

## INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b> Smith River Complex North	<b>2. Operational Period:</b> Date From: 09/16/23      Date To: 09/17/23 Time From: 0700      Time To: 0700															
<b>3. Objective(s):</b> Provide for the safety of firefighters and the public through the utilization of strategic and deliberate risk processes.  Develop strategic plans to protect businesses, homes, property, and critical infrastructure in and around the communities of the Illinois Valley including Cave Junction, O'Brien, Takilma, Sunstar, the Highway 101 and 199 corridors, and identified values within the planning area.  Protect and minimize impacts to cultural sites, Kalmiopsis and Siskiyou wilderness values, critical habitat, and the Smith River Wild and Scenic Corridor. Engage resource advisors to effectively protect natural resource values and minimize impacts of suppression efforts.  Engage in transparent communication and enhance relationships with agency partners, cooperators, stakeholders, and the public through timely and accurate information exchange. Ensure long-term strategies are communicated.  Provide initial attack support for new starts within the incident TFR or as requested through Oregon Department of Forestry, Rogue Siskiyou and Six Rivers National Forests. Coordinate responses with the local units.  Accurately track incident costs and ensure cost sharing measures are identified, applied, and documented for all fires within the Smith River Complex.  Provide an atmosphere free of discrimination, harassment, and other forms of inappropriate behavior.																
<b>4. Operational Period Command Emphasis:</b> The local history has shown that fires can appear to have minimal threat but given the right conditions can increase in activity and threaten values. There is potential that we will experience another wind event in the coming days. Good progress has been made toward meeting the objectives, but we cannot let our guard down or lose focus. Take the opportunities to reinforce lines, secure perimeter, and be ready to respond to a change in the conditions.																
General Situational Awareness One of the long-standing common denominators of tragedy fires is deceptively quiet areas of larger fires. This coupled with a pending wind event and the team working its last few shifts create the potential for a negative outcome. The daily transition between the night and day shifts adds another layer of complexity to the "swiss cheese model" where the holes align and things getting dropped or missed. Being flexible, vigilant, and communicative will mitigate these potential problems.																
<b>5. Site Safety Plan Required?</b> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> <b>Approved Site Safety Plan(s) Located at:</b>																
<b>6. Incident Action Plan</b> (the items checked below are included in this Incident Action Plan): <table style="width: 100%; border: none;"> <tr> <td style="width: 33%;"><input checked="" type="checkbox"/> ICS 203</td> <td style="width: 33%;"><input type="checkbox"/> ICS 207</td> <td style="width: 34%;"><b>Other Attachments:</b></td> </tr> <tr> <td><input checked="" type="checkbox"/> ICS 204</td> <td><input type="checkbox"/> ICS 208</td> <td><input checked="" type="checkbox"/> Fire Behavior Forecast</td> </tr> <tr> <td><input checked="" type="checkbox"/> ICS 205</td> <td><input checked="" type="checkbox"/> Map/Chart</td> <td><input type="checkbox"/> _____</td> </tr> <tr> <td><input type="checkbox"/> ICS 205A</td> <td><input checked="" type="checkbox"/> Weather Forecast</td> <td><input type="checkbox"/> _____</td> </tr> <tr> <td><input checked="" type="checkbox"/> ICS 206</td> <td></td> <td><input type="checkbox"/> _____</td> </tr> </table>		<input checked="" type="checkbox"/> ICS 203	<input type="checkbox"/> ICS 207	<b>Other Attachments:</b>	<input checked="" type="checkbox"/> ICS 204	<input type="checkbox"/> ICS 208	<input checked="" type="checkbox"/> Fire Behavior Forecast	<input checked="" type="checkbox"/> ICS 205	<input checked="" type="checkbox"/> Map/Chart	<input type="checkbox"/> _____	<input type="checkbox"/> ICS 205A	<input checked="" type="checkbox"/> Weather Forecast	<input type="checkbox"/> _____	<input checked="" type="checkbox"/> ICS 206		<input type="checkbox"/> _____

# Fire Weather Forecast

**FORECAST NO: 25**  
**PREDICTION FOR: Saturday-Sunday**  
**DATE: September 16, 2023**  
**FORECAST ISSUED: 1900 September 15, 2023**

