Fire Behavior Forecast #44

Name of Incidents: Smith River Complex – South Zone	Administrative Unit: Six Rivers NF – Gasquet District
Date & Time Issued: September 29, 2023 - 1800	Operational Periods: 9/30 through 10/4
Weather Summary: Seasonal conditions, subtle warming and drying	FBAN: 530-412-2333- cell Linda Ferguson FBAN trainee

Fire Behavior Summary

General –	FUEL MODEL	Back [ROS] Head		Back [FL] Head	
Max. spot dist.: 40 ch. or (0.5 mile) Prob. Ignition: 25% - shaded 40% - unshaded LAL: 1	GS2: Burn scars with moderate dead/down, grass, manzanita brush	0.6 ch/hr	20 ch/hr	0.6'	3.2
	TU5: Very high load mixed conifer and shrubs – heavy forest litter, deep duff, heavy dead/down fuels	0.3 ch/hr	13 ch/hr	1.5'	8'
	TL3/8: Long-needle pine litter, Gambel oak and sparse grass	0.1 ch/hr	1 ch/hr	0.2'	1'

General Fire Behavior from 9/29 through 10/4:

This forecast is for 5 operational periods and is very generalized. Subtle changes may occur in the fire environment with current forecasts

Dead and down fuels are quite damp after the rain. Minimal fire behavior is expected. Fuels have been too wet to actively carry fire, but fuels will continue to smolder and may dry out with the north winds predicted. Smoldering will take place in duff layers, root systems, and stump holes. Fuel moistures may change with updated forecasts.

Specifics:

Division R/S/V: Minimal fire behavior, interior smoldering.

Division K: Minimal fire behavior, interior smoldering.

Division L: Minimal fire behavior, interior smoldering.

Division P: Minimal fire behavior, interior smoldering.

09/30 Fuel Moistures:

1hr	11%
10 hr	25%
100 hr	24%
1000 hr	18%

Secondary Fire Effects/Watchouts

Widespread precipitation and moisture will serve as an insulator to stump holes and ash pits. The precipitation will only penetrate the top layer of the ash turning it from white to black. This will give the appearance that the area is cold. However, the top dark layer will hide areas of white ash underneath, which will remain hot. Use appropriate precautions when walking or mopping up.

Safety Message

Watch for fire weakened root systems. Trees with weak root systems can fall with very little wind. As smoke lifts look around your work area again; as overhead hazards may have gone unnoticed over the past week because of the limited visibility and haze. Areas of deep ash may be concealed with darker material. Look up, look down, look around.

Smith River Complex South – Safety Message

INCIDENT: # CA-SRF-000968

DATE: 09/30/2023

Keep Your Guard Up!

- *Maintaining situational awareness takes effort!*
- *Continue planning to provide for safety then engage in your mission!*
- *Watch for complacency in others, and help them stay sharp.*
- *Traffic is increasing, drive defensively!*
- *Be methodical and meticulous in your tactics to get the job done safely!*

Keep Your Head in the Game!

Driving

- When driving keep speed at or below the posted speed limit and your headlights on.
- **Stay as far to the right of the road as is safely possible.**
- Stay alert for oncoming traffic that may “cheat” into your lane.
- Schools is in session, watch for school busses and children at bus stops.
- Always fasten your seat belt before the vehicle is set into motion.
- Slow down, slow down, slow down.

There are three main types of distracted driving: **Visual**-taking your eyes off the road; **Manual**-taking your hands off the wheel; **Cognitive**-taking your mind away from the task at hand. Don't drive distracted!

Change In Weather / Higher Winds

- **Situational Awareness:** Be alert for gusty winds and how that affects your work area.
- **Identify hazard trees and rock fall potential** to all personnel.
- **Work with extreme caution in the area:** Wear and use all approved PPE properly. Use the Risk Management Process (IRPG p. 1) to engage.
- **Be alert for hidden hazards:** Work area can rapidly change with increasing winds.
- **Beat the Odds:** Communicate changing conditions throughout the division/group.

