Fire Weather Forecast

FORECAST NO: 34

PREDICTION FOR: Wednesday-Thursday

DATE: September 20th, 2023

FORECAST ISSUED: 1900 September 19th, 2023

FIRE: Smith River Complex South

UNIT: CA-SRF-968

IMET: tom.lonka@noaa.gov (240-205-9007)

SIGNED: Tom Lonka

Gusty Northeast Winds and Dry through Thursday

WEATHER DISCUSSION: * Valley elevations = 400-1200ft (Gasquet), Ridgetop elevations = 3500 ft (Camp Six) * Poor RH recoveries are expected tonight in the higher elevations as gusty north to northeast winds persist. Dry conditions and the gusty winds will continue through Thursday, with late this afternoon into this evening seeing the strongest winds. Some modest improvement in minimum humidity values are expected today. Fair to good recoveries are expected tonight in the lower elevations, though a dry layer will remain along higher slopes and ridges with fair to poor recoveries. The many microclimates will produce varying wind speeds and directions in drainages and valleys today through Thursday.

TODAY:

WEATHER:

Sunny and windy.

Max. spot dist.: 64 ch. or (0.8 mile)	GS2: Burn scars with moderate dead/down, grass, manzanita brush	1.4 ch/hr	70 - 90 ch/hr	6" – 1.4'	7' - 9'				
Prob. Ignition: 59% - shaded 64% - unshaded	TU5: Very high load mixed conifer and shrubs – heavy forest litter, deep duff, heavy dead/down fuels	0.4 ch/hr	20 - 25 ch/hr	1' – 2'	9' – 11'				
LAL: 1 CWR (0.10") 0%	TL3/8: Long-needle pine litter, Gambel oak and sparse grass	0.1 ch/hr	1 - 3 ch/hr	< 6"	1' – 2'				

Today's General Fire Behavior:

Drier, windy conditions have increased fire activity and lengthened burn windows. Fire behavior is expected to increase throughout the day on exposed, unsheltered slopes with moderate ROS, higher flame lengths, and isolated torching. Creeping, backing, and smoldering is projected to continue in sheltered, shaded areas such as drainages, with slow ROS and lower flame lengths.

Specifics:

Branch V:

Division VV: Minimal fire behavior, interior smoldering all the way to the zone break to the (North).

Division SS: Moderate fire behavior, interior smoldering, and creeping, backing fire adjacent to DP96 (40 Charlie Road) potential slope reversal, slow ROS.

Division RR: Moderate fire behavior, interior smoldering and creeping, backing fire into Craigs Creek, potential slope reversal, slow ROS.

Branch XX:

Division YY: Moderate fire behavior, interior smoldering, creeping, and backing fire near Washington Peak and between DP 55/DP56. Backing fire in Siskiyou fork, slow ROS.

Division LL: Moderate fire behavior, interior smoldering, creeping, and backing fire off Bear Basin Rd. and into Hurdy Gurdy Creek. If fire becomes established on Tributary Hurdy Gurdy Butte and gets in alignment with wind on south facing slopes expect a faster ROS and higher flames lengths.

Division MM: No Fire behavior expected.

Division PP: Minimal fire behavior, interior smoldering, and creeping.

Night Shift: Fire behavior is likely to increase due to predicted high winds and drier conditions from what was observed over the past week. Creeping, backing, and possibly some isolated single tree torching along ridges and down the lee side of ridges is expected. On steeper topography, the fastest spread method for fire will continue to be rollout.

Initial Attack: If new starts occur, use the above matrix to estimate fire behavior based on the dominant fuel type. New starts may exhibit moderate rates of spread and higher flame lengths if fire becomes established on exposed, unsheltered slopes where sun and wind can preheat and dry out fuel moistures.

Aviation Safety/Watchout

Bucket drops can carry thousands of pounds of water that can injure personnel, damage vehicles and equipment. Before receiving a water drop, ensure the drop area is clear of all personnel and equipment.

Safety Message/Watchout Situations

Isolated flare-ups are possible in areas that have not shown activity for a couple days. Snags may fall into fresh fuel.

