#### **INCIDENT OBJECTIVES (ICS 202)**

1. Incident Name:	2. Operational Period:	
SRF LIGHTNING COMPLEX	Date/Time From:	Date/Time To:
	09/10/2023 0700 SUN	09/11/2023 0700 MON

#### 3. Objective(s):

#### STRATEGIC FRAMEWORK

Confine, contain, or control all fires utilizing a full suppression strategy. Values at risk include human safety, private timberlands, communities, cultural resources, critical infrastructure, and associated improvements. Apply tactics that offer the highest probability of success.

#### LEADERS INTENT

Provide the highest level of customer service to all involved with or impacted. Ensure transparent, timely and accurate communication at all levels of the incident and strengthen relationships with cooperators. All incident assigned personnel should be prepared to take appropriate actions regarding:

- · Personal safety and the safety of others, including driving slowly and defensively.
- Manage fatigue by taking breaks and maintaining work/rest cycles.
- Minimize risk and limit exposure to infectious disease by implementing Center of Disease Control, California Department of Public Health, and agency guidelines.
- Professional behavior, and timely/effective communication.

#### MANAGEMENT OBJECTIVES

- Prior to engagement, stop and discuss strategies and tactics to ensure sound risk management principles are in place to provide for firefighter and public safety.
- · Implement fire suppression activities in accordance with Incident Resource Advisors.
- Minimize impacts to communities, cultural resources, natural resources including old growth redwoods, critical power, communication and other infrastructure, private property inholdings, Tribal Lands, Timber Lands, TESC Species, and watersheds.

#### CONTROL OBJECTIVES

Keep Fires within the Six Rivers National Forest:

- · Within remote National Forest areas to protect heritage, cultural, natural resources.
- Away from private lands, Hoopa, Orleans, and Hwy 96 to protect the communities along the Klamath River corridor and private lands.

Keep Fires within the Redwood National Park:

As small as possible and within park lands to protect old growth redwoods, private timber land and cultural values.

#### 4. Operational Period Command Emphasis:

- 1. Manage risk to firefighters by ensuring hazards are identified, assessed, and where possible mitigated. Be prepared to accept residual risk when values threatened warrant it and the probability of achieving objectives is high.
- 2. Utilize strategies and tactics that commit responders only to operations where and when they can be successful, and under conditions where important values at risk are protected with the least exposure necessary.
- Contain and control portions of the fire that are a threat to identified values to be protected.
- 4. Mop-up to the extent necessary to prevent escape of the fire and additional spread or damage to other values within the perimeter.
- 5. Implement practices that reduce the potential for spread of infectious disease, such as distributed operations, adhering to CDC guidelines and other actions that improve the health environment for firefighters and support personnel.

#### General Situational Awareness:

- 1. Maintain a safe working distance when working in close proximity to heavy equipment.
- 2. Identify new escape routes and safety zones as needed, especially when implementing strategic firing operations.
- Be aware of, and mitigate, mission creep.

### 2023 SRF Lightning Complex (Branches XX, X & V) Weather Forecast

FORECAST NO: 24

FORECAST FOR: Sun, Sep 10th Day/Night Shift

FORECAST ISSUED: Sep 9th 2023, 2000 PDT

NAME OF FIRE: 2023 SRF Lightning Complex

SIGNED: /s/ Ryan Walbrun - IMET

<u>WEATHER DISCUSSION:</u> Day over day changes remain minor and subtle but if anything expect a few degrees of cooling and slightly higher humidity as onshore winds increase from the west as a weak weather system passes to our north. Any morning clouds will lift by late morning but lingering smoke along Highway 96 will be slow to clear and expect the inversion to break by midday. Afternoon temperatures will warm to around 90 lower slopes of the Pearch Fire with lower to mid 70s above 3500 feet. Humidity values will be a little more moist this morning, especially for the Marlow and Bluff Fires but should lower to 28-38% this afternoon. General winds from the West to Northwest but fairly light with afternoon upvalley flow dominating for the river valleys. Humidity values will be slow to recover this evening and stay less than 50% for the ridges until just after midnight before better recovery by sunrise Monday.

