Fire Behavior Forecast #41								
Name of Incidents: Smith River Complex – South Zone	Administrative Unit: Six Rivers NF – Gasquet District							
Date & Time Issued: 26 September 2023 - 2000	Operational Period: September 27 (0700-1900)							
Weather Summary: Scattered showers Wednesday, cool and dry Thursday, Chance of rain Friday. A drier pattern is forecasted to set up over the weekend.	FBAN: 530-412-2333- cell Linda Ferguson FBAN trainee							

	Fire Behavior Summary		- Indiana		
General –	FUEL MODEL	Back [R	OS] Head	Back [F	L] Head
Max. spot dist.: 24 ch. or (0.3 mile)	GS2: Burn scars with moderate dead/down, grass, manzanita brush	0.6 ch/hr	8 ch/hr	0.7'	2.2'
Prob. Ignition: 16% - shaded 30% - unshaded	TU5: Very high load mixed conifer and shrubs – heavy forest litter, deep duff, heavy dead/down fuels	0.4 ch/hr	6 ch/hr	1.6'	6'
LAL: 1 CWR 70%	TL3/8: Long-needle pine litter, Gambel oak and sparse grass	0.1 ch/hr	1 ch/hr	0.2'	0.8'

Today's General Fire Behavior:

Dead and down fuels are quite damp after the rain. Minimal fire behavior is expected. Smoldering will still take place in duff layers, root systems, stump holes and areas that were shaded from the rain such as tree wells.

Specifics:

Branch V:

Division RR: Minimal fire behavior, interior smoldering. **Division SS/VV:** Minimal fire behavior, interior smoldering.

Branch XX:

Division LL: Minimal fire behavior, interior smoldering.

Division MM/PP: Minimal fire behavior, interior smoldering on PP. No fire behavior expected on MM.

Division YY: Minimal fire behavior, interior smoldering.

Initial Attack and Emergency Response: Be aware of secondary fire effects such as fire weakened trees, unstable root systems, soft shoulders, and falling rocks in steep canyons.

Secondary Fire Effects Fire Effects/Watchouts

Widespread precipitation and moisture will serve as an insulator to stump holes and ash pits. The precipitation will only penetrate the top layer of the ash turning it from white to black. This will give the appearance that the area is cold. However, the top dark layer will hide areas of white ash underneath, which will remain hot. Use appropriate precautions when walking or mopping up.

Safety Message

Risks to fireline personnel increase significantly during transfer of command periods regardless of the size or complexity of the incident. Incoming resources have not had the opportunity to familiarize themselves with the fire environment you have experienced and adapted to. Be intentional about sharing what you have learned about the fire behavior in your area with incoming resources.

Smith River Complex South - Safety Message

INCIDENT #CA-SRF-000968

DATE: 09/27/23 TIME: 0700-1900 Day Shift

Incident Management Team Transition

- Sometimes called the 19th Watch Out Situation
- Take the time to understand the plan. Ensure all resources completely understand the assignment, Communications, and Medical Plan.
- Supervisory positions have changed. Know who you are working for.
- Briefings: Required every shift for all personnel, for new assignments, and for changing conditions.

Any Firefighter knows how Every firefighter should know why

Make a Safety Difference

- As a supervisor, provide constant and relentless oversight.
- Stay focused on the task at hand all the time!
- Come up with a safer way to perform a risky assignment.
- Discuss situations that might cause a near miss.
- Never tolerate "Hey, watch this!"
- Discuss the effects of fatigue and how to mitigate the effects of fatigue.
- While in the fire zone, wear your hard hat when you leave the vehicle.
 Have a purpose in what you do.

Ensure....

- Strategic and tactical decisions take into account extended duration firefighting efforts with massive destruction.
- Tactical decisions keep pace with the evolving fire conditions and behavior.
- Firefighting operations are coordinated with adjacent branches, divisions, and groups.
- Specific firefighting tasks are consistent with the strategy and tactics to control the incident.
- We avoid the arrogance of success or, think what we did yesterday will be sufficient for tomorrow.

