2023 SRF LIGHTNING COMPLEX

PLAN

CA-SRF-000986

P5QKB4 (0510)

OPERATIONAL PERIOD

08/23/2023 - 08/24/23

0700 HRS - 0700 HRS

	ř.

INCIDENT OBJECTIVES (ICS 202)

INCIDENT NAME:
 SRF Lightning Complex

2. DATE: 8/22/2023 3. TIME: 1900 hrs.

4. OPERATIONAL PERIOD (DATE/TIME):

08/23/2023 thru 08/24/2023 0700 to 0700

5. OBJECTIVES:

Strategic Framework

Confine, contain, or control all fires utilizing a full suppression strategy. Values at risk include human safety, private timberlands, communities, cultural, critical infrastructure, and associated improvements. Apply tactics that offer the highest probability of success.

Leaders Intent

Provide the highest level of customer service to all involved with or impacted. Ensure transparent, timely and accurate communication at all levels of the incident and strengthen relationships with cooperators. All incident assigned personnel should be prepared to take appropriate actions regarding:

- Personal safety and the safety of others, including driving slowly and defensively.
- Manage fatigue by taking breaks and maintaining work/rest cycles.
- Minimize risk and limit exposure to infectious disease by implementing Center of Disease Control, California Department of Public Health, and agency guidelines.
- Professional behavior, and timely/effective communication.

Management Objectives

- Prior to engagement, stop and discuss strategies and tactics to ensure sound risk management principles are in place to provide for firefighter and public safety.
- Implement fire suppression activities in accordance with Incident Resource Advisors.
- · Minimize impacts to cultural, resources, infrastructure, and private property inholdings.

Control Objectives

Keep Fires within the Six Rivers National Forest:

- Within remote National Forest areas to protect heritage, cultural, natural resources.
- East of Hoopa, Orleans and Hwy 96 to protect the communities along the Klamath River corridor.

Keep Fires within the Redwood National Park:

 As small as possible and within park lands to protect old growth redw 	voods, private timber land and cultural values.

2023 SRF Lightning Complex (Branches X & V) Weather Forecast

FORECAST NO:

FORECAST FOR: Wed, Aug 23th Day/Night Shift

FORECAST ISSUED: Aug 22, 2023, 1900 PDT

NAME OF FIRE: 2023 SRF Lightning Complex

SIGNED: /s/ Rebecca Muessle - IMET

WEATHER DISCUSSION: A transitional day with weak high pressure over the area. Thinning clouds and more mixing once the inversion weakens around 1400. Diurnal night time east winds will become northwesterly through the day. Clearer skies means temperatures will be warmer and humidity drier. More active weather on Thursday.

For Lost fire weather, please see next page

FORECAST FOR TODAY: Morning marine stratus (45-70%), with less cloud cover inland (30-40%). Winds will increase from the west in the afternoon becoming easterly overnight. Warmer and drier.

Branch X Fires:

Branch V Fires:

	Branch Villes.				
Max Temperature: 78-84°	Max Temperature: 79-86°				
Min RH: 27-35%	Min RH: 29-38%				
20 FT Winds	20 FT Winds				
Slopes/Valleys: NE 2-4 mph becoming upslope 4-8 mph	Slopes/Valleys: NE less than 5 mph in the AM becoming upslope/terrain driven 5-9 mph				
Ridges: NE 4-6 mph becoming 8-11 mph with gusts up to 20 mph	Ridges: NE 3-6 mph becoming NW 7-10 with with gusts up to 16 mph				

OUTLOOK FOR TONIGHT: Partially clear skies (30-40%) with cooler temperatures and lower nighttime recoveries. Valley bottoms will see higher recoveries. Weak inversion builds at 700 ft with the thermal belt setting up to 1500 ft after 0100.

