#### **Today's General Fire Behavior:**

Heavy rain equates to minimal to no fire behavior. Secondary fire effects are expected such as fire weakened trees, snags coming down, unstable soils with possible debris slides.

#### Specifics:

**Branch V:** 

**Division RR:** Minimal to no fire behavior, interior smoldering. **Division SS/VV:** Minimal to no fire behavior, interior smoldering.

**Branch XX:** 

**Division LL:** Minimal to no fire behavior, interior smoldering.

Division MM/PP: Minimal to no fire behavior, interior smoldering on PP. No fire behavior expected on MM.

**Division YY:** Minimal to no fire behavior, interior smoldering.

**Initial Attack and Emergency Response:** Be aware of secondary fire effects such as fire weakened trees, soft shoulders, and unstable soils which may lead to debris slides.

#### **Heavy Rain/Mudslide Safety**

Listen for unusual sounds that might indicate moving debris, such as trees cracking or boulders knocking together.

If you are near a stream or channel, be alert for any sudden increase or decrease in water flow and notice whether the water changes from clear to muddy. Such changes may mean there is debris flow activity upstream so be prepared to move quickly.

Be especially alert when driving—watch for collapsed pavement, mud, fallen rocks and other indications of possible debris flow.

Avoid drainage bottoms.

#### Safety Message

Changing conditions require re-evaluation of actions. If the conditions are changing ask "how fast, how much, when, and where". Consider the effects of change on your planned action – may require adjusting your actions to mitigate changing conditions. Verify forecast values.... consider "will our situation get better or worse, will it get worse before it gets better?"

# Smith River Complex South - Safety Message

INCIDENT #CA-SRF-000968

DATE: 09-25-23 TIME: 0700-1900 Day Shift

#### Rain Event

Crew leaders should know and apply measures to enhance safety during rain events. The basic measures include:

- Stay away from areas that may be prone to flooding, such as drainages.
- · Reduce speeds and increase braking distances if driving.
- Ensure windshield wipers are functioning properly.
- Keep your distance around hazardous trees.
- Follow Thunderstorm Safety as outlined on page 17 of the IRPG.
- Stay dry; seek shelter under cover/ tent, building, or vehicle.
- Place tents in areas not prone to water flow or pooling.
- Weight and stake tents to prevent them from blowing away in the wind.
- · Park away from hillsides where unstable soil caused by the fire may slide or wash out.

#### **Drive Safely and Arrive**

- Continue to drive at reduced speeds with heightened awareness on incident roads.
- Use caution around vehicle parking areas, equipment loading areas, and staging areas.
- · Watch for fire equipment working on roadways.
- · Be aware of road graders working on incident roads.
- And please ... SLOW DOWN!

## LEADERSHIP IS ALL ABOUT CHARACTER

Fire leaders set the example by exhibiting strong character. Character is based on values. Others appraise the combination of actions and words to determine if the leader can be trusted to do the right thing.

- Know our values, review them frequently, and look for areas of improvement.
- Admit when we are wrong.
- Take time to reflect on our actions.
- · Find role models and ask them to be a mentor.
- Study leaders and leadership learn from their successes and mistakes.

#### **EXTRACTION PLAN**

- Before you engage in any action, consider your location and egress options and how you would safely extract an injured person, given the resources that are available, site, and environmental conditions.
- Re-evaluate as your location or conditions change.
- Don't wait for an injury to occur before developing a plan!

CIIMT 4 Safety Group

#### INCIDENT RISK ANALYSIS

BR/DV	HAZARDOUS ACTIONS – CONDITIONS	MITIGATIONS – WARNINGS – REMEDIES
ALL	WEATHER / THUNDERSTORM SAFETY	<ul> <li>Take weather throughout the shift to get timely and accurate information.</li> <li>Is what we predicted what you are observing?</li> <li>Request spot weather forecasts if you notice a notable change in the weather.</li> <li>Communicate any changes in weather with your crew and adjacent resources.</li> <li>Take shelter in a vehicle or building if possible.</li> <li>If outdoors, find a low spot away from tall trees. If in the woods, move to an area with shorter trees.</li> <li>If in open country, crouch low with feet together and minimize contact with the ground.</li> <li>Don't stay on ridge tops or in wide open areas.</li> <li>Follow Thunderstorm Safety in your IRPG (pg. 17)</li> </ul>
ALL	TRAFFIC HAZARDS AND DRIVING	<ul> <li>Take extra precautions when entering or exiting the roadways.</li> <li>Maintain high visibility when in the operational area and use warning lights when working on roads or traveling in smoke.</li> <li>Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on the uphill side. Use spotters when backing or turning around.</li> <li>Keep your speed down in all areas. Drive at or below posted speed limits.</li> <li>Use warning lights when working on roads or traveling in smoke.</li> <li>Use chock blocks and turn wheels into hills.</li> </ul>
ALL	COLD STRESS	<ul> <li>Keep extra clothing handy if you get wet and need to change.</li> <li>Drink warm, sweetened fluids</li> <li>Avoid touching cold metal or wet surfaces with bare skin.</li> <li>Use proper engineering controls, safe work practices, and protective equipment</li> </ul>
ALL	DEBRIS FLOW / MUDSLIDES	Never underestimate a debris flow or mudslide.     Pay attention to weather forecasts for the burn area     Know the warning signs (listen and watch for rushing water, mud, unusual sounds     Have an evacuation/escape route planned that is least likely to be impacted by flash flooding
ALL	STEEP TERRAIN & ROLLING DEBRIS	<ul> <li>Maintain 8'-10' spacing when working &amp; walking.</li> <li>Do not work above any personnel.</li> <li>Evaluate the necessity to send personnel into areas with limited access.</li> </ul>
ALL	HAZARD / DANGER TREES	<ul> <li>Follow Hazard Tree Safety Guidelines (IRPG p.22.)</li> <li>Limit the number of personnel around snags and their exposure time.</li> <li>Fallers mustbe qualified for the trees being felled.</li> <li>Be alert around hazard trees during wind events, even green trees.</li> <li>The hazard zone extends a minimum of 2½ tree lengths.</li> <li>Avoid parking vehicles or taking breaks under or near hazard trees</li> </ul>
ALL	FATIGUE AND COMPLACENCY	Be alert, and monitor all resources for signs of fatigue, and take breaks as necessary.  Maintain a 2:1 Work to rest ratio. Repeated assignments in the same area can lead to complacency, making personnel morevulnerable to accidents.  Take steps to maintain situational awareness for the duration of the incident.  Take tactical pauses as practical and feasible.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul> <li>Ensure communications are established with operators.</li> <li>Use hand signals if other communications are unavailable.</li> <li>Maintain a 50'-100' exclusion area around equipment.</li> <li>Use road guards as needed to control traffic.</li> </ul>
ALL	MENTAL WELL-BEING	<ul> <li>Prioritize sleep and eat a healthy diet.</li> <li>Include your family and friends. Call home and initiate social connections.</li> <li>Monitor resources and engage in healthy activities.</li> <li>Focus on positivity and engage in self-care.</li> </ul>
ALL	MOP-UP	<ul> <li>Balance the risk of exposure to hazards against the mop-up objective</li> <li>Evaluate areas for hazard trees and locate stump holes for avoidance.</li> <li>Monitor fatigue; shorten shifts to increase rest where appropriate.</li> <li>Review and follow "Look Up, Look Down, Look Around" procedures.</li> <li>Evaluate mop-up distances against what is safe and necessary.</li> </ul>

