P5 QJ6L (0510)

OPERATIONAL PERIOD

10/27/2023 0700
 to
10/30/2023 0700

Check-in/Demob
Maps

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: SMITH RIVER COMPLEX SOUTH	2. Operational Period: Date From: 10/27/2023 Date To: 10/30/2023 Time From: 0700 Time To: 0700
---	--

3. Objective(s):

Management Objectives

- Manage risk to responders and the public by ensuring hazards are identified, assessed, and mitigated.
- Minimize impact to economy, property, and infrastructure.
- Minimize impact to natural, cultural, wildlife, and heritage resources.
- Ensure coordinated, timely, and accurate release of public information.
- Foster and maintain relationships with all cooperators and stakeholders.
- Maintain fiscal accountability and keep costs commensurate with values at risk.
- Implement a coordinated suppression repair plan in accordance with established guidelines.

Control Objectives:

- Keep the fire East of Six Rivers National Forest boundary.
- Keep the fire West of Six Rivers and Klamath National Forest boundary.
- Keep the fire North of Forest Road 15N01.

General Safety Message:

- Adapt to and overcome the unexpected.

5. Site Safety Plan Required? Yes No

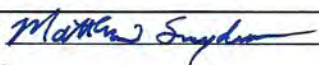

Approved Site Safety Plan(s) Located at:

Smith River Complex

Weather Forecast 10/27 – 10/29

DRY, GUSTY EAST WIND EARLY SATURDAY THROUGH EARLY SUNDAY...

DISCUSSION

Generally cool and dry weather will build in Friday through the weekend. Highs will remain around the mid-50s. Strengthening offshore flow will generate consistently clear and dry conditions. Daytime RH will drop near 20 percent on Saturday with very poor RH recoveries on mid and upper slopes as low as 30 percent. Gusty east to northeast wind will arrive early Saturday morning and persist through Sunday. Gusts as high as 30 mph are possible in exposed areas. The next chance of precipitation is around next Wednesday currently with a 40 percent chance of wetting rain.

FRIDAY

Sky/weather	Sunny
CWR	0 percent.
LAL	1.
Max temperature	47 to 52.
Min humidity	42 to 47 percent.
Wind (20 ft)	Downslope 2 to 4 mph becoming north 6 to 10 mph in the afternoon.

SATURDAY

Sky/weather	Sunny.
CWR	0 percent.
LAL	1.
Max temperature	53 to 58.
Min humidity	24 to 29 percent.
Wind (20 ft)	Northeast winds 10 to 16 mph, gusts to 25 mph strongest on ridges in the early morning.

SUNDAY

Sky/weather	Sunny.
CWR	0 percent.
LAL	1.
Max temperature	57 to 62.
Min humidity	27 to 32 percent.
Wind (20 ft)	Northeast winds 8 to 14 mph, gusts to 20 mph strongest on ridges in the early morning.

Smith River Complex General Weather Outlook

Planning Purposes Only, see the IAP for the Official Forecast

Forecast made Wednesday, October 25 - IMET James White

Conditions	Thu	Fri	Sat	Sun	Mon	Tue
around 800 FT	26-Oct	27-Oct	28-Oct	29-Oct	30-Oct	31-Oct

Ridge Wind Gusts (mph)	8	12	30	30	15	12
Wind Direction*	NW	NE	E	E	NE	NE
LAL	1	1	1	1	1	1

Do not use this matrix after Thursday, October 26

KEY:	Moderate Burning Conditions	Take Caution - Critical Burning Conditions	Extreme Burning Conditions
Clouds	>= 40 %	16 to 39%	<=15%
Avg Max Temp	<= 74 F	75 to 80 F	>= 80 F
Min Humidity	>= 40 %	26 to 39 %	<= 25 %
Max Humidity	> 55%	35 to 54%	<=34
Chance Wetting Rain	>= 30%	15 to 29%	<= 14%
Ridge Wind Gust	<= 9 mph	10 to 19 mph	>= 20 mph
*Wind Direction	Criticality of wind direction highly dependent on burn operations and/or structures threatened		
Rainfall	>= 0.5 in	0.1 to 0.5 in	<= 0.1
LAL	1	2 to 5	6

4 or more EXTREME blocks in a day equals the potential for a Critical Weather Day

Smith River – Safety Message

INCIDENT #CA-SRF-000968

DATE:10/27 – 10/30 TIME: 0700-0700

Complacency

- Stay mentally engaged on the task at hand!
- Give clear briefings. Address complacency in your daily AAR.
- Clearly identify the day's mission and purpose.
- Use the "Buddy System" and watch out for each other. If you see something, say something.
- Ask yourself: "Are you doing the job safely, the way you were trained?"
- Look for a "new" or "fresh" approach to repetitive assignments.