Branch X Fires:

Branch V Fires:

	Dianon Vinco.		
Min Temperature: 52-58°	Min Temperature: 52-67°		
Max RH: 87-98%	Max RH: 70-85%		
20 FT Winds	20 FT Winds		
Slopes/Valleys: Downslope/drainage 3-5 mph	Slopes/Valleys: Downslope/drainage 2-5 mph		
Ridges: NW 5-7 with gusts to 15 mph becoming NE 4-6 mph overnight	Ridges: NW becoming SE 4-7 mph		

OUTLOOK FOR THURSDAY: Pattern change with low pressure systems moving in. Westerly winds will become more dominant and stronger in the afternoons. 10% chance for gusts around the Mosquito to reach 25+ mph. Minimal change in temperatures or humidity. 10% chance for afternoon thunderstorms.

PLEASE submit your weather observations to the IMET at (971)394-0798.

2023 SRF Lost Fire Spot Weather Forecast

NAME OF FIRE: 2023 SRF Lightning Complex FORECAST FOR: Wed, Aug 23th Day/Night Shift FORECAST ISSUED: Aug 22, 2023, 1900 PDT

SIGNED: /s/ Rebecca Muessle - IMET

Discussion: General onshore flow through the next 48 hours. High pressure builds over the region today which will cause the inversion at the surface to intensify. The inversion will persist at 700 ft through much of the day causing little mixing of clouds and smoke. Patchy morning fog in the valley bottoms where humidity nears 100%. Above the inversion (1500 ft) expecting much more mixing which will improve smoke concentrations. Morning northeasterly drainage winds will become northwesterly and upslope in the afternoon. Low pressure nears the coastline on Thursday which will cause a change in the overall weather.

For Branch X & V fire weather, please see previous page

TODAY

Below 700 ft	Above 700 ft				
Max Temperature: 69-76°	Max Temperature: 75-83°				
Min RH: 53-61%	Min RH: 38-47%				
20 FT Winds	20 FT Winds				
Valleys: Variable becoming upslope 5-8 mph	Valleys/Slopes: Drainage then upslope 7-9 mph with gusts to 13 mph				
	Ridges: East 2-4 mph then W 8-10 mph with gusts				

to 17 mph

TONIGHT

Below 700 ft	Above 700 ft

Min Temperature: 52-60°	Min Temperature: 55-62°			
Max RH: 85-99%	Max RH: 75-96%			
20 FT Winds	20 FT Winds			
Valleys: Drainage 2-5 mph	Valleys/Slopes: W 4-8 mph becoming NE 2-5 mph			
	Ridges: W 8-12 mph becoming NE 4-7 mph			

OUTLOOK FOR THURSDAY:

Pattern shift as a series of low pressure systems will move throughout the Pacific. We will see stronger onshore flow and winds, especially in the afternoon. These winds will cause a bit more mixing allowing for the lower levels of the atmosphere to clear out in regards to skies and smoke. Fog is less likely. An inversion will once again set up in the late afternoon as warmer air moves in at 1500 ft and cooler air settles near the surface. High temperatures in the valleys will be unchanging from the past few days with highs in the 60s-70s. Above the inversion temperatures will be in the 80s. Smoke will still temper highs for the days. Humidity will also lower to near 35% above 700 ft, and near 45% in the valley. Overnight recoveries will be high except along the ridge tops that are exposed to winds. Winds will be elevated between 1700-0200. Could see gusts as high as 25 mph. Confidence is low at this time. In the afternoon there is a 10% chance of showers and thunderstorms.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 5	TYPE OF FIRE: Wildfire
FIRE NAME: SRF Lightning Complex	OPERATIONAL PERIOD: August 23, 2023 24hr
DATE ISSUED: 8/22/23	TIME ISSUED: 1800
UNIT: CA-SRF	SIGNED:
	Typed/printed: Dennis Burns/s/

INPUTS

WEATHER SUMMARY:

Warmer and Dryer

Temps: Inland Day 79-86 Night 52-67 Redwood Day 69-83 Night 52-62 RH: Inland Day 27-35% Night 87-98% Redwood Day 38-47% Night 75-96%

Winds: Day Inland NE 8-11mph gusts to 20mph. Redwood NW 8-10 gusts to 18mph.

