**FIRE BEHAVIOR**

**GENERAL:**

- Potential today for increased fire activity and smoke in the air due to gusty winds in the morning that will overlap this afternoon with favorable fire environment (▲temperature, ▼humidity, ▼fuel moistures) conditions that are associated with fire activity.
- Monitor afternoon winds in your area. Gusty winds impacting creeping or smoldering fire activity can transform to active fire spread and intensity. Watch how wind is affected by topography, position on the landscape and fuels in your work area. Think about how fire will spread, and potential flame-lengths may occur under varying conditions. Wind is a primary driver of fire growth and behavior; it is important to understand what kind of fire behavior to expect as conditions change.

**SPECIFIC:**

**Branch X:** Minimal fire activity throughout fire area. Monitor for fire/heat creeping through duff near control features, and the effect of winds in the afternoon on known pockets of heat or potential threats to the line. Keep an eye out for heat holdovers in stump holes or standing trees. Where heat can be smolder for a longtime without showing much smoke.

**Branch XX:** Minimal fire activity throughout fire area, except for active area in SE end of Lightning ridge. Expect some increased activity in this area due to higher temps/winds and lower humidities and fuel moistures. Monitor areas on division that are holding heat where fuels such as duff, heavy dead/down woody material, stumps and in trees such as timbered areas. Duff creep near holding features like rock outcrops are known for providing a wick or stringer of duff that tracks along the edge of the rock.

**AIR OPERATIONS:**

Little if any impacts to air operations from smoke. Mostly cloudy early becoming partly cloudy by afternoon. Sunrise: 7:14am, Sunset: 6:51pm, Daylength: 11 hours, 37 minutes, 29 seconds (-2:41min)

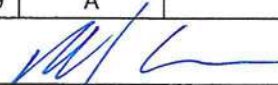

**SAFETY:**

As you work the fire's edge remember that fire weakened trees pose a significant risk to firefighters. These trees are prone to fall in increased winds.

# SAFETY MESSAGE

*Firefighter safety comes first on every fire, every time*

## Major Hazards and Risks:

- **Environmental Hazards** – Be watchful for bears, rattlesnakes, bees, and other insects that bite or sting. Don't leave food out, haul out your trash daily. Look before you step or place hands on the ground. Identify who on your crew is allergic to bees and ensure medication is available.
- **Driving** – Defensive Driving techniques. Drive at posted or slower speed limits as conditions warrant. Be prepared for sudden, unexpected stops and expect the unexpected. Night driving best to use low beams in smoke and or dust. With narrow roads pull to the right to let vehicles pass and use parking lights or daylighters.

## Work Assignments

- If you are working near heavy equipment, stay at least 100 feet in front and 50 feet behind. In timber, distances should be increased to 2 1/2 times the canopy height.
- Never approach equipment until you have eye contact with the operator.
- Know the capability of your crew! Work within those limits.
- Read the medical plan. It works well if needed.
- Always treat power lines as energized; communicate and isolate by flagging off those down powerline hazards.

## Poison Oak

- Beware of Poison Oak:

**Poison Oak**

Three leaflets that look like oak leaves  
Dark green leaf to red  
Grow as vine or shrub  
Each leaf 1 to 4 inches long

# HUMAN RESOURCE MESSAGE

## What ZONE are you in?

When you hear people talking about someone being “zoned out” what do you think of? The Twilight Zone? Mindless zombies wandering around????

On the fire there are 3 zones:

### The Zero Tolerance Zone

- No drug/alcohol misuse
- No discrimination'
- No sexual harassment
- No fighting

### The Inappropriate Behavior Zone

- Put down humor/sarcasm
- Arguing and quick temper
- Discussing inappropriate subjects
- Horse play

### The HR Safe Zone

- Mutual respect
- Clear communication
- Proper conduct
- Good performance

Congratulations! I am happy to say that this camp is in the HR Safe Zone. The success of this incident rests on each of you staying within the zone. You are doing your part by maintaining your self-respect with self-control.

 <p><b>CAUTION!</b></p> <p><b>ZOMBIES MAY BE FLAMMABLE</b></p>	<p>Watch out for zombies today and every day.</p> <p>Human Resource Specialist Karen Hartman 801-368-3493</p>
