FIRE WEATHER FORECAST #22

NAME OF FIRE: MEU Lightning
UNIT: All Units
DATE AND TIME
FORECAST ISSUED: 14 July 2008 1800 PDT

PREDICTION FOR: Day and Night shift
SHIFT DATE: 15 July Tuesday
SIGNED: Jeff Tonkin IMET

MEU Complex WEATHER DISCUSSION: Upper trough over the north coast of California has brought another marine push from the coast...with excellent rh recovery over all areas except for the NE portion of branch 1-2. Although the fog and stratus will burn off today slightly cooler temperatures and higher rh's are expected for the western zones. Cumulus development is expected again along the eastern mountains along with a slight chance of thunderstorms. However with westerly winds aloft any thunderstorm development will remain east of the fire area.

| | |
|--|---|
| <p>Branch 1-2, 3 Today (Tue) <u>Covelo, Yellow, Big & Miller Areas</u> <u>Sky / Weather:</u> Sunny, afternoon cumulus buildup to the east, slight chance of t-storms. <u>Max Temps:</u> 90 to 98 <u>Min RH:</u> 17 to 22 <u>Wind</u> <u>Slope Valley:</u> West or Upslope 4 to 8 G13 <u>Ridge:</u> West or Southwest 4 to 8 G 13 afternoon</p> | <p>Tonight (Tue Night) <u>Covelo, Yellow, Big & Miller Areas</u> <u>Sky / Weather:</u> Clear <u>Min Temps:</u> 58 - 64 <u>Max RH:</u> 58 - 66...near 80% in drainages. <u>Wind</u> <u>Slope Valley:</u> East or Downslope 1- 3 mph. <u>Ridge:</u> West 2 to 4 mph.</p> |
| <p>Branch 4: Interior, 5 & 6 Today (Tue) <u>Lost Pipe and Sugarloaf Areas</u> <u>Sky / Weather:</u> Fog / Low clouds early, Sun by 1100. <u>Max Temps:</u> 76 to 82 <u>Min RH:</u> 38 to 43%...23% Br. 4 interior <u>Wind</u> <u>Slope Valley:</u> W or upslope 5 to 10 G 15 afternoon <u>Ridges:</u> West or Southwest 4 to 8 G 13 afternoon</p> | <p>Tonight (Tue Night) <u>Lost Pipe and Sugarloaf Areas</u> <u>Sky/Weather:</u> Low clouds fog. <u>Min Temps:</u> 64-72...55-60 Drainage <u>Max RH:</u> 68-74%...near 100% Drainage. <u>Wind</u> <u>Slope Valley:</u> East or Downslope 1-3 mph. <u>Ridges:</u> West 2 to 4 mph.</p> |
| <p>Branch 6: <u>Hardy Area</u> Today (Tue) <u>Sky / Weather:</u> / Low clouds early, Sun by 1100. <u>Max Temps:</u> 66 - 73 <u>Min RH:</u> 55-65% <u>Wind</u> <u>Slope Valley:</u> West 4 to 8 mph...gust 15 afternoon <u>Ridges:</u> SouthWest 4 to 8 mph...gust 15 afternoon.</p> | <p><u>Hardy Area</u> Tonight (Tue Night) <u>Sky/Weather...</u> fog and low clouds overnight. <u>Min Temps:</u> 53 to 58. <u>Max RH:</u> 75-85%...100% in drainage. <u>Wind</u> <u>Slope Valley:</u> variable 1-2 mph. <u>Ridges:</u> west 2 to 4 mph.</p> |

OUTLOOK FOR WEDNESDAY: Little change in terms of temperature and relative humidity. Ridgetop winds West 4-8 mph with gusts to 15 mph in the afternoon. Slope/Valley winds: West or Upslope 3-5 mph with gusts to 10 mph. Maximum temperatures 75-83 coast and 90-97 inland. Minimum humidity 39-44% coast fires and 17-23% inland.

EXTENDED OUTLOOK FOR THURSDAY AND FRIDAY: Sunny. Max temps 75 to 80 coast...90-95 inland. Min humidity 39-44% coast and 18-25% inland. West 4 to 8 mph...afternoon gusts 12 to 17 mph.

FIRE BEHAVIOR FORECAST NO. 20

NAME OF FIRE: MEU Lightning Complex CA-MEU-4608 PREDICTION FOR: Day/Night Shift
AGENCIES: CALFIRE, MEU FDs, SO, OES SHIFT DATE: 07/15/08 (Tuesday)
TIME AND DATE ISSUED: 07/14/08 1900 Hours SIGNED: William Baxter, FBAN
Jean Walters, FBAN trainee

WEATHER SUMMARY: Drainage smoke and coastal low cloud in the morning with clearing by 1100hrs

Coast: Day 82°F, 40% RH, Ridge winds West 3-7 Gusts 14, Slopes – upslope 2-5 mph;

Night – 52-59°F, 80% RH, Ridge Winds West 2-4, down slope 1-3 MPH.

