Fire Weather Forecast

FORECAST NO: 31

PREDICTION FOR: Sunday-Monday

Valleys:

DATE: September 17th, 2023

FORECAST ISSUED: 1900 September 16th, 2023

FIRE: Smith River Complex South

UNIT: CA-SRF-968

IMET: tom.lonka@noaa.gov (240-205-9007)

SIGNED: Tom Lonka

WEATHER DISCUSSION: * Valley elevations = 400-1200ft (Gasquet), Ridgetop elevations = 3500 ft (Camp Six) * Temperatures and humidity values continue to moderate through Monday. Mostly sunny skies are expected today. A shallow inversion and very light winds will keep smoky conditions in place today and tonight, with the worst conditions across the lower elevations below 3,000 ft. Good to fair RH recoveries are expected tonight as some maritime air makes it into the fire area.

TODAY:

WEATHER:

Mostly sunny with areas of smoke.

MAX TEMP:

75-81°F (4-6 1)

MIN RH:

Valleys:

35-43% (6-10 个)

Today's General Fire Behavior:

Expect a significant change in the fire weather. Cooling conditions will aid in securing control lines. Firing opportunities will be limited due to higher RH (30-40%). Micro-climates throughout the incident may continue to support fire spread.

Specifics:

Branch V

Division VV: Minimal fire behavior, interior smoldering all the way through to the zone break (North).

Division SS: Moderate fire behavior, interior smoldering and creeping. Backing fire adjacent to DP96 (40 Charlie Rd.),

potential slope reversal, slow ROS

Division RR: Moderate fire behavior, interior smoldering and creeping, backing fire into Craigs Creek. Potential for roll-out, spotting and slope reversal. Slow ROS.

Branch XX

Division YY: Moderate fire behavior, interior smoldering and creeping near Washington Peak and between DP 55 and DP56. Backing fire in Siskiyou fork slow ROS.

Division LL: Moderate fire behavior, interior smoldering, creeping and backing fire off of Bear Basin Rd.

Division MM: No fire behavior expected.

Division PP: Moderate fire behavior, interior smoldering, creeping and backing off DP86 (405 Rd.). Potential for rollout spotting.

Night Shift: Fire activity may continue into the evening hours based on day operation's environmental factors and fire behavior. Expect moderate to good overnight recoveries above 3500ft. West winds becoming East after midnight and downslope in the valleys. Inversion will set in at approx. 2300.

Initial Attack: Forecasted cooler conditions over the next few operational periods will reduce the probability of ignition. New starts in the area will be challenged to becoming established due to high RH, lower temps and smoke shading. Expect minimal to moderate fire behavior with surface fire, flanking, and potential single tree torching with alignment.

Aviation Safety/Watch out:

Use easily understandable directions, such as north, south, east, west, 2 o'clock, 9 o'clock, left 20 degrees, right 45 degrees, etc.

Safety Message/ Watch Out Situations:

Are there adequate safety zones and escape routes? Review what constitutes an adequate safety zone and escape route. Who has the responsibility to designate them and monitor their continued suitability?

Smith River Complex South - Safety Message

INCIDENT #CA-SRF-000968

DATE: 09-17/18-23 TIME: 0700-0700 Day/Night Shift

Mission Analysis and Engagement

- What is the mission? What is the assignment?
- Are all hazards identified and made known?
- Is additional information needed?
- Lookouts Communications Escape Routes Safety Zones
- Situational Awareness Perception of the elements in the environment!
- Comprehension of the situation and Projection of Future Status.

Tactical Firing Operations

Have a firing operations plan in place. Brief all resources in firing operations and identify firing teams and holding teams.

- Post adequate Lookouts.
- · Have a good starting and ending point for firing.
- Hazards: Drip Torch Fuel, Firing Devices and Projectiles.
- Wear and use all PPE.
- Know what your fire is doing at all times.

Mitigate or Change Tactics When Faced With:

- Indirect Fireline
- Compromised LCES
- Frontal Assault
- Change in wind speed and/or direction
- Reburn Potential
- Lack of Communications
- Structural Protection
- Spotting Becomes Common
- Downhill Line Construction

Night Shift: Patrol with a Purpose!

- Obtain a clear briefing to understand the purpose and intent of the patrol.
- Coordinate all patrol activities with adjoining patrol resources.
- Maintain strict accountability of all resources.
- Always keep the purpose of the patrol in mind before engaging.
- Always assess risk versus gain when considering taking action during patrol activities.

