

# Wildland Fire Decision Support System (WFDSS) July 2008 - Fires Currently Supported - ONCC / OSCC Fire Spread Probability (FSPro) Analysis as of 07/14/2008 @1700

**About WFDSS FSPro**

*This map displays FSPro modeling efforts to date. It is for display purposes only. Be cautious in interpretation as analyses were done on different dates for different time periods. Most analyses are 7 or 14 day projections.*

[http://wfdss.nwcg.gov/wfdss/WFDSS\\_Home.html](http://wfdss.nwcg.gov/wfdss/WFDSS_Home.html)

*FSPro outputs represent the probability of fire spread over time assuming no suppression. These are not maps of actual fire progression. The WFDSS Prototype will be fully deployed in 2009.*

- WFDSS FSPro Probability Bands**
- 80-100%
  - 60-79%
  - 40-59%
  - 20-39%
  - 5-19%
  - 0.2 - 4.9%
  - <0.2%
  - FSPro Burn Perimeter as Mask

**Other Incidents Currently Being Monitored**

- MEU Lightning Complex
- SQF Piute
- LPF Gap
- LPF Indians
