

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Smith River Complex North	2. Operational Period: Date From: 09/14/23 Date To: 09/15/23 Time From: 0700 Time To: 0700															
3. Objective(s): Provide for the safety of firefighters and the public through the utilization of strategic and deliberate risk processes. Develop strategic plans to protect businesses, homes, property, and critical infrastructure in and around the communities of the Illinois Valley including Cave Junction, O'Brien, Takilma, Sunstar, the Highway 101 and 199 corridors, and identified values within the planning area. Protect and minimize impacts to cultural sites, Kalmiopsis and Siskiyou wilderness values, critical habitat, and the Smith River Wild and Scenic Corridor. Engage resource advisors to effectively protect natural resource values and minimize impacts of suppression efforts. Engage in transparent communication and enhance relationships with agency partners, cooperators, stakeholders, and the public through timely and accurate information exchange. Ensure long-term strategies are communicated. Provide initial attack support for new starts within the incident TFR or as requested through Oregon Department of Forestry, Rogue Siskiyou and Six Rivers National Forests. Coordinate responses with the local units. Accurately track incident costs and ensure cost sharing measures are identified, applied, and documented for all fires within the Smith River Complex. Provide an atmosphere free of discrimination, harassment, and other forms of inappropriate behavior.																
4. Operational Period Command Emphasis: The last 48 hours have included IMT transitions, red flag conditions and stand-up of the Harbor Camp. Field operations and logistical support have been exceptional and truly appreciated. Ensure our assigned resources continue to get thorough briefings specific to their assignments, share critical information, and focus on the mitigating hazards to reduce risk. We will need a rested, healthy, and engaged workforce to safely continue the fight over the coming days, weeks and months.																
General Situational Awareness Resources are spread over a large geographic area and conducting a variety of missions, all of which have risks. Brief specifically to the hazards associated with the assigned task for this shift. Ensure all resources are familiar with the medical plan, transport times, and alternative medical evacuation options for their work areas.																
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Approved Site Safety Plan(s) Located at:																
6. Incident Action Plan (the items checked below are included in this Incident Action Plan): <table style="width: 100%; border: none;"> <tr> <td style="width: 33%;"><input checked="" type="checkbox"/> ICS 203</td> <td style="width: 33%;"><input type="checkbox"/> ICS 207</td> <td style="width: 34%;"><u>Other Attachments:</u></td> </tr> <tr> <td><input checked="" type="checkbox"/> ICS 204</td> <td><input type="checkbox"/> ICS 208</td> <td><input checked="" type="checkbox"/> Fire Behavior Forecast</td> </tr> <tr> <td><input checked="" type="checkbox"/> ICS 205</td> <td><input checked="" type="checkbox"/> Map/Chart</td> <td><input type="checkbox"/> _____</td> </tr> <tr> <td><input type="checkbox"/> ICS 205A</td> <td><input checked="" type="checkbox"/> Weather Forecast</td> <td><input type="checkbox"/> _____</td> </tr> <tr> <td><input checked="" type="checkbox"/> ICS 206</td> <td></td> <td><input type="checkbox"/> _____</td> </tr> </table>		<input checked="" type="checkbox"/> ICS 203	<input type="checkbox"/> ICS 207	<u>Other Attachments:</u>	<input checked="" type="checkbox"/> ICS 204	<input type="checkbox"/> ICS 208	<input checked="" type="checkbox"/> Fire Behavior Forecast	<input checked="" type="checkbox"/> ICS 205	<input checked="" type="checkbox"/> Map/Chart	<input type="checkbox"/> _____	<input type="checkbox"/> ICS 205A	<input checked="" type="checkbox"/> Weather Forecast	<input type="checkbox"/> _____	<input checked="" type="checkbox"/> ICS 206		<input type="checkbox"/> _____

Fire Weather Forecast

FORECAST NO: 23
PREDICTION FOR: Thursday-Friday
DATE: September 14, 2023
FORECAST ISSUED: 1900 September 13, 2023