East of 101: Day - 95°F, 20% RH, Ridge winds West, becoming NW 3-6 Gusts 12; Upslope/canyon 3-6 MPH.

Night – 56-63°F, 60% RH, Winds: Ridges West 1-2 Valleys down slope 1-3 MPH.

See detailed weather forecast issued 7/14/08 at 1900 hours.

FIRE BEHAVIOR GENERAL: Little change in weather is expected for Tuesday, July 15th. A firing operation occurred in Sugarloaf with some short range spotting occurring on the opposite side of a saddle. A backing fire with 2ft flame lengths (some jackpots with greater flame lengths) burning primarily in the 10hr and 100hr fuels was observed. Torching and significant spotting is not expected in any fires along the coast because RH thresholds will not be met. Deep seated timber fires will be difficult to mop up due to the extremely dry large dead fuels. Firing operations could be advantageous during the day due to light winds and RH's greater than 30%, however night firing operations will be problematic due to excellent overnight RH recoveries. New fires east of the 101 will have a moderate potential for spotting (POI 67%) and will be primarily fuels and topography driven. The potential for rollout is high due to steep slopes. The burning period will be 1200 to 2000hrs. Southwest aspects could be the most problematic in the afternoon. The potential for uphill runs will remain high where fuel continuity exists, especially where winds and topography align. Expect fires to run, torch and spot if eye level winds penetrate below canopy level with sustained wind speeds greater than 7 MPH.

Fire Behavior - Optimal Alignment

| Fuel Type | ROS (ft./min) Fwd. | ROS Flank | ROS Back | FL (ft.) | Spotting (ft.) | PI |
|---------------------|--------------------|-----------|-------------|----------|----------------|----|
| Coast Timber FM 10 | 3-5 | 2 | 1 -rollout | 1 - 4 | 590 | 40 |
| Interior Timber/Oak | 1-2 | 1 | 1 - rollout | 1 - 2 | 675 | 67 |
| Brush FM 5 | 18-22 | 5 | 2 | 2 - 6 | 675 | 67 |

SPECIFIC:

Coastal (Sugarloaf, Hardy & Lost Pipe) – Jackpot fuels will continue to burn out on Sugarloaf, and little change in Hardy or Lost Pipe. Expect excellent RH recovery at night.

East side of the county – No significant activity is expected within any existing fires due to successful suppression operations.

AVIATION OPERATIONS: Coastal low fog will dissipate around 1100hrs and clearing skies will prevail for the remainder of the day.

SAFETY: Potential for falling snags and rolling debris will have the highest probability in the recently burned out area on Sugarloaf. Footing may prove difficult when working some of the steep slopes in slash fuel types. Fuels remain extremely dry. LCES. Have a safe day.

| SAFETY MESSAGE | INCIDENT NAME MEU LIGHTNING | 2. DATE PREPARED 7/14/2008 | 3. TIME PREPARED 1630 | 4. OPERATIONAL PERIOD 07/15/2008 |
|-----------------------|---------------------------------------|-------------------------------|--------------------------|-------------------------------------|

The Incident is seeing more and more poison oak cases presenting at our Medical Units. Firefighters should report these cases to their supervisors, and seek medical evaluation and treatment at the Base Medical Units.

Do not postpone evaluation & treatment!

Poison Oak and Urushiol

All parts of poison oak plants, including roots, stalks, stems, leaves, berries and flowers contain the poisonous, oily substance *urushiol*. This toxin can be contracted from the plant and its parts at any time during the year and can cause painful irritation and blistering of the skin. Reactions to the poison oak oils vary from extreme in some individuals to very minor in others.

To cause poison oak rash, the oil must contact the skin, either directly by touching the plant, or indirectly by touching contaminated objects like pets, tools, gloves, firewood or clothing. Individuals can also be exposed to the *urushiol* oils through the burning of the poison oak plants. The burning of the plants emits particles that carry the oil into the air. Coming in contact with the smoke can cause severe cases of poisoning. The rash is transmitted only through the poisonous plant oils themselves. Broken or oozing blisters will not spread the poison oak *urushiol* oils because their content is exclusively body fluids.

