fire behavior is expected. Fuels are too wet to actively carry fire, but fuels will continue to smolder. Smoldering will take place in duff layers, root systems, and stump holes.

Specifics:

Branch V:

Division RR: Minimal fire behavior, interior smoldering. **Division SS/VV:** Minimal fire behavior, interior smoldering.

Branch XX:

Division LL: Minimal fire behavior, interior smoldering.

Division MM/PP: Minimal fire behavior, interior smoldering on PP. No fire behavior expected on

MM.

Division YY: Minimal fire behavior, interior smoldering.

Initial Attack and Emergency Response: Be aware of secondary fire effects such as fire weakened trees, unstable root systems, soft shoulders.

Secondary Fire Effects/Watchouts

Smoldering fire behavior hazards include threats to your feet, hands, airways, knees, shins, and eyes that will continue to be challenged by smoke, ash, slippery dirt (mud), sharp things, pokey stuff, steam...be kind to your money-making parts – they need to last to the end of the season.

Safety Message

Changing conditions require re-evaluation of actions. If the conditions are changing ask "how fast, how much, when, where". Consider the effects of change on your planned action — may require adjusting your actions to mitigate changing conditions. Verify forecast values.... consider "will our situation get better or worse, will it get worse before it gets better?" Always expect change, except from a vending machine.

SMITH RIVER COMPLEX SAFETY MESSAGE DAY 9-29-2023

Kinds of fatigue and different stages.

Objective - Mental (Cognitive*)

· Reduced cognitive functioning and mental capacity.

Physical

· Reduced bodily functioning and physical exhaustion.

Subjective - Symptomatic (Boredom*)

• Feelings of tiredness, sleepiness, drowsiness

- The first step toward becoming a good decision maker on the fire line is to recognize that fatigue hampers your ability to make appropriate decisions fatigue affects everyone. <u>Fatigue has an impact on risk taking.</u>
- Studies that focus on how lack of sleep affects work performance during long shifts agree for people to perform well they should average one hour of sleep for every 2 hours of work.
- Breaks are a hedge against fatigue. Fatigue can rapidly overtake you. Breaks of 5 to 10 minutes or more can keep performance from declining. The number and length of breaks should increase after 8 hours, because fatigue builds through-out a shift.

Are we in a routine situation?

Are we fatigued to the point where we think everything is routine?

Are we dismissive to a hazard later in the season that we would give more attention to earlier in the year?

What can we control currently?

"Be purposeful and don't allow yourself and others around you to simply fall into automatic responses without pausing long enough to really take a hard look at the situation. Stay engaged!"

Smith River Complex Incident: Resource Advisor Message

IMPORTANT: Yellow/White Striped flagging 'Equipment Exclusion' indicates resource AVOIDANCE areas.

Cultural and Heritage Resources:

The area you are working in is rich in cultural and heritage resources which may be encountered while fighting fire or during suppression repair. Avoid disturbing cultural or heritage resource if encountered.

- GPS its location and take a photo, do not remove or collect anything. Work with your division to notify a READ for recommendations on how to proceed.
- Some cultural resources present hazardous conditions, such as mining shafts. Be attentive to these potential hazards when working around known mining areas or in rocky areas.
- Known resources may be flagged ahead in work areas.
- Finding of cultural resources should not be reported over the radio.
- Coordinate with READs on all dozer operations to minimize impacts to cultural and heritage sites. Limit dozer operations to pre-existing dozer lines and limit widths to the extent possible.

Port Orford Cedar root disease

Some local drainages are infected with a root disease that spreads via mud and water and kills Port Orford cedar trees. To prevent spreading this disease to uninfected areas, all water tenders and engines will apply bleach to their tanks (1:1000 ratio). **Designated Draft Site Location by Division (setup with Bleach and fish screen)**

- Panther Flat Day Use Gasquet Structure Grp, Div A
- DP 10 (Gasquet Ranger District) ALL Divs
- DP85 (Coon Creek) Div YY

WEED WASH:

The area in and around the Smith River Complex, are home to many sensitive species. Infestations of highly invasive plant species are one of the largest threats to sensitive species populations here. Spread via vehicles and foot traffic as well as re-activation via fire is of high concern. To help protect these sensitive places, do not park in <u>and</u> try to avoid areas flagged areas. Make sure to visit the WEED WASH 1 mile east Gasquet Base Camp on south side pullout State Highway 199.

Human Resource Message

HOW MUCH DO YOU KNOW ABOUT HARASSMENT?

The US Forest Service Anti-Harassment Policy defines the following types of harassment:

- Sexual Assault: Any type of sexual contact that is attempted or completed against an
 individual's will or when an individual cannot consent because of age, disability, the influence of
 alcohol or drugs, or any other reason preventing the individual from providing consent.
- <u>Sexual Harassment:</u> Unwelcome sexual advances, requests for sexual favors, and other verbal
 or physical conduct of sexual nature.
- Equal Employment Opportunity (EEO)- Related Harassment: Unwelcome intimidation, ridicule, insults, comments, or verbal or physical conduct that is based on race, color, religion, age (40 years or older), disability (physical or mental), national origin, reprisal, sex/gender (whether of a sexual nature), sexual orientation, disability, marital, and/or parental status.
- Other Workplace Harassment/Bullying: Any form of repeated, unwelcome, pervasive, persistent, and unsolicited verbal, nonverbal, written, or physical conduct that is objectively offensive and could alter the affected individual's terms and conditions of employment.

What Harassment is Not

Minor slights/annoyances and isolated incidents often do not rise to the level of harassment or misconduct. Examples of what *generally* is not considered harassment include:

- Disagreement with a policy or a supervisor's reasonable instruction.
- Receiving discipline or performance-based actions.
- · Receiving objective/constructive feedback about work performance.
- Minor disagreements, conflict and/or stress.
- Supervisors filing against subordinate employees.
- · Being accused of harassment; and
- Allegations are too general, or the affected individual and/or alleged offenders are unknown.

As employees on a federal worksite, you are responsible for knowing what constitutes harassment and for reporting it when you see it occur. Know the law and protect your employees – it's your responsibility.

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training

Be Alert - Keep Calm - Think Clearly - Act Decisively

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)
"This will be the Trout Meadow Medical Incident, IC is TELD, longs, EMT Smith is providing medical care."