PREPARE FOR A MEDICAL EMERGENCY

- Practice reporting the Medical Incident Report with all crew members.
- An emergency shouldn't be the first time that the process is reviewed.
- Know where the closest medical staff is located.
- Pre plan travel routes and utilize drop points as rendezvous locations if needed. Have a plan in case aircraft are unavailable.
- Know who else is medically trained within assigned resources.

OPERATIONAL TEMPO

- Maintaining operational tempo is not solely about speeding up to match or exceed the pace of the environment.
- It's also about knowing when operations should slow down and why.
- We are most vulnerable to accidents and errors when operational tempo changes, especially when it changes quickly.
- Maintaining good situation awareness despite change in operational tempo represents a considerable challenge.
- The key to managing operational tempo successfully is monitoring the changing environment and capabilities of the team, and then applying good judgment to determine whether to push forward or pull back while making necessary adjustments.

Points to Ponder

- Vehicle accidents are a common cause of firefighter injuries – Drive Smart
- Trees are a major cause of wildland firefighter injuries and fatalities – Look Up
 - FF's can be the cause of, or recipient of rolling debris – Look Around
- Heat and Cold, long hours, and repetition can lead to complacency and injuries – Pace yourself!
 - Multiple Resources of multiple typing doing multiple jobs = Multiple potential for injury – Stay Focused
 - Communicate clearly and get confirmation that your message is understood – Communicate Clearly

Safety Ron Booker

Safety Rob Pelton 231-629-7242

INCIDENT RISK ANALYSIS

ICS (215A) DAY SHIFT

BR/DV	HAZARDOUS ACTIONS – CONDITIONS	MITIGATIONS – WARNINGS – REMEDIES
ALL	WEATHER / THUNDERSTORM SAFETY	<ul style="list-style-type: none"> • Take weather throughout the shift to get timely and accurate information. • Is what we predicted what you are observing? • Request spot weather forecasts if you notice a notable change in the weather. • Communicate any changes in weather with your crew and adjacent resources. • Take shelter in a vehicle or building if possible. • If outdoors, find a low spot away from tall trees. If in the woods, move to an area with shorter trees. • If in open country, crouch low with feet together and minimize contact with the ground. • Don't stay on ridge tops or in wide open areas. • Get to hard packed roads during rain events. • Follow Thunderstorm Safety in your IRPG (pg. 17).
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Take extra precautions when entering or exiting the roadways. • Maintain high visibility when in the operational area and use warning lights when working on roads or traveling in smoke. • Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on the uphill side. Use spotters when backing or turning around. • Keep your speed down in all areas. Drive at or below posted speed limits. • Use warning lights when working on roads or traveling in smoke. • Use chock blocks and turn wheels into hills.
ALL	COLD STRESS	<ul style="list-style-type: none"> • Keep extra clothing handy if you get wet and need to change. • Drink warm, sweetened fluids. • Avoid touching cold metal or wet surfaces with bare skin. • Use proper engineering controls, safe work practices, and protective equipment.
ALL	DEBRIS FLOW / MUDSLIDES	<ul style="list-style-type: none"> • Never underestimate a debris flow or mudslide. • Never attempt to cross a debris flow. • Pay attention to weather forecasts for the burn area. • Know the warning signs (listen and watch for rushing water, mud, unusual sounds. • Have an evacuation/escape route planned that is least likely to be impacted by flash flooding.
ALL	STEEP TERRAIN & ROLLING DEBRIS	<ul style="list-style-type: none"> • Maintain 8'-10' spacing when working & walking. • Do not work above any personnel. • Evaluate the necessity to send personnel into areas with limited access.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p.22.) • Limit the number of personnel around snags and their exposure time. • Fallers must be qualified for the trees being felled. • Be alert around hazard trees during wind events, even green trees. • The hazard zone extends a minimum of 2½ tree lengths. • Avoid parking vehicles or taking breaks under or near hazard trees.
ALL	FATIGUE AND COMPLACENCY	<ul style="list-style-type: none"> • Be alert, and monitor all resources for signs of fatigue, and take breaks as necessary. • Maintain a 2:1 Work to rest ratio. • Repeated assignments in the same area can lead to complacency, making personnel more vulnerable to accidents. • Take steps to maintain situational awareness for the duration of the incident. • Take tactical pauses as practical and feasible.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> • Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-100' exclusion area around equipment. • Use road guards as needed to control traffic.
ALL	MENTAL WELL-BEING	<ul style="list-style-type: none"> • Prioritize sleep and eat a healthy diet. • Include your family and friends. Call home and initiate social connections. • Monitor resources and engage in healthy activities. • Focus on positivity and engage in self-care.
ALL	MOP-UP	<ul style="list-style-type: none"> • Balance the risk of exposure to hazards against the mop-up objective. • Evaluate areas for hazard trees and locate stump holes for avoidance. • Monitor fatigue; shorten shifts to increase rest where appropriate. • Review and follow "Look Up, Look Down, Look Around" procedures. • Evaluate mop-up distances against what is safe and necessary.

