1. Incident Name:		2. Operational Period:	
SRF LIGHTNING COMPLEX		Date/Time From: 09/03/2023 0700 SUN	Date/Time To: 09/04/2023 0700 MON
3. Objective(s):			
<p>STRATEGIC FRAMEWORK Confine, contain, or control all fires utilizing a full suppression strategy. Values at risk include human safety, private timberlands, communities, cultural, critical infrastructure, and associated improvements. Apply tactics that offer the highest probability of success.</p> <p>LEADERS INTENT Provide the highest level of customer service to all involved with or impacted. Ensure transparent, timely and accurate communication at all levels of the incident and strengthen relationships with cooperators. All incident assigned personnel should be prepared to take appropriate actions regarding:</p> <ul style="list-style-type: none"> • Personal safety and the safety of others, including driving slowly and defensively. • Manage fatigue by taking breaks and maintaining work/rest cycles. • Minimize risk and limit exposure to infectious disease by implementing Center of Disease Control, California Department of Public Health, and agency guidelines. • Professional behavior, and timely/effective communication. <p>MANAGEMENT OBJECTIVES</p> <ul style="list-style-type: none"> • Prior to engagement, stop and discuss strategies and tactics to ensure sound risk management principles are in place to provide for firefighter and public safety. • Implement fire suppression activities in accordance with Incident Resource Advisors. • Minimize impacts to communities, cultural resources, natural resources including old growth redwoods, critical power, communication and other infrastructure, private property inholdings, Tribal Lands, Timber Lands, TESC Species, and watersheds. <p>CONTROL OBJECTIVES Keep Fires within the Six Rivers National Forest:</p> <ul style="list-style-type: none"> • Within remote National Forest areas to protect heritage, cultural, natural resources. • Away from private lands, Hoopa, Orleans, and Hwy 96 to protect the communities along the Klamath River corridor and private lands. <p>Keep Fires within the Redwood National Park:</p> <ul style="list-style-type: none"> • As small as possible and within park lands to protect old growth redwoods, private timber land and cultural values. 			
4. Operational Period Command Emphasis:			
<ol style="list-style-type: none"> 1. Manage risk to firefighters by ensuring hazards are identified, assessed, and where possible mitigated . Be prepared to accept residual risk when values threatened warrant it and the probability of achieving objectives is high. 2. Utilize strategies and tactics that commit responders only to operations where and when they can be successful, and under conditions where important values at risk are protected with the least exposure necessary. 3. Contain and control portions of the fire that are a threat to identified values to be protected. 4. Mop-up to the extent necessary to prevent escape of the fire and additional spread or damage to other values within the perimeter. 5. Implement practices that reduce the potential for spread of infectious disease, such as distributed operations, adhering to CDC guidelines and other actions that improve the health environment for firefighters and support personnel. 			
General Situational Awareness:			
<ol style="list-style-type: none"> 1. Complete a good size up of your work area to mitigate hazards. 2. Be prepared for changing weather conditions. 3. Minimize firefighter exposure to falling tree hazards. 4. Know who you are working for.

2023 SRF Lightning Complex (Branches XX, X & V) Weather Forecast

FORECAST NO: 17
FORECAST FOR: Sun, Sep 3rd Day/Night Shift
FORECAST ISSUED: Sep 2nd 2023, 2000 PDT

NAME OF FIRE: 2023 SRF Lightning Complex
SIGNED: /s/ Ryan Walbrun – IMET

WEATHER DISCUSSION: An area of low pressure will remain over the region with just enough lingering instability to keep a 15% chance of afternoon showers in the forecast across the SRF Complex. Best chances look to be in Branch X and XX. Otherwise expect partly cloudy skies with temperatures warmer than the last few days but still running near or slightly below normal with valley highs in the upper 70s and lower 80s while the higher ridges above 3000 feet will stay in the upper 60s. General winds will be from the West to Northwest and light. Humidity values will only lower to around 55-65%

For Lost Fire and Branch XL weather, please see next page

FORECAST FOR TODAY: Some patchy morning fog otherwise partly cloudy. A 15% chance of an afternoon rain shower. Rain amount with any showers less than 0.10 with most areas staying completely dry.

Branch XX Fires:

Branch V & X Fires:

Max Temperature: 68-74° (5 degrees warmer)	Max Temperature: 75-82° (5 degrees warmer)

Ridges: Light, becoming NW 3-6 with gusts 10-15 mph in the afternoon.	Ridges: Light, becoming NW 4-8 with gusts 10-15 mph in the afternoon.

OUTLOOK FOR TONIGHT: Skies becoming mostly clear except areas of patchy fog slopes and valleys.

Branch XX Fires:

Branch X & V Fires:

Min Temperature: 52-57°	Min Temperature: 49-54°
Max RH: 80-100%	Max RH: 85-95% mid and upper slopes with near 100% in the river drainages.

Ridges: NW 3-6 mph becoming NE overnight	Ridges: NW 3-6 mph becoming NNE overnight

Extended Forecast: A seasonal weather pattern sets up for much of next week with weak high pressure at the surface and zonal flow aloft. This should translate to near normal temperatures and little or no precipitation. Daytime highs warming back into the upper 70s ridges with upper 80s and lower 90s in the valleys by mid to late week. Overnight lows in the 50s. Afternoon humidity lowering 30-40% with good nighttime recovery. General winds remain from the West, strongest in the afternoon hours with gusts 10-15 mph but with light slope winds night and morning hours.

