### Fire Behavior Forecast #33 TYPE OF FIRE: Wildfire Incident: Smith River Cx North CA-SRF-000968 OPERATIONAL PERIOD: Sept. 22, 2023 0700-1800 DATE/TIME ISSUED: September 21, 2023 1900 Signed: Wm. Scott MacDonald FBAN: Scott MacDonald (541)-993-3444

### Weather Summary - See Incident Weather Forecast:

### **Fuels**

Shrub: Shrubs and brush 1 to 3 feet high with a very low load of grass intermixed with sparse conifer. Manzanita brush and other live fuels are moderately available for consumption with independent fire. These fuels will be more reactive to higher wind speeds and show greater rates-of-spread in exposed areas (ridges)

Timber litter and shrub: Primary carrier of the fire is understory brush with timber and leaf litter. Expect moderate spread rates in sheltered areas. Canopy closure shelters fuels from wind, making fire spread to be slow with low to moderate winds.

Grass/light fuels: Primary carrier of the fire is open grass areas with light shrub and mixed timber at lower elevations (valley bottoms in IA response area. Grasses are fully cured with seasonal drying, and will be reactive to higher winds

Fire Behavior: Moderate	Fuel/Type Model	Maximum Rate of Spread	Maximum Flame Length
Max. spot distance: 0.1 mile Wild Rivers ERC%: 82 <sup>nd</sup> percentile	Shrub	1 - 3 Ch./hr.	1 - 3 ft.
BI%: 78 <sup>th</sup> percentile	Timber litter shrub	2 - 7 Ch./Hr.	1 - 4 ft.
POI is 40 to 55 percent	Grass (lower elevations)	10 - 30 Ch./hr.	2 - 6 ft.

Expected Fire Behavior is Based on the Warmest, Driest, Windiest Conditions Forecasted assuming wind/slope/fuels are aligned

General/Potential: Mostly clear skies; Temps and RH will continue to moderate fire activity, along with lower winds on ridges/exposed areas, Moderate ROS potential with any alignment of slope/wind (see table above). POI unchanged from yesterday.

Div. E/F: If initial attack fire occurs expect moderate fire behavior affected by wind, slope and heavy timber with potential for short range (less than .1 miles) spotting from timber stands.

Div. G/H: Fire activity will continue to be low to moderate in islands of fuel; SW winds occurring in afternoon and lower than yesterday; some alignment with drainage and the terrain. Smoldering, creeping, and heavy fuels continue consuming. Expect green islands to continue to burn with backing/flanking behavior, and the potential for a single tree or small group torching if wind/slope/fuels align.

India/Kilo: Smoldering and creeping with continued moderate dry weather. Potential remains for unburned islands of fuel to continue consuming until higher fuel moistures occur with precipitation.

Utility Group: The green island will continue to burn at a moderate level of fire activity, mostly backing and flanking, smoldering, and creeping. Steep slopes with wind alignment may provide for short upslope runs (higher ROS), with limited spotting distance. Continued consumption of heavy down woody and areas of duff

IA Response: Potential for rapid ROS in light flashy fuels in valley bottoms. Shifting or battling winds may change direction of fire quickly.

### Air Operations:

Clear air for most of the day. Lower winds may provide an opportunity for any missions requiring aircraft.

### Safety:

Common denominator of tragedy fires: On relatively small or deceptively quiet areas of large fires. Keep your SA up, and ensure you have good escape routes, safety zones, lookouts, and communications.

**SAFETY** starts with **YOU** 

**INCIDENT: Smith River Complex** 

DATE: 9/22/23

Operations: Day Shift

# Major Hazards and Risks: HAZARD TREES, DRIVING, HEAVY EQUIPMENT OPERATIONS, POWERLINES, STEEP TERRIAN, AND RUGGED ACCESS

### Fire Order of the Day - Give Clear Instructions And Be Sure They Are Understood

Hazard Trees - Fire Weakened Trees. Be aware there are both fire weakened and naturally occurring snags throughout the complex. While some areas of the fire are not loaded with "Big Wood" there are still lots of trees enough to injure or kill the un-aware. Do you have trees beyond or your crew's ability to fall, ask for help w in doubt?

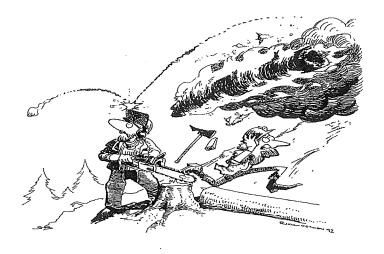

Powerlines- Fire activity near high voltage electrical lines can cause serious injuries to a firefighter. Be aware of surroundings, lookup and communicate any identified powerlines to your crewmembers. Contact your supervisor the local power company when lines are threatened or involved. Review your IRPG on powerline safety.

Interior work is occurring. As secured fire lines are starting to, or continuing to be mopped up, keep your situat awareness up by looking up, down and around for hazards or work situations with hazardous possibilities.

DO YOU KNOW YOUR PART IN A MEDICAL RESPONSE? KNOW WHERE HELP IS COMING FROM? CONSULT THE IAP MEDICAL PLAN, REVEW IT AND THE MEDICAL INCIDENT REPORT AT THE ST OF THE WORK SHIFT.

Remember, anyone who is involved in an accident, or comes across someone who is injured can start the Med Plan process!!!

## Watch Out Situation of the Day

3.ON A HILLSIDE WHERE ROLLING MATERIAL CAN IGNITE FUEL BELOW

### HAZARD TREE SAFETY SUMMARIZED FROM THE IRPG PAGE:

"Hazard trees, both dead snags and live green trees, one of the most common risks encountered on the fireline. All firefighters should frequently survey the work area for potential hazard trees."

### **HAZARD TREE INDICATORS:**

- Trees burning for any period of time.
- Numerous downed trees
- Dead, broken or burning tops and limbs over
- Accumulation of downed limbs
- Absence of needles, bark or limbs
- Leaning or hung up

### Human Resource Message

# Smith River Complex (North) Sep 22, 2023

### Are You A Difficult Person?

Of course, everyone is sometimes irritable, but some people are so complex that they strain others' lives and work. Have you ever considered that you could be difficult to work with?

### Tips For Overcoming Negative Aspects In Yourself

- Learn to recognize when your defensive mechanisms come up. Then, realize that you are probably not being attacked.
- When you catch yourself feeling defensive, avoid reacting so quickly.
- Learn how to listen when someone asks a question or makes a suggestion.
- Ask people to re-state their questions/comments/suggestions.
- Try to understand what others are saying by repeating back what you think you hear.
- You may want to ask for more time to respond and then get back to them. This will
  give you time to work on the question/comment/suggestion without the pressure of
  being on the spot.
- Do consider that other people have good ideas that are just as valid as yours.
- Recognize that changing learned patterns of insecurity and defensiveness may take years of work.
- Learn to understand your personality and your unique strengths and weaknesses.