AIR OPERATIONS SUMMARY ICS-220

Incident Name / Number	Sunrise / Startup / Cutoff / Sunset
SMITH RIVER COMPLEX - CA-SRF-000968	7:44 7:16 17:45 18:14
General Remarks, Safety Notes, Hazards, Air Operations Special Equipment, etc.	
Be sure to Contact: "NORTH COAST DISPTACH" for any aviation needs. Forward any new medivac lat-longs up to your supervisor in format: DDD° MM.MMM' Contact: BRANDEN MARTIN if you have any questions (530) 927-7336	

WHEN IN POOR VISIBILITY CONDITIONS
ADD VISIBILITY DISTANCE TO YOUR I/W/ SIZEUP TO JUSTIFY IFR HOIST - IF NEEDED.
 Example: Ertid transmission with "Requesting hoist, current visibility less than a half mile."
 Go direct with Branden with any recon requests. This 220 will be good for the next three days

Smith River Complex Incident: Resource Advisor Message

IMPORTANT: Yellow/White Striped flagging 'Equipment Exclusion' indicates resource **AVOIDANCE** areas.

Lil' Gasquet fact! With its diverse soils, the Smith River basin supports at least 27 species of rare or endangered plants. These rare plants are protected within specially designated tracts like the Myrtle Creek Botanical Area, North Fork Botanical Area, Bear Basin Butte Botanical Area, and Broken Rib Botanical Area. *Darlingtonia californica* (right picture)

CULTURAL AND HERITAGE RESOURCES:

The area you are working in is rich in cultural and heritage resources which may be encountered while fighting fire or during suppression repair. Avoid disturbing cultural or heritage resource if encountered.

- GPS its location and take a photo, do not remove or collect anything. Work with your division to notify a READ for recommendations on how to proceed.
- Some cultural resources present hazardous conditions, such as mining shafts. Be attentive to these potential hazards when working around known mining areas or in rocky areas.
- Known resources may be flagged ahead in work areas.
- Finding of cultural resources should not be reported over the radio.

PORT ORFORD CEDAR ROOT DISEASE:

Some local drainages are infected with a root disease that spreads via mud and water and kills Port Orford cedar trees. To prevent spreading this disease to uninfected areas, all water tenders and engines will apply bleach to their tanks (1:1000 ratio). Use **Designated Draft Site Location in your Division (setup with Bleach and fish screen)**

WEED WASH:

The area in and around the Smith River Complex, are home to many sensitive species. Infestations of highly invasive plant species are one of the largest threats to sensitive species populations here. Spread via vehicles and foot traffic as well as re-activation via fire is of high concern. To help protect these sensitive places, do not park in and try to avoid areas flagged areas. **Make sure to visit the WEED WASH just north of Gasquet Ranger District Office on the south side pullout State Highway 199.**

HAZARD TREE ABATEMENT GUIDELINES

17N05 and 17N08 Road Systems

Treatment Extent Includes Items 1-3

- 1) Cutting trees within 1.5 tree lengths above the road and 0.5 dominant tree height (roughly 80') below the road.
- 2) Only cutting **completely** dead trees. Trees with a single green needle shall stay unless impeding operations (ie. completely dead trees beyond trees with few green needles).
- 3) Felling of all trees less than 18" dbh, trees over 18" dbh may be cut if within striking distance of areas of moderate use. This includes areas of moderate and high personnel residence time such as landings, campgrounds, and bathrooms. Coordinate with Timber Resource Advisors on moderate use determination.