Smith River Complex South - Safety Message

INCIDENT #CA-SRF-000968

DATE: 09-20/21-23 TIME: 0700-0700 Day/Night Shift

OPERATIONAL TEMPO

Maintaining operational tempo is not solely about speeding up to match or exceed the pace of the environment. It is also about knowing when operations should slow down and why.

We are most vulnerable to accidents and errors when operational tempo changes, especially when it changes quickly. Maintaining good situation awareness despite change in operational tempo represents a considerable challenge. The key to managing operational tempo successfully is monitoring the changing environment and capabilities of the team, and then applying good judgment to determine whether to push forward or pull back while making necessary adjustments.

Working with Heavy Equipment

- Don't approach until you have eye contact with the operator and all implements have been lowered.
- Avoid working downhill from equipment.
- Communicate all hazards to the operator.
- During night shift or low visibility, use a headlamp or glow sticks so the operator can see you.
- Equipment operators can have a difficult time see you ground personnel; take responsibility for your safety and all of those around you.

Driving

- When driving, keep the speed at or below the posted speed limit and turn your headlights on. Is the posted speed limit a safe speed under current conditions and traffic?
- Use caution on unimproved roads as some have soft shoulders. Some roads are also only one lane with pullouts.
- Road surfaces are variable with washboard conditions and thick dust that can compromise turning and braking.
- Watch for and anticipate stock and wildlife especially at dusk and dawn.
- Always fasten your seatbelt before the vehicle is set into motion. Use backers.
- Don't tailgate, especially in dusty conditions.

Hazard Tree Indicators

- Tree burning for any period of time.
- High risk tree species (rotten and shallow roots).
- Numerous downed trees in the area.
- Dead, broken, or burning tops and limbs overhead
- Accumulation of needles, bark, or limbs.
- Leaning or hung-up trees.

Eliminate the hazards with qualified sawyers and modify suppression tactucs or fireline location to avoid high risk areas. Always provide timely feedback to others regarding any hazard trees.

ICS (215A) DAY SHIFT

BR/DV	HAZARDOUS ACTIONS – CONDITIONS	MITIGATIONS – WARNINGS – REMEDIES
ALL	STEEP TERRAIN & ROLLING DEBRIS	 Maintain 8'-10' spacing when working & walking. Do not work above any personnel. Evaluate the necessity to send personnel into areas with limited access.
ALL	WEATHER	 Maintain continuous Situational Awareness based on the fire environment, observed fire behavior, hazards, and incident objectives. Take weather throughout the shift to get timely and accurate information. Is what we predicted what you are observing? Request spot weather forecasts if you notice a notable change in the weather. Communicate any changes in weather with your crew and adjacent resources
ALL	HEAVY EQUIPMENT OPERATIONS	 Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment. Use road guards as needed to control traffic.
ALL	TRAFFIC HAZARDS AND DRIVING	 Take extra precautions when entering or exiting the roadways. Maintain high visibility when in the operational area, and use warning lights when working on roads or traveling in smoke. Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on the uphill side. Use spotters when backing or turning around. Keep your speed down in all areas. Drive at or below posted speed limits. Use warning lights when working on roads or traveling in smoke. Use chock blocks and turn wheels into hills. Be alert for wildlife. Dusk to Dawn poses the greatest potential for accidents.
ALL	FIRE BEHAVIOR	 Are you seeing what we have predicted? Conduct thorough assessments before starting work. Ensure LCES is in place. Plan & communicate your exit strategy with your crew and adjacent resources. Provide additional briefing for new resources and maintain communications
ALL	INDIRECT LINE CONSTRUCTION	 Establish and maintain LCES. Utilize favorable locations when constructing control features, I.e. lighter fuels, natural or existing barriers, and ridgelines. Watch out as there is unburned fuel between you and the fire.
ALL	AIR OPERATIONS	 Follow "Aviation Watch-Out Situations" on page 46, IRPG. Do not plan on air resources for tactical support or medical transportation. Refer to page 58, IRPG, for directing bucket drops. Ensure positive communication with air resources
ALL	STRATEGIC/TACTICAL FIRING	 Follow the chain of command when undertaking burning operations. Ensure that aerial/ground ignition plans have been well briefed, including LCES and drought-related fire behavior considerations. Wear and use appropriate PPE. Initiate burning after ensuring the plan is authorized and understood by all.
ALL	HAZARD / DANGER TREES	 Follow Hazard Tree Safety Guidelines (IRPG p.22.) Limit the number of personnel around snags and their exposure time. Fallers mustbe qualified for the trees being felled. Be alert around hazard trees during wind events, even green trees. The hazard zone extends a minimum of 2½ tree lengths. Avoid parking vehicles or taking breaks under or near hazard trees
ALL	MOP-UP	 Balance the risk of exposure to hazards against the mop-up objective Evaluate areas for hazard trees and locate stump holes for avoidance. Monitor fatigue; shorten shifts to increase rest where appropriate. Review and follow "Look Up, Look Down, Look Around" procedures. Evaluate mop-up distances against what is safe and necessary.
ALL	NIGHT OPERATIONS	 Have a purpose for where you drive and what you do. Use caution where you park or stage, especially in steep timbered areas. Use available time for briefings on roads, terrain, and potential rolling material, especially if the resources are new to the area. Use glow sticks to mark hazards, and ensure personnel have headlamps.