Night Inland NE 4-6mph Redwood NE 4-7mph.

FUELS SUMMARY: Dense mixed conifer, old-growth timber, heavy dead/down, mixed ground fuels.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Today is a transition day. Conditions are becoming warmer and dryer and there will be less shading from clouds and smoke. Expect, to see more active fire behavior, this includes multiple and group tree torching with short crown runs on aligned slopes. Primary fire spread will be active backing surface fire. Roll out will also contribute to fire spread. Rapid upslope runs are possible when fire reaches drainage bottoms and reverses slope. Spotting from torching trees will increase in range to 400 feet. With the large amount of snags, surface fire will be resistant to control. With the steep multiple intersecting drainages, active fire has a high probability of generating fire whirls.

Probability of ignition 70%

If any resources are dispatched to assist with IA expect minimal rates of spread with mainly surface fire and some torching in the denser tree stands.

SPECIFIC:

Lone Pine: No forward fire progression is expected fire behavior will be smoldering and creeping. Containment lines will continue to be challenged from rollout and falling snags.

Pearch Fire: Expect active backing and flanking fire spread. Keep a heads up for fire spread or rollout that could lead to slope reversals. Fire established on an aligned slope will have rapid rates of spread and the potential for short crown runs. All other fires to the north including Hancock and Let er Buck expect active surface fire with slow rates of spread. With the heavy dead down component fire will be resistant to control.

Mosquito Fire: Expect active surface fire with single and group tree torching. With the fire located on an exposed ridge, keep a heads up for spot fires from the torching trees.

Redwood Fires: Lost Fire: Expect backing fire with minimal flame lengths. Some single and group tree torching is probable with short range spotting. Keep a heads up for fire movement south across Lost Man Creek which will lead to a slope reversal up Holter Ridge.100-1000hr fuels are what's carrying the fire. Devil and Glen Fires: Continued smoldering with no new forward fire movement expected.

Night Shift: With the RH recovery minimal forward fire progression is expected on any of the fires.

AIR OPERATIONS: Clear conditions over the fires however, fog at the coast has the possibility of preventing the launch of aircraft.

SAFETY

- Make sure Lookouts are posted in places where they can see potential spotting.
- Fire weakened timber poses a threat to personnel working in timber areas.

SRF Lightning Complex-Safety Message

INCIDENT: SRF Lighting Complex Date: 08/23/23-08/24/23 0700-0700

Major Hazards, Risks, Mitigation Reminders:

- > Complacency, Be aware of: Human Factors, Attitudes, Leaders Intent, Communication
- > Driving: Slow and Cautious with Lights On. Watch out for Traffic & Wildlife
- > Snags and Weakened Trees: Maintain Situational Awareness
- Leadership: Know who your leadership is, know where you are supposed to be, know your assignment, and who you report to. Ensure your radios have the appropriate frequencies. Give and receive understandable and comprehensive briefings. Confirm that information is received, acknowledged, and understood. Establish and maintain continuous information flow. Take your time through transitions, serious accidents can occur at any time. Know what your roles and responsibilities are. Be prepared to respond to an IWI.
- Medivac Procedures: Take time to review the Medical Plan, ICS 206, know exactly how to proceed before an injury occurs. Know where the closest landing zone is and where the line EMTs are located.
- **Driving:** Be aware of local traffic. Drive defensively. Hillside stabilization is weakened due to fire damage and steep slopes. Be heads-up while driving. Be mindful that the hillsides are unstable. Do not get distracted. Communicate traffic problems and hazards. Civilian traffic on highways tend to travel at high speeds. Continue to slow down, be courteous and drive cautiously. Be mindful of pedestrians and wildlife on the roads.
- Snags and Weakened Trees: Hazard Tree Safety, LCES is a must. Establish a NWZ (no work zone) if necessary. Make sure you communicate all hazards. If you see something say something. Maintain Situational Awareness... Please Remember: Look Up, Look Down, Look Around
- **Heavy Equipment:** Keep a safe distance. Make sure the heavy equipment operator knows your location. Watch for rolling material, falling, and moving of trees, branches, logs, and rocks. Ensure the operators and folks working with the heavy equipment are trained and know the hazards. Don't approach moving equipment until you are sure the operator is aware of your presence.