FIRE: Smith River Complex North
UNIT: CA-SRF-968
IMET: Phil Manuel (540-239-8961)
SIGNED: *Phil Manuel*

WEATHER DISCUSSION: Valley elevations = 1400 ft (Illinois Valley), Ridgetop elevations = 4000 ft (H13)

*****Critical Fire Weather Conditions Through Friday*****

Hot and very dry conditions are expected through Friday with temperatures 10 degrees above normal. Humidity minimums will likely fall below 25% during the day and will be hard pressed to recover above 40 percent at night. Winds will diminish along the ridges with mainly terrain driven influences along the slopes and valleys.

TODAY:

WEATHER: Sunny. Hot and dry.
MAX TEMP: Valleys: 92-98°F (3-6 ↑) **MIN RH:** Valleys: 13-17% (5-10 ↓)
Ridgetops: 78-85°F (3-6 ↑) Ridgetops: 18-25% (3-7 ↓)
CHC WTG RAIN: 0% **LAL:** 1 **SFC VIS:** 6+ miles.

WINDS: Valleys: Northeast 3-6 mph gusts to 10 mph. After 1500: Northwest 4 to 7 mph with gusts 12 mph.
(20 feet) Ridgetops: Morning: East 5 to 10 mph. After 1400: Northwest 3-6 mph with gusts 10 mph..

MIXING HEIGHT: Rising to 6,800 ft by 1500. **TRANSPORT WIND:** North 5 to 7 mph.

TONIGHT:

WEATHER: Clear. Poor humidity recovery along the upper slopes and ridgetops.
MIN TEMP: Valleys: 50-55° (Little Change) **MAX RH:** Valleys: 60-70% (Little Change)
Ridgetops: 59-65° (Little Change) Ridgetops: 35-45% (Little Change)
CHC WTG RAIN: 0% **LAL:** 1 **SFC VIS:** 6+ miles.

WINDS: Valleys: Northeast 5 mph or less. Slopes: downslope 2 to 4 mph.
(20 FEET) Ridgetops: East 3 to 6 mph.

MIXING HEIGHT: Dropping under 1000 ft by 2200.

FRIDAY:

WEATHER: Sunny. Hot and dry.
MAX TEMP: Valleys: 92-98°F (Little Change) **MIN RH:** Valleys: 13-17% (Little Change)
Ridgetops: 78-85°F (Little Change) Ridgetops: 20-30% (2-5 ↑)
CHC WTG RAIN: 0% **LAL:** 1 **SFC VIS:** 6+ miles.

WINDS: Valleys: Morning: Near calm. Afternoon: West 4 to 8 mph gusts to 15 mph.
(20 feet) Ridgetops: Morning: East 2-5 mph. Afternoon: West 4 to 8 mph gusts to 12 mph.

MIXING HEIGHT: Rising to 10,000 ft by 1500. **TRANSPORT WIND:** West 5 to 7 mph.

EXTENDED OUTLOOK: Hot and dry weather is expected through Saturday. Temperatures return to normal for early next week. There is an isolated chance for a shower or thunderstorm late Sunday into Monday. .

Nearby Weather Observations

Please send weather observations to Phil Manuel (IMET) at phillip.manuel@noaa.gov or 540-239-8961

Fire Behavior Forecast #25

Incident: Smith River Cx North CA-SRF-000968	TYPE OF FIRE: Wildfire
DATE/TIME ISSUED: September 13, 2023 1900	OPERATIONAL PERIOD: September 14, 2023
FBAN: Tobin Kelley	Signed: /s/ Tobin Kelley

Weather Summary - See Incident Weather Forecast: Critical Fire Weather Day

Fuels

Shrub: Shrubs and brush 1 to 3 feet high with a low load of grass intermixed with sparse conifer. Manzanita brush and other live fuels are moderately available for consumption with independent fire. These fuels will be more reactive to higher wind speeds and show greater rates-of-spread.