Key Operational Side Bars

- Ground equipment will be limited to slopes of 35% or less.
- Coordinate with Resource Advisors for equipment exclusion zone and site-specific treatments.
- No equipment is allowed within Riparian Reserves (Equipment Exclusion Zones) - 320 feet slope distance of perennial and 160 feet intermittent stream channels. Retain trees in Riparian Reserves, unless excessive fuels loading.
- Within Equipment Exclusion Zones, with coordination with resource advisors, material may be removed from these areas if full suspension can be achieved in order to prevent excess fuels loading.
- Whole tree yard and skid to greatest extent practicable.
- Minimize Landing Sizes
- ≤ 1 ft. stump height

Rules and Guidelines:

- **Always buck for the longest preferred length. Preferred Lengths are 16'6", 33' and 41.**
- Logs not capable of being bucked to a preferred length shall be bucked to the next longest length in two-foot (2') multiples.
- Minimum scaling diameter is 6" DIB. Minimum log length is 10'. Maximum log length is 41' for tree less than 36" dbh.
- All trees 36" dbh or higher felled and retained onsite, unless excessive fuels loading.

Unless otherwise specified during operations, each piece less than or equal to 20 feet will have a trim allowance of 6 inches. All logs 22-40 feet will have a 12-inch trim allowance.