Discussion: Lingering clouds and fog this morning with skies turning partly cloudy this afternoon. About a 10% chance of a stray shower or sprinkle this afternoon as lingering instability remains with low pressure finally exiting. Any rain amounts would be less than a tenth with the most likely scenario being no rain over the Lost Fire. Continued seasonably mild with highs in the 60s with high humidity readings. Winds will be onshore or westerly and generally light with gusts to around 15 mph afternoon hours.

FIRE BEHAVIOR FORECAST			
Incident Name	SRF Lightning complex	Forecast Number	01
Operational Period	09/03/2023	Date/Time Issued	09/02/2023 1900
Unit	CA-KNF	Forecast by (Name & Position)	Glen Lewis FBAN
Inputs			
<i>See attached fire weather forecast</i>			
<p>FUELS: Primary fuels are conifer with litter and brush understory. The area has multiple burn scars adjacent to the fires with light fuels. Fire scars over 5-8 years old have a higher fuel load. Fire scars beyond 8 -10 years old generally have a significant dead and down component with higher and more continuous brush that will support substantially higher rates of spread and intensity under dry conditions.</p>			
Outputs			
<p>General Conditions today are similar to yesterday with very good overnight recovery and moderate humidity and temperatures throughout the normal burn period today. Fine dead fuels are saturated due to recent rain, and high humidity recovery at night will slow the recovery to dryer conditions. Down woody fuels will be slow to dry and this will further shorten potential burn periods over the next several days. Average to above average live fuel moisture in the timber and brush will remain. Fire Indices are below average for this time of year and ERC's and heavier woody fuels will be slow to rebound above average for this time of year.</p>			
<p>FIRE BEHAVIOR: With the precipitation on the fire over the last 2 days and consistent high overnight humidity recovery, the time needed to dry out fuels will be extended resulting in a period of low fire activity. What activity that occurs will mostly involve the heavy downed woody fuels and stump holes. Little to no fire spread will occur on all of the fires within the complex today.</p>			
<p>SAFETY: LCES – Lookouts. When fire activity is high, post as many lookouts as needed to monitor your area of work and the surrounding area. Topography and weather may limit the effectiveness of lookouts; post more lookouts as needed. Establish communication with all lookouts to maintain and improve situational awareness.</p> <p style="text-align: center;"><u>A MOMENT FOR SAFETY CAN LAST A LIFETIME.</u></p>

WE WANT YOUR PHOTOS

Your photos and videos help us tell the story of the fire. They are critical in our communications with the public. You can bring them by the Information trailer or email them to 2023.lightningcomplex@firenet.gov . Please let us know the date, location, and persons in the photos.

THINK BEFORE YOU POST

With today's technology, it's easy to post pictures and text on social media from wherever you are. It's okay to do that on a fire as long as you follow a few simple guidelines.

- Make sure that taking and posting pictures doesn't interfere with your assigned work.
- Avoid posting pictures that show the agencies or the firefighting community in a negative light.
- DO NOT post pictures of accidents, injuries, or victims. Doing so could be traumatic for family members and could even have legal consequences.

WE HAVE LOST & FOUND

Information maintains a lost & found box. If you're missing items or if you have something someone else lost, stop by the Information trailer and we'll help you out.

HEALTH AND SAFETY MESSAGE

SAFETY starts with *YOU*

We are **ALL** accountable for **SAFE** behaviors

INCIDENT: SRF Lightning Complex & Redwood
Lightning Complex

DATE: 9/3/23

Shift: Day and Night

- **MISSION CREEP** – If your assignment does not have purpose and meaning or does not support meeting the objectives, you should re-access the assignment. How does your work contribute to the success of protecting critical values? Do you know what the critical values that you are protecting?
- **MEDICAL INCIDENT REPORTING** – Do you know what to do in case of a medical **emergency**? When in the field of operations, call Communications on a command frequency and provide a Medical Incident Report. Review Medical Plan (ICS 206) and become familiar with the “Medical Incident Report”. Your actions may be what save a life.
- **PERSONAL HYGIENE & INFECTIOUS DISEASE** – Wash your hands frequently and before you eat. Limit folks in face to face briefings to key members of your crew to limit spread of germs. Maintain your overall rest, hydration and nutrition.
- **COMMUNICATIONS** – Test your communications frequently on command to ensure you can reach communications. If you don't, designate the dead areas and work out a plan, i.e. human repeaters, incase you have a medical and need critical resources. Don't wait till an emergency to find out you don't have a way to communicate.
- **HEAVY EQUIPMENT** – Spend a few minutes in the morning to discuss the hazards of working around heavy equipment & chippers and how to maintain separation and work safety with the equipment.

*KEEP YOUR HEAD IN THE GAME. YOUR ASSIGNMENT IS NOT OVER
TILL YOU MAKE IT HOME SAFETY.
FINISH STRONG!!!*

Human Resource Message

Employee Advocate

Everyone here today is playing a critical role in repairing the damage following the wake of the fire. We all have our assignments that must be met in order to achieve our mission of protecting life, resources and property. Of course, we cannot accomplish our mission when one of our fellow team members may be experiencing a work and/or personal matter that is impacting their ability to stay focused and/or remain positive and present.

If we witness a team member who is having a rough go at it, become their advocate. Ask them how things are going. See if they want to take a break to talk about what's going on. Give them the opportunity to vent and to share with you their concern(s). You may be the person that brings them back to 'center' so that they can move forward to help meet our overall objectives. Remember, we're all human.