Poison Oak Treatment

There is no cure for the rash of poison oak once it begins, although there are many ways to relieve the symptoms. The removal of the poisonous plant oils from the skin via thorough washing and drying is the first and most important step of any treatment regimen. These oils will also need to be washed from PPE, personal clothing, and tools. Mild symptoms of poison oak, including red bumps, blisters and itching, can be treated with over-the-counter anti-itch treatments that contain zinc acetate, zinc oxide, or hydrocortisone. These are available on the incident. Visit the Medical Unit at your respective bases to get some.

SAFETY IS EVERYONE'S JOB, MAKE IT YOUR PRIORITY!

**Mendocino Lightning Complex
MEU CA 004608**

**Criteria for “Controlled”
status on fires**

- **Small Fires** - (100% observed) –
 - No smokes for 72 hours

- **Large Fires** –
 - Mopped up in 2 ½ X fuel size
 - MINIMUM 300 feet
 - No smokes for 72 hours in mopped up areas

**48 hours after a fire has met the above
criteria – It will be inspected one last time,
prior to being declared “Controlled”**

AIR OPERATIONS SUMMARY

PREPARED BY: Chris Avina

PREPARED DATE/TIME: 07/14/08 1700

1. INCIDENT NAME: MEU Lightning Complex
 2. OPERATIONAL PERIOD DATE: 07/15/08 START TIME: 0800 END TIME: 2011 SUNRISE: 0554 SUNSET: 2041

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment,, etc.):
 Helibase is Brook Trails Airport (BRK) Lat: 39 27.139 Long: 123 22.420 com 122.8
 Howard Forest Helitack Base Lat: 39 20.747 Long: 123 19.002
 Safety: Heavy Smoke and 3 TFR's in place. On a new fire be sure to get a Lat and Long and pass it on to Air Ops. and the Branch that the fire is in. Air to ground is not a Tac FREQ have the copter come up on your Tac after you make contact.

4. MEDEVAC A/C:
 Go through your Branch and notify Air Ops.

5. TFR: Three TFR's in place.
 NOTAM Numbers:
 FDC 8/4957
 FDC 8/4958
 FDC 8/4959
 FDC 07/035
 All TFR's posted at te Helibase

Incident Location Mendocino County
 County Mendocino State Ca Latitude N Longitude W

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

IMPORTANT

SUPPLY UNIT DEMOB PROCEDURES

Before demobilization through the **Ukiah Base**, you **MUST RETURN SUPPLIES** to the Supply Unit that issued the supplies (Covelo, Laytonville, Fort Bragg, or Boonville)

Once the supplies have been returned to the proper Supply Unit, get a General Message form from that Supply Unit indicating that the supplies have been returned.

Bring that General Message form to Ukiah Base Supply Unit as part of the demob check-out process.

Your demob will be delayed if you do not return supplies to the proper location.

DEMOBILIZATION PLAN – summarized
MEU Lightning Complex CAMEU 004608

I. RELEASE PRIORITIES

The following Release Priorities have been established by the Incident Commander.

1. Out of State resources
2. Local Government
3. OES
4. Federal Agencies
5. Military
6. Private equipment and personnel
7. Out-of-Region CAL FIRE resources
8. Within Region CAL FIRE resources
9. Home Unit CAL FIRE

II. GENERAL GUIDELINES

- A. NO RESOURCES WILL LEAVE UNTIL AUTHORIZED BY THE DEMOB UNIT.**
- B. Efforts will be made to ensure that all released personnel arrive home by 2200 hours.
- C. All vehicles shall have an Asbestos mitigating treatment, Sudden Oak Death (SOD) wash treatment and a Mechanical Safety Inspection.
- D. Prior to leaving the Incident the Demob Unit will brief all Supervisors and Strike Team Leaders.
- E. Notification to incident personnel will be by posting "Tentative Demob" list in advance.
- F. Actual departure times and ETA at destination will be relayed to Expanded Dispatch at time of departure.
- G. A Personal Protective Equipment (PPE) self-sign off (On the ICS-221) must be completed by all CAL FIRE personnel. Crew Leaders, Strike Team and Task Force Leaders may sign for subordinates under their command. All incident personnel must be accounted for as having serviceable, agency compliant PPE. Defective items may be exchanged in supply.
- H. All Trainees will see the Training Tech Specialist prior to departure.
- I. Maximum driving duration for federal resources will not exceed 10 hours/person/day.

III. RELEASE PROCEDURES

DMOB will post the date and time when Surplus resources can commence the Demob process and report to the Demob Unit.

The Crew Leader or individual will take the Demobilization Check-out form to:

COML (to confirm that radio and/or cell phone equipment is returned)

SUPL (to confirm all non-expendable property is returned)

GSUL (for Asbestos treatment, SOD wash treatment, and Mechanical Safety Inspection.)