#### For Lost Fire and Branch XL weather, please see next page

FORECAST FOR: Sun, Sep 10th Day/Night Shift FORECAST ISSUED: Sep 9th 2023, 2000 PDT

<u>Discussion:</u> Onshore winds will bring more low clouds to the coast and the area of the Lost Fire Sunday morning. Clouds will slowly clear back to the coast but the persistent onshore winds will keep temperatures slightly cooler and humidity slightly higher than the last few days. Winds will remain from the West but generally light, especially under the canopy of the Lost Fire. Full humidity recovery tonight as westerly winds off the ocean will likely spread more low clouds over the Lost Fire tonight.

INPUTS

WEATHER SUMMARY: \*REFER TO SPECIFIC IMET WEATHER FORECASTS\*

Sky: Mostly sunny

Maximum Temperatures: Highs 80's – 90s in lower elevations 70s higher elevations, 60s Lost Minimum Humidity: 20% – 30% lower elevations, 30% - 40% higher elevations, 55% - 65% Lost Winds (20'): Ridgetops – SW/WSW 4-8 gusting 15-20, Lost NW/WNW 3-8 gusting 10-12 Slope/valley – SW 2-6 gusting 7-15, Lost NW/WNW 3-8 gusting 10-12

**FUELS:** Fuels are primarily conifer with litter and brush understory. The are multiple previous fire scars in the area. Fire scars over 5-8 years old will have a higher fuel load. Fuel loads in fire scars 8-10 years old will have a significant dead and down component and more continuous brush that will increase spread rates and flame lengths.

**OUTPUTS** 

#### FIRE BEHAVIOR

#### **GENERAL:**

With only minor changes in the weather, fuels will continue to dry especially on south, southwest and west aspects. Due to lower nighttime relative humidity recoveries at higher elevations last night, fires will be more active earlier in the day. Fire behavior will be smoldering and creeping in the morning with surface fire spread by afternoon where heat exists on uncontained line. Spotting from rollout as well as isolated torching likely.

Maximum Surface Rate of Spread: Timber/Brush/Heavy Down/Dead: 8 Chains per hour (head fire)

2 Chains per hour (backing fire)

Maximum Surface Flame Length: Timber/Brush Heavy Down/Dead: 6 Fe

6 Feet (head fire)
3 Feet (backing fire)

Crown Fire Potential: Isolated torching. Crown runs not expected.

Spotting Distance: 0-0.2 mi Probability of Ignition: 20-30%

Rollouts: Watch for locations where rollout is set up for and uphill run

SPECIFIC:

**Branch V:** No fire growth expected due to limited heat sources near the fire line. Interior heat expected to continue to produce smoke.

**Branch X:** Fire will be more active in the brush and needle cast in the afternoon especially in unshaded areas. Fire on the eastern part of the Pearch in Butler Creek will become more active if it gets established in the bottom of the drainage.

**Branch XX:** The fires will continue to spread slowly where heat is showing on uncontained line. lower nighttime relative humidity recoveries quicken drying and allow for a longer burn period. Fires will be more active where they are not shaded by smoke or dense canopies. Isolated torching likely to occur in areas of heat along uncontained line.

**Branch XL:** Fire activity expected to be minimal with good overnight relative humidity recoveries and higher forecasted relative humidities.

#### **AIR OPERATIONS**

With increased smoke production yesterday, the valleys may take longer to clear out.

#### SAFETY

The effects of the moisture are starting to wear off. Ensure LCES is in place before engaging even in areas where smoke hasn't been seen recently.

TASK: Patrol and mop up areas that threaten values at risk. Continue chipping operation from DP14 along 10N13 road. Prepare for possible strategic firing operations from Pearch Creek to DP11.

PURPOSE: Protect values at risk. Strategic firing plan in place when conditions warrant implementation.

END STATE: Fire does not pose a threat to any critical values within or adjacent to division.

#### 7. Special Instructions:

Coordinate with READS to validate control line locations prior to implementation.

Do not use community hydrants unless there is fire impact to values at risk.

Utilize drafting as primary water source.

Share these points with the public as you have an opportunity.