INCIDENT RISK ANALYSIS

ICS (215A) DAY SHIFT

BR/DV	HAZARDOUS ACTIONS – CONDITIONS	MITIGATIONS – WARNINGS – REMEDIES
ALL	WEATHER / THUNDERSTORM SAFETY	<ul style="list-style-type: none"> • Take weather throughout the shift to get timely and accurate information. • Is what we predicted what you are observing? • Request spot weather forecasts if you notice a notable change in the weather. • Communicate any changes in weather with your crew and adjacent resources. • Take shelter in a vehicle or building if possible. • If outdoors, find a low spot away from tall trees. If in the woods, move to an area with shorter trees. • If in open country, crouch low with feet together and minimize contact with the ground. • Don't stay on ridge tops or in wide open areas. • Get to hard packed roads during rain events. • Follow Thunderstorm Safety in your IRPG (pg. 17).
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Take extra precautions when entering or exiting the roadways. • Maintain high visibility when in the operational area and use warning lights when working on roads or traveling in smoke. • Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on the uphill side. Use spotters when backing or turning around. • Keep your speed down in all areas. Drive at or below posted speed limits. • Use warning lights when working on roads or traveling in smoke. • Use chock blocks and turn wheels into hills.
ALL	COLD STRESS	<ul style="list-style-type: none"> • Keep extra clothing handy if you get wet and need to change. • Drink warm, sweetened fluids. • Avoid touching cold metal or wet surfaces with bare skin. • Use proper engineering controls, safe work practices, and protective equipment.
ALL	DEBRIS FLOW / MUDSLIDES	<ul style="list-style-type: none"> • Never underestimate a debris flow or mudslide. • Never attempt to cross a debris flow. • Pay attention to weather forecasts for the burn area. • Know the warning signs (listen and watch for rushing water, mud, unusual sounds. • Have an evacuation/escape route planned that is least likely to be impacted by flash flooding.
ALL	STEEP TERRAIN & ROLLING DEBRIS	<ul style="list-style-type: none"> • Maintain 8'-10' spacing when working & walking. • Do not work above any personnel. • Evaluate the necessity to send personnel into areas with limited access.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p.22.) • Limit the number of personnel around snags and their exposure time. • Fallers must be qualified for the trees being felled. • Be alert around hazard trees during wind events, even green trees. • The hazard zone extends a minimum of 2½ tree lengths. • Avoid parking vehicles or taking breaks under or near hazard trees.
ALL	FATIGUE AND COMPLACENCY	<ul style="list-style-type: none"> • Be alert, and monitor all resources for signs of fatigue, and take breaks as necessary. • Maintain a 2:1 Work to rest ratio. • Repeated assignments in the same area can lead to complacency, making personnel more vulnerable to accidents. • Take steps to maintain situational awareness for the duration of the incident. • Take tactical pauses as practical and feasible.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> • Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-100' exclusion area around equipment. • Use road guards as needed to control traffic.
ALL	MENTAL WELL-BEING	<ul style="list-style-type: none"> • Prioritize sleep and eat a healthy diet. • Include your family and friends. Call home and initiate social connections. • Monitor resources and engage in healthy activities. • Focus on positivity and engage in self-care.
ALL	MOP-UP	<ul style="list-style-type: none"> • Balance the risk of exposure to hazards against the mop-up objective. • Evaluate areas for hazard trees and locate stump holes for avoidance. • Monitor fatigue; shorten shifts to increase rest where appropriate. • Review and follow "Look Up, Look Down, Look Around" procedures. • Evaluate mop-up distances against what is safe and necessary.

Smith River Complex Incident: Resource Advisor Message

IMPORTANT: Yellow/White Striped flagging 'Equipment Exclusion' indicates resource AVOIDANCE areas.

Cultural and Heritage Resources:

The area you are working in is rich in cultural and heritage resources which may be encountered while fighting fire or during suppression repair. Avoid disturbing cultural or heritage resource if encountered.

- GPS its location and take a photo, do not remove or collect anything. Work with your division to notify a READ for recommendations on how to proceed.
- Some cultural resources present hazardous conditions, such as mining shafts. Be attentive to these potential hazards when working around known mining areas or in rocky areas.
- Known resources may be flagged ahead in work areas.
- Finding of cultural resources should not be reported over the radio.
- Coordinate with READs on all dozer operations to minimize impacts to cultural and heritage sites. Limit dozer operations to pre-existing dozer lines and limit widths to the extent possible.

Port Orford Cedar root disease

Some local drainages are infected with a root disease that spreads via mud and water and kills Port Orford cedar trees. To prevent spreading this disease to uninfected areas, all water tenders and engines will apply bleach to their tanks (1:1000 ratio). **Designated Draft Site Location by Division (setup with Bleach and fish screen)**

- Panther Flat Day Use - Gasquet Structure Grp, Div A
- DP 10 (Gasquet Ranger District) - ALL Divs
- DP85 (Coon Creek) - Div YY

WEED WASH:

The area in and around the Smith River Complex, are home to many sensitive species. Infestations of highly invasive plant species are one of the largest threats to sensitive species populations here. Spread via vehicles and foot traffic as well as re-activation via fire is of high concern. To help protect these sensitive places, do not park in and try to avoid areas flagged areas. **Make sure to visit the WEED WASH 1 mile east Gasquet Base Camp on south side pullout State Highway 199.**

Human Resource Message

Listen More

A wise man once told me that we have 2 ears and 1 mouth for a reason – to listen twice as much as we speak; and if you notice, our ears always stay open, while our mouths have a hinge so it can be closed.

Also, note that “listen” and “silent” are spelled with the same letters. Is that just a coincidence, or is it that you need to be silent to be able to really listen? Check that out and think about it!

Let’s try really listening to each other more and see if we can resolve our issues and/or concerns that we may have much faster.

Take Home Message:

Good listening allows us to demonstrate that we are paying attention to the thoughts, feelings, and behaviors of the other person (seeing the world through their eyes). This is crucial to maintaining productive relationships, and sometimes the only way to establish communication.

The Human Resources Specialist is here on assignment to help you and your teams manage the operational stress keeping your crews safe, positive, and productive increasing your situational awareness.