Human Resources Message Smith River Complex September 20, 2023

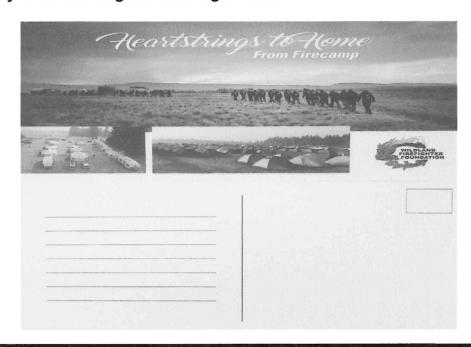

HEARSTRINGS

TO HOME

I want to make you all aware I have another option for you to communicate with those waiting on you to return home. The Wildland Firefighter Foundation has a campaign called "HEARTSTRINGS TO HOME" and have provided postcards so you may stay connected with family and friends giving them something tangible they can hold in their hands sent by you. It's a nice way to bring a smile to the face of someone you miss and who is waiting on your return.

Pick up a postcard from Human Resources and write your message remembering to address it complete with zip code and drop it back off with Human Resources. I'll apply the postage and drop it in the outgoing mail.

Our hope is that this will help you to connect with those waiting at home and it lets them know you are missing and thinking of them too.

If you have any questions or would like to chat, do not hesitate to contact me.

Remember we are all an Information Officer - helpful tips in your IRPG page 101:

JOKE THE WEEK:

Why don't pirates take a shower before they walk the plank?

They just wash up on shore.

IMPORTANT: <u>Yellow/White Striped flagging 'Equipment Exclusion'</u> indicates resource <u>AVOIDANCE</u> areas.

Port Orford Cedar root disease

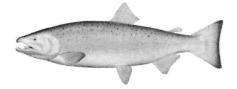

Some local drainages are infected with a root disease that spreads via mud and water. To prevent spreading this disease to uninfected areas, all water tenders and engines will apply bleach to their tanks in a 1:1000 ratio (using bleach with 6.0 % Sodium hypochlorite).

Fish Screens: Coho Salmon Critical Habitat

Most rivers and streams in this area are considered critical habitat for Threatened Coho salmon. Please ensure that Mark 3 and Engine/Tender suction hoses have the appropriate screen attached. Talk to a READ if you think you need a screen!

WEED WASH:

The area in and around the Smith River Complex, are home to many sensitive species. Infestations of highly invasive plant species are one of the largest threats to sensitive species populations here. Spread via vehicles and foot traffic as well as re-activation via fire is of high concern. To help protect these sensitive places, do not park in and_try to avoid areas flagged areas. Make sure to visit the WEED WASH at either Gasquet Base Camp OR Elk Valley ICP for demob and additionally if needed, as directed by the READs. Located on Elk Valley Rd Camp.
