Today's General Fire Behavior:

Over two inches of rain fell yesterday. Minimal fire behavior is expected. Smoldering will still take place in duff layers, root systems, areas that were shaded from the rain such as tree wells, and in stump holes.

Specifics:

Branch V:

Division RR: Minimal fire behavior, interior smoldering. **Division SS/VV:** Minimal fire behavior, interior smoldering.

Branch XX:

Division LL: Minimal fire behavior, interior smoldering.

Division MM/PP: Minimal fire behavior, interior smoldering on PP. No fire behavior expected on MM.

Division YY: Minimal fire behavior, interior smoldering.

Initial Attack and Emergency Response: Be aware of secondary fire effects such as fire weakened trees, unstable root systems, soft shoulders, and unstable soils which may lead to debris slides.

Secondary Fire Effects and Rain/Watchouts

These fires have been burning for several weeks at multiple types of severity. With the recent rainfall, additional erosion may have compromised root system of even green trees on steep slopes. Drive and work defensively as there are increased chances of trees falling.

Ash pits and stump holes are usually recognized by the large areas of white ash and occasional insects flying in the vicinity. The recent rain will have dampened the white ash surface and the areas may appear dark and cold. This may just be a crust which insulates very hot ash below the crust. Be careful when walking around in higher severity areas after recent rain especially as this area has deep duff and stump holes.

Safety Message

Inattentive blindness is a failure to notice unexpected things in a visual field because focus is on something else in that same field of view. This blindness can visually distract us from what else is happening in our environment. Inattentive blindness can cause you to see what you expect, rather than what is there. The fire environment is full of distractions that require proactive engagement to maintain focus. A core competency of emergency responders is the ability to direct attention on a deliberately chosen target and sustain that attention.

Smith River Complex South - Safety Message

INCIDENT #CA-SRF-000968

DATE: 09-26-23 TIME: 0700-1900 Day Shift

Measures to Enhance Recovery from Accumulated Fatigue

Crew leaders should know and apply measures to enhance recovery from accumulated fatigue. The basic measures include:

- Increased sleep in an environment conducive to sleep.
- Reduced duration and frequency of physical work (possible change of duty the following day).
- Adequate supplemental nutrition and fluids during and immediately after physical work.
- A high carbohydrate diet.
- Monitoring the individuals for recovery.

Human Factor Watch Outs

Are designed to create an opportunity for you to take a tactical pause and re-evaluate your situation.

- The briefing was unclear.
- · Don't remember what took place in the last hour.
- · Not getting answers to your questions.
- Not getting clear acknowledgement of your message.
- Encountering hazards that are not mentioned in your brief.
- The team is not debriefing.
- Tempo is too high to maintain command and control.
- The leader's intent is vague.
- Supervisor's expectation is unrealistic.

COLD STRESS

- Keep extra clothing handy if you get wet and need to change.
- Drink warm, sweetened fluids.
- Avoid touching cold metal or wet surfaces with bare skin.
- Use proper engineering controls, safe work practices, and protective equipment.

DEBRIS FLOW / MUDSLIDES

- Never underestimate a debris flow or mudslide.
- Pay attention to weather forecasts for the burn area.
- Know the warning signs (listen and watch for rushing water, mud, unusual sounds).
- Have an evacuation/escape route planned that is least likely to be impacted by flash flooding.

