SRF LIGHTNING COMPLEX

CA-SRF-000986 - P5 QKB4 (0510)

REDWOOD LIGHTNING COMPLEX

PP QJ5R (1522)

MONDAY, SEPTEMBER 11, 2023

Day Operational Period 0700 – 2100 Night Operational Period 1800 – 0800

Rocky Mountain CIMT1

Dan Dallas, IC

Mark Giacoletto, Deputy IC

Justin Conrad, ICCI(t)

PUBLIC FIRE INFORMATION: 530.536.0767
BRIEFING LINK: https://srflightningcomplex2023.com

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name;	2. Operational Period:	。"
SRF LIGHTNING COMPLEX	Date/Time From:	Date/Time To:
SAT EIGHTAING COM LEX	09/11/2023 0700 MON	09/12/2023 0700 TUE

3. Objective(s):

STRATEGIC FRAMEWORK

Confine, contain, or control all fires utilizing a full suppression strategy. Values at risk include human safety, private timberlands, communities, cultural resources, critical infrastructure, and associated improvements. Apply tactics that offer the highest probability of success.

LEADERS INTENT

Provide the highest level of customer service to all involved with or impacted. Ensure transparent, timely and accurate communication at all levels of the incident and strengthen relationships with cooperators. All incident assigned personnel should be prepared to take appropriate actions regarding:

- Personal safety and the safety of others, including driving slowly and defensively.
- Manage fatigue by taking breaks and maintaining work/rest cycles.
- Minimize risk and limit exposure to infectious disease by implementing Center of Disease Control, California Department of Public Health, and agency guidelines.
- Professional behavior, and timely/effective communication.

MANAGEMENT OBJECTIVES

- Prior to engagement, stop and discuss strategies and tactics to ensure sound risk management principles are in place to provide for firefighter and public safety.
- Implement fire suppression activities in accordance with Incident Resource Advisors.
- Minimize impacts to communities, cultural resources, natural resources including old growth redwoods, critical power, communication and other infrastructure, private property inholdings, Tribal Lands, Timber Lands, TESC Species, and watersheds.

CONTROL OBJECTIVES

Keep Fires within the Six Rivers National Forest:

- Within remote National Forest areas to protect heritage, cultural, natural resources.
- Away from private lands, Hoopa, Orleans, and Hwy 96 to protect the communities along the Klamath River corridor and private lands.

Keep Fires within the Redwood National Park:

· As small as possible and within park lands to protect old growth redwoods, private timber land and cultural values.

4. Operational Period Command Emphasis:

- 1. Manage risk to firefighters by ensuring hazards are identified, assessed, and where possible mitigated. Be prepared to accept residual risk when values threatened warrant it and the probability of achieving objectives is high.
- 2. Utilize strategies and tactics that commit responders only to operations where and when they can be successful, and under conditions where important values at risk are protected with the least exposure necessary.
- 3. Contain and control portions of the fire that are a threat to identified values to be protected.
- 4. Mop-up to the extent necessary to prevent escape of the fire and additional spread or damage to other values within the perimeter.
- 5. Implement practices that reduce the potential for spread of infectious disease, such as distributed operations, adhering to CDC guidelines and other actions that improve the health environment for firefighters and support personnel.

General Situational Awareness:

- Maintain a safe working distance when working in close proximity to heavy equipment.
- 2. Identify new escape routes and safety zones as needed, especially when implementing strategic firing operations.
- 3. Be aware of, and mitigate, mission creep.

2023 SRF Lightning Complex (Branches XX, X & V) Weather Forecast

FORECAST NO: 25

FORECAST FOR: Mon, Sep 11th Day/Night Shift

FORECAST ISSUED: Sep 10th 2023, 2000 PDT

NAME OF FIRE: 2023 SRF Lightning Complex

SIGNED: /s/ Ryan Walbrun - IMET

WEATHER DISCUSSION: Two main changes in the fire environment today. The first will be more smoke as the fires have been more active the last 24 hours producing smoke across the Complex, especially the river drainages and lower slopes. This smoke will act like an inversion layer and likely not mix out for many of the fires in Branch XX. In addition to the smoke, a weak weather system passing to the north will allow for increasing onshore winds which will keep temperatures cooler and humidity higher, especially for the Bluff fire which is closest to the ocean influences. Unlike previous days the persistent westerly onshore flow should lead to good humidity recovery across nearly all elevations of the fire tonight into Tuesday morning.

