopy closure shelters fuels from wind, making fire spread slow with low to moderate winds.

	Fuel/Type Model	Maximum Rate of Spread	Maximum Flame Length
	Shrub	8-14 feet/minute	4-8 ft.
	Timber litter shrub	5-9 feet/minute	3-8 ft.

Expected Fire Behavior is Based on the Warmest, Driest, Windiest Conditions Forecasted.

General/Potential: Critical Fire Weather Day: Weather conditions meet local criteria for low relative humidity, ridge winds and wind gusts. Expect moderate to active fire behavior as hot and dry weather with gusty winds may drive fire activity more than seen in the past week.

E/F: Red Flag Warning for these Divisions starting at 1700. If an initial attack fire occurs expect active fire behavior affected by wind, slope and heavy timber with potential for mid-range spotting from timber stands.

Golf: Area is not aligned with NE winds and should stay sheltered. Expect moderate to active fire behavior.

Hotel: NE winds should be aligned with fire perimeter east of H-13. Winds will be adverse along the line from H-13 south to fire perimeter. Winds will likely be less along this ridge as it descends to the south.

India: Little activity beyond smoldering and creeping expected. Potential remains for unburned islands of fuel to carry surface fire as warming and drying continues. NE winds will tend to push into the black.

Kilo: Expect smoldering and creeping fire activity. A change in wind direction may work under timber stands differently and may bring up hot spots not seen recently. NE winds should be favorable for line location in this division.

Night Operations: Critical fire conditions with low relative humidity and higher winds speeds are expected to keep fire active through the night along Division H and other areas that may see increased fire during the day.

Air Operations:

Winds may pose issues with air operations along ridges.

Safety:

Hotter, drier and windy conditions have the potential to greatly increase fire activity where exposed to winds and aligned with slope. Most of the fire area should be sheltered from higher winds, but should fire move into an area with slope and wind alignment, rapid rates-of-spread are possible. This also applies to any initial attack fires that may occur during this time period.

Lookouts Communications Escape Routes Safety Zones	Incident Smith River Complex North Operation Period: 09/13/2023 Day Shift
	Emphasis on Anticipating Problems

Ask yourself “What Can Go Wrong”

- Identify the critical elements of your plan, and ask “what if” a loss of one of these elements occurs.
- Identify the weak link in the plan. Where do you expect a problem?
- Develop a plan to deal with the problem(s) before they occur.
- Communicate the plan to all of your personnel.
- Validate the new plan to ensure it matches the current situation.

MAJOR HAZARDS AND RISKS

STEEP TERRAIN CHIPPING OPS FATIGUE	ROLLING MATERIAL DEHYDRATION BUCKET DROPS	HEAVY EQUIPMENT HAZARD TREES COMPLACENCY
--	---	--

Be sure all elements of your safety plan are in place prior to engagement

- Communicate – trust and verify
- Stay mindful when accomplishing mundane or repetitive tasks
- Recognize your flaws – use your co-workers to get honest feedback and give it to them
- Get adequate rest, eat well, hydrate adequately
- Keep up on your mental health – talk to your bro’s and sis’s, your family
- Get home safely

Navigating Transitions

Life Transitions

We know that transitions can occur in our professional and personal lives, with one impacting the other. Life transitions may look like added responsibilities at work following a promotion, a baby, illness, marriage, death of a parent, divorce, or retirement. The key to successfully navigating transitions is flexibility and adaptability.

What are the barriers to integrating back to your family, friends, hobbies, and routines after a busy season?

“There are times when I feel “too exhausted” to want to be around people, even loved ones. When I feel that way, I know it’s time to take a chunk of time off and stay away from my work phone and computer. I also know I need a break when all I can talk about is work-related stuff. These are signs that it’s time to let go of work and step away for a while.”

Fire Budget Analyst, 22-year career

Finding Your Balance

Balancing work and life can be difficult. At times, major decisions may need to be made to allow us to find a better balance. For some, it may look like taking a season off to focus on school. For others, it may mean stepping away from a career opportunity to spend more time with family and engage in self-care. For some it might mean stepping away from wildland fire entirely. There is no single “right way” for us each of us to find that balance.

The constant demands of being in wildland fire can put us in a reactive mode. Striving to develop and maintain a well-balanced life can help us navigate life changes more effectively.