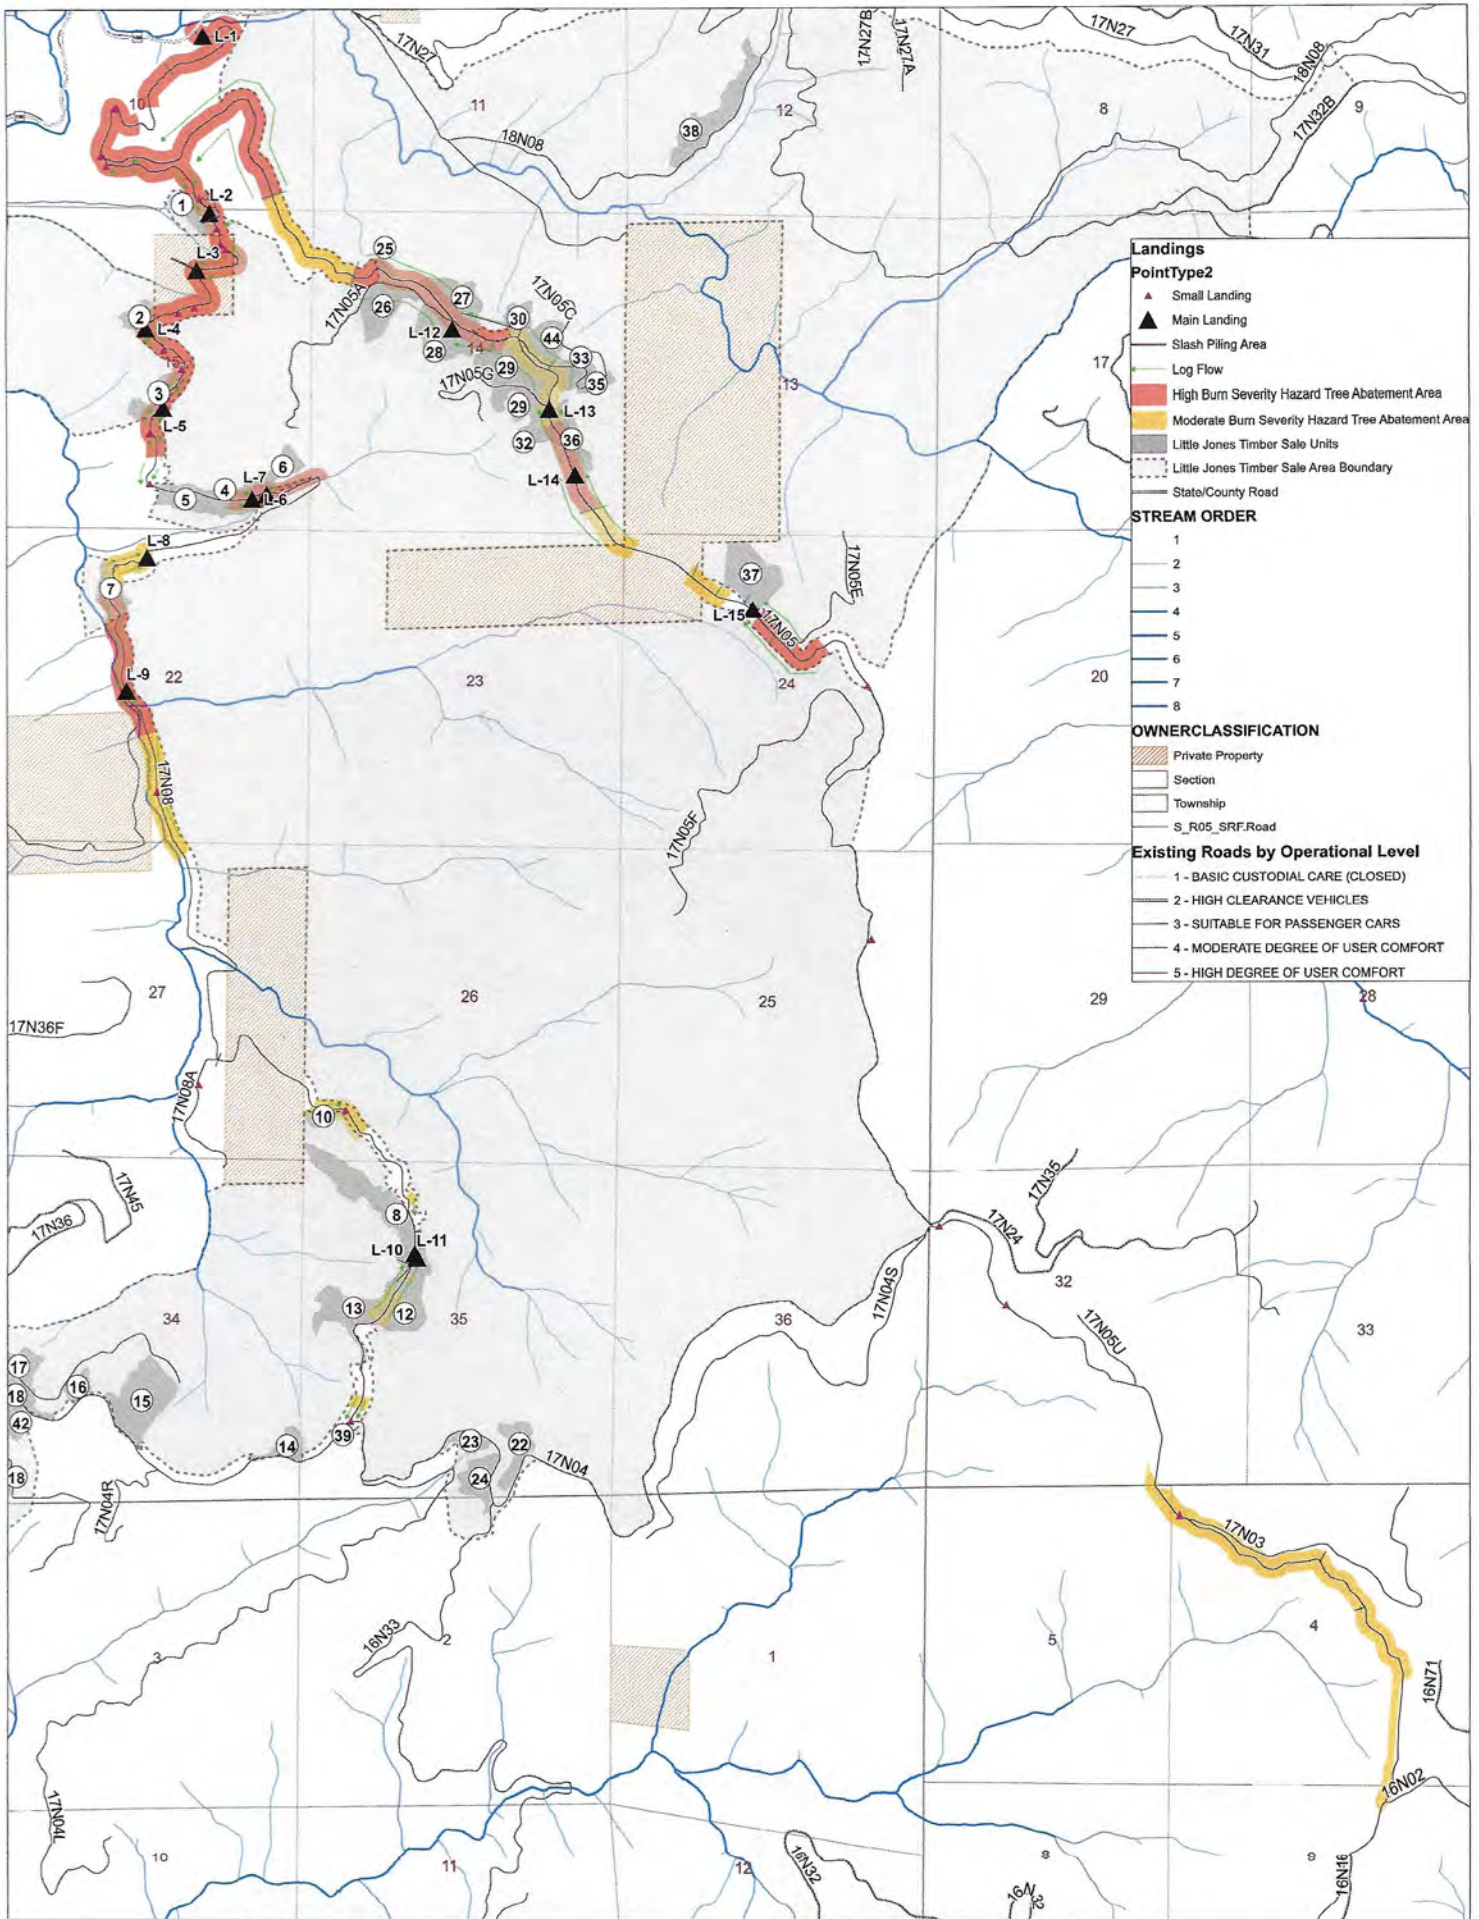

Slash

- (1) **Chipping** is the preferred method – chip depth should not exceed 6 inches.
- (2) **Machine piles** – this is second preferred method of slash disposal. **No soil in piles.** Follow site specific of pile size and placement. Cover piles with **black 6ml plastic over a minimum of 75% of the pile.**
- (3) **Stack hardwood boles separately.** Keep stacks < 10 ft. in height.
- (4) Slash must be spread to a depth of not more than six (6) inches.

Flagging Colors

- **Red:** Private Property boundary
- **Yellow:** Boundary of Little Jones Timber Sale
- **Orange:** Landing
- **White and yellow striped "EQUIPMENT EXCLUSION":** Avoidance area (Exceptions: work with Resource Advisors for special circumstances)
- Minimize walking equipment across chip sealed or asphalt surface. Rubber mats or tires are required when crossing.
- Keep road surface and ditches free and clear of debris.
- Protect all structural improvements.

New Traffic Schedule for U.S. 199 in Del Norte County

Published: Sep 12, 2023

Beginning Thursday, Sept. 14 U.S. 199 in Del Norte County will be closed from 8 a.m. to 11 a.m. and 1 p.m. to 4 p.m. U.S. 199 will open to one-way controlled traffic from 11 a.m. to 1 p.m. The two daily closures will be in effect Monday – Friday. Saturday, Sunday and before 8 a.m. and after 4 p.m. Monday- Friday U.S. 199 will be open to one-way controlled traffic. Motorists should anticipate up to one-hour delays during all open hours.

Caltrans will continue to pilot northbound traffic from Patrick Creek to Oregon Mountain Road and southbound traffic from Oregon Mountain Road to Patrick Creek. By “timing it right” to arrive slightly before and during these open windows, travel impacts can be greatly reduced as crews continue their hard work battling the elements.

The work on U.S. 199 involves the removal of hazardous trees, repairing and replacing damaged guardrails and slope stabilization. Because the repair work involves multiple contractors working at several locations, vehicular traffic is unable to go through the site smoothly without completely stopping the work. In order to expedite the work while providing safe access for the traveling public, it is necessary to close the road fully twice daily.