ICS (215A) DAY SHIFT

	INCIDENT RISK ANALTSIS	ics (215A) DAY SHIFT
BR/DV	HAZARDOUS ACTIONS - CONDITIONS	MITIGATIONS – WARNINGS – REMEDIES
ALL	STEEP TERRAIN & ROLLING DEBRIS	 Maintain 8'-10' spacing when working & walking. Do not work above any personnel. Evaluate the necessity to send personnel into areas with limited access.
ALL	INDIRECT LINE CONSTRUCTION	 Establish and maintain LCES Utilize favorable locations when constructing control features, i.e. lighter fuels, natural or existing barriers, and ridgelines. Watch out as there is unburned fuel between you and the fire.
ALL	HAZARD / DANGER TREES	 Follow Hazard Tree Safety Guidelines (IRPG p.22.) Limit the number of personnel around snags and their exposure time. Fallers mustbe qualified for the trees being felled. Be alert around hazard trees during wind events, even green trees. The hazard zone extends a minimum of 2½ tree lengths. Avoid parking vehicles or taking breaks under or near hazard trees.
ALL	TRAFFIC HAZARDS AND DRIVING	 Take extra precautions when entering or exiting the roadways. Maintain high visibility when in the operational area, and use warning lights when working on roads or traveling in smoke. Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on the uphill side. Use spotters when backing or turning around. Keep your speed down in all areas. Drive at or below posted speed limits. Use warning lights when working on roads or traveling in smoke. Use chock blocks and turn wheels into hills. Be alert for wildlife. Dusk to Dawn poses the greatest potential for accidents.
ALL	MOP-UP	 Balance the risk of exposure to hazards against the mop-up objective Evaluate areas for hazard trees and locate stump holes for avoidance. Monitor fatigue; shorten shifts to increase rest where appropriate. Review and follow "Look Up, Look Down, Look Around" procedures. Evaluate mop-up distances against what is safe and necessary.
ALL	HEAVY EQUIPMENT OPERATIONS	 Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment. Use road guards as needed to control traffic.
ALL	TACTICAL FIRING	 Follow the chain of command when undertaking burning operations. Ensure that aerial/ground ignition plans have been well briefed, including LCES and drought-related fire behavior considerations. Wear and use appropriate PPE. Initiate burning after ensuring the plan is authorized and understood by all.
ALL	NIGHT OPERATIONS	Have a purpose for where you drive and what you do. Use caution where you park or stage, especially in steep timbered areas. Use available time for briefings on roads, terrain, and potential rolling material, especially if the resources are new to the area. Use glow sticks to mark hazards, and ensure personnel have headlamps.
ALL	AIR OPERATIONS	 Follow "Aviation Watch-Out Situations" on page 46, IRPG. Do not plan on air resources for tactical support or medical transportation. Refer to page 58, IRPG, for directing bucket drops. Ensure positive communication with air resources
ALL	FIRE BEHAVIOR	 Are you seeing what we have predicted? Conduct thorough assessments before starting work. Ensure LCES is in place. Plan & communicate your exit strategy with your crew and adjacent resources. Provide additional briefing for new resources and maintain communications
ALL	WEATHER	Maintain continuous Situational Awareness based on the fire environment, observed fire behavior, hazards, and incident objectives. Take weather throughout the shift to get timely and accurate information. Is what we predicted what you are observing? Request spot weather forecasts if you notice a notable change in the weather. Communicate any changes in weather with your crew and adjacent resources

SEPTEMBER 17-18, 2023

Date/Time Prepared: 09/16/2023 - 1500

What can you do about stress?

Focus on what you're able to control:

- Eat right, stay hydrated!
- Get enough rest!
- Communicate with friends and family!

If you're feeling overwhelmed, or if you feel like talking to someone can be helpful – HR is able to assist and/or point you in the right direction.

CALIFORNIA INTERAGENCY INCIDENT MANAGEMENT TEAM 4

EXPECTATIONS

Welcome to this Incident.
Thank You for your Cooperation & Support!

2023

CONDUCT AND BEHAVIOR

This team is committed to "ZERO TOLERANCE" of careless, illegal, inappropriate and unsafe actions.

Alcohol and/or illegal drugs are **NOT allowed** within the incident environment or while actively assigned to the incident. Local Law Enforcement Officials will be called to deal with any suspected illegal activities. Each employee has the responsibility to be ready, willing, and able to perform the duties for which they are qualified.

Sexual Harassment

Inappropriate actions or comments will not be tolerated. Everyone is expected to act in a professional manner. It is your responsibility to stop inappropriate actions or comments immediately upon becoming aware of such. Sexual Harassment must be reported to the Human Resource Specialist or Incident Commander. When outside of your designated sleeping area, you are required to wear at least a shirt, appropriate shorts, and shoes or sandals. If you need clarification of these expectations contact the Human Resource Specialist or IC. What we PERMIT we PROMOTE!!!!

SAFETY

The commitment to and accountability for safety is a joint responsibility of firefighters, managers and administrators. Individuals must personally be committed and responsible for their own performance and accountability. Everyone assigned to this incident can expect an assignment that follows all safety rules & regulations. Every person is expected to perform his or her duties in compliance with all known safety practices at all times. Anything less is unacceptable.

EMPHASIS AREAS

Training

All trainees and trainers are expected to follow the procedures outlined in the California Interagency Incident Management Team 4 **Training Expectations** – **See back page.**

Evaluations

All supervisory personnel assigned will complete an ICS 225 Incident Personnel Performance Rating form for their assigned resources according to agency policy or contractual agreement.

Injuries/Claims

Ensure all injuries and potential claims are reported to the Comp/Claims Unit for completion of appropriate paperwork. Contract claims will be reported to the Procurement Unit Leader.