Timber litter and shrub: Primary carrier of the fire is understory brush with timber and leaf litter. Expect moderate spread rates in sheltered areas. Canopy closure shelters fuels from wind, making fire spread to be slow with low to moderate winds.

	Fuel/Type Model	Maximum Rate of Spread	Maximum Flame Length
	Shrub	8-14 feet/minute	4-8 ft.
	Timber litter shrub	5-9 feet/minute	3-8 ft.

Expected Fire Behavior is Based on the Warmest, Driest, Windiest Conditions Forecasted.

General/Potential: Critical Fire Weather Day: Weather conditions meet local criteria for low relative humidity, ridge winds and wind gusts. Expect moderate to active fire behavior as hot and dry weather with winds may drive fire activity more than seen in the past week. Winds are predicted to shift to the WNW after 1400 but expected to be light.

E/F: If an initial attack fire occurs expect active fire behavior affected by wind, slope and heavy timber with potential for short range spotting from timber stands.

Golf: Area is not aligned with NE winds and should stay sheltered. Light NW winds in the afternoon should not affect the division. Expect moderate fire behavior.

Hotel: NE winds should be aligned with fire perimeter east of H-13. Winds will be adverse along the line from H-13 south to fire perimeter. After 1400, NW to W light winds should be favorable for this part of the division.

India: Little activity beyond smoldering and creeping expected. Potential remains for unburned islands of fuel to carry surface fire as warming and drying continues to bake fuels.

Kilo: Expect creeping, smoldering and some low surface fire in unburned fuels as hot and dry weather continues over the division.

Night Operations: Hot and dry weather with little relative humidity recovery will allow fire activity to continue into the evening and nighttime hours. Winds should be light overnight.

Air Operations:

No adverse conditions are foreseen today for air operations.

Safety:

Expect fire activity to pick as the hot and dry weather continues. If fire is aligned with wind and slope, there is potential for rapid rates-of-spread. If on Initial Attack, assess conditions regarding fuels, weather and topography as spread rates and flame lengths may be higher than seen on this fire over the last week.

Safety Message

Real Dangers in Walking up on an Illegal Cultivation Site.

- Sometimes marijuana smells like a skunk on hot days.
- Hoses or drip lines located in unusual or unexpected places.
- A well-used trail where there shouldn't be one.
- People standing along roads without vehicles present, or in areas where loitering appears unusual.

Here are some clues that you may have come across a marijuana cultivation site.

- Grow sites are usually found in isolated locations, in rough steep terrain.
- Camps containing cooking and sleeping areas with food, fertilizer, weapons, garbage, rat poison, and/or dead animals.
- Small propane bottles, which are used to avoid the detection of wood smoke.
- Individuals armed with rifles out of hunting season.

As soon as you become aware that you have come upon a cultivation site, **back out immediately**. **Never engage the growers** as these are extremely dangerous people. If you can identify a landmark, or record a GPS coordinate, that's very helpful. The growers may be present and may or may not know that you have found their grow site.

Get to a safe place and report as much detail about the location and incident as you can recall to incident law enforcement officers, your incident supervisor or to the local law enforcement agency. Leave the way you came in and make as little noise as possible.

SAFETY OFFICERS: Jeff Hammes, Tim Sampson, Dean Whitney, Ryan Keogh, and Matt Allen

FINANCE MESSAGE

Finance Email: 2023.smithrivercomplex.finance@firenet.gov

Equipment: 971-713-1521

Personnel: 206-376-7448

This incident requires electronic documentation. Please email your time to the Finance email address daily *with the word "NORTH" as the first word in the subject line.* Finance documents required upon check in are:

Required Documents

Overhead, Agency Crews & Cooperators	Contract Resources
Check-in docs needed: Resource Order, Manifest, Cooperative Agreement, Casual Hire Form w/ECI# (as applicable)	Check-in docs needed: Resource Order, Manifest, Full Contract/Agreement, Certifications (<i>If required</i>) Pre-Inspection

Crisis Line Resources

Do not be afraid to call

*These resources are available to help in a time of crisis.
It can be difficult to make the call, but that call may save a life.*

The 988 Suicide and Crisis Lifeline, and the Veterans Crisis Line (VCL), offer free, 24/7 access to a counselor who is trained to support people experiencing mental health distress, suicidal crisis or substance use crisis. You can also dial 988 if you are worried about someone else.

What to Expect When You Call 988 or Veterans Crisis Line (VCL):

What will happen when you contact 988 or VCL?

A trained crisis counselor will respond to your call or text. The counselor will listen, ask questions to understand how problems are affecting you, provide support, and share resources that might be helpful.

Questions you may be asked:

- Are you currently having thoughts of suicide, or do you have a history of suicidal thoughts or actions?
- Where are you located?
- Do you have access to firearms?
Do you have a plan?
- What has led you to this point?
- What type of support system do you have?
- Have you ever seen a mental health provider?

What if I call on behalf of someone else?

You may be asked all of the questions above, as well as questions about the person you are calling for. This is to ensure that you are safe and not experiencing secondary trauma from assisting someone else in a suicidal crisis. Resources may also be provided to you as a support person of someone in crisis. You may be asked how you know the individual and/or how this has affected you. It is important to know the information you share will remain confidential.

What to Say When Calling 911 Regarding Suicide.

- Clearly identify you are calling about a mental health crisis.
- Notify dispatch whether you are calling for yourself or someone else.
- Be clear with your words. Say "I am suicidal," or "I am calling because of a suicidal individual."
- Provide information regarding location and access to the location.
- Be an advocate for yourself or the individual you are calling for. For example, "It's best to show up without lights or sirens; individual does not feel comfortable with attention."
- Identify if there are weapons accessible. If so, ensure the officers know where they are located and if they could be a direct threat.
- Identify if there are pets on site.
- Provide status of yourself or the individual. For example, indicate, "Currently intoxicated," "Non-confrontational but can be agitated if feels forced or treated poorly," or "Non-violent individual."
- The more information you provide, the calmer a difficult situation will become.

WHEN TO CALL 911:

If you need immediate support from law enforcement or emergency medical services, or if there is an immediate threat of violence to oneself or others, call 911.

WHO YOU CAN CALL:

- Mental Health Clinician
- 911
- 988 or Crisis Lines
- Text Crisis Line 741741

Smith River Complex Demob Process

As your Demob day approaches:

- Pay attention to the IAP Demob Schedule.
- Alert DMOB if there are issues. We can only fix things we know about.
- **PHONE: 541-414-6539; Email: 2023.smithrivercomplex.demob@firenet.gov**
- NO CELL COVERAGE: See your Division Supervisor

- **Contact FINANCE 48 hours prior** to give them a heads-up you are departing.
- **Finance Phone: Equipment: 971-713-1521 Personnel: 206-376-7448**
- **Email: 2023.smithrivercomplex.finance@firenet.gov** Turn in any outstanding or travel CTRs/Shift Tickets. Make sure they're SIGNED.
- **Confirm no missing financial documentation. See Finance Page for full information.**

Need COMMERCIAL AIR TRAVEL to get home?

To schedule a flight home **you** need to complete the Commercial Air Travel Request form **72-hours ahead** of your last work day. The data is needed to purchase your flight and email you the itinerary prior to your demob date.

Link to Form: <https://forms.office.com/g/g2B3uHCxVp>

QR code for Form

Rogue Valley Expanded Dispatch will email the itinerary to the email address you enter into the form. Make sure it is an address you can access on this assignment.

Contact DMOB if Ground Support is needed to get to the airport. **541-414-6539.**

!!! We are using a virtual check-out process for demob. !!!