For Lost Fire and Branch XL weather, please see next page

FORECAST FOR TODAY: Clouds and smoke only partially clearing during the afternoon hours.

Branch XX Fires: Forecast Elevation 4000 feet. Branch V & X Fires:

=-a:	Branen V & X Fires.				
Max Temperature: 66-74° coolest Bluff fire	Max Temperature: 78-87° (2-5 degrees cooler)				
Min RH: 40-50% (may trend higher due to smoke)	Min RH: 35-45% (5-15% wetter than previous days)				
20 FT Winds	20 FT Winds				
Slopes/Valleys: Light then becoming SW 2-5 with gusts 7-10 mph in the afternoon.	Slopes/Valleys: N 2-4 mph, becoming Southwest 3-6 mph with gusts to 12-15 mph afternoon hours.				
Ridges: Light SW, becoming SW 4-8 with gusts 15-20 mph in the afternoon	Ridges: Light SW, becoming WSW 4-8 with gusts 12-15 mph in the afternoon.				

OUTLOOK FOR TONIGHT: Smoke settling over most of the Complex. Moderate to good humidity recovery.

Branch XX Fires: Branch X & V Fires:

Min Temperature: 55-60°	Min Temperature: 50-55°			
Max RH: 55-65% til midnight then 70-80% by morning	Max RH: Full recovery valleys. 60-70% above 2000 ft			
20 FT Winds	20 FT Winds			
Slopes/Valleys: Downslope winds 2-4 mph	Slopes/Valleys: WSW 2-4 mph becoming downslope			
Ridges: W 4-8 mph becoming NE overnight	Ridges: NW 3-6 mph becoming NE overnight			

Extended Forecast: No big changes Tuesday with slight warming and drying. Building high pressure Wednesday and Thursday will bring warmer and drier conditions. Light West winds during the day with light easterly or offshore winds at night. The biggest wildcard will be smoke production which may limit the amount of hot weather and keep the fire environment more stable at least through Friday. Highs ranging from 70 ridges to 90 river valleys. Overnight lows mainly in the 50s except 60-70 thermal belts above 2000 feet. Next trough may arrive by next weekend.

Safety Message: Operation Hydration! Drink water now so you can keep working and stay healthy!

2023 SRF Lost Fire Spot Weather Forecast

FORECAST NO: 22

FORECAST FOR: Mon, Sep 11th Day/Night Shift

FORECAST ISSUED: Sep 10th 2023, 2000 PDT

NAME OF FIRE: 2023 SRF Lightning Complex

SIGNED: /s/ Ryan Walbrun - IMET

Discussion: A weak front passing just north of the region will bring increasing westerly winds to the coast. This will allow for some morning clouds and even some drizzle over the Lost Fire and at ICP in Orick. Clouds should mix out by late morning. Given the westerly winds, temperatures should be a little cooler today with highs staying in the upper 60s. Humidity values will trend more moist than previous days with afternoon minimums only around 60%. Look for low clouds to spread inland tonight with continued full humidity recovery overnight into Tuesday morning.

For Branches XX, X, & V fire weather, please see previous page

FORECAST FOR TODAY: Some morning clouds otherwise partly sunny. Light northwest winds.

Valleys & Slopes (below 1000 ft) Ridgetops and Above 1000 ft

Max Temperature: 62-66°	Max Temperature: 65-70°			
Min RH: 60-65%	Min RH: 55-60%			
20 FT Winds: Drainage winds 1-4 mph, becoming NW 3-6 mph afternoon gusts 10 mph	20 FT Winds: WNW 4-8 mph afternoon gusts 10-12 mph along Holter Ridge			

OUTLOOK FOR TONIGHT: Becoming mostly cloudy overnight. Full humidity recovery with light winds.

Valleys & Slopes (below 1000 ft) Ridgetops and Above 1000 ft

Tuneye a chopes (selent 1000 it)	Ridgetops and Above 1000 it				
Min Temperature: 49-54°	Min Temperature: 51-56°				
Max RH: 85-95%	Max RH: 75-85%				
20 FT Winds: NW winds becoming drainage 1-3 mph	20 FT Winds: NW 4-7 mph becoming NE overnight.				