Work Rest Cycles

The 2: 1 work/rest ratio is mandatory. For every two hours on shift you will be required to rest for one hour. Every effort shall be used to limit work hours to a maximum of 16. If circumstances require you to exceed 16 hours, this needs to be coordinated in advance with your supervisor and the Justification/Mitigation form completed to support the excessive hours prior to submitting for approval by the IC. It is your responsibility to comply with this direction and provide the appropriate documentation to your Supervisor and Finance.

Position Qualifications

Personnel shall only be assigned to positions for which they are qualified. Proof of qualifications shall be approved prior to being assigned to any fire line position. Non-fireline positions may be filled based on the word of the employee pending home unit confirmation, which must be requested immediately. Contract dozer operators, tactical water tender operators and contract fallers must provide proof that they have received the annual fire refresher training.

Engagement/Disengagement

The 10 Standard Orders & 18 Watchout Situations will be followed at all times and mitigated as needed. Staying aware of your situation is critical. This includes Geographic Area and incident briefings. Follow the Risk Management Process outlined in the Incident Response Pocket Guide.

Debriefing

All Branch Directors/Division/Group Supervisors will report to their Supervisor and Situation Unit at the end of the operational period for debriefing with emphasis on the accomplishment of objectives. All unit logs (ICS 214) will be turned in after the debriefing to Documentation reflecting accomplishment and/or special incidents that occurred during the operational period.

Crew Time Reports/Shift Tickets

It is your responsibility to ensure all time is properly accounted for and recorded each shift. The records are to be <u>reviewed and signed</u> by the next level supervisor. A finance "Rules of Engagement" document will be provided in the IAP explaining further requirements.

Social Media

It is your responsibility to know and understand guidelines for firefighter photography, video and social media use. California Interagency Incident Management Team 4 goal is simple: to participate online in a respectful, relevant way that protects our incident's professional reputation, does not confuse the public about the incident and follows the letter and spirit of the law. Be mindful that social media postings can be viewed as unprofessional, damage careers and lead to disciplinary actions. For further information, contact the Public Information Officer.

We look forward to working with you as a valuable member of this effort. If you have any questions or feedback, please feel free to contact any Command and General Staff Member.

ROCKY W. OPLIGER

Incident Commander

MIKE NOBLES

PUBLIC INFORMATION

Direct any public or media inquiries to the Information Center at 707-383-9727 (staffed from 0800-2000) or <u>2023.SmithRiverComplex@firenet.gov</u> Please email your photos so we can help tell the story of these fires.

Remember we are all Information Officers.

Here are some helpful tips:

Fire Information is Everyone's Job

Notify chain of command and incident Public Information/ Affairs Officer (PIO/PAO) if media arrives unescorted. Provide for their safety until an escort arrives.

Media Interviews:

- Develop and deliver key factual messages; anticipate tough questions.
- Give simple answers (10-20 sec.) and avoid using jargon or acronyms.
- Stick to your knowledge and avoid speaking for other incident personnel.
- Never speak off the record, exaggerate, or try to be cute or funny.
- Keep quiet in between questions; if you misspeak, ask to start again.
- Be personable, professional, and presentable (remove sunglasses and hat).
- Conclude with a safety or wildfire prevention message. Social Media PAUSE Before Posting:
- PERCEPTION You are representing the jurisdictional agency and your home unit.
- <u>A</u>UTHORITY Be aware of federal and host agency social media policies.
- UNDERSTANDING Know the incident objectives. Never post negative, controversial, or unsafe messages to personal accounts. Ask a PIO/PAO or supervisor for clarification.
- SAFETY Do not compromise your safety while taking photos and always wear proper PPE. Never post photos of children, inmates, investigations, or cultural sites; be sensitive to burned structures and private information.
- EXPECTATION Share relevant content or photos with PIOs/PAOs to help tell the incident story.

Q: How does Bigfoot capture special memories?

A: With a pho-TOE.

IMPORTANT: <u>Yellow/White Striped flagging 'Equipment Exclusion'</u> indicates resource <u>AVOIDANCE</u> areas.

Port Orford Cedar root disease

Some local drainages are infected with a root disease that spreads via mud and water. To prevent spreading this disease to uninfected areas, all water tenders and engines will apply bleach to their tanks in a 1:1000 ratio (using bleach with 6.0 % Sodium hypochlorite).

Fish Screens: Coho Salmon Critical Habitat

Most rivers and streams in this area are considered critical habitat for Threatened Coho salmon. Please ensure that Mark 3 and Engine/Tender suction hoses have the appropriate screen attached. Talk to a READ if you think you need a screen!

WEED WASH:

The area in and around the Smith River Complex, are home to many sensitive species. Infestations of highly invasive plant species are one of the largest threats to sensitive species populations here. Spread via vehicles and foot traffic as well as re-activation via fire is of high concern. To help protect these sensitive places, do not park in <u>and</u> try to avoid areas flagged areas. Make sure to visit the WEED WASH at either Gasquet Base Camp OR Elk Valley ICP for demob and additionally if needed, as directed by the READs. Located on Elk Valley Rd Camp.