Finance/Time (to confirm all finance and time documents are complete)

DOCL (to hand in unit logs and performance ratings)

DMOB will be the **last stop** in the release process and:

- Sign-off, note date and time on the ICS-221
- Confirm PPE self check off on ICS-221
- Note any revisions to the ETD or ETA
- Collect the ICS-221

Resource is **released** and free to leave the incident

Archaeological and Historical Sites:

Fireline Guidance for the MEU LIGHTNING COMPLEX

Do not compromise safety for the protection and preservation of archaeological and historical sites. When possible and prudent:

1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include temporary camps containing scatters of obsidian and/or other projectile points/arrowheads as well as flakes [scatters of obsidian flakes often look like broken glass] and village sites containing dark brown-black soils (midden), artifact scatters and/or scatters of brown ceramic fragments and flat rock outcrops with polished milling surfaces, mortars and/or ovals. These typically occur on flats near sources of water, along ridgetops and saddles, and other such places suitable for camping. Historic sites in much of the complex include rock walls, mining remains (e.g., shafts, adits and tailings piles), old wooden buildings, structures, old logging equipment, trash dumps with old cans and bottles as well as scatters of old cans, bottles and other refuse.
2. Some of the known sites are marked with red flagging. Many other sites have not yet been flagged. If you observe artifacts, features, or sites, avoid dozing or driving through and/or parking on these sites, when possible, especially with heavy equipment.
3. If you can't avoid them, attempt to minimize disturbance as much as possible, only clearing the surface to as minimal a depth and width as necessary.
4. Leave all artifacts in place. Some artifacts may have been intentionally placed by Native Americans in the distant and/or recent past for religious or ceremonial reasons.
5. If new sites are discovered, flag them for visibility and report the location to the Division Supervisor. If possible, note locations of discovered resources on a map. Better yet, take a GPS reading. Leave information with the Plans Unit so that the sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
6. If you encounter a burial or other human remains, cease work in that area immediately and contact CAL FIRE Archaeologist Chuck Whatford at (707) 529-2989 (cell phone). State law requires that CAL FIRE then contact the County Coroner, who will then determine if the remains are part of a crime scene. If the Coroner determines that the remains are Native American, State law requires the Coroner to contact the Native American Heritage Commission in Sacramento.

CAMP RULES

MEU LIGHTNING COMPLEX

OVERHEAD – ENGINE CO's – CREW SUPERVISORS **BRIEF YOUR CREWS**

The citizens of California and CAL FIRE Incident Command Team 4 truly appreciate your hard work on this incident. The purpose of the Incident Base/Camp is to provide service and support for the fire, rest and relaxation for personnel, and potential reassignment to different incidents.

The incident has had more than 2,000 firefighters at the various facilities while in operation. As you know, with any large operation such as this cooperation and understanding from all individuals assists everyone in their endeavors. Please observe common courtesy at all times.

So that you may have a clear understanding of the Command Team's expectations, we have provided the following rules and guidelines which need to be followed.

Prohibited Activities with ZERO TOLERANCE:

1. Possession or use of DRUGS or ALCOHOL is NOT PERMITTED on Base/Camp or on the incident.
2. Returning to the Incident Base/Camp or Incident UNDER THE INFLUENCE OF DRUGS or ALCOHOL is NOT PERMITTED. The entire crew/engine will be released, even if only one crew member is involved.
3. Packages may be searched upon entering the Base.
4. NO WEAPONS allowed in Incident Base/Camp, Except Law Enforcement Personnel in the ICP Area.
5. NO SEXUAL activity.
6. NO SMOKING in buildings, food line or around entry areas of Sections/Units.
7. NO HORSEPLAY or FIGHTING.
8. NO GAMBLING.
9. NO LOUD MUSIC.
10. NO VULGAR LANGUAGE.
11. NO DAMAGE to Fairgrounds buildings, facilities or off-site accommodations.

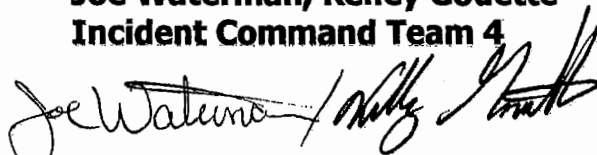

Limit group sizes if traveling off Base/Camp.

INCIDENT BASE/CAMP WEAR Policy (7070.7.1)

CAL FIRE personnel should remember that while off-shift, they remain on duty. Therefore, only authorized uniform clothing or safety clothing is to be worn while outside sleeping areas. It is the responsibility of company officers and their supervisors to ensure that personnel are properly attired at all times.

