Management Objectives

- Prior to engagement, stop and discuss strategies and tactics to ensure sound risk management principles are in place to provide for firefighter and public safety.
- Implement fire suppression activities in accordance with Incident Resource Advisors.
- Minimize impacts to communities, cultural resources, natural resources including critical power, communications and other infrastructure, private property inholdings, Tribal Lands, timberlands, T.E.S. species, and watersheds.
- Effectively manage costs by selecting and implementing strategies based on values at risk.
- Implement suppression repair plan in accordance with the suppression repair plan, Incident Resource Advisors and Cultural Specialists

Control Objectives

- MOSQUITO
Keep the fire within the Six Rivers National Forest.
Keep the fire within remote National Forest areas to protect heritage, cultural and natural resources.
- PEARCH & MARLOW
Maintain fires within their current perimeters.

General Situational Awareness:

Steep and rugged terrain, active area for fire history and drought stressed trees.

In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family, and to ensure all employees return home safely, make sure to practice social distancing.

Enhanced hygiene (especially handwashing), PPE & monitoring practices help limit the infection rate of first responders.

FIRE BEHAVIOR

GENERAL:

- Some conditions in the fire environment begin to moderate (▼temperature and ▲humidity) in the coming days, but there will be a day or two of lag in fuel moisture response.
- Expect additional heat sources in the fire area to become visible.
- Moderate overnight humidity recovery will continue through Sunday AM.
- Monitor afternoon SW winds in your area for alignment with unburned available fuels and slope.

SPECIFIC:

Branch X: Minimal fire activity throughout fire area. Smoke may be visible in Div Y in the upper Monte Creek drainage. Interior smokes will be visible in the high-elevation interior portions of Div J. Monitor for fire/heat creeping through duff near control features. Keep an eye out for heat holdovers in stump holes, standing trees, or where heat can smolder for a long time without showing much smoke. Expect rollout to continue on steeper slopes.

Branch XX: Increasing fire activity throughout fire area with new perimeter growth in the eastern portion of the branch.

Div O: Expect continued backing and flanking spread to the SW and NE on Lightning Ridge with possible short uphill runs toward the ridgetop. Fire is projected to remain on the north side of the Lightning Gulch drainage.

Div R: There are several areas within the division where fire below the 14N21 Road will see wind and slope alignment when the wind turns to SW in the afternoon. This includes the area fired on 8/6, where today's wind is forecast to be adverse in the afternoon. Areas of new growth south of Dillon Mountain will likely spread uphill toward the 14N21. Fire established above the 14N21, on the south aspect of Dillon Mtn is expected to continue spreading upslope and flanking to the NE.

All other Divisions: Expect additional interior areas of heat and areas of interior perimeter growth to become visible and produce smoke.

AIR OPERATIONS: Smoke may limit potential air operations in the drainages within Divisions O and R.

Sunrise: 7:17am, Sunset: 6:46pm, Day length: 11 hours, 29 minutes, 26 seconds (-2:40 min)

SAFETY: As the fire footprint expands, be heads-up for new fire-weakened trees in your work areas and travel routes. With a transition to SW winds, trees will be tested by a new wind direction.

SAFETY MESSAGE

Fire fighter safety comes first on every fire, every time

Environmental Hazards – Be watchful for Bears, Rattlesnakes, Bees, and other insects that bite or sting. Don't leave food out, haul out your trash daily, also watch for camp bear that is looking for easy food. Look before you step or place hands on the ground. Identify who on your crew is allergic to Bees and ensure medication is available.

Medical Emergencies- Do you know what to do in case of a medical emergency? Review Medical Plan (ICS 206) and become familiar with the "Line Emergencies" procedures checklist. We are a long way from 911 help. Your actions may be what save a life.

HEALTH and WELLNESS: Make sure you hydrate during the entire shift and make time for meal breaks. Wash your hands before meals. If someone on your crew is sick go see medical for meds and use disinfecting wipes and/or disinfecting sprays on equipment and vehicles. Do not share food or liquids. Try not to spread infectious disease and/or colds. Get your crews well rested after each shift.

CAMP SAFETY- Make sure you're in a designated Sleeping Area, no sleeping around vehicles. If you see a hazard, make it known and stop the hazard.

BRUSH CHIPPER: Make sure all personnel working with Brush Chippers review the Job Hazard Analysis (JHA) and conduct Tail Gate Safety Sessions before operations of chipping begin. Make sure all personnel are properly trained in the use of Brush Chippers before work begins.

TEAM SAFETY OFFICERS: Doug Mckelvey SOF, John Nickey SOF and Rich Harnden SOF

Human Resource Message

***“Accept the things we cannot change,
and change the things we can...”***

There are a lot of things that we cannot change, but one thing we all have influence over is our *attitude*.

Remember – as you are interacting with others throughout the day – of all the things you wear, your expression is the most important.

Keep your positive attitude, smile, and have a great day!