**FIRE: Smith River Complex North**  
**UNIT: CA-SRF-968**  
**IMET (t): William Iwasko (240-778-5301)**  
**SIGNED: *William Iwasko***

**WEATHER DISCUSSION:** Valley elevations = 1400 ft (Illinois Valley), Ridgetop elevations = 4000 ft (H13)  
 Very warm and dry conditions are expected once again today with temperatures running slightly cooler than yesterday. These temperatures will still allow humidity minimums to drop into the teens and lower 20s at all elevations. Terrain driven influences are expected for the winds in the morning before westerly winds develop for the afternoon. These westerly winds should help to push smoke out of branch VIII however Branch X and the Illinois Valley may remain smoked in for the day including the helibase at Cave Junction. Isolated thunderstorms may develop southeast of the fire both Saturday and Sunday afternoons however direct impacts are not anticipated at this time.

**TODAY:**

**WEATHER:** Sunny. Hot and dry. Smoke will reduce visibility in Branch X.  
**MAX TEMP:** Valleys: 88-94°F (1-3 ↓)      **MIN RH:** Valleys: 17-22% (3-6 ↑)  
                   Ridgetops: 73-81°F (1-3 ↓)      **Ridgetops:** 20-30% (3-6 ↑)  
**CHC WTG RAIN:** 0%      **LAL:** 1      **SFC VIS:** Branch X: 1-3 miles. Branch VIII: 3-5 miles  
**WINDS:** Valleys: Morning: Near calm. Afternoon: West 5 to 9 mph gusts to 13 mph.  
**(20 feet)**      **Ridgetops:** Morning: East 3-6 mph. Afternoon: West 5 to 9 mph gusts to 13 mph.  
**MIXING HEIGHT:** Rising to 9,000 ft by 1500.      **TRANSPORT WIND:** Southwest 7 to 10 mph.

**TONIGHT:**

**WEATHER:** Partly cloudy. Areas of smoke.  
**MIN TEMP:** Valleys: 45-50° (Little Change)      **MAX RH:** Valleys: 65-75% (5-10 ↑)  
                   Ridgetops: 57-63° (Little Change)      **Ridgetops:** 45-55% (5-10 ↑)  
**CHC WTG RAIN:** 0%      **LAL:** 1      **SFC VIS:** Branch X: 1-3 miles. Branch VII: 3-5 miles.  
**WINDS:** Valleys: Northeast 5 mph or less. Slopes: downslope 2 to 4 mph.  
**(20 FEET)**      **Ridgetops:** East 7 to 10 mph.  
**MIXING HEIGHT:** Dropping under 1000 ft by 2200.

**SUNDAY:**

**WEATHER:** Partly cloudy. Hot and dry. Areas of smoke.  
**MAX TEMP:** Valleys: 88-94°F (1-3 ↓)      **MIN RH:** Valleys: 19-25% (3-6 ↑)  
                   Ridgetops: 73-81°F (1-3 ↓)      **Ridgetops:** 27-37% (5-8 ↑)  
**CHC WTG RAIN:** 0%      **LAL:** 1      **SFC VIS:** 3-5 miles.  
**WINDS:** Valleys: Morning: Near calm. Afternoon: Northwest 9 to 12 mph gusts to 18 mph.  
**(20 feet)**      **Ridgetops:** Morning: East 6-9 mph. Afternoon: West 6 to 9 mph gusts to 15 mph.  
**MIXING HEIGHT:** Rising to 9,000 ft by 1500.      **TRANSPORT WIND:** West-southwest 6 to 9 mph.

**EXTENDED OUTLOOK:** Our hot temperatures will continue to moderate as we go into early next week with more seasonable temperatures expected. Another northeast wind event is possible around the middle of next week with strong ridge top winds.

Nearby Weather Observations

Please send weather observations to Phil Manuel (IMET) at [phillip.manuel@noaa.gov](mailto:phillip.manuel@noaa.gov) or 540-239-8961

**Fire Behavior Forecast #27**

<b>Incident:</b> Smith River Cx North CA-SRF-000968	<b>TYPE OF FIRE:</b> Wildfire
<b>DATE/TIME ISSUED:</b> September 15, 2023 1900	<b>OPERATIONAL PERIOD:</b> September 16, 2023
<b>FBAN:</b> Tobin Kelley	<b>Signed:</b> /s/ Tobin Kelley

**Weather Summary - See Incident Weather Forecast:**

**Fuels**

**Shrub:** Shrubs and brush 1 to 3 feet high with a low load of grass intermixed with sparse conifer. Manzanita brush and other live fuels are moderately available for consumption with independent fire. These fuels will be more reactive to higher wind speeds and show greater rates-of-spread.

