INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: 2023 SRF Lightning Complex	2. Operational Period: Date From: 10/10/2023 Date To: 10/15/2023 Time From: 0700 Time To: 0700
--	---

3. Objective(s):

Management Objectives

- Prior to engagement, stop and discuss strategies and tactics to ensure sound risk management principles are in place to provide for firefighter and public safety.
- Implement fire suppression repair activities in accordance with Incident Resource Advisor and Cultural Specialists.
- Minimize impacts to communities, cultural resources, natural resources including critical power, communications and other infrastructure, private property inholdings, Tribal Lands, timberlands, T.E.S. species, and watersheds.
- Effectively manage costs by selecting and implementing strategies based on values at risk.
- Provide initial attack resources in coordination with the Six Rivers National Forest.

Control Objectives

- Maintain fires within their current perimeters.
- Stay in alignment with the suppression repair plan in conjunction with Agency Administrators.

General Situational Awareness:

Steep and rugged terrain, active area for fire history and drought stressed trees.

In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family, and to ensure all employees return home safely, make sure to practice social distancing.

Enhanced hygiene (especially handwashing), PPE & monitoring practices help limit the infection rate of first responders.

OUTPUTS

GENERAL:

Overall, fire behavior will be minimal. Heavy fuels like snags, logs, heavy duff, stumps, and roots will harbor heat until successive waves of precipitation occur and extinguish it. By Friday, several days after precipitation, fuels may be dry enough for heat holding over in heavy fuels to begin spreading again. However, alignment of wind and slope will be required for significant perimeter growth. There is a chance for another round of precipitation late in the week, which may preclude any additional fire spread.

Projected Fire Behavior (in unburned, available fuels, on 40% slope, burning uphill):

Fuel Type (40)	Max. Rate of Spread (ch/hr)	Max. Flame Length (ft)	Spotting Distance (mi)	Probability of Ignition (%)
Grass/Shrub (GS2)	0 - 18	0 - 4	Up to 0.3	Up to 29
Timber Understory (TU5)	0 - 8	0 - 7	Up to 0.3	Up to 29

SPECIFIC FIRE BEHAVIOR: Tuesday – Saturday, October 10th – 14th, 2023

Pearch: Anticipate minimal fire activity for several days. Expect some heat to hold over in heavy fuels in the upper portions of the *Monte Creek* drainage. Even without perimeter growth, heavy fuels may continue to burn out, which may cause debris to roll down steep slopes. Rollout of debris could continue to affect Hwy 96. By Friday, small-scale perimeter growth might occur in upper *Monte Creek*.

Mosquito: Anticipate minimal fire activity for several days. Expect some heat to hold over (smoldering in heavy fuels and possibly creeping in sheltered fuels) in the in the areas that showed activity most recently: on *Dillon Mountain*, near the 14N21 Rd, and in the *Lightning Ridge* area. By Friday, a small amount of perimeter growth may be possible in these areas. Expect primarily low-intensity, creeping fire behavior if surface spread initiates within the 5-day timeframe. An interior pocket of heat just north of the *East Fork of Bluff Creek* may also begin to spread within the forecast period.

All Other Fires: Expect minimal to no fire activity through the forecast period.

AIR OPERATIONS

Smoke is not expected to limit air operations in the next 5 days. However, low clouds or high winds may affect operations.

SAFETY

As fire activity winds down, do not let your guard down. Make sure your work area is assessed for fire-weakened trees and potential rolling hazards (such as rocks & logs) when doing repair work and patrolling.

Incident: <i>SRF LIGHTING COMPLEX</i>	Date: 10/10-15/23	Operational Period: ALL Shift

SAFETY MESSAGE

Fire fighter safety comes first on every fire, every time

Transition Day: Go Slow to Go Fast

Regardless of fire behavior or activities, transition is a likely time for things to slip through the cracks! Know who you are working for and establish good communication with them for accountability. If you don't know something, **ASK**. If you have helpful information pass it on. Remember that an obvious hazard to you may be unknown to others, unless **YOU** communicate it!!!

- There are new division supervisors, do you know who you are working for?
- Do you have an updated map?
- Do you know what command and tactical channels you are using?
- Do you know what to do in case of a medical emergency? (See the ICS 206)

Snags:

- There are dead and fire weakened trees throughout the burn area. Maintain strong situational awareness for snag issues in your work area at all times. Ensure a good size up of the area and only mop-up to the extent needed to secure the line. Look up, look down, and around.
- Perform a risk assessment before working in snags and evaluate the risk vs. benefit.

Suppression Repair:

- If you are working near heavy equipment, stay at least 100 feet in front and 50 feet behind all equipment. In timber, distances should be increased to 2.5 times the canopy height.
- Have good communication with operator.

Driving:

- Highways are narrow and winding with steep drop offs. Dirt roads are slick with the current rain. They are steep with soft shoulders. The rain has caused rolling rocks to come onto the roadbed

THE TAKEAWAY MESSAGES HERE ARE ...

Know who you are working for, how to communicate to them and always maintain accountability. Communicate your concerns upward.

Safety Officer: Rich Harnden SOFC

HUMAN RESOURCE MESSAGE

I've Learned....

I've learned....

That just one person saying to me, "You've made my day!"
MAKES MY DAY.

I've learned....

That no matter how serious your life requires you to be, everyone needs a friend to act
goofy with.

I've learned....

That it's those small daily happenings that make life so spectacular.

I've learned....

That under everyone's hard shell is someone who wants to be appreciated and loved.

I've learned....

That to ignore the facts does not change the facts.

I've learned....

That everyone you meet deserves to be greeted with a smile.

I've learned....

That one should keep their words both soft and tender, because tomorrow they may have
to eat them.

I've learned....

That a smile is an inexpensive way to improve your looks.

I've learned....

That I can't choose how I feel, but I can choose what I can do about it.

I've learned....

That it is best to give advice in only two circumstances; when it is requested and when it
is a life threatening situation.

Which rectangle is bigger?

I've learned...that when it comes to optical
illusions, the answer is always the simplest one.

They are the same size.

Keep up the good work!