Practice Leadership in Safety

- Situational Awareness: Communications, Weather, Local Factors, Assess Hazards, Communicate Hazards.
- Maintain Your Health: Personal Safety, Safety of Others, Manage Fatigue, Minimize Risk Get Quality Rest, Get Good Nutrition & Hydration.

Thanks, from your CAIIMT2 SAFETY TEAM!

Prepared by:

Annamaria Echeverria SOF1(t)

SRF Lightning Complex Safety Team Risk Management for Hazard Trees

August, 2023

Hazard trees, both dead (snags) and green trees, are one of the highest risks found in forests on the SRF Lightning Complex. Observe & share hazard tree intel with your crew and others on the Fireline.

Ask yourself: How serious is the hazard & what is the probability that it will occur?

Environment:

- Gusty winds from storm cells
- Water/ retardant drops or copter rotor wash
- Night operations
- Steep slopes
- Changing forest health conditions Diseased/bug-kill areas
- Number and height of hazard trees
- Potential for trees to domino into each other.

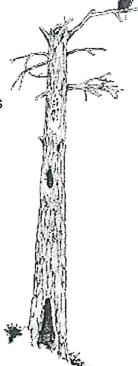

Tree Indicators:

- Trees burning for any period of time
- High risk tree species (rot and shallow roots)
- Numerous downed trees
- Dead, broken, or burning tops and limbs
- Absence of needles, bark, or limbs SNAGS!
- Leaning or hung-up

Hazard Control and Mitigation:

- Utilize qualified sawyers & Falling Bosses
- Establish a secure felling area, minimum of 2 ½ times tree height
- Post a lookout to keep personnel clear of the felling area
- Initiate road closure & traffic control if necessary
- Plan a quick & safe escape route if Plan A does not work
- All eyes on the tree being felled and trees in the falling layout
- Stay clear of the felling area until "All Clear" called by the sawyer
- Flag, sign & map "No Work Zones" in high-risk areas.
- Keep clear of water/retardant drops near trees/snags
- Reposition to a safe area in response to high wind forecast

MAINTAIN SITUATIONAL AWARENESS - LOOK UP AND LIVE!

Training Specialist Message

An Incident Training Specialist is assigned to this incident and will be performing the duties "Remotely".

To assure proper documentation for your assignment:

- 1. Scan the QR Code
- 2. Complete the Trainee Registration Form

This is the link to sign up -

At the end of your assignment:

1. Trainee: Complete the exit interview form. Use the exit interview QR code to access the document.

This is the link to the exit interview form -

- 2. Trainer: Fill in the Position Task Book as completely as possible for this incident.
- 3. Trainer: Complete the ICS 225 performance evaluation and discuss with your Trainee. Make sure it's <u>signed</u> by both the Trainer and Trainee. Take a picture/copy of the ICS 225 and send it to imt2training@gmail.com

The Training Specialist will send the training documents to the email address you provided. For training related questions, call/text Dominic Panno (TNSP) at 530-913-8251 or email- imt2training@gmail.com

Human Resource Message SRF Lighting Strike Complex Fire

HUMAN RESOURCES MESSAGE

My name is Anthony "Tony" Torres. I am the Human Resource Specialist assigned to the incident. As the Human Resource Specialist, I am available to incident personnel to provide work environment information and assist with conflict resolution if needed. If I can be of assistance to you, please let me know. I'm in the trailer at the end of main street. You can also contact me by cell phone at 505-249-2341 or via e-mail at Anthony_Torres@firenet.gov

As a reminder, we have a zero tolerance for illegal drugs, alcohol, sexual harassment, and any other type of inappropriate behavior. We expect all incident personnel to treat each other with dignity and respect, and to work as a team to support a positive work environment.

Be Safe! Keep your positive attitude and have a great day!

Tony Torres - (HRSP) - (505) 249-2341
