***Flood Watch Sunday Afternoon Through Monday Evening ***

* Valley elevations = 400-1200ft (Gasquet), Ridgetop elevations = 3500 ft (Camp Six) * WEATHER DISCUSSION: A weak weather system will move in off of the Pacific today with clouds increasing and a chance of sprinkles this afternoon and evening. Increased onshore flow with cloud cover will result in cooler temperatures and higher humidity. A more robust and moist Pacific storm system will bring widespread wetting rains late Sunday through Monday. Monday afternoon will turn showery with a chance for wet thunderstorms. A cool and showery pattern will continue into mid week.

TODAY:

WEATHER: Increasing clouds. Smoke and haze. Chance of sprinkles in the afternoon and evening.

Today's General Fire Behavior:

The fire environment is poised to moderate quickly over the next few operational periods. 30-50% chance of light rain this evening. Low temps and high RH will reduce fire activity and aid in reinforcing control lines. Sheltered fuels and heavy down and dead will continue to smolder and creep.

Specifics:

Branch V

Division SS/VV: Minimal fire behavior, interior smoldering and creeping. Backing in open line adjacent to DP96 and DP97, slow ROS

Division RR: Minimal fire behavior, interior smoldering and creeping, backing into Craigs Creek. Potential for roll-out and slope reversal, Slow ROS.

Branch XX

Division YY: Active fire behavior. Flanking fire spread to the Southeast in Siskiyou Fork drainage, fuel and slope driven into the wilderness, burning in the 2015 Bear fire footprint.

Division LL: Moderate fire behavior, interior smoldering, creeping, backing with scattered heat on the Hurdy Gurdy, specifically the Northwest, Southwest and Southeast flanks.

Division MM: No fire behavior expected.

Division PP: Minimal fire behavior, interior smoldering, creeping.

Initial Attack: Limited potential for new starts. IA's will pose minimal resistance to suppression efforts due to environmental factors (low temperatures, high RH, limited solar radiation, and marine influence).

Aviation Safety/Watch out:

When giving ground descriptions, describe the location as if you are viewing it from the direction an aircraft would be traveling. Use a common frame of reference for the sender and receiver.

Safety Message/ Watch Out Situations:

Smoldering fire behavior still carries a number of hazards – ash pits, stumpholes, steam burns, and crud in the eyes. Ensure safe practices are followed when providing suppression repair and mopping up.

Smith River Complex South - Safety Message

INCIDENT #CA-SRF-000968

DATE: 09-23-23 TIME: 0700-1900 Day Shift

Foot Travel in Steep Terrain

- When walking through steep and rocky terrain, watch footing and maintain proper spacing.
- · Identify safe routes and local conditions.
- Test and use secure footing.
- Watch for overhead hazards, carry tools on the downhill side, and wear gloves.
- Treat "hot spots" on feet before they become blisters.

Ash Pit Hazards

- Identify high-risk landscapes extensive root systems of trees and shrubs, deep duff or peat, landscapes that have been once cultivated or manipulated by heavy equipment, old dozer piles, sawmills, timber sale yards, or decking areas. Animal dwellings (small rodent holes, beaver holes near dams and stream beds, badger and coyote dens)
- · White ash is sometimes an indicator of ash pits
- With the sun behind the suspected ash pit, look for small, nearly translucent smoke that dissipates quickly above the ground
- · Ash pits often give off the smell of incomplete combustion or creosote burning
- · Identify and flag all hazardous discovered ash pits

CIRCLE OF SAFETY:

- Walk around the vehicle.
- Check the windshield, wipers, and wiper fluid levels.
- Keep windows, mirrors, and lights clean to see better and be seen.
- Check headlights, turn signals, tail lights, reflectors, and running lights.
- · Adjust mirrors.
- Check front and back tires (including wheels and lug nuts).
- Under the hood, check all fluid levels and especially the Air Filter

STATISTICS

- NFPA estimates 65,880 FF injuries occurred in the line of duty in 2017.
- An estimated 45% of those injuries occurred during fire-ground operations.
- The leading injuries during fire-ground operations involved injuries such as sprains, strains, and muscular pain attributed to fatigue
- An estimated 19% of those injuries involved loss of work.
- Injuries are more prevalent between the hours of 2:00 and 5:00 PM

