

San Mateo/Santa Cruz Unit

October 26, 2009

**“Loma”
Incident**

CACZU-009867

IAP

Incident Action Plan

Operational Period:

10/26/09 (08:00) – 10/27/06 (08:00)

Incident Objectives	1. Incident Name	2. Date Prepared	3. Time Prepared
	Loma - CZU 9867	10/26/09	0000 hrs
4. Operational Period (Date and Time) 10/26/09 - 24 hours (08:00 to 08:00)			
5. General Control Objectives for the Incident (include Alternatives)			
a. Provide for Firefighter/Responder and Public Safety			
b. Support evacuations in affected areas			
c. Keep costs commensurate with values at risk			
6. Objectives for this Operational Period			
Control Objectives			
a. Keep fire East of Highland Way			
b. Keep fire West of Summit Rd.			
c. Keep fire North of Maymans Flat Road			
d. Keep fire South of Mt. Bache Road			
7. Weather Forecast for Operational Period			
See Weather Forecast attached			
Monitor local and national weather forecast broadcasts			
8. General Safety Message			
Safety message attached			
9. Attachments (Mark if attached)

Fire Weather Forecast

FORECAST NO: 1

NAME OF FIRE: Loma

PREDICTION FOR: 1900 Sun-0700 Tue

UNIT: CA-CZU

SHIFT DATE: October 26th 2009

SIGNED: 

TIME AND DATE

Matt Mehle

FORECAST ISSUED: Sunday 10/25/09 @ 1900

Incident Meteorologist

*****STRONG NORTHWEST WINDS LATE MONDAY NIGHT THROUGH WEDNESDAY MORNING*****

WEATHER DISCUSSION: High pressure will keep mild and dry conditions over the fire through Monday. In addition... northerly winds will prevail with breezy conditions over the ridgetops. High pressure will gradually weaken Monday as a trough of low pressure swings through northern California Monday into Tuesday. Northerly winds will increase significantly with this trough passage beginning Monday evening. Winds will be strongest Tuesday through early Wednesday with gusts up to 50 mph.

WEATHER FORECAST:

SUNDAY NIGHT:

WEATHER: Mostly clear with a few high clouds.

MIN TEMPERATURES: 56-62

24 HOUR CHANGE: little

MAX HUMIDITY: 60-75%.

24 HOUR CHANGE: 5% drier

20 FT WINDS:

RIDGETOP – North to northeast winds 6-12 mph. Gusts up to 20 mph.

SLOPE/VALLEY – North/downslope 3-8 mph with an occasional gust up to 15 mph.

STABILITY/INVERSION: None.

MONDAY FORECAST:

WEATHER: Mostly sunny with a few high clouds early with increasing clouds late.

MAX TEMPERATURES: 67-74.

MIN HUMIDITY: 35-50%

20 FT WINDS:

RIDGETOP –Northeast to north 6-12 mph with gusts up to 17 mph becoming north to northwest 10-20 mph by afternoon. Gusts up to 25 mph late afternoon.

SLOPE/VALLEY – downslope/downvalley winds less than 5 mph in the morning becoming northwest/upslope 4-8 mph with gusts to 12 mph in the afternoon.

MONDAY NIGHT:

Partly cloudy and breezy. Lows in the upper 40s to mid 50s. Max RH 85-100%. Winds northwest 10-20 mph with gusts to 25 mph increasing to 15 to 25 mph with gusts 40 mph by morning.

OUTLOOK FOR TUESDAY:

Partly cloudy and windy. Highs in the 60s. Min RH 25-40%. Winds northwest 15-30 mph with gusts 40-50 mph.

FIRE BEHAVIOR FORECAST NO. 1

NAME OF FIRE: Loma Incident PREDICTION FOR: Day/Night Shift
AGENCIES: CALFIRE, SO SHIFT DATE: 10/26/2009 (Monday)
TIME AND DATE SIGNED: H. Scanlon, FBAN
FORECAST ISSUED: 10/25/09 2300 Hours

WEATHER SUMMARY: Mostly sunny with increasing clouds later, high temps in the low 70s °F, minimum RHs 35%, and winds on the ridge tops northerly 6-12 gusts to 17 in the morning, changing to northwest 10-20 gusts to 25 in the late afternoon. Evening conditions will cool to the upper 40s°F and RHs 85 to 100%. Strong northwest winds on the fire area by Tuesday morning. See fire weather forecast issued 10/25/09 at 1900 hours.

FIRE BEHAVIOR GENERAL:

The topography is very complex, steep, and rugged. Fuels are primarily brush, timber and areas influenced by the Summit Fire. Dead fuels are receptive to burning, live fuels carry fire readily. Moisture from the heavy rains of two weeks ago has largely dissipated. Winds have been driving fire movement. Peak burning conditions will start around 1200 and continue through 1700 hrs.

Fire Behavior – Optimal Alignment

Fuel Type	ROS (ft./min) Fwd.	ROS Flank	ROS Back	FL (ft.)	Spotting (mi.)	pI
Brush (5)	40-60	5-9	1-3	2 - 9	0.3	55
Timber (8)	11	2	.5	1 - 6	0.25	35

SPECIFIC:

DIV A: Winds are favorable for holding and mop-up during the day. Strong northwest winds expected by Tuesday morning

DIV B: Area is adjacent to the Summit fire of 2008. Fuels in Summit fire will be resistant to burning, but some areas may still carry fire, should it establish. Spotting may be a problem in Div B, especially as winds pick up overnight. High humidity is expected and should mitigate the spot fire risk.

DIV X: The lower slope will have some wind sheltering. However, spotting potential from torching trees in the interior may initiate fire across Soquel Creek, where slope and winds are in alignment. Spot fire potential remains low.

DIV Z: Good opportunity for line improvement and effective mop-up. Watch areas where winds may push embers across control lines

AVIATION OPERATIONS: Light smoke in the morning should not produce adverse flight conditions. Gusty afternoon winds may reduce bucket drop effectiveness.

SAFETY: Winds will be picking up, creating a hazard from falling trees and snags. It may also transport embers downwind farther than you can easily see. While spot fire probabilities are low, the winds can get some fuel jackpots cooking in poorly accessed areas.

Sunrise: 0725 Sunset: 1815

INCIDENT RISK ANALYSIS - WILDLAND FIRES

DIVISION	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	DRIVING HAZARDS	Drive defensively! Headlights on. Be alert for other drivers, civilians, & wildlife. Poor access and narrow, one-way roads. Follow the traffic plan
ALL	COMMUNICATIONS	Know the communications plan.
ALL	POISON OAK WEATHER	Avoid poison oak, wash as frequently as possible. Change clothing if possible. Review identification of poison oak. Access to weather & fire behavior forecasts? Monitor current weather conditions and forecasts.
ALL	SNAG HAZARDS (Includes Utility Poles)	3 Stripes flagging guidelines Follow Hazard Tree Safety Guidelines (IRPG p. 80). Fallers must be qualified & have the right tools.
B,X,Z	DOWNHILL FIRE LINE UNDER SLUNG FIRE LINE	Conduct thorough briefing for all personnel. Establish adequate safety zones (IRPG p.7). Use Downhill Line Checklist (IRPG p. 8). Watch for rolling material. Are you on midslope?
ALL	HYGIENE	Wash hands after using restroom Use hand sanitizer if no hand washing available

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.