**Timber litter and shrub:** Primary carrier of the fire is understory brush with timber and leaf litter. Expect moderate spread rates in sheltered areas. Canopy closure shelters fuels from wind, making fire spread to be slow with low to moderate winds.

Fire Behavior: Minimal to active surface fire, occasional torching  Atmosphere: Partially Stable Max. spot distance: 0.1 mile Wild Rivers ERC%: 88 <sup>th</sup> percentile BI: 91 <sup>th</sup> percentile	Fuel/Type Model	Maximum Rate of Spread	Maximum Flame Length
	Shrub	3-5 feet/minute	4 ft.
	Timber litter shrub	2 feet/minute	3-8 ft.

Expected Fire Behavior is Based on the Warmest, Driest, Windiest Conditions Forecasted.

**General/Potential:** Have dropped out of critical fire weather conditions but fuels have dried and burn readily. Weather will remain hot and dry – if smoke remains in place over the fire it will tone down fire behavior. Expect moderate to active fire behavior as hot and dry weather continues. Winds should be light and terrain driven with west winds along the ridges in the afternoon.

**E/F:** If an initial attack fire occurs expect moderate fire behavior affected by wind, slope and heavy timber with potential for short range spotting from timber stands.

**Golf:** Expect moderate fire behavior in the timber bowl. Winds should not be a factor.

**Hotel:** Conditions should remain favorable for this division. Expect green islands to continue to burn out with flanking and slope driven runs.

**India:** Little activity beyond smoldering and creeping expected. Potential remains for unburned islands of fuel to carry fire.

**Kilo:** Expect creeping, smoldering fire in unburned fuels as hot and dry weather continues over the division.

**Night Operations:** Hot and dry weather with little relative humidity recovery will allow fire activity to continue into the evening and nighttime hours. Relative humidity later in the night should be high enough to greatly moderate fire activity. Winds should be light overnight.

**Air Operations:**

Heavy smoke may hinder aviation operations over the fire today.

**Safety:**

ERC and BI indices will climb steeply with the continued hot and dry weather. Lighter grass, shrub and forest litter fuels will react quickly to this drying and may exhibit rapid spread rates if fuels, slope and wind align. If fire is aligned with wind and slope, there is potential for rapid rates-of-spread. If on Initial Attack, assess conditions regarding fuels, weather and topography as spread rates and flame lengths may be higher than seen on this fire over the last week.

## Smith River Complex North

### SAFETY MESSAGE FOR THE OPERATIONAL PERIOD 9/16/2023

#### It turns out mama was right!!

According to medical experts, hand washing can prevent 1 in 3 diarrhea-related illnesses and 1 in 5 infections, including the flu. The CDC reports that only 31 percent of men and 65 percent of women washed their hands after using a public restroom. On average, you come into contact with 300 surfaces every 30 minutes, exposing you to 840,000 germs. Around 33% of people don't use soap when washing their hands. Up to 80% of communicable diseases are transferred by touch. There is bacterial matter on 10% of credit cards, and 16% of cellphones. Elevator buttons harbor 22% more bacteria than toilet seats.

#### How to wash your hands:

- Wet your hands with clean, running water — either warm or cold.
- Apply any kind of soap and lather well.
- Rub your hands vigorously for at least 20 seconds. Remember to scrub all surfaces, including the backs of your hands, wrists, palms, between your fingers and under your fingernails.
- Rinse well and dry your hands using a clean towel or an air dryer.