On your Day of Demob:

STEP 1:

- Return supplies to the Cache
- Return radios, antennas, etc., to Communications
- Contact Finance about closing out your paperwork
- If required, have all of your line-going vehicles (including UTVs) inspected by Ground Support for a release safety inspection
- If required, take your vehicle through weed wash

STEP 2:

Once the above items have been completed, SCAN the DMOB QR code and complete the questions.

Call Demob at 541-414-6539 to confirm the information has been received

To request a remote demob from Smith River South Demob call 208-854-9127

DEMOB HOURS OF OPERATION: 0700-1300 / 1400-2100

Rev 9/13

Mop-Up Standards, Waterbar guidelines, and the Top 5 Natural Resources Take-homes from Smith River Complex Fire

In addition to the upcoming task of constructing waterbars during Suppression Repair, as well as the current Mop-Up standards, here are the top 5 messaging points and/ or tidbits of info that we have shared that will prove useful whenever you are fighting fire in the Illinois Valley. Thank you for your most excellent work here and safe travels as you time out and return to your home units!

Constructing EFFECTIVE waterbars on firelines includes attention following the 5-D's; Distance, Divert, Diagonal, Discharge, and Dissipate. The purpose of waterbars is to slow water down as it travels downhill. When constructed correctly, waterbars help reduce excessive erosion and mitigate sediment transfer to streams and rivers.

Fireline Slope	Maximum Spacing
1-6%	300 ft.
7-9%	200 ft.
10-14%	150 ft.
15-20%	90 ft.
21-40%	50 ft.
41-60+%	25 ft.

Figure 1. *The Five-D System for Effective Fireline Waterbars.* Furniss (undated) PNW

Mop-Up Standards for BLM- and USFS-Managed Lands

The following are the mop up standards for BLM- and USFS-managed lands. The intent of mop up is to make the likelihood of the fire escaping the containment perimeter very unlikely through the rest of the fire season or onset of significant rains. Mop up will be implemented to the degree and location necessary to meet the stated intent.

- The BLM's and USFS's approach to mop up, in order to minimize unnecessary exposure to firefighters, is not to specify a distance or percentage "standard." There may be parts of the fire that are too dangerous for any mop up (e.g., snag patches, extremely steep/rocky terrain).
- To reduce hazards during mop up, fall snags that pose "imminent" danger to firefighters (ref **Field Guide for Danger Tree Identification and Response**, RG-NR-FP-PR-01-08).
- Spot fires outside the control lines will be mopped up commensurate with exposure and values. The perimeter of spots will be mapped in GIS.
- Mop up of partially burned areas further inside the lines will be the exception and determined on a case-by-case basis by the Resource Advisor, Safety Officer, and Operations depending on the specific values at risk.
- As mop up specifications are met on a Division, Operations will work with the Resource Advisors to develop a plan for the resources and equipment to be left in place that may be required for future contingency actions.

Mop-up Standards for State and Private Lands

The following are the mop up standards for Smith River Complex North **on State and private lands**. At no time shall firefighter safety be compromised to meet these standards. All hazards associated with these standards will be mitigated based on experience and deference to firefighter expertise prior to implementation.

- Mop up to the degree necessary to make the likelihood of escape very low, with mop up based on experience, terrain, fuel types, and fuel conditions, and current/predicted weather conditions. Engage in dialogue with your supervisor in order to determine the appropriate distance.