Thank you for your cooperation,
Joe Waterman, Kelley Gouette
Incident Command Team 4

OIL CHANGES AT HOWARD FOREST!

The Repair Section of Ground Support is equipped to provide oil and filter changes for our Mobile Equipment assigned to the Lightning Complex

To make an appointment for this service, please call the Howard Forest Shop at (707) 459-7431

When you call, please provide the following:

**Vehicle 'X' Number
License Number
Radio Identifier
Filter Numbers**

EMERGENCY WATERSHED PROTECTION GUIDELINES FOR GENERAL FIRELINE SUPPRESSION REPAIR

Dozer Lines

1. Install waterbars; spacing not to exceed 100 feet on any dozer line. All areas should be considered to have high erosion potential.

Guideline for spacing of waterbars and rolling dips:

| Road or Fire Line Gradient | Spacing |
|----------------------------|----------|
| 30% or Less | 100 feet |
| 30% to 50% | 75 feet |
| 50% or Greater | 50 feet |

2. Waterbars should be deep enough to significantly reduce the chance of being damaged and should be constructed at an angle of approximately 45 degrees to the fire line.
3. Where dozer lines cannot be drained by installation of waterbars (due to steepness or dozer lines within swales), the equipment operator will tractor pack a sufficient amount of woody vegetation into the surface to prevent erosion.
4. For dozer lines located along long ridgelines, alternate the direction of the waterbars (in a herring bone configuration), if the situation dictates.
5. Waterbars should be located to discharge into natural vegetation where possible; where waterbars are within 75 feet of a watercourse, install sufficient size rocks, other durable organic material and/or pack outlets with slash.
6. Remove berms created during dozer line construction.
7. Scatter organic debris over dozer line surface near areas where dozer lines intersect roads.
8. Reshape cross-slope control lines to as natural a contour as possible and remove lower berm.
9. Break apart dozer piles and spread out along dozer line.

Handlines

1. Install waterbars at the following spacing:

| Fire Line Gradient | Spacing |
|--------------------|----------|
| 30% or Less | 100 feet |
| 30% to 50% | 75 feet |
| 50% or Greater | 50 feet |

2. Fill in all under-slung trenches along cross slopes using material from the lower berm. Remove berms to allow flow of water across outsloped fireline.
3. Lop and scatter slash along the fire line near road intersections and within 75 feet from a watercourse.
4. Where handlines cannot be drained by installation of waterbars (due to steepness or handlines within swales), scatter slash along that portion of the handline to prevent erosion.

Watercourse Crossings

1. Remove all displaced soil and debris from the stream channel.
2. The excavated channel should be wider than the natural channel.
3. Slope back the approaches to prevent future stream bank failure.
4. As needed, scatter sufficient quantities of slash to stabilize exposed soil down to the edge of the active channel.
5. Clean out culvert inlets and outlets as needed.

General Cleanup

1. Collect all fire suppression-generated trash such as plastic water bottles, cardboard, plastic flagging, foodstuffs, wrappers, blown hose and plastic bags and pack it out.

INSTRUCTIONS FOR COMPLETION OF ICS-230 CONTRACTOR/VENDOR PERFORMANCE EVALUATION

This form is to be completed at least once for each contractor/vendor, per incident. Specific agencies may require the form to be completed more frequently as needed to meet agency specific needs.

1. Enter the incident name.
2. Enter the incident order number.
3. Enter the request number.
4. Enter the incident start and end dates.
5. Enter the shift to be covered by the evaluation (if appropriate).
6. Enter the operator(s) name(s).
7. Enter the assignment(s) or location(s) addressed by this evaluation.
8. Enter the name of the contractor/vendor.
9. Enter address of contractor/vendor.
10. Enter phone/contact number of contractor/vendor.
11. Check the type of use made of the contractor/vendor by the incident.
12. Enter the contractor/vendor agreement number.
13. Enter a brief description of the goods/services the contractor/vendor is providing.
14. Complete by checking the YES or NO box for items 1 through 7.
15. Enter a specific expectation of the contractor/vendor not previously mentioned, in item number 8 and check YES or NO.
16. Enter any comments you feel are appropriate or relevant to the contractor/vendor(s) performance. It is MANDATORY to explain any rating of "Poor" or "No Reuse". If an entry of "Poor" or "No Reuse" is recommended, the signature of the Logistics Section Chief MUST be included along with his or her comment in this block, also.
17. Enter contractor/vendor representative name and title.
18. Enter government representative name and position.
19. Signature block for contractor/vendor representative.
20. Enter date contractor/vendor representative signed the evaluation.
21. Signature block for government representative.
22. Enter date government representative signed the evaluation.