CIIMT 4 Safety Group

INCIDENT RISK ANALYSIS

ICS (215A) DAY SHIFT

BR/DV	HAZARDOUS ACTIONS – CONDITIONS	MITIGATIONS – WARNINGS – REMEDIES
ALL	WEATHER / THUNDERSTORM SAFETY	 Take weather throughout the shift to get timely and accurate information. Is what we predicted what you are observing? Request spot weather forecasts if you notice a notable change in the weather. Communicate any changes in weather with your crew and adjacent resources. Take shelter in a vehicle or building if possible. If outdoors, find a low spot away from tall trees. If in the woods, move to an area with shorter trees. If in open country, crouch low with feet together and minimize contact with the ground. Don't stay on ridge tops or in wide open areas. Follow Thunderstorm Safety in your IRPG (pg. 17).
ALL	TRAFFIC HAZARDS AND DRIVING	 Take extra precautions when entering or exiting the roadways. Maintain high visibility when in the operational area and use warning lights when working on roads or traveling in smoke. Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on the uphill side. Use spotters when backing or turning around. Keep your speed down in all areas. Drive at or below posted speed limits. Use warning lights when working on roads or traveling in smoke. Use chock blocks and turn wheels into hills.
ALL	COLD STRESS	 Keep extra clothing handy if you get wet and need to change. Drink warm, sweetened fluids. Avoid touching cold metal or wet surfaces with bare skin. Use proper engineering controls, safe work practices, and protective equipment.
ALL	DEBRIS FLOW / MUDSLIDES	 Never underestimate a debris flow or mudslide. Pay attention to weather forecasts for the burn area. Know the warning signs (listen and watch for rushing water, mud, unusual sounds. Have an evacuation/escape route planned that is least likely to be impacted by flash flooding.
ALL	STEEP TERRAIN & ROLLING DEBRIS	 Maintain 8'-10' spacing when working & walking. Do not work above any personnel. Evaluate the necessity to send personnel into areas with limited access.
ALL	HAZARD / DANGER TREES	 Follow Hazard Tree Safety Guidelines (IRPG p.22.) Limit the number of personnel around snags and their exposure time. Fallers must be qualified for the trees being felled. Be alert around hazard trees during wind events, even green trees. The hazard zone extends a minimum of 2½ tree lengths. Avoid parking vehicles or taking breaks under or near hazard trees.
ALL	FATIGUE AND COMPLACENCY	Be alert, and monitor all resources for signs of fatigue, and take breaks as necessary. Maintain a 2:1 Work to rest ratio. Repeated assignments in the same area can lead to complacency, making personnel morevulnerable to accidents. Take steps to maintain situational awareness for the duration of the incident. Take tactical pauses as practical and feasible.
ALL	HEAVY EQUIPMENT OPERATIONS	 Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment. Use road guards as needed to control traffic.
ALL	MENTAL WELL-BEING	 Prioritize sleep and eat a healthy diet. Include your family and friends. Call home and initiate social connections. Monitor resources and engage in healthy activities. Focus on positivity and engage in self-care.
ALL	MOP-UP	 Balance the risk of exposure to hazards against the mop-up objective. Evaluate areas for hazard trees and locate stump holes for avoidance. Monitor fatigue; shorten shifts to increase rest where appropriate. Review and follow "Look Up, Look Down, Look Around" procedures. Evaluate mop-up distances against what is safe and necessary.

FIRE INFORMATION

The PIO team maintains a Linktree website with informational links to Inciweb, CalTrans, Smoke reports and much more. Please feel free to direct members of the public to our site using the QR code here!

SEND US YOUR PHOTOS

Your PIO team is looking for photos that we can use to help continue to tell the story about all the hard work you are doing! You can send us photos via email a 2023.smithrivercomplex@firenet.gov.

THINK BEFORE YOU POST

Please have your photos of the incident approved by the PIO team before posting to your personal social media accounts. Contact us with any questions or concerns about approved content.

Direct any public or media inquiries to the Information Center at 707-383-9727 (8 am to 8 pm) or email us at 2023.SmithRiverComplex@firenet.gov.

IMPORTANT: <u>Yellow/White Striped flagging 'Equipment Exclusion'</u> indicates resource **AVOIDANCE** areas.

Port Orford Cedar root disease

Some local drainages are infected with a root disease that spreads via mud and water. To prevent spreading this disease to uninfected areas, all water tenders and engines will apply bleach to their tanks in a 1:1000 ratio (using bleach with 6.0 % Sodium hypochlorite).

*Designated Draft Site Location by Division (setup with Bleach and fish screen)

- Panther Flat Day Use Gasquet Structure Grp, Div A
- DP 10 (Gasquet Ranger District) ALL Divs
- DP85 (Coon Creek) Div YY

Fish Screens: Coho Salmon Critical Habitat

Most rivers and streams in this area are considered critical habitat for Threatened Coho salmon. Please ensure that Mark 3 and Engine/Tender suction hoses have the appropriate screen attached. Talk to a READ if you think you need a screen!

WEED WASH:

The area in and around the Smith River Complex, are home to many sensitive species. Infestations of highly invasive plant species are one of the largest threats to sensitive species populations here. Spread via vehicles and foot traffic as well as re-activation via fire is of high concern. To help protect these sensitive places, do not park in <u>and</u> try to avoid areas flagged areas. Make sure to visit the WEED WASH 1 mile east Gasquet Base Camp on south side pullout State Highway 199.

Medical Incident Report

FOR A <u>NON-EMERGENCY INCIDENT</u>: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A <u>MEDICAL EMERGENCY</u>: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)

"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."