Extended Forecast: Weather pattern remains similar Tuesday with slight warming Wednesday as high pressure builds and may mix out the marine layer along the coast. Daytime highs lower 70s with overnight lows in the 50s. Light westerly onshore winds afternoon and evening hours with down-canyons nights and morning hours. Afternoon humidity 55-65% with full recovery each night.

<u>Safety Message:</u> Marine clouds may linger over the helibase during the morning hours. Don't count on Air Operations when doing risk assessment.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 24	TYPE OF FIRE: Wildfire
FIRE NAME: SRF Lightning Complex	OPERATIONAL PERIOD: Day, 09/11/2023
DATE ISSUED: 09/10/2023	TIME ISSUED: 2000
UNIT: CA-SRF	SIGNED: (s) Kerin Hillard
	Typed/printed: Keyin Hillard

INPUTS

WEATHER SUMMARY: *REFER TO SPECIFIC IMET WEATHER FORECASTS*

Sky: Mostly sunny

Maximum Temperatures: Highs 70s – 80s in lower elevations 60s – 70s higher elevations, 60s Lost Minimum Humidity: 35% – 45% lower elevations, 40% - 50% higher elevations, 55% - 65% Lost Winds (20'): Ridgetops – SW/WSW 4-8 gusting 15-20, Lost NW/WNW 3-8 gusting 10-12

Slope/valley – SW 2-6 gusting 7-15, Lost NW/WNW 3-8 gusting 10-12

FUELS: Fuels are primarily conifer with litter and brush understory. The are multiple previous fire scars in the area. Fire scars over 5-8 years old will have a higher fuel load. Fuel loads in fire scars 8-10 years old will have a significant dead and down component and more continuous brush that will increase spread rates and flame lengths.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Where the smoke doesn't mix out fire will be less active than yesterday. With good relative humidity recoveries expect active fire behavior to die down earlier in the evening. Fire behavior will be smoldering and creeping in the morning but will become more active if the smoke mixes out. Spotting from rollout as well as isolated torching likely in areas where intensities pick up.

Surface Rate of Spread: Timber/Brush/Heavy Down/Dead:

8 Chains per hour (head fire)

2 Chains per hour (backing fire)

Surface Flame Length:

Timber/Brush Heavy Down/Dead:

6 Feet (head fire)

3 Feet (backing fire)

Crown Fire Potential: Isolated torching. Crown runs not expected.

Spotting Distance: 0-0.2 mi Probability of Ignition: 20-30%

Rollouts: Watch for locations where rollout is set up for uphill spread.

SPECIFIC:

Branch V: No fire growth expected due to limited heat sources near the fire line. Interior heat expected to continue to produce smoke.

Branch X: Most areas of the branch are expected to remain minimally active with slow spread rates. In higher elevation areas expect surface fire spread on uncontained line in the afternoon as the smoke mixes out. Isolated to group torching and backing/flanking growth to the east/northeast on the eastern part of the Pearch in Butler Creek is expected to die down earlier the evening.

Branch XX: The fires will continue to spread slowly where heat is showing on uncontained line. If the smoke mixes out, expect all fires in the branch, except Bluff #1, to continue to be active in the afternoon where the fire behavior has picked up in the last few days and where new ignitions occur. Relative humidities are forecast to be higher on Bluff #1 so it should be less active today.

Branch XL: Fire activity expected to be minimal with good overnight relative humidity recoveries and higher forecasted relative humidities.

AIR OPERATIONS

The smoke may not mix out in all areas today, limiting visibility.

SAFETY

When moving into unfamiliar areas get a good briefing and maintain situational awareness.

6. Control Operations/Work Assignments:

TASK: Provide point protection preparation. Maintain immediate readiness.

PURPOSE: Minimize fire impacts to private residences in fire area. Respond to IA within designated areas. **END STATE:** Area to be protected is prepped and secured. Provide initial attack and support new fire starts.

7. Special Instructions:

Coordinate with READs to validate control line locations prior to implementation.

Strategically withdraw accountable property to Orleans Supply Unit.