# THANK YOU

I wanted to take this opportunity to thank you all for conducting yourselves in a respectful and professional manner.

I appreciate it and I am sure those you work with appreciate it also.

It has been a pleasure and a privilege to be on this incident to serve you.

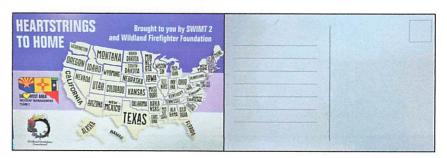

I will close out with what I opened with.

Be nice and be kind to one another.

Thanks and I will see you again.

Reminder!!! You can still pick up postcards and get them to HR.

Postcards will transition to the incoming team. Just fill them out and drop them off. We'll stamp it and send it out for free!

- ★ Use military time (0001-2400).
- ★ If filing a claim, you must submit the appropriate paperwork immediately!

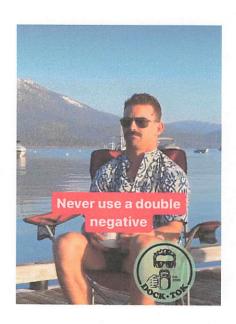

# **PUBLIC INFORMATION**

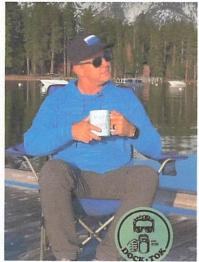

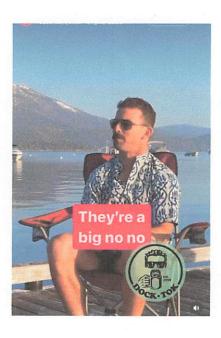

#### **SEND US YOUR PHOTOS!!**

Your PIO team is looking for photos you may have that show the impacts of the incoming storm on our fire operations. You can send us photos through the LinkTree QR code here, or email us at 2023.smithrivercomplex@firenet.gov.

Direct any public or media inquiries to the Information Center at 707-383-9727 (8 am to 8 pm) or email us at 2023.SmithRiverComplex@firenet.gov.

# **IMPORTANT:** Yellow/White Striped flagging 'Equipment Exclusion' indicates resource AVOIDANCE areas.

#### Port Orford Cedar root disease

Some local drainages are infected with a root disease that spreads via mud and water. To prevent spreading this disease to uninfected areas, all water tenders and engines will apply bleach to their tanks in a 1:1000 ratio (using bleach with 6.0 % Sodium hypochlorite).

#### \*Designated Draft Site Location by Division (setup with Bleach and fish screen)

- Panther Flat Day Use Gasquet Structure Grp, Div A
- DP 10 (Gasquet Ranger District) ALL Divs
- DP85 (Coon Creek) Div YY

#### Fish Screens: Coho Salmon Critical Habitat

Most rivers and streams in this area are considered critical habitat for Threatened Coho salmon. Please ensure that Mark 3 and Engine/Tender suction hoses have the appropriate screen attached. Talk to a READ if you think you need a screen!

#### WEED WASH:

The area in and around the Smith River Complex, are home to many sensitive species. Infestations of highly invasive plant species are one of the largest threats to sensitive species populations here. Spread via vehicles and foot traffic as well as re-activation via fire is of high concern. To help protect these sensitive places, do not park in and try to avoid areas flagged areas. Make sure to visit the WEED WASH 1 mile east Gasquet Base Camp on south side pullout State Highway 199.

# Training Message

# **Trainer / Mentors:**

If in the event:

You are leaving the incident before your assigned trainee

Or

Your trainee is reassigned
You must complete a performance evaluation for the
period the trainee was assigned to you