ICS (215A) DAY SHIFT

BR/DV	HAZARDOUS ACTIONS - CONDITIONS	MITIGATIONS – WARNINGS – REMEDIES
ALL	STEEP TERRAIN & ROLLING DEBRIS	 Maintain 8'-10' spacing when working & walking. Do not work above any personnel. Evaluate the necessity to send personnel into areas with limited access.
ALL	TRAFFIC HAZARDS AND DRIVING	 Take extra precautions when entering or exiting the roadways. Maintain high visibility when in the operational area and use warning lights when working on roads or traveling in smoke. Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on the uphill side. Use spotters when backing or turning around. Keep your speed down in all areas. Drive at or below posted speed limits. Use warning lights when working on roads or traveling in smoke. Use chock blocks and turn wheels into hills. Be alert for wildlife. Dusk to Dawn poses the greatest potential for accidents.
ALL	HAZARD / DANGER TREES	 Follow Hazard Tree Safety Guidelines (IRPG p.22.) Limit the number of personnel around snags and their exposure time. Fallers mustbe qualified for the trees being felled. Be alert around hazard trees during wind events, even green trees. The hazard zone extends a minimum of 2½ tree lengths. Avoid parking vehicles or taking breaks under or near hazard trees
ALL	INDIRECT LINE CONSTRUCTION	 Establish and maintain LCES. Utilize favorable locations when constructing control features, I.e., lighter fuels, natural or existing barriers, and ridgelines. Watch out as there is unburned fuel between you and the fire.
ALL	HEAVY EQUIPMENT OPERATIONS	 Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment. Use road guards as needed to control traffic.
ALL	MOP-UP	 Balance the risk of exposure to hazards against the mop-up objective Evaluate areas for hazard trees and locate stump holes for avoidance. Monitor fatigue; shorten shifts to increase rest where appropriate. Review and follow "Look Up, Look Down, Look Around" procedures. Evaluate mop-up distances against what is safe and necessary.
ALL	WEATHER	 Maintain continuous Situational Awareness based on the fire environment, observed fire behavior, hazards, and incident objectives. Take weather throughout the shift to get timely and accurate information. Is what we predicted what you are observing? Request spot weather forecasts if you notice a notable change in the weather. Communicate any changes in weather with your crew and adjacent resources
ALL	FIRE BEHAVIOR	 Are you seeing what we have predicted? Conduct thorough assessments before starting work. Ensure LCES is in place. Plan & communicate your exit strategy with your crew and adjacent resources. Provide additional briefing for new resources and maintain communications.
ALL	AIR OPERATIONS	 Follow "Aviation Watch-Out Situations" on page 46, IRPG. Do not plan on air resources for tactical support or medical transportation. Refer to page 58, IRPG, for directing bucket drops. Ensure positive communication with air resources
ALL	STRATEGIC/TACTICAL FIRING	 Follow the chain of command when undertaking burning operations. Ensure aerial/ground ignition plans have been well briefed, including LCES and drought-related fire behavior considerations. Wear and use appropriate PPE. Initiate burning after ensuring the plan is authorized and understood by all.

HUMAN RESOURCE MESSAGE

The Forest Service is committed to maintaining a work environment in which all people are treated with dignity, fairness, and respect, and are free from harassment, bullying, and retaliation. This policy applies to all Forest Service employees in their working relationship with other Federal employees, non-Federal employees, and the public. The policy also applies to persons working under contract or other formal agreements with the Forest Service, such as Administratively Determined (AD) and volunteers.

The Agency prohibits the following conduct, as further defined in FSM 8100 section 8110.5:

- 1. Sexual Assault/Violence;
- 2. Sexual Harassment:
- 3. EEO-Based Harassment:
- 4. Other Workplace Harassment (non-EEO, including bullying); and
- 5. Retaliation against employees who report or oppose harassment.

Reports of harassment will be handled in a confidential manner, to the extent allowed by applicable law.

Employees who believe they have experienced harassment are encouraged to voice their objections concerning this behavior to the offending person and/or report such incidents.

ALSO: Alcohol, Non-Prescription, and Federal-Illegal Drugs are Not Allowed on This or Any Incident! Alcohol and/or illegal are NOT allowed within the incident environment or while actively assigned to the incident. Local Law Enforcement Officials will be called to deal with any suspected illegal activities. Each employee has the responsibility to be ready, willing and able to perform the duties for which they are qualified and for which they are assigned to this incident.

THESE POLICIES ARE STILL IN EFFECT WHILE WE ARE IN A TACTICAL PAUSE

There will be zero tolerance of harassment, bullying, intimidation, illegal drug and alcohol usge or any resemblance of such on this incident period.

Feel free to call/text HRSP if you have questions, concerns, or just want to chat. We can determine a confidential place if you wish to meet.

PUBLIC INFORMATION

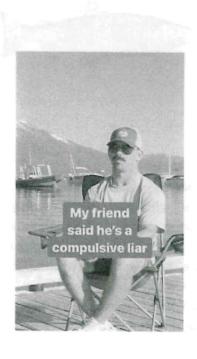

CRESCENT CITY THANKS YOU

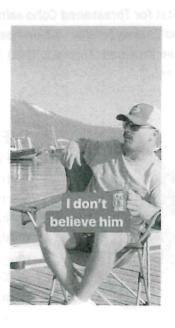

On Thursday, Deputy Incident Commander Kyle Jacobson and other members of our team met with California Assemblymember Jim Wood, City Manager Eric Weir, and other leaders from Crescent City. The team provided an update on the progress that you've made on the fire and the suppression repair projects now taking shape.

Assemblymember Wood and City Manager Weir expressed their gratitude and appreciation for your hard work, dedication, and service.

Direct any public or media inquiries to the Information Center at 707-383-9727 (8 am to 8 pm) or email 2023. SmithRiverComplex@firenet.gov. Please send us your photos that tell the story of the fire. See page 101 of your IRPG for helpful tips on public information.

IMPORTANT: <u>Yellow/White Striped flagging 'Equipment Exclusion'</u> indicates resource **AVOIDANCE** areas.

Port Orford Cedar root disease

Some local drainages are infected with a root disease that spreads via mud and water. To prevent spreading this disease to uninfected areas, all water tenders and engines will apply bleach to their tanks in a 1:1000 ratio (using bleach with 6.0 % Sodium hypochlorite).

Fish Screens: Coho Salmon Critical Habitat

Most rivers and streams in this area are considered critical habitat for Threatened Coho salmon. Please ensure that Mark 3 and Engine/Tender suction hoses have the appropriate screen attached. Talk to a READ if you think you need a screen!

WEED WASH:

The area in and around the Smith River Complex, are home to many sensitive species. Infestations of highly invasive plant species are one of the largest threats to sensitive species populations here. Spread via vehicles and foot traffic as well as re-activation via fire is of high concern. To help protect these sensitive places, do not park in <u>and</u> try to avoid areas flagged areas. Make sure to visit the WEED WASH at either Gasquet Base Camp OR Elk Valley ICP for demob and additionally if needed, as directed by the READs. Located on Elk Valley Rd Camp.