**Safety Officers:** Tim Sampson, Dean Whitney(T), Ryan Keogh(T), Matt Allen (T)

# Survivorship

*Suicide affects the fire community each year, along with millions of others in the world. The phrase 'survivor of suicide' can have several meanings. Someone who lost a loved one to suicide, or someone who has survived a suicide attempt is a survivor. Survivorship looks different for everyone.*

***Below is a story of hope from one wildland firefighter to those who may experience the painful wake of suicide and suicidality.***

## **The Emotions:**

Fire season can pose big challenges to both physical and mental resilience. We choose the job because we love the work, but that doesn't mean it can't take everything from us. After an incident which required resuscitation and intensive care, I came home in a cloud of emotions. I experienced fear, anxiety, anger, and most of all, the frustration that I didn't just die in the hospital. I physically had to recover, and I mentally felt as though I'd failed both my job and those around me. I felt ashamed and isolated and as though I was a burden in my work and home life. I wasn't sleeping because of nightmares; I was just surviving each day. I was in my third season of my ongoing six-year career in wildland fire. I admittedly did not know what resources were available, which left me feeling as though the return home /Office of Workers' Compensation Programs (OWCP)/ return to work process was crushing me. When asked, I would just say I was okay, because anything less would reinforce my feeling of weakness. As time progressed, I lost all sense of purpose, hope, support, and the feeling of being a burden consumed me. At that time, I felt suicide was the only way to relieve the burden for those I cared most for. I wasn't being selfish – in my mind, this was the most selfless act I could do. It would not be the last decision in my story.

## **How Did I Heal:**

Healing is non-linear and a lifelong process. Each day, I face the grief, but I no longer allow it to control me. After my suicide attempt, I kept my experience extremely quiet. Only my family knew. I was ashamed and embarrassed, but they helped me reach out to a mental health counselor who saw me and helped me process both my trauma and the experience I'd just gone through. I worked through tools and healthy coping mechanisms, and I began to share what I had been through with others.

## **What Came Next:**

I continued seeing a counselor, and even today I still seek counseling services with a clinician who specializes in first responder trauma and suicidality. I became my own advocate and began to search for what my life meant outside of being on the fireline. I started participating in Critical Incident Stress Management response, and I found not only an incredible support system, but also passion and a new way to serve in the fire community. I found my own hope and purpose. I learned that sharing my story, as hard as it was, was what saved me and helped others to see that my experience was not the end of my life or career, but the start of a new passion and purpose in fire.

## **My Message to You:**

It is normal to have questions after someone close to you attempted suicide or died by suicide. A few common questions might be, "Why didn't they tell me they were struggling?" or "Could I have done something different?" Suicide loss can bring up feelings of shame and guilt for friends and family members. If you need support processing a loved one's suicide attempt or death, counseling can be a safe space to work through your thoughts and feelings. It is okay to talk about your experience, but know that each experience is different. Your story may be what saves a life or offers hope to those who are survivors or facing suicidality. There are ways to heal. Attempted suicide or suicidality does not define you. It is a simply a part of who you are and a part of your story; it is not the end of your story. This is a plea of hope to those who feel lost in the aftermath of experiences such as these to keep fighting. You are not alone, as isolating as it may feel. In the wake of my experience, I found purpose in a desire to change the system for the field, and I will serve the remainder of my career advocating in memory of those who have passed, for those who fought their battle silently, and in support of those who may face the pain of suicidality in the future.

*If you are experiencing thoughts of suicide or are in distress, dial or text 988 for free, confidential support available 24/7.*

**LIFELINE**

# Smith River Complex Demob Process

## **As your Demob day approaches:**

- Pay attention to the IAP Demob Schedule.
- Alert DMOB if there are issues. We can only fix things we know about.
- **PHONE: 541-414-6539; Email: [2023.smithrivercomplex.demob@firenet.gov](mailto:2023.smithrivercomplex.demob@firenet.gov)**
- NO CELL COVERAGE: See your Division Supervisor
  
- **Contact FINANCE 48 hours prior** to give them a heads-up you are departing.
- **Finance Phone: Equipment: 971-713-1521      Personnel: 206-376-7448**
- **Email: [2023.smithrivercomplex.finance@firenet.gov](mailto:2023.smithrivercomplex.finance@firenet.gov)** Turn in any outstanding or travel CTRs/Shift Tickets. Make sure they're SIGNED.
- **Confirm no missing financial documentation. See Finance Page for full information.**

## **Need COMMERCIAL AIR TRAVEL to get home?**

To schedule a flight home **you** need to complete the Commercial Air Travel Request form **72-hours ahead** of your last work day. The data is needed to purchase your flight and email you the itinerary prior to your demob date.