Do not use community hydrants unless there is fire impact to values at risk.

Utilize drafting as primary water source.

Identify resources to respond to new starts within the complex footprint.

** The units marked with asterisks are IA resources **

TASK: Burnout indirect fire line from DP 20 to DP 25. Prep indirect fireline from DP 25 south along Slate Creek Road (11NO5). PURPOSE: Hold fire inside the Hand line and Dozer line. Prep indirect fireline.

END STATE: Fire is patrolled for threatening fires and smokes.

7. Special Instructions:

Coordinate with READs to validate control line locations prior to implementation.

Do not Use community hydrants unless there is fire impact to values at risk.

Utilize drafting as primary water source.

Erin Rentz (Lead READ), Todd Stiles (REAF), Aria Mildice (REAF), Roy Ammon (CULS), Kevin Colegrove (REAF), Kevin Lane (REAF), Eric Blake (READ), and Caw Tep Silvia (REAF) are working across Branch XX.

6. Control Operations/Work Assignments:

TASK: Repair handline on the Lost Fire. **PURPOSE:** Mitigate suppression impacts.

END STATE: Handline rehabilitated to agency standards.

7. Special Instructions:

Keep the fire footprint as small as possible to reduce impacts to private lands and Old Growth Forest within the park. Use State Park tree specialist to advice on sprinkler set up to extinguish Old Growth Redwood trees that are a threat to control lines.

READs Steve Buckley, Emma McClure, Gabe Goff, Samantha Kinsman, Travis Sowards, and Anna Hellewege-Beles are working across branch XL.

Coordinate with Branch XL READ's prior to operating heavy equipment.

TASK: Initiate fire suppression repair. Rehab fireline where specified, on Bridge Ridge Fire and Lost Fire.

PURPOSE: Rehab dozer and fireline where identified. Mitigate suppression impacts.

END STATE: Dozer and fireline is repaired per fire suppression repair standards. Fireline rehabilitated to agency standards.

7. Special Instructions:

Keep the fire footprint as small as possible to reduce impacts to private lands and Old Growth Forest within the park. Use proper TAC channel for the division that is being worked in.

READs Steve Buckley, Emma McClure, Gabe Goff, Samantha Kinsman, Travis Sowards, and Anna Hellewege-Beles are working across branch XL.

Coordinate with Branch XL READ's prior to operating heavy equipment.

CHECK-IN AND DEMOB TIPS

CHECK-IN

Submit the electronic check-in form using the QR code on front of IAP and selecting **Incident Check In** from the menu.

Email the following items to 2023.lightningcomplex.checkin@firenet.gov

- Red card/fire card
- Manifest (Crews)

DEMOB

FOR EMERGENCY OR URGENT DEMOBS CONTACT YOUR SUPERVISOR FIRST AND THEN CONTACT THE DEMOB UNIT DIRECTLY AT 720.584.8887 or 925.783.7744

If you need a flight, please email <u>2023.lightningcomplex.demob@firenet.gov</u> 72 hours in advance or call 720.584.8887 or 925.783.7744

After being notified by your supervisor of your tentative release date:

Step 1. Return all supplies, radios, etc. that were checked out.

<u>Step 2</u>. All vehicles - including UTVs/ATVs - that have been on the fireline **MUST** go through weed wash. Obtain an Authorization Slip from the weed wash operators after completing weed wash. Turn in the Slip to Demob at your assigned camp.

Release Inspection is required for all private contract equipment resources (i.e. Engines, Water Tenders, Heavy Equipment, Transports, etc.)

<u>Step 3</u>. Submit final time documents electronically to Finance per directions in the IAP. Provide a valid email address. Finance will post your time, let you review a draft, and send your final documents to you, all electronically.

<u>Step 4</u>. Complete Demob Checkout Form – accessed by scanning using QR code on the IAP and selecting **Incident Demob** from the menu. Once you submit the form, you are released from the incident and may begin travel home. Safe Travels!

