3. Objective(s):

- Management Objectives**
- Prior to engagement, stop and discuss strategies and tactics to ensure sound risk management principles are in place to provide for firefighter and public safety.
 - Implement fire suppression repair activities in accordance with Incident Resource Advisor and Cultural Specialists.
 - Minimize impacts to communities, cultural resources, natural resources including critical power, communications and other infrastructure, private property inholdings, Tribal Lands, timberlands, T.E.S. species, and watersheds.
 - Effectively manage costs by selecting and implementing strategies based on values at risk.
 - Provide Initial Attack resources in coordination with the Six Rivers National Forest.

- Control Objectives**
- Maintain fires within their current perimeters.
 - Stay in alignment with the suppression repair plan in conjunction with Agency Administrators.

General Situational Awareness:

Steep and rugged terrain, active area for fire history and drought stressed trees.

In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family, and to ensure all employees return home safely, make sure to practice social distancing.

Enhanced hygiene (especially handwashing), PPE & monitoring practices help limit the infection rate of first responders.

FIRE BEHAVIOR

GENERAL:

- Conditions in the fire environment will continue to support perimeter growth today.
- Expect additional heat sources in the fire area to become visible.
- Moderate overnight humidity recovery again this morning.
- Monitor afternoon SW winds in your area for alignment with unburned available fuels and slope.

SPECIFIC:

Branch X: Minimal fire activity throughout fire area. Smoke may be visible in Div Y in the upper Monte Creek drainage. Interior smokes will be visible in the high-elevation interior portions of Div J. Monitor for fire/heat creeping through duff near control features. Keep an eye out for heat holdovers in stump holes, standing trees, or where heat can smolder for a long time without showing much smoke. Expect rollout to continue on steeper slopes, including toward Hwy 96.

Branch XX: Continued fire activity throughout fire area with new perimeter growth in the eastern portion of the branch.

Div R: Fire established on Dillon Mtn is expected to continue spreading upslope as well as flanking/backing to the E and NE. The area near DP52 that was fired on 10/6 will continue to see adverse afternoon winds. Areas of new growth south of Dillon Mountain and the 14N21 will likely spread uphill toward the 14N21.

Div O: Expect continued backing and flanking spread to the SW and NE on Lightning Ridge with possible short uphill runs toward the ridgetop. Fire is projected to remain on the north side of the Lightning Gulch drainage. Fire will continue to spread SW in the drainage to the north of Lightning Ridge.

All Other Divisions: Expect additional interior areas of heat and pockets of interior perimeter growth to become visible and produce smoke.

AIR OPERATIONS: Smoke may limit potential air operations in the drainages within Divisions O and R.

Sunrise: 7:18am, Sunset: 6:45pm, Day length: 11 hours, 26 minutes, 46 seconds (-2:40 min)

SAFETY: Smoke, complex topography, and thick vegetation make visibility difficult in the fire area. Post a lookout who can see your work area and the fire.

3. REMARKS: (Safety Notes, Hazards, etc.)

USFS Leaders intent for Short-haul: The intent of the Short-Haul program is to ensure safe and efficient use of Short-haul capabilities to aid injured personnel. In some cases, Short-haul may be the most expedient means to get medical care to a person in need, as well as extract an injured or ill employee for transport to definitive medical care. The Forest Service highly values the safety and health of its employees and cooperators.

SAFETY MESSAGE

Fire fighter safety comes first on every fire, every time

Driving after Demob:

Before driving home, determine the travel routes/directions, secure maps and provide an ETA to your home unit dispatcher or supervisor. Conduct a vehicle inspection checking tires, mirrors, headlights, turn signals, clean windshield, wipers, and fluid levels. Secure loose items. As a driver, do not eat, drink, or use cell phones while driving. Vehicles 10,000 GVWR and higher must have wheels and lug nuts checked daily.

Other basic standards include staying alert, wearing seat belts, driving defensively (lights on), and maintaining speeds safe for the existing road conditions. When more than one driver is available, consider sharing driving duties. When drivers stop overnight, they shall notify their home unit dispatcher of their location, departure times the next morning, and ETA of arrival at their home unit. After arriving home, make contact following your agency or supervisor policy.

Safety Factors

- **Communications:** Be sure all personnel have been briefed. Be sure to check communications on your Division prior to initiating tactical operations. Be sure you can hear and be heard.
- **Transfer of Command:** As there may be a demand to move resources around daily for work priorities. Make sure you know whom your new leader is. Take extra time to assure that everyone has the same understanding of leader's intent and work instructions.
- **Incoming Weather:** Make sure you have a plan if the wind and or rain arrive early. With the wind watch for trees and limbs falling. Slowdown on slick roads and increase your breaking distance. Check your sleeping area for hazards all around you. Make sure if your sleeping area is around trees check for lose branches and widow-makers.

Make a Safety Difference:

- As a supervisor, provide constant and relentless oversight.
- ***Stay focused on the task at hand, all the time!***
- Come up with a safer way to perform arisky assignment.
- Discuss situations that might cause a nearmiss.
- Never tolerate "Hey, watch this!"
- Discuss the effects of fatigue and how tomitigate the effects of fatigue.
- While in the fire zone, make sure you have your appropriate PPE before you leave the vehicle.
- Have a purpose in what you do.

HUMAN RESOURCE MESSAGE

Transition --- or --- Re-entry into the Real World

It's coming to the end of fire season. You have been gone on assignments for most of the summer. You're wrapping up your good time in Orleans, California.

You've had great successes; you saw some old friends and you made some new ones; you've made it through the hot, windy days and the freezing nights. You've done an awesome job.

But while you've been gone, a lot of things have been happening at home; your kids have headed back to school, your dog had to go to the vet to have a cheatgrass seed taken out of his ear (and he got car sick all over the back seat of your car), and the garden died.

So, before you share all the things you have done and seen, listen to what they have experienced in your absence. Remember to ask about the first day of school, the dog, and the like. **If you spend the time to listen to them first it will make the transition easier and encourage support for future assignments.**

Take advantage of the trip home to think about the things that might have happened at home that the folks there would like to tell you about. And then share your experiences with them.