ICS (215A) DAY SHIFT

BR/DV	HAZARDOUS ACTIONS – CONDITIONS	MITIGATIONS – WARNINGS – REMEDIES
ALL	WEATHER / THUNDERSTORM SAFETY	 Take weather throughout the shift to get timely and accurate information. Is what we predicted what you are observing? Request spot weather forecasts if you notice a notable change in the weather. Communicate any changes in weather with your crew and adjacent resources. Take shelter in a vehicle or building if possible. If outdoors, find a low spot away from tall trees. If in the woods, move to an are with shorter trees. If in open country, crouch low with feet together and minimize contact with the ground. Don't stay on ridge tops or in wide open areas. Follow Thunderstorm Safety in your IRPG (pg. 17).
ALL	TRAFFIC HAZARDS AND DRIVING	Take extra precautions when entering or exiting the roadways. Maintain high visibility when in the operational area and use warning lights whe working on roads or traveling in smoke. Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicle to pass on the uphill side. Use spotters when backing or turning around. Keep your speed down in all areas. Drive at or below posted speed limits. Use warning lights when working on roads or traveling in smoke. Use chock blocks and turn wheels into hills.
ALL	COLD STRESS	 Keep extra clothing handy if you get wet and need to change. Drink warm, sweetened fluids. Avoid touching cold metal or wet surfaces with bare skin. Use proper engineering controls, safe work practices, and protective equipmen
ALL	DEBRIS FLOW / MUDSLIDES	 Never underestimate a debris flow or mudslide. Pay attention to weather forecasts for the burn area. Know the warning signs (listen and watch for rushing water, mud, unusual sounds. Have an evacuation/escape route planned that is least likely to be impacted by flash flooding.
ALL	STEEP TERRAIN & ROLLING DEBRIS	 Maintain 8'-10' spacing when working & walking. Do not work above any personnel. Evaluate the necessity to send personnel into areas with limited access.
ALL	HAZARD / DANGER TREES	 Follow Hazard Tree Safety Guidelines (IRPG p.22.) Limit the number of personnel around snags and their exposure time. Fallers must be qualified for the trees being felled. Be alert around hazard trees during wind events, even green trees. The hazard zone extends a minimum of 2½ tree lengths. Avoid parking vehicles or taking breaks under or near hazard trees.
ALL	FATIGUE AND COMPLACENCY	 Be alert, and monitor all resources for signs of fatigue, and take breaks as necessary. Maintain a 2:1 Work to rest ratio. Repeated assignments in the same area can lead to complacency, making personnel morevulnerable to accidents. Take steps to maintain situational awareness for the duration of the incident. Take tactical pauses as practical and feasible.
ALL	HEAVY EQUIPMENT OPERATIONS	 Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment. Use road guards as needed to control traffic.
ALL	MENTAL WELL-BEING	 Prioritize sleep and eat a healthy diet. Include your family and friends. Call home and initiate social connections. Monitor resources and engage in healthy activities. Focus on positivity and engage in self-care.
ALL	MOP-UP	 Balance the risk of exposure to hazards against the mop-up objective. Evaluate areas for hazard trees and locate stump holes for avoidance. Monitor fatigue; shorten shifts to increase rest where appropriate. Review and follow "Look Up, Look Down, Look Around" procedures. Evaluate mop-up distances against what is safe and necessary.

6. Work Assignments:

Patrol and mop up to the extent necessary from DP9-DP80.

Identify hazard trees along 17N40 road, dozer lines, and hand lines to implement mitigation measures.

Patrol along Hwy 199 and respond to service calls for smoke reports and mop up to the extent necessary.

Patrol and mop up handline from the 17N40 road to Craigs Creek.

7. Special Instructions:

REAFs need to check in and out with DIVS.

Backhaul trash and excess supplies to Gasquet and update Field Maps from any removed accountable property.

Be strategically and tactically prepared to alter and enhance changing environmental conditions.

Ensure escape routes to staging areas or safety zones will not be compromised by mud slides or debris flows.

Smith River Complex Incident: Resource Advisor Message

IMPORTANT: Yellow/White Striped flagging 'Equipment Exclusion' indicates resource AVOIDANCE areas.

Cultural and Heritage Resources:

The area you are working in is rich in cultural and heritage resources which may be encountered while fighting fire or during suppression repair. Avoid disturbing cultural or heritage resource if encountered.

- GPS its location and take a photo, do not remove or collect anything. Work with your division to notify a READ for recommendations on how to proceed.
- Some cultural resources present hazardous conditions, such as mining shafts. Be attentive to these potential hazards when working around known mining areas or in rocky areas.
- Known resources may be flagged ahead in work areas.
- Finding of cultural resources should not be reported over the radio.
- Coordinate with READs on all dozer operations to minimize impacts to cultural and heritage sites. Limit dozer operations to pre-existing dozer lines and limit widths to the extent possible.

Port Orford Cedar root disease

Some local drainages are infected with a root disease that spreads via mud and water and kills Port Orford cedar trees. To prevent spreading this disease to uninfected areas, all water tenders and engines will apply bleach to their tanks (1:1000 ratio). Designated Draft Site Location by Division (setup with Bleach and fish screen)

- Panther Flat Day Use Gasquet Structure Grp, Div A
- DP 10 (Gasquet Ranger District) ALL Divs
- DP85 (Coon Creek) Div YY

WEED WASH:

The area in and around the Smith River Complex, are home to many sensitive species. Infestations of highly invasive plant species are one of the largest threats to sensitive species populations here. Spread via vehicles and foot traffic as well as re-activation via fire is of high concern. To help protect these sensitive places, do not park in and try to avoid areas flagged areas. Make sure to visit the WEED WASH 1 mile east Gasquet Base Camp on south side pullout State Highway 199.

Human Resource Message Smith River Complex Fire

HUMAN RESOURCES MESSAGE

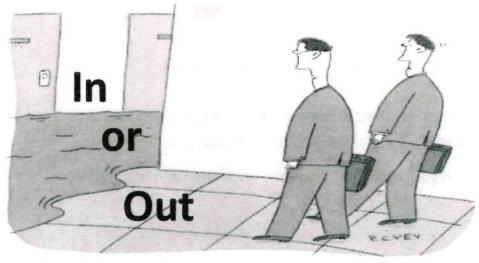

My name is Anthony "Tony" Torres. I am the Human Resource Specialist assigned to the incident. As the Human Resource Specialist, I am available to incident personnel to provide work environment information and assist with conflict resolution if needed. If I can be of assistance to you, please let me know. I'm in the Yurt at the end of main street. You can also contact me by cell phone at 505-249-2341 or via e-mail at Anthony. Torres@usda.gov

As a reminder, we have a zero tolerance for illegal drugs, alcohol, sexual harassment, and any other type of inappropriate behavior. We expect all incident personnel to treat each other with dignity and respect, and to work as a team to support a positive work environment.

Be Safe! Keep your positive attitude and have a great day!

Tony Torres - (HRSP) - (505) 249-2341

Training Specialist Message