Link to Form: <https://forms.office.com/g/g2B3uHCxVp>

QR code for Form

Rogue Valley Expanded Dispatch will email the itinerary to the email address you enter into the form. Make sure it is an address you can access on this assignment.

Contact DMOB if Ground Support is needed to get to the airport. **541-414-6539.**

## **!!! We are using a virtual check-out process for demob. !!!**

### **On your Day of Demob:**

#### **STEP 1:**

- Return supplies to the Cache
- Return radios, antennas, etc., to Communications
- Contact Finance about closing out your paperwork
- If required, have all of your line-going vehicles (including UTVs) inspected by Ground Support for a release safety inspection
- If required, take your vehicle through weed wash

#### **STEP 2:**

Once the above items have been completed, SCAN the DMOB QR code and complete the questions.

Call Demob at 541-414-6539 to confirm the information has been received

# Smith River Complex North – Field Maps Workflow

As suppression repair is begun on some portions of the fire, it is important to use Field Maps correctly so repair work can progress! A common question is: *Who can change the Repair Status in Field Maps?*

**REPAIR STATUS:** Operations is responsible for changing the status from “In Use – Fire Management” to either “Needs Assessment” or “Repair Needed”. In consultation with the READS, the status can then be updated as work proceeds. READs are the only group that can change the status to “Completed – Inspected” or “No Repair Needed”.

<b>Operations</b>
<ul style="list-style-type: none"> <li>• In Use - Fire Management</li> <li>• Needs Assessment</li> <li>• Repair Needed</li> <li>• In Progress</li> <li>• Completed - Ready for Inspection</li> </ul>

<b>Resource Advisors</b>
<ul style="list-style-type: none"> <li>• Completed - Inspected</li> <li>• No Repair Needed</li> <li>• Other - See Comments</li> </ul>

**ARCH CLEARANCE:** Archaeologists (ARCHs) or cultural advisors are the only ones who can clear lines for repairs and change the “ARCH Clearance” status.

