Stratified Cost Index Results

Stratified Cost Index by Percentage

| Acres Burned | 25% | 50% | 75% | 90% |
|--------------|--------------|----------------|----------------|----------------|
| 4099 | \$343 | \$1,317 | \$5,052 | \$9,011 |
| 23000 | \$178 | \$682 | \$2,617 | \$4,668 |
| 24500 | \$174 | \$666 | \$2,555 | \$4,557 |
| 35200 | \$151 | \$580 | \$2,225 | \$3,969 |

25 percent of historical fires with similar characteristics had a cost per acre less than the value displayed in the 25% column of the table. Likewise, 50, 75, and 90 percent of fires with similar characteristics had a cost per acre less than the values displayed in their respective columns.