Transitions in Wildland Fire

In wildland fire, we tend to think of “transitions” in the context of moving in and out of the fire season. As fall approaches, you may be helping your kids transition from summer vacation to back to school mode or making plans for fall. For many of us, winter and early spring involve preparing for the upcoming fire season such as hiring personnel, pre-season PT, resolving IT and credit card issues, connecting or re-connecting with the crew, putting bills on autopay. Our lives are dynamic and complex, and meeting these demands can take a toll.

What would you tell your younger self?

“Thinking back to when I was a seasonal, I would tell myself that there is always someone to do the work, but if you miss birthdays, family gatherings, and holidays, or lose touch with friends, you can’t get that back. Moving back to work in my hometown made sure I didn’t miss out, and it allowed me to enjoy the transition to something else in the winter. The transition wasn’t ever hard for me.”

Fire Management Officer (FMO), 23-year career

If you are experiencing thoughts of suicide or are in distress, dial or text 988 for free, confidential support available 24/7.

Smith River Complex Demob Process

As your Demob day approaches:

- Pay attention to the IAP Demob Schedule.
- Alert DMOB if there are issues. We can only fix things we know about.
- **PHONE: 541-414-6539; Email: 2023.smithrivercomplex.demob@firenet.gov**
- NO CELL COVERAGE: See your Division Supervisor

- **Contact FINANCE 48 hours prior** to give them a heads-up you are departing.
- **Finance Phone: Equipment: 971-713-1521 Personnel: 206-376-7448**
- **Email: 2023.smithrivercomplex.finance@firenet.gov** Turn in any outstanding or travel CTRs/Shift Tickets. Make sure they're SIGNED.
- **Confirm no missing financial documentation. See Finance Page for full information.**

Need COMMERCIAL AIR TRAVEL to get home?

To schedule a flight home **you** need to complete the Commercial Air Travel Request form **72-hours ahead** of your last work day. The data is needed to purchase your flight and email you the itinerary prior to your demob date.

Link to Form: <https://forms.office.com/g/g2B3uHCxVp>

QR code for Form

Rogue Valley Expanded Dispatch will email the itinerary to the email address you enter into the form. Make sure it is an address you can access on this assignment.

Contact DMOB if Ground Support is needed to get to the airport. **541-414-6539.**

!!! We are using a virtual check-out process for demob. !!!

On your Day of Demob:

STEP 1:

- Return supplies to the Cache
- Return radios, antennas, etc., to Communications
- Contact Finance about closing out your paperwork
- If required, have all of your line-going vehicles (including UTVs) inspected by Ground Support for a release safety inspection
- If required, take your vehicle through weed wash

STEP 2:

Once the above items have been completed, SCAN the DMOB QR code and complete the questions.

Call Demob at 541-414-6539 to confirm the information has been received

To request a remote demob from Smith River South Demob call 208-854-9127

DEMOB HOURS OF OPERATION: 0700-1300 / 1400-2100

Rev 9/13

Mop-Up Standards, Waterbar guidelines, and the Top 5 Natural Resources Take-homes from Smith River Complex Fire

In addition to the upcoming task of constructing waterbars during Suppression Repair, as well as the current Mop-Up standards, here are the top 5 messaging points and/ or tidbits of info that we have shared that will prove useful whenever you are fighting fire in the Illinois Valley. Thank you for your most excellent work here and safe travels as you time out and return to your home units!

Constructing EFFECTIVE waterbars on firelines includes attention following the 5-D's; Distance, Divert, Diagonal, Discharge, and Dissipate. The purpose of waterbars is to slow water down as it travels downhill. When constructed correctly, waterbars help reduce excessive erosion and mitigate sediment transfer to streams and rivers.

Fireline Slope	Maximum Spacing
1-6%	300 ft.
7-9%	200 ft.
10-14%	150 ft.
15-20%	90 ft.
21-40%	50 ft.
41-60+%	25 ft.

Figure 1. *The Five-D System for Effective Fireline Waterbars.* Furniss (undated) PNW

Mop-Up Standards for BLM- and USFS-Managed Lands

The following are the mop up standards for BLM- and USFS-managed lands. The intent of mop up is to make the likelihood of the fire escaping the containment perimeter very unlikely through the rest of the fire season or onset of significant rains. Mop up will be implemented to the degree and location necessary to meet the stated intent.

