**WEATHER DISCUSSION:** Another round of precipitation is expected on Tuesday with showers off and on through much of the day. Light precipitation lingers into early Wednesday before ending. No precipitation is expected Thursday but the weather pattern will support additional precipitation over the weekend. Below normal temperatures are expected Wednesday with a return to near normal temperatures Thursday and Friday.

### **TUESDAY:**

**WEATHER:** Mostly cloudy with periods of rain.  
**MAX TEMP:** 44-65°      **MIN RH:** 65-80%  
**CHC WTG RAIN (>0.10"):** 100%  
**WINDS (20ft):** Valleys: SW 10-14 mph, gusts to 20 mph  
**MIXING HEIGHT:** 1,900'

**MIN TEMP:** 40-46°      **MAX RH:** 85-100%  
**EXPECTED PRECIP:** 0.50-1.50" – locally higher  
**Mid-Slopes and Ridges:** SW 17-21 mph, gusts to 30 mph  
**TRANSPORT WIND:** SW 23 mph

### **WEDNESDAY:**

**WEATHER:** Showers early becoming partly cloudy by afternoon.  
**MAX TEMP:** 44-68°      **MIN RH:** 45-65%  
**CHC WTG RAIN (>0.10"):** 30%  
**WINDS (20ft):** Valleys: Terrain then NW 8-12 mph, gust 15  
**MIXING HEIGHT:** 4,300'

### OUTPUTS

**GENERAL:**

Overall, fire behavior will be minimal. Heavy fuels like snags, logs, heavy duff, stumps, and roots will harbor heat until successive waves of precipitation occur and extinguish it. By Friday, several days after precipitation, fuels may be dry enough for heat holding over in heavy fuels to begin spreading again. However, alignment of wind and slope will be required for significant perimeter growth. There is a chance for another round of precipitation late in the week, which may preclude any additional fire spread.

**Projected Fire Behavior (in unburned, available fuels, on 40% slope, burning uphill):**

Fuel Type (40)	Max. Rate of Spread (ch/hr)	Max. Flame Length (ft)	Spotting Distance (mi)	Probability of Ignition (%)
Grass/Shrub (GS2)	0 - 18	0 - 4	Up to 0.3	Up to 29
Timber Understory (TU5)	0 - 8	0 - 7	Up to 0.3	Up to 29

**SPECIFIC FIRE BEHAVIOR: Tuesday – Saturday, October 10<sup>th</sup> – 14<sup>th</sup>, 2023**

**Pearch:** Anticipate minimal fire activity for several days. Expect some heat to hold over in heavy fuels in the upper portions of the Monte Creek drainage. Even without perimeter growth, heavy fuels may continue to burn out, which may cause debris to roll down steep slopes. Rollout of debris could continue to affect Hwy 96. By Friday, small-scale perimeter growth might occur in upper Monte Creek.

**Mosquito:** Anticipate minimal fire activity for several days. Expect some heat to hold over (smoldering in heavy fuels and possibly creeping in sheltered fuels) in the areas that showed activity most recently: on *Dillon Mountain*, near the 14N21 Rd, and in the *Lightning Ridge* area. By Friday, a small amount of perimeter growth may be possible in these areas. Expect primarily low-intensity, creeping fire behavior if surface spread initiates within the 5-day timeframe. An interior pocket of heat just north of the *East Fork of Bluff Creek* may also begin to spread within the forecast period.

**All Other Fires:** Expect minimal to no fire activity through the forecast period.

### AIR OPERATIONS

Smoke is not expected to limit air operations in the next 5 days. However, low clouds or high winds may affect operations.

### SAFETY

As fire activity winds down, do not let your guard down. Make sure your work area is assessed for fire-weakened trees and potential rolling hazards (such as rocks & logs) when doing repair work and patrolling.

# ***SAFETY MESSAGE***

*Fire fighter safety comes first on every fire, every time*

## **Transition Day: Go Slow to Go Fast**

Regardless of fire behavior or activities, transition is a likely time for things to slip through the cracks! Know who you are working for and establish good communication with them for accountability. If you don't know something, **ASK**. If you have helpful information pass it on. Remember that an obvious hazard to you may be unknown to others, unless YOU communicate it!!!

- There are new division supervisors, do you know who you are working for?
- Do you have an updated map?
- Do you know what command and tactical channels you are using?
- Do you know what to do in case of a medical emergency? (See the ICS 206)

## **Snags:**

- There are dead and fire weakened trees throughout the burn area. Maintain strong situational awareness for snag issues in your work area at all times. Ensure a good size up of the area and only mop-up to the extent needed to secure the line. Look up, look down, and around.
- Perform a risk assessment before working in snags and evaluate the risk vs. benefit.

## **Suppression Repair:**

- If you are working near heavy equipment, stay at least 100 feet in front and 50 feet behind all equipment. In timber, distances should be increased to 2.5 times the canopy height.
- Have good communication with operator.

## **Driving:**

- Highways are narrow and winding with steep drop offs. Dirt roads are slick with the current rain. They are steep with soft shoulders. The rain has caused rolling rocks to come onto the roadbed

## **THE TAKEAWAY MESSAGES HERE ARE ...**

*Know who you are working for, how to communicate to them and always maintain accountability. Communicate your concerns upward.*

Safety Officer: Rich Harnden SOFC

## HUMAN RESOURCE MESSAGE

I've Learned....

I've learned....

That just one person saying to me, "You've made my day!"  
MAKES MY DAY.

I've learned....

That no matter how serious your life requires you to be, everyone needs a friend to act  
goofy with.

I've learned....

That it's those small daily happenings that make life so spectacular.

I've learned....

That under everyone's hard shell is someone who wants to be appreciated and loved.

I've learned....

That to ignore the facts does not change the facts.

I've learned....

That everyone you meet deserves to be greeted with a smile.

I've learned....

That one should keep their words both soft and tender, because tomorrow they may have  
to eat them.

I've learned....

That a smile is an inexpensive way to improve your looks.

I've learned....

That I can't choose how I feel, but I can choose what I can do about it.

I've learned....

That it is best to give advice in only two circumstances; when it is requested and when it  
is a life threatening situation.

Which rectangle is bigger?

I've learned...that when it comes to optical  
illusions, the answer is always the simplest one.

They are the same size.

Human Resource Specialist:  
Karen Hartman

Keep up the good work!

## ***2023 SRF Lightning Complex***

**The Training Specialist is working remotely. Training Specialist contact information for the 2023 SRF Lightning Complex:**

- Robert Rivelle
- Important: If any Trainee or Trainer has any questions or concerns, call/text: 707.498.1761 “anytime”.
- Email: robert\_rivelle@nps.gov

### **How to register as a Trainee:**

1. Use the QR code below or on the front of the IAP to register. If you're unable to register using the QR code, please call 707.498.1761.
2. Once registered, you will receive text and email updates.

### **How to close-out your training assignment:**

1. **Trainer and Trainee:** Have a conversation, open dialog between both.
2. **Trainer:** Complete an Evaluation Record in the back of the Position Task Book and make as many entries as possible within the individual tasks. Discuss this with your Trainee.
3. **Trainer:** Complete an individual performance rating (ICS 225) and go over the performance rating with your Trainee.
4. **Trainee:** Text a photo or email your individual performance rating (ICS 225) to the Training Specialist.
5. **Trainee:** Complete the Trainee exit questions at the QR code below.
6. **Trainee:** Once 1-4 are completed, the Trainee and the Training Specialist will have a brief conversation to discuss the Task Book and assignment with the Trainee.
7. **Done**, except for safe travels home!