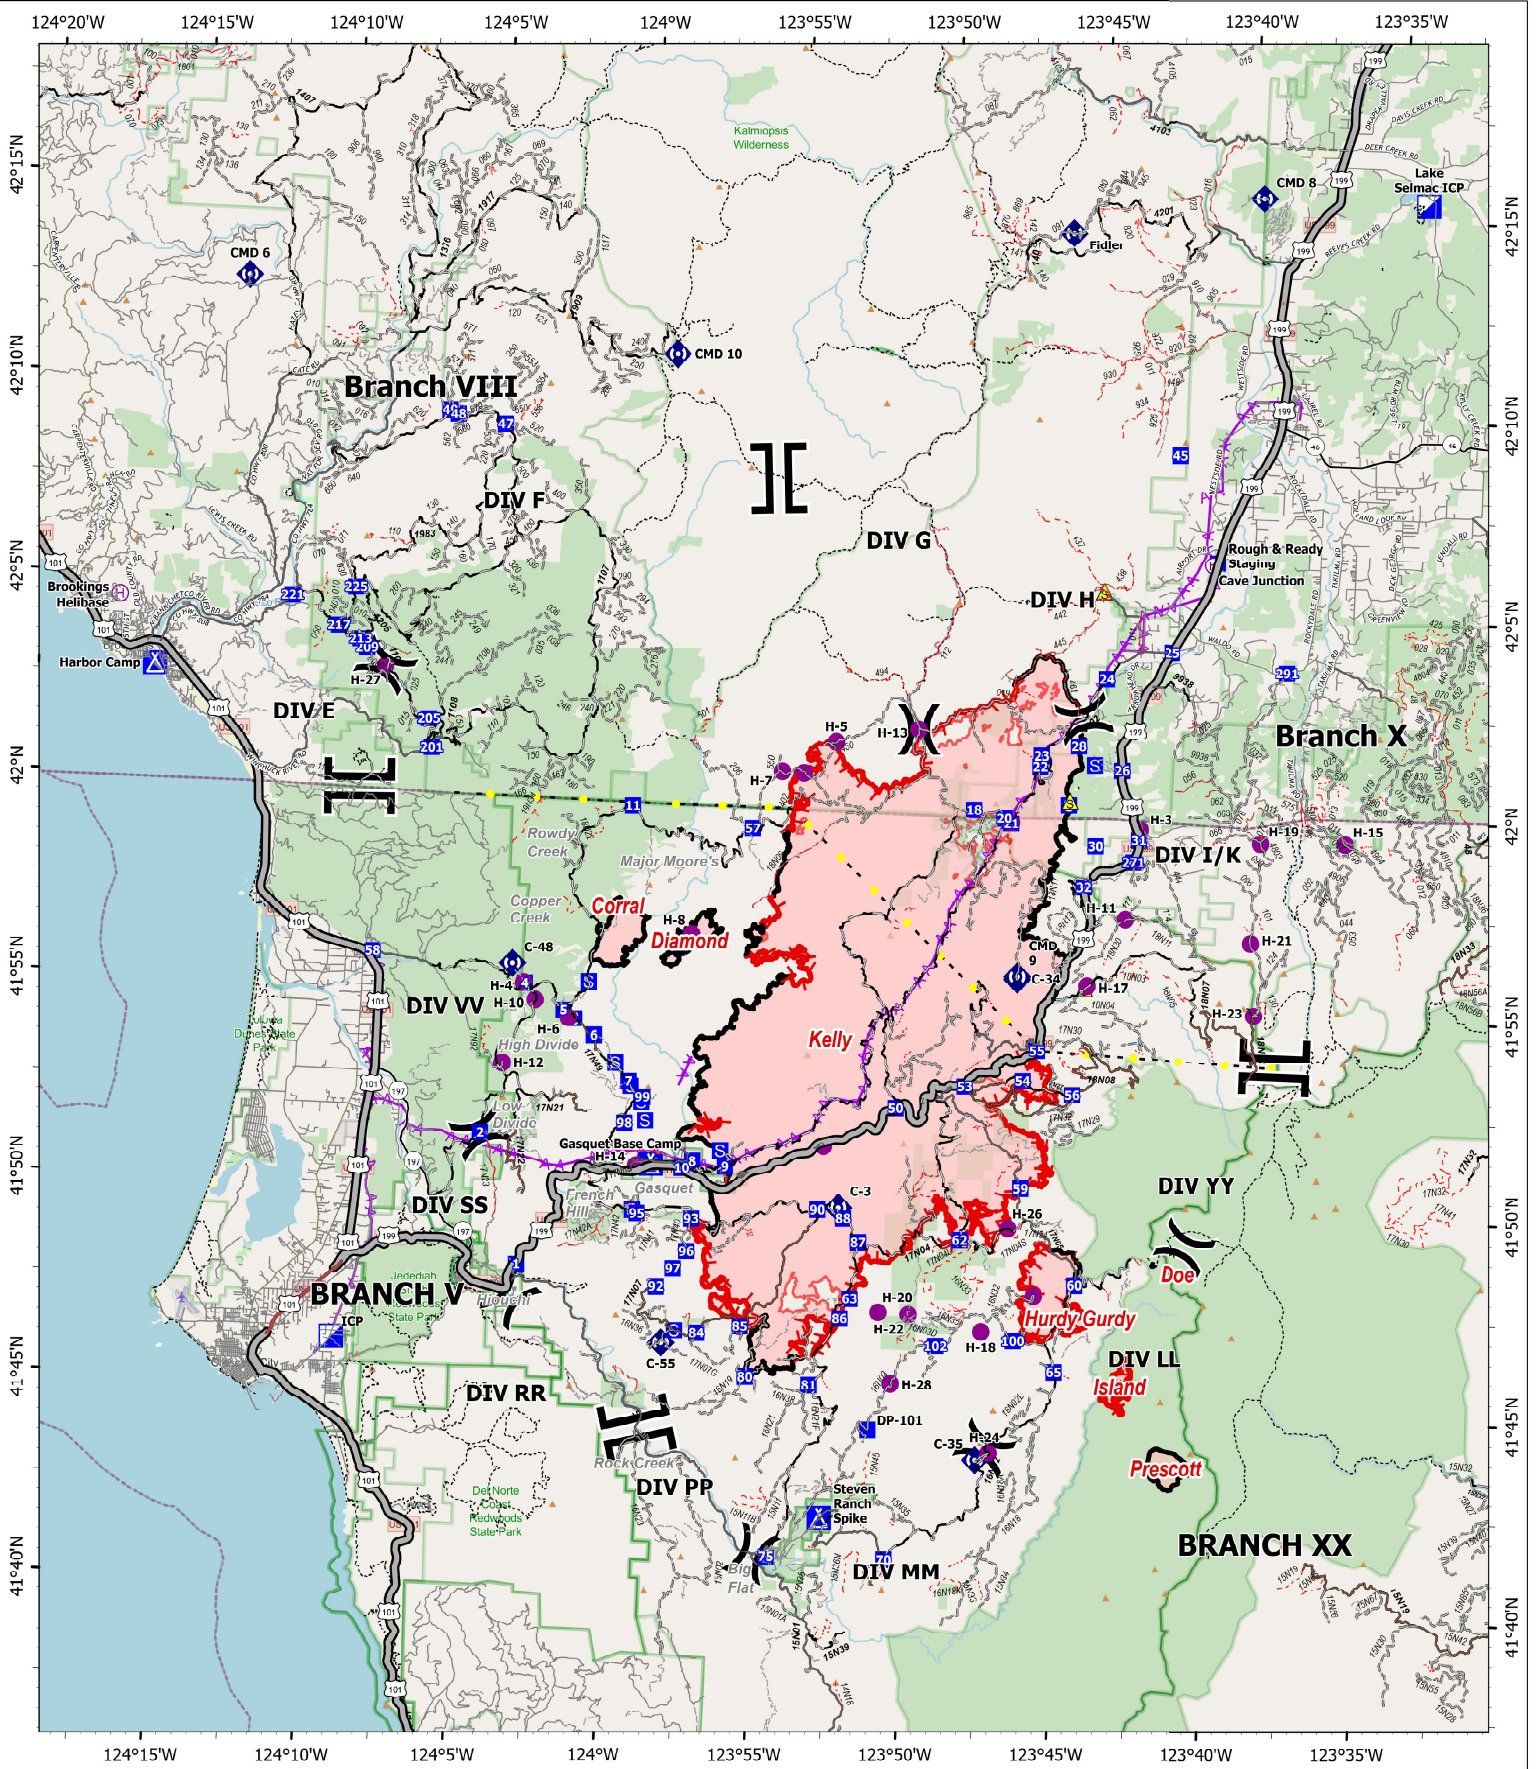

## Constructing Waterbars

Constructing EFFECTIVE waterbars on firelines includes attention to following the 5-D’s: Distance, Divert, Diagonal, Discharge, and Dissipate. The purpose of waterbars is to slow water down as it travels downhill. When constructed correctly, waterbars help reduce excessive erosion and mitigate sediment transfer to streams and rivers.

<i><b>Fireline Slope</b></i>	<i><b>Maximum Spacing</b></i>
1-6%	300 ft.
7-9%	200 ft.
10-14%	150 ft.
15-20%	90 ft.
21-40%	50 ft.
41-60+%	25 ft.

**Figure 1. The Five-D System for Effective Fireline Waterbars.**

### Special Medical Emergency Procedures:

**Green-** Contact local/incident Medics for assistance. Medics will follow up with ICP MEDL by the end of shift.

**Yellow/Red-** Immediately contact local/incident medics for assistance and contact North Communications on Command using the Medical Incident Report (MIR) on the back of the IAP. Additional resources such as High Angle Rescue and Short Haul, if needed, will be facilitated by MEDL. A contingency plan for extraction should be in place in the event that above resources are unavailable.

**ICP/In Camp-** Contact Communications on Command or by phone.

Communications for Medical Emergencies 971-245-0255

**The CDC recommends that you wash your hands to remove germs and keep yourself healthy on the line.**

### Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

Use the following items to communicate situation to communications/dispatch.

**1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)**

*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*

**2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.**

*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location &amp; Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

**3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)**

Patient Assessment: See IRPG page 106

Treatment:

**4. TRANSPORT PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

*Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication*

**6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable**

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

**7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.**

**8. ADDITIONAL INFORMATION: Updates/Changes, etc.**

**REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.**
