## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 3	<b>TYPE OF FIRE:</b> Wildfire
<b>FIRE NAME:</b> SRF Lightning Complex	<b>OPERATIONAL PERIOD:</b> August 21, 2023 24hr
<b>DATE ISSUED:</b> 8/20/23	<b>TIME ISSUED:</b> 1800
<b>UNIT:</b> CA-SRF	<b>SIGNED:</b> _____
	<b>Typed/printed:</b> Dennis Burns/s/

### INPUTS

**WEATHER SUMMARY:** \*\*\*Partly Sunny with areas of dense smoke\*\*\*

Temps: Inland Day 77-84 Night 63-69 Redwood Day 70-76 Night 59-65  
 RH: Inland Day 40-52% Night 53-73% Redwood Day 45-57% Night 75-85%  
 Winds: Day Inland W 2-5 gusts to 12mph. Redwood NW 6-8 gusts to 14mph.  
 Night Inland Downslope 2-5mph Redwood Downslope 3-5mph.

**FUELS SUMMARY:** Dense mixed conifer, old-growth timber, heavy dead/down, mixed ground fuels.

### OUTPUTS

**FIRE BEHAVIOR**

**GENERAL:**

The majority of all of the fires in the complex are presently in a backing alignment. Primary fire spread will be active backing surface fire. Roll out will also contribute to fire spread. Rapid upslope runs are possible from the rollout but the fire will burn back into itself. Any other spotting will be short range less than 100 feet. With the large amount of snags expect some single tree torching. The cloud cover and smoke will moderate fire behavior. However, if the smoke and clouds clear, expect a dramatic increase in fire behavior. With the steep multiple intersecting drainages, active fire has a high probability of generating fire whirls.

If any resources are called to assist with IA expect minimal rates of spread with mainly surface fire and some torching in the denser tree stands.

**SPECIFIC:**

**Lone Pine:** Minimal forward fire progression is expected. Containment lines will continued to be challenged from rollout and falling snags.

**Pearch Fire:** Expect active backing and flanking fire spread. Keep a heads up for fire spread or rollout that could lead to slope reversals. Fire established on a aligned slope will have rapid rates of spread and the potential for short crown runs. All other fires to the north including;

**Mosquito Fire:** Minimal forward progression expected for the next 24 hours.

**Redwood Fires:** Lost Fire: Expect backing fire with minimal flame lengths. Some single and group tree torching is probable with short range spotting. Keep a heads up for fire movement south across Lost Man Creek which will lead to a slope reversal up Holter Ridge. Devil and Glen Fires: Continued smoldering with no new forward fire movement expected.

**Night Shift:** With the RH recovery minimal forward fire progression is expected on any of the fires.

**AIR OPERATIONS:** With the smoke and cloud cover opportunities for air support are minimal.

### SAFETY

- Make sure Lookouts are posted in places where they can see potential spotting.
- Fire weakened timber poses a threat to personnel working in timber areas .
- Unburned fuel between you and the fire.

# SAFETY MESSAGE

*Fire fighter safety comes first on every fire, every time*

INCIDENT: SRF Lightning Complex

Date: 8/21/23 thru 8/22/23

Operational Period: 0700-0700

## Take Your Time!

Take your time driving, there is nothing out there that we need to get to quickly.

Take time to thoroughly scout work areas. We have already had two injuries with snags/branches falling out of trees. As you move through an area look again for things that could fall. Can you mitigate? Should you be there?

**Take a moment to re-assess your situation.  
STOP THINK TALK Then ACT**

### PLANNING FOR MEDICAL EMERGENCIES

Prior to each operational period, all wildland firefighters need to ask and be able to answer the following questions:

1. **What are we going to do if someone gets hurt?**
2. **How will we get them out of here?**
3. **How long will it take to get them to them to the hospital?**

All operational activities should be based on answers to these questions. If the answers are insufficient, stop, reassess, and consider alternative strategies and tactics.

**2022 IRPG Page 2**

### DRIVING

**Go slower than you normally would.**

Giving yourself an additional 1/2 second to a few seconds of reaction time can mean the difference between life and death.

**Go slower through town.** People that live here are not used to the amount of traffic there is now. Going slower will add additional reaction time.

**Avoid Distractions.** Don't talk on the cell phone, grab a map or your lunch while driving. Pull over if you need to do something other than drive.

TEAM SAFETY OFFICERS: Doug McKelvey, Matt Lipson, Linda Ferguson, John Nickey

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "W" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeaters (and depending on use, base stations) must be programmed with the Rx and Tx reversed.