Any questions about the check-in or demob process, call 720.584.8887 or 925.783.7744 or email 2023.lightningcomplex.demob@firenet.gov

DEMOB LIST 2023 SRF LIGHTNING COMPLEX – CA-SRF-000986 9/11/2023 – 9/13/2023

Please submit CTRs, shift tickets and vehicle inspection forms electronically to finance using the QR codes in the IAP (2023.lightningcomplex.finance@firenet.gov). If you do not have the ability to send and finalize your documents electronically, please come at the time next to your name below. Call finance at 720-693-1869 with any questions.

SRF Lightning Complex FINANCE PROCEDURES

Finance Email: 2023.lightningcomplex.finance@firenet.gov

Finance Hotline: 720-693-1869

Please submit your documents ELECTRONICALLY.

(If you are completing CTRs/Shift Tickets on paper, you can take a picture, save it as a PDF and then email it.) ALL RESOURCES – When emailing, please include your RO# in the subject line and on all documents.

Provide a contact phone number in your email.

For easy document submission, scan the QR codes.

Overhead & Crews:
Use TIME in subject line of email
or QR code below

Contractors & Cooperators:
Use PROC in subject line of email
or QR code below

At **check-in** submit the following:

- Resource Order
- Manifest/Roster
- Cooperator agreement or contract (w/ correct resource highlighted)
- AD Casual Hire Form
- Vehicle Inspection Form

Daily submit the following:

- CTRs
- Shift Tickets

Ensure all CTR/Shift Tickets are signed and dated.

Contracted Resources: Please ensure daily hours worked do NOT exceed operational period without including written justification and supervisor's approval.

Demobing soon? We will need the below documents to process your OF-288/286.

At **DEMOB** submit the following:

- Final CTR/Shift Tickets w/ projected travel times
- Release Vehicle Inspection Form

All documents can be EMAILED for a faster, virtual demob process!

Share these points with the public as you have an opportunity.

- Firefighters have been working for days to build "boxes" of direct and indirect control lines around several of the fires in the Complex. This work is nearing completion.
- The IMT, agencies, and tribal leaders have cooperatively developed a plan for using strategic firing operations within these boxes to accomplish multiple objectives:
 - Full suppression of the existing fires
 - Reduction of fuels at a landscape level to lessen the number or intensity of future fires
- With fuels drying after recent rains, conditions are approaching optimal for implementing the strategic firing plan. This should begin in the next day or two.
- Implementing the plan will be slow and methodical over multiple days. We will monitor
 effectiveness and make adjustments as needed.
- The public will see more smoke when the plan is implemented, but this is expected and does not mean there is an increased threat to homes or other values at risk.

WE WANT YOUR PHOTOS - Email them to 2023.lightningcomplex@firenet.gov or drop off at PIO trailer.

WE HAVE LOST & FOUND - Drop off or pick up at the Information trailer.

MAIL DELIVERY: Your name and E/O number

Six Rivers Lightning Complex Camp

11121 Hwy. 96 Hoopa, CA 95546

HEALTH AND SAFETY MESSAGE

Communicate – Collaborate – Coordinate – Cooperate

Redeem personal and professional responsibilities to care for your self and those you are responsible for.

We don't plan on luck to be safe, we plan on sound risk management and good decisions.

Operational tempo with line construction, mop up and engaging where opportunities are presented will increase across the incident today after a brief pause due to wetting rain. Don't let silly acts result in injuries or accidents. Stay alert and engaged.

Drowsy Driving: Drowsy driving is the dangerous combination of driving and sleepiness or fatigue. This usually happens when a driver doesn't get enough sleep, but it can also happen due to untreated sleep disorders, medications, drinking alcohol, or shift work. Warning signs are yawning and blinking frequently, drifting from your lane, missing an exit, etc. Don't hesitate to pull over to rest for several minutes if you feel you are becoming drowsy.

Heavy Equipment: Heavy equipment has been essential on this incident. If you are an operator, take care of your health and don't injure yourself. If you are not, do all you can to help them get to their assignment and accomplish their mission. Yield the road, save some parking space, and provide extra eyes on fire activity. Masticator create large chunks of wood that can be hazardous to anyone nearby for several hundred foot distance. Communicate with HEQB to ensure safe operating practices.

Speak Up: If you see something say something. Whether it is stopping an unsafe act, notice a dangerous hazard, or anything else that can cause injury. Speak up and avoid a potentially dangerous or advanced medical situation.