- The BLM's and USFS's approach to mop up, in order to minimize unnecessary exposure to firefighters, is not to specify a distance or percentage "standard." There may be parts of the fire that are too dangerous for any mop up (e.g., snag patches, extremely steep/rocky terrain).
- To reduce hazards during mop up, fall snags that pose "imminent" danger to firefighters (ref **Field Guide for Danger Tree Identification and Response**, RG-NR-FP-PR-01-08).
- Spot fires outside the control lines will be mopped up commensurate with exposure and values. The perimeter of spots will be mapped in GIS.
- Mop up of partially burned areas further inside the lines will be the exception and determined on a case-by-case basis by the Resource Advisor, Safety Officer, and Operations depending on the specific values at risk.
- As mop up specifications are met on a Division, Operations will work with the Resource Advisors to develop a plan for the resources and equipment to be left in place that may be required for future contingency actions.

Mop-up Standards for State and Private Lands

The following are the mop up standards for Smith River Complex North **on State and private lands**. At no time shall firefighter safety be compromised to meet these standards. All hazards associated with these standards will be mitigated based on experience and deference to firefighter expertise prior to implementation.

- Mop up to the degree necessary to make the likelihood of escape very low, with mop up based on experience, terrain, fuel types, and fuel conditions, and current/predicted weather conditions. Engage in dialogue with your supervisor in order to determine the appropriate distance.