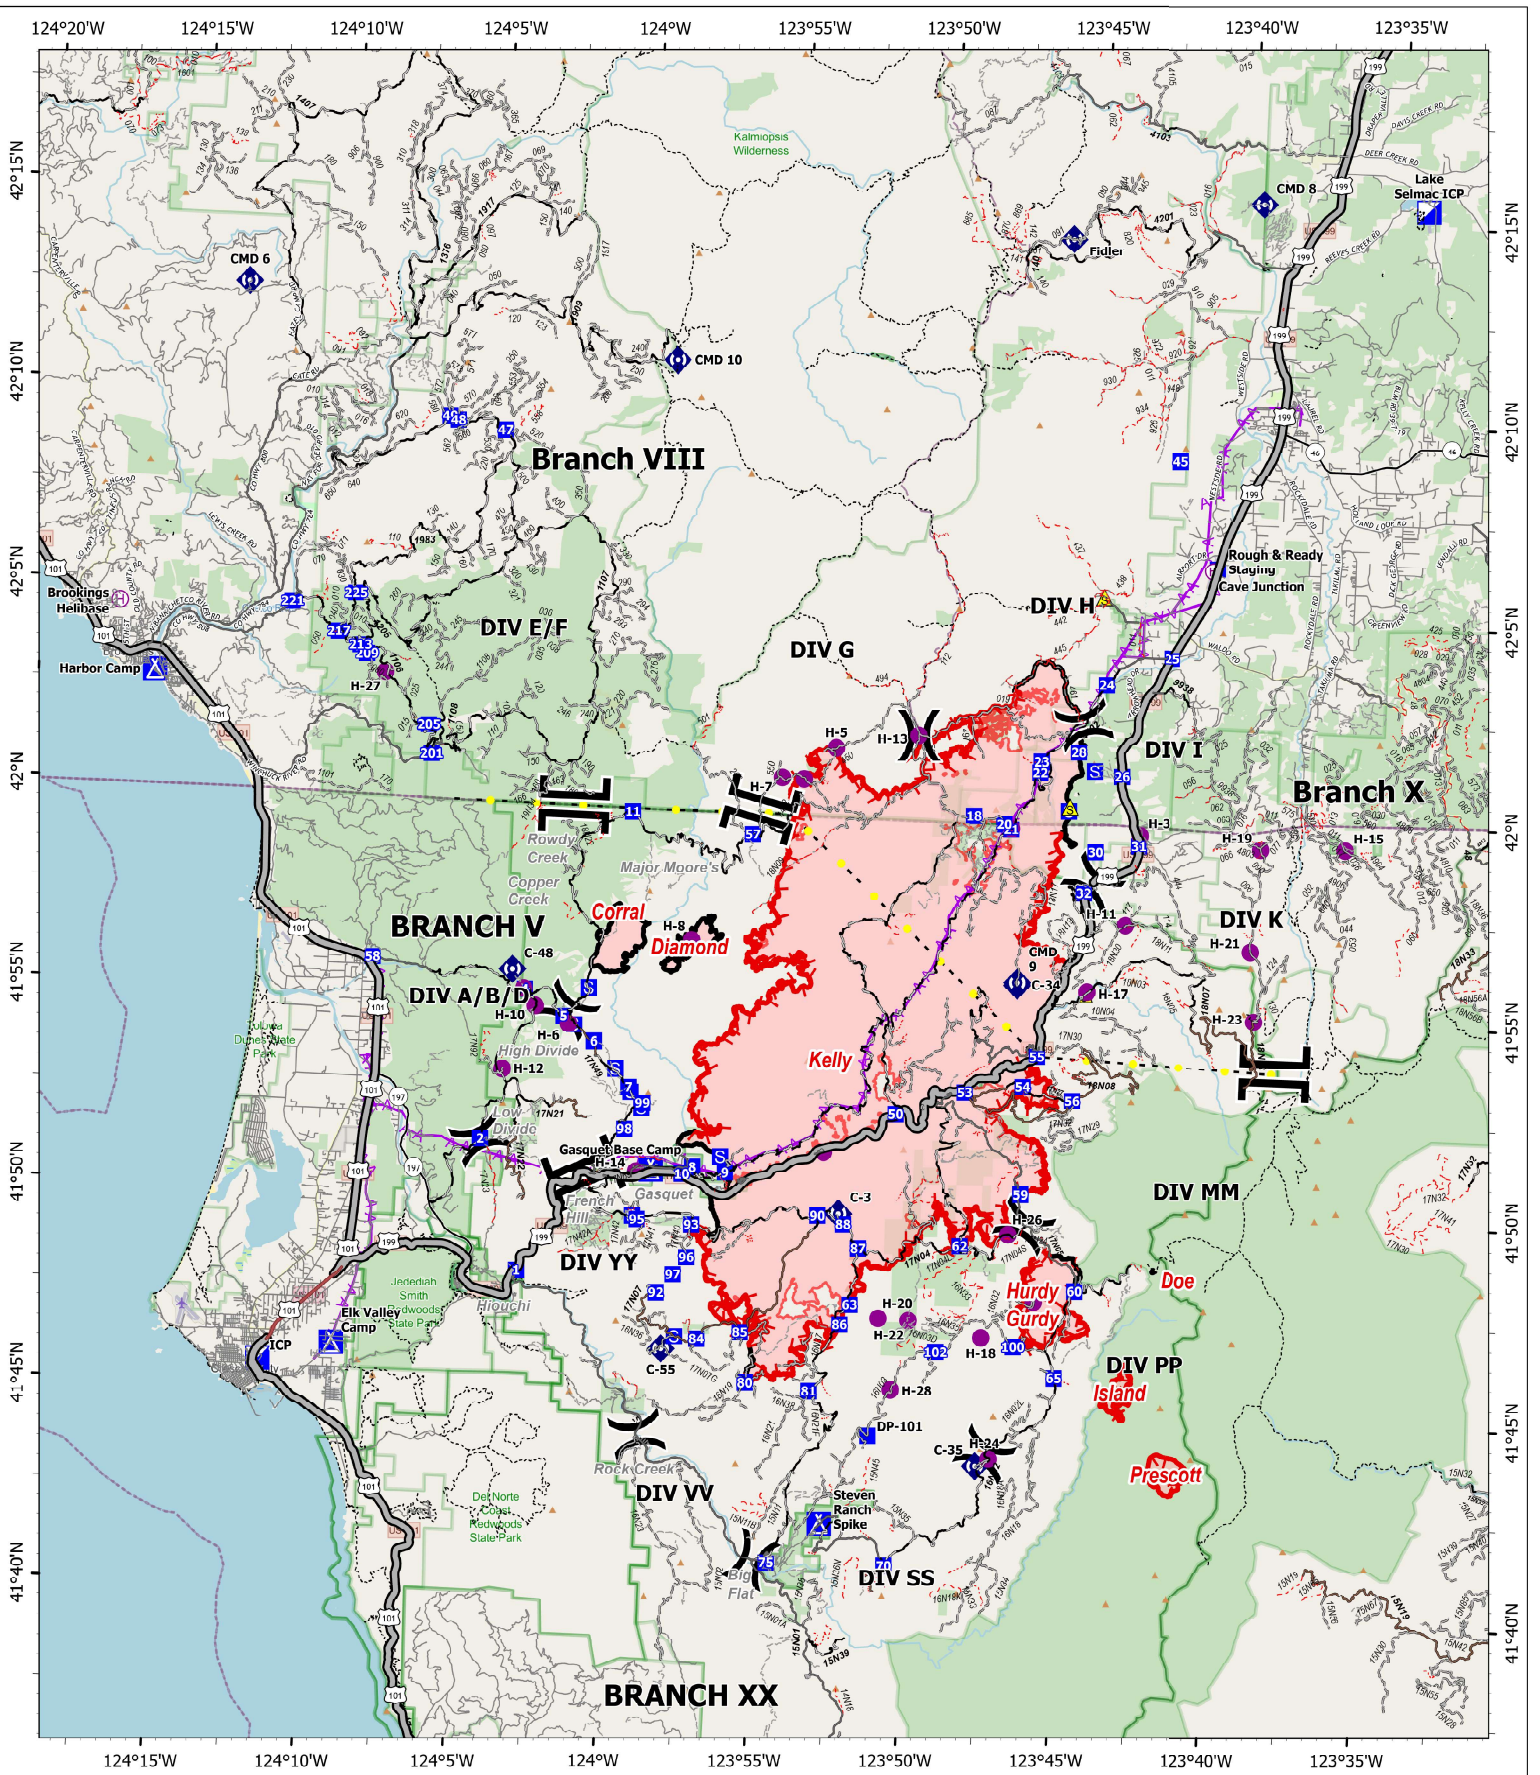

- Snag and hazard tree removal: complete felling of all snags and fire damaged trees that have been identified as a safety concern or have the potential to cause spotting outside the control lines.
- Mop up a minimum of 200 ft or 1 tree length along the perimeter with the following exceptions;
 - Some areas may require additional mop up commensurate with the risk of possible escape (i.e. dirty-burn areas). Verify mop up of perimeter with the use of IR equipment in those areas of heavy fuel concentrations.
 - Structures - 300 ft
 - Dirty burn areas – 300 ft
 - Unburned areas within fire perimeter (i.e. islands, drainages, etc) – 300 ft.
- Fire must be secured from rolling material or falling trees/snags crossing the fire lines.
- Avoid creating erosion when using water to mop up.
- Mop up all spot fires outside the main fire perimeter 100%.
- Knock down and scatter all dozer berms during mop up operations.

Top 5 Natural Resource Take-Homes from the Smith River Complex North

- 1) **WE ARE WITHIN THE RANGE OF PORT-ORFORD CEDAR AND ROOT-ROT, WHICH IS WHY WE BLEACH OUR WATER WITH A 1% SOLUTION (BLEACH KILLS THE ROOT-ROT SPORES).**
