### **Fire Weather Forecast**

FORECAST NO: 35

PREDICTION FOR: Thursday-Friday

DATE: September 21st 2023

FORECAST ISSUED: 1900 September 20th, 2023

**FIRE: Smith River Complex South** 

UNIT: CA-SRF-968

SIGNED: Tom Lonka

\*\*\*Gusty Northeast Winds and Dry through Thursday\*\*\*

**WEATHER DISCUSSION:** \* Valley elevations = 400-1200ft (Gasquet), Ridgetop elevations = 3500 ft (Camp Six) \* Dry conditions and the gusty northeast winds will continue through today as low pressure slowly moves through the Great Basin region. Minimum relative humidities will trend downwards today compared to yesterday, with temperatures slightly warmer. Good recoveries are expected tonight in the lower elevations below a 1,500 ft inversion, though a dry layer will remain along higher slopes and ridges with fair recoveries expected. The gusty winds today will finally abate this evening. The many microclimates will produce varying wind speeds and directions in drainages and valleys today.

TODAY:

WEATHER: Sunny and breezy.

#### Today's General Fire Behavior:

Expect an increase in fire activity due to several operational periods of heating and drying. Spotting potential in both branches near previous firing operations. Fire activity displayed in consuming interior islands is a good indicator of potential fire behavior outside the line (day or night). North to Northeast winds predicted today, West flanks will be impacted. Be mindful of micro-climates and thermal belts...take weather often.

#### Specifics:

#### Branch V

**Division SS/VV:** Moderate fire behavior, interior smoldering and creeping. Backing fire off the 40 Charlie Rd. NE winds could increase fire behavior. Firing operations will be challenging due to forecasted winds. Potential spotting and slope reversal, slow ROS.

**Division RR:** Moderate fire behavior, interior smoldering and creeping, backing fire into Craigs Creek. Potential for roll-out, spotting and slope reversal. Slow ROS.

#### **Branch XX**

**Division YY:** Active fire behavior. Uphill fire spread in Siskiyou Fork drainage (East), fuel and slope driven into the wilderness, burning into the 2015 Bear fire footprint. Plausible for slope reversal up to Jawbone rd. (Ridge adjacent to Hurdy Gurdy). **Division LL:** Moderate to active fire behavior, interior smoldering, creeping and backing on the Hurdy Gurdy. Expect an increase in fire behavior due to wind on both the NW and W flanks. East flank, interior smoldering. Potential for spotting. **Division MM:** No fire behavior expected.

Division PP: Minimal fire behavior, interior smoldering, creeping. NE wind will aid in reinforcing control lines.

**Night Shift:** Fire activity may continue into the evening hours based on day operation's environmental factors and fire behavior. Expect fair to good overnight recoveries above 3500ft. NE winds will continue into the evening hours. Shallow inversion (1500') will set in at approx. 2300.

**Initial Attack:** The fire environment is primed for increased activity. Expect new starts to be somewhat resistant to suppression efforts due to increase winds and fuel receptibility. Potential for an upturn in ROS and spotting with slope alignment.

#### **Aviation Safety/Watch out:**

Blowing dust, sand, or rocks caused by the helicopter's rotor wash can be hazardous. Institute dust abatement actions at the landing area if necessary.

#### Safety Message/ Watch Out Situations:

Environmental conditions that increase risk from hazard trees: Strong winds or erratic winds from storm cells. Night operations. Machine operations. Air operations - cargo drops, water or retardant drops, helicopter take off/landing, low-level flights. Steep slopes. Diseased or bug-killed areas.

### Smith River Complex South - Safety Message

INCIDENT #CA-SRF-000968

DATE: 09-21/22-23 TIME: 0700-0700 Day/Night Shift

### **Hazard Tree Risk Management**

- Eliminate the hazards with qualified sawyers, blasters/explosives, or heavy equipment.
- Avoid hazards by designating "No Work Zones" (NWZ) (flag, sign, and map).
- Modify suppression tactics or fireline locations to avoid extreme/high-risk rated areas.
- Post lookouts to help maintain a secure area.
- Fireproof potential hazard trees to prevent ignition.
- Initiate road/traffic control and area closure.
- · Keep clear of bucket drops near trees/snags.
- Establish trigger points for repositioning to secure areas in response to high winds.
- Minimize exposure time in hazardous tree areas using efficient felling techniques and limiting the number of personnel in hazardous areas.

### Maintain prompt communications with your forces, your supervisor, and adjoining forces.

### **Chainsaw Safety**

Chainsaw safety is every saw operator's job.

- Always wear proper personal protective equipment (PPE) when handling or working around chainsaws.
- Take the time to inspect the chainsaw before operating the saw.
- Make sure you're aware of your surroundings while operating the chainsaw.
- Complete a personal Risk Assessment to determine if you are comfortable completing the task at hand – don't let job performance pressure force you in over your skill level.

### **Individual Safety Responsibilities**

- Fitness for duty
- Utilization of personal protective equipment.
- Following safe work practices.
- Using the correct reference materials.
- Ensure instructions are clearly understood.
- · Maintain situational awareness.

Do not expect someone else to be responsible for your safety. Take it upon yourself to make personal safety your number one priority.

### Human Resources Message Smith River Complex September 21, 2023

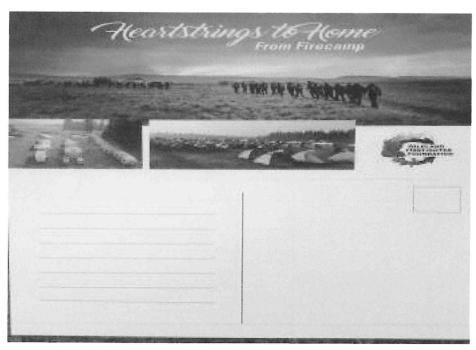

### **HEARSTRINGS**

TO HOME

I want to make you all aware I have another option for you to communicate with those waiting on you to return home. The Wildland Firefighter Foundation has a campaign called "HEARTSTRINGS TO HOME" and have provided postcards so you may stay connected with family and friends giving them something tangible they can hold in their hands sent by you. It's a nice way to bring a smile to the face of someone you miss and who is waiting on your return.

Pick up a postcard from Human Resources and write your message remembering to address it complete with zip code and drop it back off with Human Resources. I'll apply the postage and drop it in the outgoing mail.

Our hope is that this will help you to connect with those waiting at home and it lets them know you are missing and thinking of them too.

If you have any questions or would like to chat, do not hesitate to contact me.

Adam Alvarez- HRSP- 707-373-8715

### **PUBLIC INFORMATION**

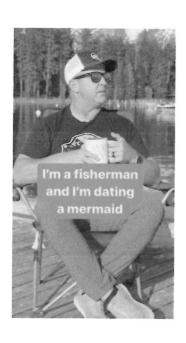

This past week, your Public Information Officers have engaged with thousands of members of the local community. In turn, these community members share our information with their friends, family and others. Our goal is to share accurate, relevant fire information, and especially highlight your efforts on and off the fireline.

There is an overwhelming amount of community support, appreciation and gratitude for the hard work of everyone on this team. We hear this from members of the community every day, and we want to make sure you're hearing it too.

### THANK YOU FOR YOUR SERVICE

Direct any public or media inquiries to the Information Center at 707-383-9727 (8 am to 8 pm) or email 2023.SmithRiverComplex@firenet.gov. Please send us your photos to help us tell the story of the fire. See page 101 or your IRPG for helpful tips on Public Information.