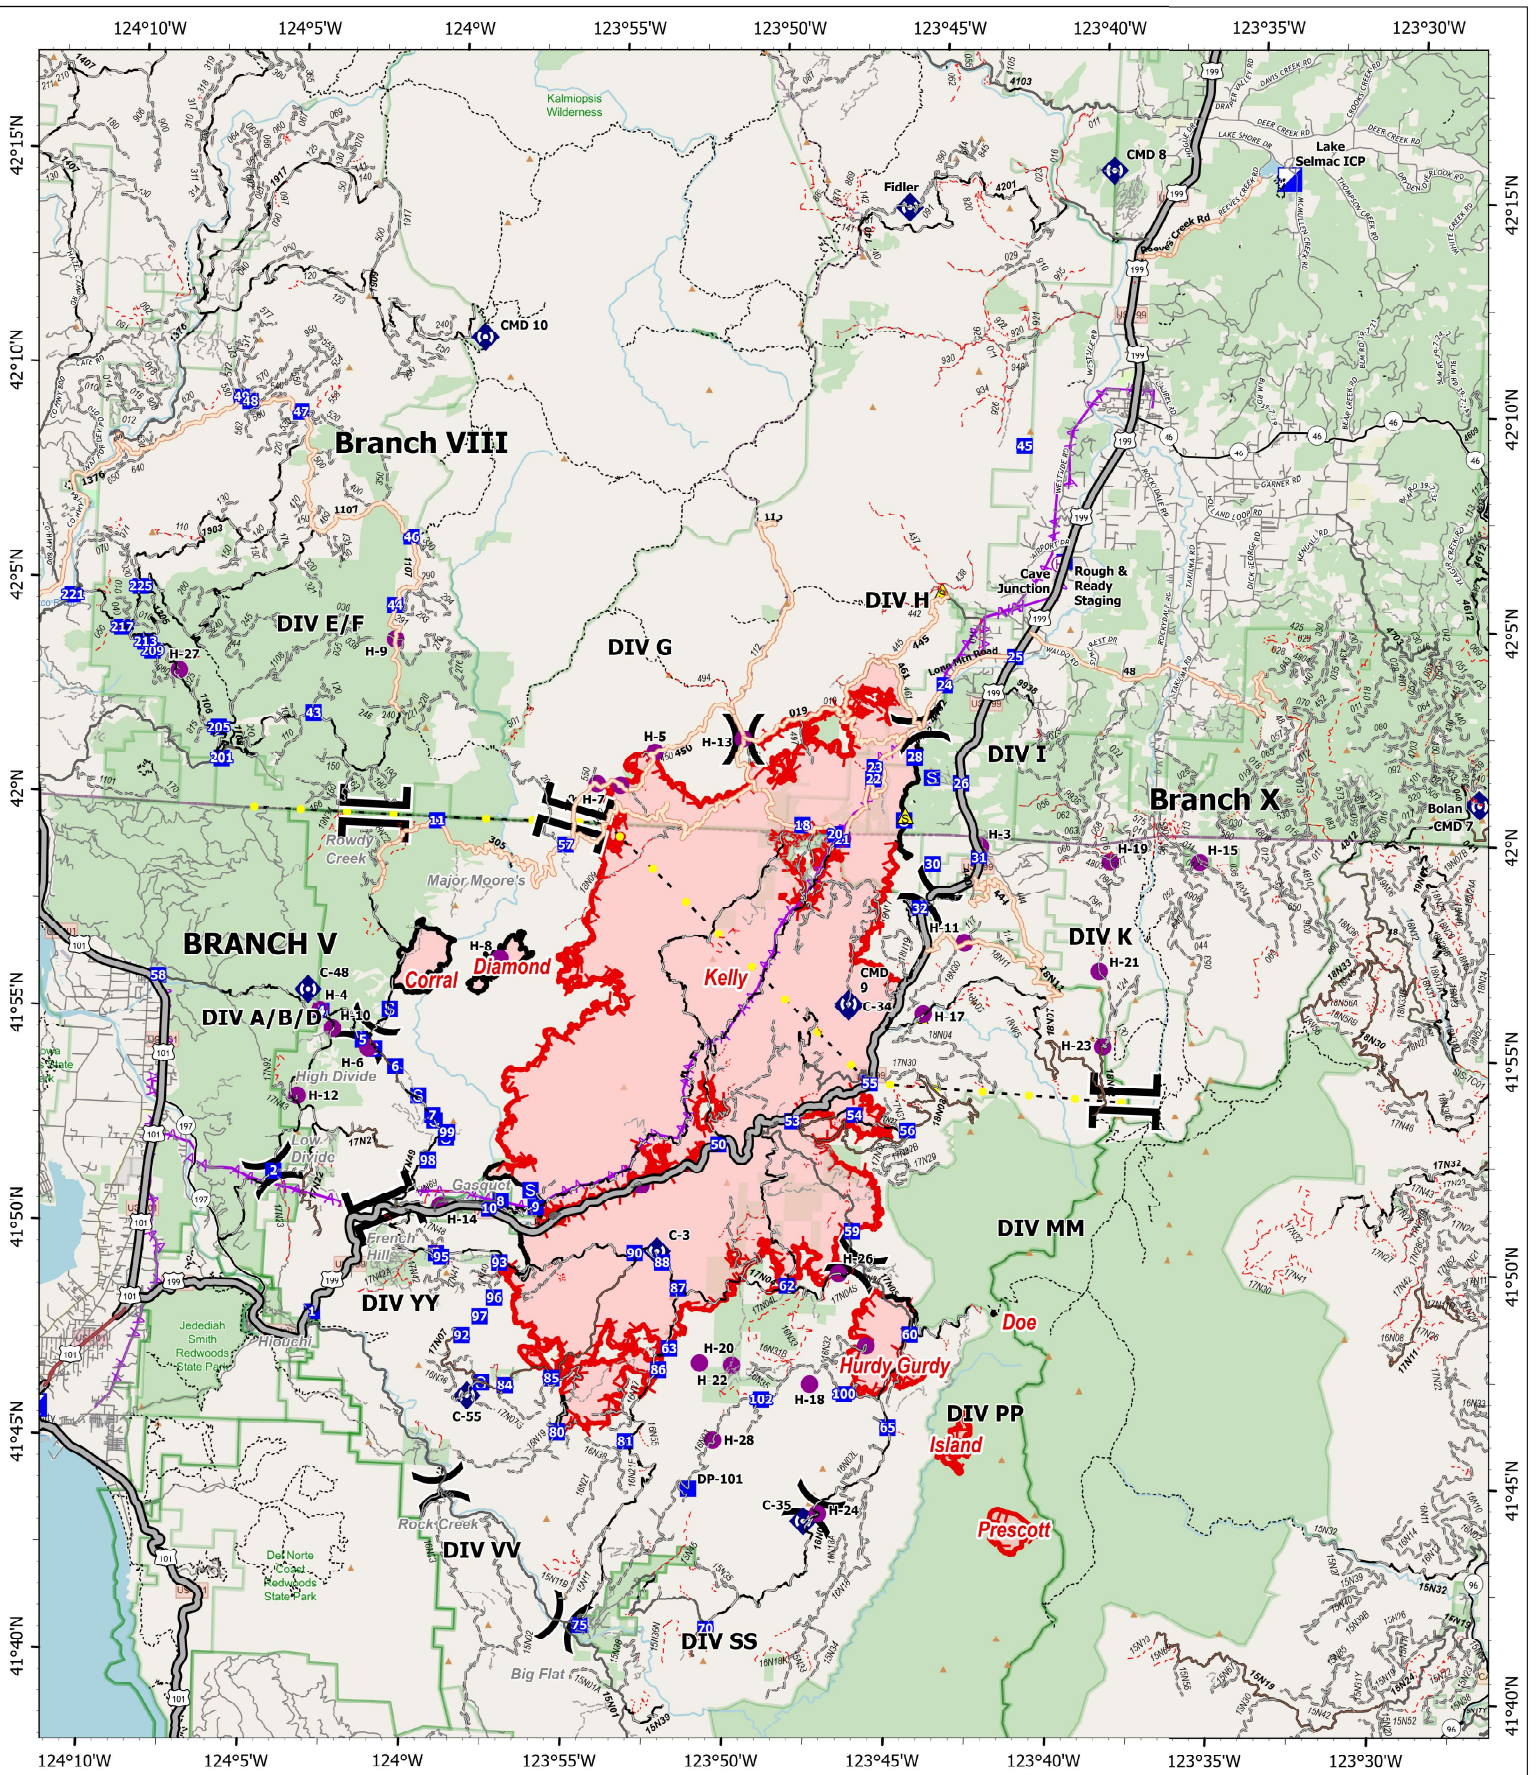

- Snag and hazard tree removal: complete felling of all snags and fire damaged trees that have been identified as a safety concern or have the potential to cause spotting outside the control lines.
- Mop up a minimum of 200 ft or 1 tree length along the perimeter with the following exceptions;
 - Some areas may require additional mop up commensurate with the risk of possible escape (i.e. dirty-burn areas). Verify mop up of perimeter with the use of IR equipment in those areas of heavy fuel concentrations.
 - Structures - 300 ft
 - Dirty burn areas – 300 ft
 - Unburned areas within fire perimeter (i.e. islands, drainages, etc) – 300 ft.
- Fire must be secured from rolling material or falling trees/snags crossing the fire lines.
- Avoid creating erosion when using water to mop up.
- Mop up all spot fires outside the main fire perimeter 100%.
- Knock down and scatter all dozer berms during mop up operations.

Top 5 Natural Resource Take-Homes from the Smith River Complex North

- 1) **WE ARE WITHIN THE RANGE OF PORT-ORFORD CEDAR AND ROOT-ROT, WHICH IS WHY WE BLEACH OUR WATER WITH A 1% SOLUTION (BLEACH KILLS THE ROOT-ROT SPORES).**
- 2) Control efforts and economic losses stemming from noxious weeds are extremely costly – upwards of \$125 million, in Oregon alone. In the Illinois Valley, we have a noxious weed, Alyssum (*Alyssum corsicum* and *Alyssum murale*), that is the only infestation known in North America. Noxious weed seeds can remain viable for 1 – 80 years, depending on species; Alyssum seeds can remain viable for 10-20 years. The best thing we can do is to prevent the spread; use the weed wash whenever possible, check your clothing for seeds, and ensure no plant parts/seeds make the journey home with you.