By closing U.S. 199 to motorists for short periods, the contractors can focus on completing the necessary repairs to get the road fully reopened before the rainy season begins. If we were to refrain from utilizing these intermittent, full closures, it would likely take 2 to 3 times as long to complete the necessary repairs.

This plan is subject to change if there is a safety risk to the traveling public and/or personnel.

U.S. 199 Traffic Schedule in Del Norte County

8 to 11 a.m. Full closure

11 a.m. to 1 p.m. Open to one-way controlled traffic

1 to 4 p.m. Full closure

4 p.m. to 8 a.m. Open to one-way controlled traffic

Saturday and Sunday Open to one-way controlled traffic

Follow Caltrans District 1 social media for more updates, and check quickmap.dot.ca.gov or the QuickMap app for the latest road conditions.

FINANCE MESSAGE

Fire Name: Smith River Complex
Fire Number: CA-SRF-000968
Accounting Code: P5 QJ6L (0510)
Email: 2023.smithrivercomplex.finance@firenet.gov

**Finance will be located at the Gasquet Ranger Station
Please email if you have any questions.**

Finance Documents Needed upon "Check In" (If Not Already Submitted):

Please email these documents or scan the QR Code below, attach & submit.			
FED Equipment/ Crews: <ul style="list-style-type: none">• Manifest - showing employment type (GS or WG) or AD rates if applicable	Overhead: <ul style="list-style-type: none">• AD/Casual Hire Form• If regular Agency please ensure "GS" or "WG" is written on your first CTR	Contract Equipment/ Contract Crews: <ul style="list-style-type: none">• Agreement• Manifest• Resource Order• Inspections	Cooperator: <ul style="list-style-type: none">• Cooperative Agreement• Resource Order

CLAIMS- If you have a claim please email it in as soon as possible.

Prior to your demob date, please contact Finance *via email* to expedite the demob process.

Upon submittal of your final CTR/Shift Tickets, Finance will email you copies of your pay documents for review and signature.

Local Government Resources on CFAA

If you are demobing from the incident and there is not an OES AREP on site:

Email your 213 to sarah_rietz@firenet.gov

Utilize your MARS account for your F-42

Once your draft is complete call:

Chief Wakefield 916-704-3445

Or

Chief Courson 916-281-4484

If claiming any expenses, you MUST have Finance sign your form 213 and demob 221

Call the above numbers if you have any questions

Smith River Complex
(South)

CHECK-IN

1. Scan the QR code and select INITIAL CHECK IN. If returning from R&R use the same QR code but fill out the RETURN FROM R&R link.

Submit all required documents to Finance by emailing them to 2023.SmithRiverComplex.Finance@firenet.gov

2. Go find your incident supervisor or attend morning briefing.
E-Mail: 2023.SmithRiverComplex.Checkin@firenet.gov

DEMOB

1. Come to the District Office at 10600 US-199 in Gasquet and pick up a 221

-OR-

2. Scan the QR code on the front of your IAP and select the **Demob** questionnaire
3. Make sure you are current with your CTR's or Shift Tickets.
4. Gary Wright will be at the District Office to handle **Supplies** and **Communications**.
5. Finalize time with **Finance**.
6. Submit the completed paper 221 to DEMOB or submit the electronic questionnaire
Safe Travels!

If you need a flight home contact DEMOB 72 hours (3 days) before your demob date. Stop by to fill out an Air Travel Request form.

DEMOB questions ? 541 801-3761

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "**MEDICAL EMERGENCY**" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)

"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency AND Transport Priority (priority 1, 2, 3)	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	
	<input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i>	
	<input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Crew Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: (IRPG PAGE 106)	Age:	Weight:	Chief Complaint:
Skin Signs: (color/moisture/temp)	Level of Consciousness:	BP:	HR: Respirations:
Treatment:			

4. TRANSPORT PLAN:

Evacuation Location (<i>drop point, intersection, helispot, Lat. / Long, hazards</i>)	Patient's ETA to Location:
---	----------------------------

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Paramedic / EMT - Crews - Immobilization Devices - AED - Oxygen - Trauma Bag - IV/Fluid(s) - Splints - Rope rescue - Wheeled litter - HAZMAT - Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method?
Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training
Be Alert - Keep Calm - Think Clearly - Act Decisively

*** Follow up with MEDL upon return to ICP ***