- Firefighters have been working for days to build "boxes" of direct and indirect control lines around several of the fires in the Complex. This work is nearing completion.
- The IMT, agencies, and tribal leaders have cooperatively developed a plan for using strategic firing operations within these boxes to accomplish multiple objectives:
  - Full suppression of the existing fires
  - o Reduction of fuels at a landscape level to lessen the number or intensity of future fires
- With fuels drying after recent rains, conditions are approaching optimal for implementing the strategic firing plan. This should begin in the next day or two.
- Implementing the plan will be slow and methodical over multiple days. We will monitor effectiveness and make adjustments as needed.
- The public will see more smoke when the plan is implemented, but this is expected and does not mean there is an increased threat to homes or other values at risk.

**WE WANT YOUR PHOTOS** - Email them to <u>2023.lightningcomplex@firenet.gov</u> or drop off at PIO trailer.

## HEALTH AND SAFETY MESSAGE

## **SAFETY** starts with **YOU**

We are **ALL** accountable for **SAFE** behaviors

INCIDENT: SRF Lightning Complex DATE: 9/10/23 Shift: Day and Night

## Becoming The Safety Officer - Your Life Might Depend On It

The SRF Lightning Complex has 1030 Safety Officers, more safety officers than any other fire. That is because each of you is empowered to be a safety officer.

Six Rivers NF and Rocky Mountain Team 1 want each and everyone of you to know that you are the most important resource on this incident. This is seen through the risk management process that includes Incident Strategic Alignment (ISAP), Deliberate Risk (215), and safety messaging. Incident objectives and leaders' intent also reflect this.

#### STRATEGIC FRAMEWORK

Values at risk include human safety, private timberlands, communities, cultural resources, critical infrastructure, and associated improvements.

#### LEADERS INTENT

All incident assigned personnel should be prepared to take appropriate actions regarding personal safety and the safety of others, including driving slowly and defensively and manage fatigue by taking breaks and maintaining work/rest cycles.

#### MANAGEMENT OBJECTIVES

Prior to engagement, stop and discuss strategies and tactics to ensure sound risk management principles are in place to provide for firefighter and public safety.

The guiding principals of professionalism in the wildland fire community are based on **Duty**, **Integrity**, and **Respect**. Each of us should have, live by, and exemplify a safety mindset, **Duty** to speak up and share safety concerns, **Integrity** choosing the hard right over the easy wrong, and the **Respect** to listen to others.

Do you have, live by, and exemplify a safety mindset?

Have you ever deviated from a so	ifety mindset, what was that resu	ılt, was it a positive result for the right
	reasons or because you got luck	ky?

## You are empowered to be the safety officer.

- I am responsible for my own Safety as well as my fellow employees and the public.
- I have full authority to call a halt to any activity that looks or feels unsafe.
- I will use this authority with confidence because Incident Leadership supports me taking this action so I can protect myself and others from harm.

Safety Officers: Todd Legler, Pat Medina, Jon Blackstone, Brandon Hoffman, Chris Sweeney, David Molter, Dave Marion, Tim Quigley and Matthew Martin

## FIREFIGHTER HEALTH

LINEA DE SALUD DEL BOMBERO / HEALTH LINE 720.693.3188

**COORDINATOR: SUSAN KOLP** 

# "Prolonged exposure to smoke literally makes you dumber."

Travis Dotson, Fruit We Can Reach And the Tricky Transition from Bad Ass to Dumb Ass, Two More Chains, Summer 2017 Vol. 7 Issue 2.

"As CO exposure increases, your ability to think clearly decreases. Being in smoke you don't need to be in is the epitome of not working "smarter." In fact, it is actually working dumber."

"So first and foremost, exposure to smoke is dangerous because it impairs our capacity to think clearly— something most of us have a hard enough time doing given the complexity of our environment."

# It also makes you sicker.

Exposure to wildland smoke increases susceptibility to infectious diseases like influenza, COVID-19, the common cold, and other illnesses. The respiratory tract response to smoke can further increase severity of illness, leading to infections like pneumonia and bronchitis.

## So what?

Can't tell if your cough, sore throat, runny nose, or other symptom is from the smoke, allergies, or an infectious disease? Do the right thing. Get yourself checked out by **Frontline Medical** or your friendly neighborhood medical resource. It's free.