The **cornerstone of safety** is to take time to assess the risks involved with a mission. In order to encourage this principle, please consider using the "Stop, Think and Talk before Acting" phrase to help us work in a safer manner.

Think Talk Before Acting

COORDINATOR: SUSAN KOLP Se habla español

Are you ready for Re-entry? Tips to prepare Adapted from Fall 2021, NWCG Mental Health Subcommittee Newsletter

You	Family & Friends			
Debrief before leaving work. Provide yourself closure on this fire season.	Realize your firefighter is probably exhausted and will need to catch up on rest.			
Establish a buddy check system with a co-worker, so you have someone to call when needed. Remain connected to your fire network.	You're probably exhausted too. Are there ways you can both rest?			
Plan to reintegrate slowly once home. Ease back into routines instead of trying to take over.	There may be a lot to do and a lot of people who want to catch up with your firefighter. Resist doing too much at once.			
Avoid making important pe	rmanent changes right away			
Expect things to be a little different than you remember.	Spend some time briefing your firefighter on what's changed. They're used to briefings!			
There's probably a to-do list waiting for you, but it doesn't have to be done all at once.	Go through the to-do list in your briefing and set a reasonable pace for completion.			
Be prepared for a handoff on kid shuttles, chores, grocery shopping, etc. Your spouse/family needs a break too!	Take some well-deserved time for yourself! Vanishing for two weeks may not work so well, but set some realistic breaks.			

Kids will adjust at their own pace. Make sure they know there is no pressure. Spend plenty of time with loved ones, but also make time for yourself.

Make a list of fun things you want to do this winter. Set physical and mental health fitness goals as well.

The Wildland Firefighter Foundation provides information and resources related to mental health and well-being for wildland firefighters. We can assist with finding a counselor or therapist and other resources. We also offer financial help for Wildland Firefighters and their families. We are here assist you or someone you know.

Please contact us. We are here for you

Team Ordering/Timeline Process:

1400- Last call for change in dinner deliver locations. Submit to the Food Unit Leader via 213 or through communications.

1600 - DIVS to have next day's resource order ready for Planning OPS.

- All crew level orders will be placed through DIVS or Branch.
- DIVS or Branch will place all orders through Communications Unit.
- All orders will be tracked using the process found on the front of this form.

Definitions

FOB-Forward Operating Base is a secure forward position established to strategize, design and discuss tactics, and for personnel to transfer information and meet.

Line Spike Camp-Managed by Operations at the DIVS level; mobile, short duration and self- sufficient.

Spike Camp-Supported by Logistics, listed in the IAP, numbers in camp are set by 1100, named by Plans.

Emergency Medevac- Life threatening situation requiring immediate medical attention. Handled as per IAP med plan and team SOP's.

Communications to clear command channel radio traffic.

Medical Transport-Transport of less serious injury/illness managed by Operations or line Medics back to camp for evaluation and/or treatment.

VEDIONES VIEW CONGRESS (OCEDIVINES SERVES)

LINE "MEDICAL-EMERGENCY" PLAN:

Crew Supervisor to contact Division Supervisor/Operations with:

- Patient Complaint, Condition and Location via Tactical or Command frequency.
- Priority 1/Red & 2/Yellow patients trigger Incident within Incident (IWI).

Division Supervisor/Operation contacts Communications/Dispatch:

Division Supervisor or POC* will run "Medical Emergency" on the command frequency. POC* (Point of Contact) and/or Operations

LINE "NON-EMERGENCY INCIDENT" PLAN:

Crew Supervisor to contact Division Supervisor with:

- Patient Complaint, Condition and Location via Tactical or Command frequency.
- Priority 3/Green, (Minor) Patients do not trigger Incident within Incident (IWI), unless there is a potential of it being upgraded to yellow or red.
- Division Supervisor to contact MEDL through Comms or directly:
- · · Division Supervisor or POC* will use "Medical Incident Report" worksheet on the back of this page or back of IRPG.
- · Communications contacts Medical Unit Leader on the Command frequency or cell phone 602-799-8779 (For medical related incidents only).

IN-CAMP - 24 HOUR MEDICAL

- Contact 911 and Medical Unit Leader Dan Leone 602-799-8779 with:
 - · Patient Complaint, Condition and Location