- 3) Avoid drafting from smaller streams – if you need to dam up a source, ensure at least 50% of the outflow remains, and pull the fine gravel (which salmonids use for spawning) to the side so that it can be easily re-integrated into the pool. And make sure your absorbent pads are changed when they become 50% saturated.
- 4) **Serpentine soils account for a high number of native endemic plants in this area, including the California pitcher plant (*Darlingtonia californica*), a carnivorous species that is found fens, or areas with constant flow of shallow water.**
- 5) You'd be surprised how long trash persists; a Ziplock bag takes ~ 1,000 years to decompose! Thanks for keeping our yard clean!!

Final fun fact; one-half inch of rain over the 83K acres that the Smith River Complex fire encompasses equates to roughly 1,150,769,228 gallons of water over the area PER event.

MEDICAL PLAN (ICS 206 WF)

7.Prepared By (Medical Unit Leader)	8.Date/Time	9.Approved By (Safety Officer)	10.Date/Time
Meredith Lund MEDL <i>Meredith Lund</i>	9/12/2023 1800	Tim Sampson <i>Timothy Sampson</i>	9/12/2023 1800

Special Medical Emergency Procedures:

Special Medical Emergency Procedures:

Green- Contact local/incident Medics for assistance. Medics will follow up with ICP MEDL by the end of shift.

Yellow/Red- Immediately contact local/incident medics for assistance and contact North Communications on Command using the Medical Incident Report (MIR) on the back of the IAP. Additional resources such as High Angle Rescue and Short Haul, if needed, will be facilitated by MEDL. A contingency plan for extraction should be in place in the event that above resources are unavailable.

ICP/In Camp- Contact Communications on Command or by phone.

Communications for Medical Emergencies 971-245-0255

The CDC recommends that you wash your hands to remove germs and keep yourself healthy on the line.

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