- 2) Control efforts and economic losses stemming from noxious weeds are extremely costly – upwards of \$125 million, in Oregon alone. In the Illinois Valley, we have a noxious weed, Alyssum (*Alyssum corsicum* and *Alyssum murale*), that is the only infestation known in North America. Noxious weed seeds can remain viable for 1 – 80 years, depending on species; Alyssum seeds can remain viable for 10-20 years. The best thing we can do is to prevent the spread; use the weed wash whenever possible, check your clothing for seeds, and ensure no plant parts/seeds make the journey home with you.
- 3) Avoid drafting from smaller streams – if you need to dam up a source, ensure at least 50% of the outflow remains, and pull the fine gravel (which salmonids use for spawning) to the side so that it can be easily re-integrated into the pool. And make sure your absorbent pads are changed when they become 50% saturated.
- 4) **Serpentine soils account for a high number of native endemic plants in this area, including the California pitcher plant (*Darlingtonia californica*), a carnivorous species that is found fens, or areas with constant flow of shallow water.**
- 5) You'd be surprised how long trash persists; a Ziplock bag takes ~ 1,000 years to decompose! Thanks for keeping our yard clean!!

Final fun fact; one-half inch of rain over the 83K acres that the Smith River Complex fire encompasses equates to roughly 1,150,769,228 gallons of water over the area PER event.

MEDICAL PLAN (ICS 206 WF)

Special Medical Emergency Procedures:

Green- Contact local/incident Medics for assistance. Medics will follow up with ICP MEDL by the end of shift.

Yellow/Red- Immediately contact local/incident medics for assistance and contact North Communications on Command using the Medical Incident Report (MIR) on the back of the IAP. Additional resources such as High Angle Rescue and Short Haul, if needed, will be facilitated by MEDL. A contingency plan for extraction should be in place in the event that above resources are unavailable.

ICP/In Camp- Contact Communications on Command or by phone.

Communications for Medical Emergencies 971-245-0255

The CDC recommends that you wash your hands to remove germs and keep yourself healthy on the line.

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
